#	ARTICLE	IF	CITATIONS
1	Quantifying Severity of Preschool-Aged Children's Internalizing Behaviors: A Daily Diary Analysis. <i>Assessment</i> , 2023, 30, 190-209.	1.9	5
2	The development of depressogenic self-schemas: Associations with children's regional grey matter volume in ventrolateral prefrontal cortex. <i>Development and Psychopathology</i> , 2023, 35, 1000-1010.	1.4	2
3	Is the distinction between tonic and phasic irritability meaningful in 3-year-old children?. <i>European Child and Adolescent Psychiatry</i> , 2023, 32, 1755-1763.	2.8	6
4	Affective Dynamics and Mean Levels of Preschool Irritability and Sadness: Predictors of Children's Psychological Functioning Two Years Later. <i>Child Psychiatry and Human Development</i> , 2022, 53, 244-255.	1.1	5
5	A study of parents of sexual and gender minority children: Linking parental reactions with child mental health.. <i>Psychology of Sexual Orientation and Gender Diversity</i> , 2022, 9, 300-308.	2.0	4
6	Early intervention for inhibited young children: a randomized controlled trial comparing the Turtle Program and Cool Little Kids. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2022, 63, 273-281.	3.1	13
7	Preschool Irritability Predicts Adolescent Psychopathology and Functional Impairment: A 12-Year Prospective Study. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2022, 61, 554-564.e1.	0.3	24
8	Early Timing and Determinants of the Sexual Orientation Disparity in Internalizing Psychopathology: A Prospective Cohort Study from Ages 3 to 15. <i>Journal of Youth and Adolescence</i> , 2022, 51, 458-470.	1.9	15
9	Temperament and psychopathology in early childhood predict body dissatisfaction and eating disorder symptoms in adolescence. <i>Behaviour Research and Therapy</i> , 2022, 151, 104039.	1.6	12
10	Executive functioning moderates neural mechanisms of irritability during reward processing in youth. <i>Psychiatry Research - Neuroimaging</i> , 2022, 323, 111483.	0.9	4
11	Offspring irritability: associations with parental psychopathology and personality. <i>European Child and Adolescent Psychiatry</i> , 2022, , .	2.8	2
12	Cortisol Reactivity and Observed Parenting among Mothers of Children with and without ADHD. <i>Journal of Attention Disorders</i> , 2022, 26, 1605-1621.	1.5	0
13	Structural Brain Correlates of Childhood Inhibited Temperament: An ENIGMA-Anxiety Mega-analysis. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2022, 61, 1182-1188.	0.3	2
14	Early childhood cumulative risk is associated with decreased global brain measures, cortical thickness, and cognitive functioning in school-age children. <i>Developmental Psychobiology</i> , 2021, 63, 192-205.	0.9	15
15	Using Item Response Theory to Compare Irritability Measures in Early Adolescent and Childhood Samples. <i>Assessment</i> , 2021, 28, 918-927.	1.9	27
16	Executive functioning moderates neural reward processing in youth. <i>Cognitive, Affective and Behavioral Neuroscience</i> , 2021, 21, 105-118.	1.0	7
17	Hippocampal subregion volume in high-risk offspring is associated with increases in depressive symptoms across the transition to adolescence. <i>Journal of Affective Disorders</i> , 2021, 281, 358-366.	2.0	7
18	Parental hostility predicts reduced cortical thickness in males. <i>Developmental Science</i> , 2021, 24, e13052.	1.3	4

#	ARTICLE	IF	CITATIONS
19	Developmental pathways from preschool irritability to multifinality in early adolescence: the role of diurnal cortisol. <i>Psychological Medicine</i> , 2021, 51, 761-769.	2.7	11
20	Neural mechanisms of reward processing in adolescent irritability. <i>Developmental Psychobiology</i> , 2021, 63, 1241-1254.	0.9	16
21	Reward-related neural correlates of early life stress in school-aged children. <i>Developmental Cognitive Neuroscience</i> , 2021, 49, 100963.	1.9	8
22	Early Predictors of Adolescent Irritability. <i>Child and Adolescent Psychiatric Clinics of North America</i> , 2021, 30, 475-490.	1.0	9
23	Irritability-related neural responses to frustrative nonreward in adolescents with trauma histories: A preliminary investigation. <i>Developmental Psychobiology</i> , 2021, 63, e22167.	0.9	11
24	A Transdiagnostic Perspective on Youth Irritability. <i>Current Directions in Psychological Science</i> , 2021, 30, 437-443.	2.8	36
25	Parsing between- and within-person effects: Longitudinal associations between irritability and internalizing and externalizing problems from early childhood through adolescence. <i>Development and Psychopathology</i> , 2021, , 1-11.	1.4	1
26	Early Childhood Psychopathology Prospectively Predicts Social Functioning in Early Adolescence. <i>Journal of Clinical Child and Adolescent Psychology</i> , 2020, 49, 353-364.	2.2	17
27	Prefrontal cortical thickness mediates the association between cortisol reactivity and executive function in childhood. <i>Neuropsychologia</i> , 2020, 148, 107636.	0.7	10
28	Predictors and Moderators of Parent Engagement in Early Interventions for Behaviorally Inhibited Preschool-Aged Children. <i>Evidence-Based Practice in Child and Adolescent Mental Health</i> , 2020, 5, 452-467.	0.7	3
29	Parent versus child report of children's sexual orientation: associations with psychiatric morbidity in the Adolescent Brain Cognitive Development study. <i>Annals of Epidemiology</i> , 2020, 45, 1-4.	0.9	6
30	Mapping the frequency and severity of anxiety behaviors in preschool-aged children. <i>Journal of Anxiety Disorders</i> , 2019, 63, 9-17.	1.5	11
31	Cognitive Styles in Preschool-Age Children: Associations with Depression Risk and Evidence of Stability. <i>Journal of Psychopathology and Behavioral Assessment</i> , 2019, 41, 612-626.	0.7	3
32	A Daily Diary Analysis of Preschool Depressive Behaviors: Prospective Associations and Moderators Across 14 Days. <i>Journal of Abnormal Child Psychology</i> , 2019, 47, 1547-1558.	3.5	10
33	Lasting effects of stress physiology on the brain: Cortisol reactivity during preschool predicts hippocampal functional connectivity at school age. <i>Developmental Cognitive Neuroscience</i> , 2019, 40, 100736.	1.9	7
34	Early parenting predicts hippocampal subregion volume via stress reactivity in childhood. <i>Developmental Psychobiology</i> , 2019, 61, 125-140.	0.9	19
35	Outcomes of early parent-child adrenocortical attunement in the high-risk offspring of depressed parents. <i>Developmental Psychobiology</i> , 2018, 60, 468-482.	0.9	8
36	Preschool- and School-Age Irritability Predict Reward-Related Brain Function. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2018, 57, 407-417.e2.	0.3	38

#	ARTICLE	IF	CITATIONS
37	Preschool psychiatric disorders: homotypic and heterotypic continuity through middle childhood and early adolescence. <i>Psychological Medicine</i> , 2018, 48, 2159-2168.	2.7	60
38	Temperament Distinguishes Persistent/Recurrent from Remitting Anxiety Disorders Across Early Childhood. <i>Journal of Clinical Child and Adolescent Psychology</i> , 2018, 47, 1004-1013.	2.2	14
39	Stability and Predictive Validity of the Parent-Child Sleep Interactions Scale: A Longitudinal Study Among Preschoolers. <i>Journal of Clinical Child and Adolescent Psychology</i> , 2018, 47, 382-396.	2.2	8
40	Is Parent-Child Disagreement on Child Anxiety Explained by Differences in Measurement Properties? An Examination of Measurement Invariance Across Informants and Time. <i>Frontiers in Psychology</i> , 2018, 9, 1295.	1.1	18
41	Cortisol Rhythm in Preschoolers: Relations with Maternal Depression and Child Temperament. <i>Journal of Psychopathology and Behavioral Assessment</i> , 2018, 40, 386-401.	0.7	3
42	Early childhood cortisol reactivity moderates the effects of parent-child relationship quality on the development of children's temperament in early childhood. <i>Developmental Science</i> , 2017, 20, e12378.	1.3	17
43	Parent-child adrenocortical concordance in early childhood: The moderating role of parental depression and child temperament. <i>Biological Psychology</i> , 2017, 124, 100-110.	1.1	21
44	Predictors of Later Psychopathology in Young Children with Disruptive Mood Dysregulation Disorder. <i>Journal of Child and Adolescent Psychopharmacology</i> , 2017, 27, 396-402.	0.7	15
45	Mapping the Frequency and Severity of Depressive Behaviors in Preschool-Aged Children. <i>Child Psychiatry and Human Development</i> , 2017, 48, 934-943.	1.1	13
46	Neural reactivity to reward in school-age offspring of depressed mothers. <i>Journal of Affective Disorders</i> , 2017, 214, 81-88.	2.0	19
47	The interaction between parenting and children's cortisol reactivity at age 3 predicts increases in children's internalizing and externalizing symptoms at age 6. <i>Development and Psychopathology</i> , 2017, 29, 1319-1331.	1.4	21
48	Parental depression and parent and child stress physiology: Moderation by parental hostility. <i>Developmental Psychobiology</i> , 2017, 59, 997-1009.	0.9	10
49	Neurophysiological Processing of Emotion in Children of Mothers with a History of Depression: the Moderating Role of Preschool Persistent Irritability. <i>Journal of Abnormal Child Psychology</i> , 2017, 45, 1599-1608.	3.5	12
50	A Prospective Examination of the Relations Between Emotional Abuse and Anxiety: Moderation by Distress Tolerance. <i>Prevention Science</i> , 2017, 18, 20-30.	1.5	30
51	Development of hippocampal functional connectivity during childhood. <i>Human Brain Mapping</i> , 2017, 38, 182-201.	1.9	57
52	Graphical representations of adolescents' psychophysiological reactivity to social stressor tasks: Reliability and validity of the Chernoff Face approach and person-centered profiles for clinical use. <i>Psychological Assessment</i> , 2017, 29, 422-434.	1.2	9
53	Children's cortisol responses to a social evaluative laboratory stressor from early to middle childhood. <i>Developmental Psychobiology</i> , 2016, 58, 1019-1033.	0.9	9
54	Transdiagnostic factors and pathways to multifinality: The error-related negativity predicts whether preschool irritability is associated with internalizing versus externalizing symptoms at age 9. <i>Development and Psychopathology</i> , 2016, 28, 913-926.	1.4	32

#	ARTICLE	IF	CITATIONS
55	Examining the concurrent and longitudinal relationship between diurnal cortisol rhythms and conduct problems during childhood. <i>Psychoneuroendocrinology</i> , 2016, 71, 147-154.	1.3	32
56	Loss of Temper and Irritability: The Relationship to Tantrums in a Community and Clinical Sample. <i>Journal of Child and Adolescent Psychopharmacology</i> , 2016, 26, 114-122.	0.7	42
57	Longitudinal Associations Between Preschool Disruptive Mood Dysregulation Disorder Symptoms and Neural Reactivity to Monetary Reward During Preadolescence. <i>Journal of Child and Adolescent Psychopharmacology</i> , 2016, 26, 131-137.	0.7	40
58	Physiological and Behavioral Vulnerability Markers Increase Risk to Early Life Stress in Preschool-Aged Children. <i>Journal of Abnormal Child Psychology</i> , 2016, 44, 859-870.	3.5	17
59	Preliminary evaluation of a multimodal early intervention program for behaviorally inhibited preschoolers.. <i>Journal of Consulting and Clinical Psychology</i> , 2015, 83, 534-540.	1.6	97
60	Preschool irritability predicts child psychopathology, functional impairment, and service use at age nine. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2015, 56, 999-1007.	3.1	103
61	“It takes two”: The interaction between parenting and child temperament on parents' stress physiology. <i>Developmental Psychobiology</i> , 2015, 57, 336-348.	0.9	9
62	Allelic Variation of Risk for Anxiety Symptoms Moderates the Relation Between Adolescent Safety Behaviors and Social Anxiety Symptoms. <i>Journal of Psychopathology and Behavioral Assessment</i> , 2015, 37, 597-610.	0.7	11
63	An fMRI Pilot Study of Cognitive Reappraisal in Children: Divergent Effects on Brain and Behavior. <i>Journal of Psychopathology and Behavioral Assessment</i> , 2015, 37, 634-644.	0.7	24
64	Advances and Directions in Preschool Mental Health Research. <i>Child Development Perspectives</i> , 2015, 9, 14-19.	2.1	48
65	Noisy spit: Parental noncompliance with child salivary cortisol sampling. <i>Developmental Psychobiology</i> , 2014, 56, 647-656.	0.9	21
66	The Conundrum of the Laboratory: Challenges of Assessing Preschool-Age Children's Salivary Cortisol Reactivity. <i>Journal of Psychopathology and Behavioral Assessment</i> , 2014, 36, 350-357.	0.7	16
67	Testing Models of Psychopathology in Preschool-aged Children Using a Structured Interview-based Assessment. <i>Journal of Abnormal Child Psychology</i> , 2014, 42, 1201-1211.	3.5	85
68	Construct validity of the Parent-Child Sleep Interactions Scale (PSIS): associations with parenting, family stress, and maternal and child psychopathology. <i>Sleep Medicine</i> , 2014, 15, 942-951.	0.8	13
69	Early Exposure to Parental Depression and Parenting: Associations with Young Offspring's Stress Physiology and Oppositional Behavior. <i>Journal of Abnormal Child Psychology</i> , 2013, 41, 1299-1310.	3.5	65
70	Preschool Irritability: Longitudinal Associations With Psychiatric Disorders at Age 6 and Parental Psychopathology. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2013, 52, 1304-1313.	0.3	112
71	Maternal Psychopathology and Early Child Temperament Predict Young Children's Salivary Cortisol 3 Years Later. <i>Journal of Abnormal Child Psychology</i> , 2013, 41, 531-542.	3.5	29
72	Preschool Anxiety Disorders: Comprehensive Assessment of Clinical, Demographic, Temperamental, Familial, and Life Stress Correlates. <i>Journal of Clinical Child and Adolescent Psychology</i> , 2013, 42, 577-589.	2.2	72

#	ARTICLE	IF	CITATIONS
73	Psychiatric Disorders in Preschoolers: Continuity From Ages 3 to 6. <i>American Journal of Psychiatry</i> , 2012, 169, 1157-1164.	4.0	253
74	It Depends on What You Mean by "Disagree": Differences between Parent and Child Perceptions of Parent-Child Conflict. <i>Journal of Psychopathology and Behavioral Assessment</i> , 2012, 34, 293-307.	0.7	37
75	Preschoolers' Observed Temperament and Psychiatric Disorders Assessed with a Parent Diagnostic Interview. <i>Journal of Clinical Child and Adolescent Psychology</i> , 2011, 40, 295-306.	2.2	70
76	Parent-reported mental health in preschoolers: findings using a diagnostic interview. <i>Comprehensive Psychiatry</i> , 2011, 52, 359-369.	1.5	130
77	Social and Non-Social Behavioral Inhibition in Preschool-Age Children: Differential Associations with Parent-Reports of Temperament and Anxiety. <i>Child Psychiatry and Human Development</i> , 2011, 42, 390-405.	1.1	59
78	Hypothalamic-Pituitary-Adrenal Axis Reactivity in the Preschool-Age Offspring of Depressed Parents. <i>Psychological Science</i> , 2011, 22, 650-658.	1.8	54
79	The dopamine D2 receptor gene and depressive and anxious symptoms in childhood: associations and evidence for gene-environment correlation and gene-environment interaction. <i>Psychiatric Genetics</i> , 2010, 20, 304-310.	0.6	81
80	Temperamental Positive and Negative Emotionality and Children's Depressive Symptoms: A Longitudinal Prospective Study from Age Three to Age Ten. <i>Journal of Social and Clinical Psychology</i> , 2010, 29, 462-488.	0.2	104
81	The Role of Brain-Derived Neurotrophic Factor Genotype, Parental Depression, and Relationship Discord in Predicting Early-Emerging Negative Emotionality. <i>Psychological Science</i> , 2010, 21, 1678-1685.	1.8	39
82	Increased waking salivary cortisol and depression risk in preschoolers: the role of maternal history of melancholic depression and early child temperament. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2009, 50, 1495-1503.	3.1	63
83	Depression in Children and Adolescents. , 2008, , 69-95.		8
84	Children's Emotionality and Social Status: A Meta-analytic Review. <i>Social Development</i> , 2006, 15, 394-417.	0.8	85
85	Parent responses to their sexual and gender minority children: Implications for parent-focused supportive interventions.. <i>Psychology of Sexual Orientation and Gender Diversity</i> , 0, , .	2.0	1
