List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/8454634/qing-li-publications-by-year.pdf>

Version: 2024-04-25

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

34
papers

1,633
citations

#	Paper	IF	Citations
34	Natural Killer (NK) Cell Assays in Immunotoxicity Testing. <i>Methods in Molecular Biology</i> , 2018 , 1803, 231-241	2.4	6
33	Effects of viewing forest landscape on middle-aged hypertensive men. <i>Urban Forestry and Urban Greening</i> , 2017 , 21, 247-252	5.4	52
32	Effects of Forest Bathing on Cardiovascular and Metabolic Parameters in Middle-Aged Males. <i>Evidence-based Complementary and Alternative Medicine</i> , 2016 , 2016, 2587381	2.3	26
31	Effect of carbamate pesticides on perforin, granzymes A-B-3/K, and granulysin in human natural killer cells. <i>International Journal of Immunopathology and Pharmacology</i> , 2015 , 28, 403-10	3	5
30	Carbamate pesticide-induced apoptosis in human T lymphocytes. <i>International Journal of Environmental Research and Public Health</i> , 2015 , 12, 3633-45	4.6	35
29	Effect of forest walking on autonomic nervous system activity in middle-aged hypertensive individuals: a pilot study. <i>International Journal of Environmental Research and Public Health</i> , 2015 , 12, 2687-99	4.6	78
28	Physiological and psychological effects of forest therapy on middle-aged males with high-normal blood pressure. <i>International Journal of Environmental Research and Public Health</i> , 2015 , 12, 2532-42	4.6	106
27	Physiological and Psychological Effects of a Forest Therapy Program on Middle-Aged Females. <i>International Journal of Environmental Research and Public Health</i> , 2015 , 12, 15222-32	4.6	94
26	Emotional, restorative and vitalizing effects of forest and urban environments at four sites in Japan. <i>International Journal of Environmental Research and Public Health</i> , 2014 , 11, 7207-30	4.6	120
25	Influence of forest therapy on cardiovascular relaxation in young adults. <i>Evidence-based Complementary and Alternative Medicine</i> , 2014 , 2014, 834360	2.3	119
24	Effect of ziram on natural killer, lymphokine-activated killer, and cytotoxic T lymphocyte activity. <i>Archives of Toxicology</i> , 2012 , 86, 475-81	5.8	10
23	Mechanism of ziram-induced apoptosis in human T lymphocytes. <i>Archives of Toxicology</i> , 2012 , 86, 615-235.8	5.8	14
22	Acute effects of walking in forest environments on cardiovascular and metabolic parameters. <i>European Journal of Applied Physiology</i> , 2011 , 111, 2845-53	3.4	124
21	Ziram induces apoptosis and necrosis in human immune cells. <i>Archives of Toxicology</i> , 2011 , 85, 355-61	5.8	21
20	Apoptosis Induced by Anticholinesterase Pesticides 2011 , 165-174		
19	Effect of oral exposure to fenitrothion and 3-methyl-4-nitrophenol on splenic cell populations and histopathological alterations in spleen in Wistar rats. <i>Human and Experimental Toxicology</i> , 2011 , 30, 665-74	3.4	9
18	Insulin resistance, as expressed by HOMA-R, is strongly determined by waist circumference or body mass index among Japanese working men. <i>Obesity Research and Clinical Practice</i> , 2010 , 4, e1-e82	5.4	5

17	Association of smoking status, insulin resistance, body mass index, and metabolic syndrome in workers: A 1-year follow-up study. <i>Obesity Research and Clinical Practice</i> , 2010 , 4, e163-246	5.4	29
16	Effect of forest bathing trips on human immune function. <i>Environmental Health and Preventive Medicine</i> , 2010 , 15, 9-17	4.2	230
15	A day trip to a forest park increases human natural killer activity and the expression of anti-cancer proteins in male subjects. <i>Journal of Biological Regulators and Homeostatic Agents</i> , 2010 , 24, 157-65	0.7	38
14	Chlorpyrifos induces apoptosis in human T cells. <i>Toxicology</i> , 2009 , 255, 53-7	4.4	46
13	DDVP markedly decreases the expression of granzyme B and granzyme 3/K in human NK cells. <i>Toxicology</i> , 2008 , 243, 294-302	4.4	12
12	New mechanism of organophosphorus pesticide-induced immunotoxicity. <i>Journal of Nippon Medical School</i> , 2007 , 74, 92-105	1.3	53
11	Organophosphorus pesticides induce apoptosis in human NK cells. <i>Toxicology</i> , 2007 , 239, 89-95	4.4	38
10	Healthy lifestyles are associated with higher levels of perforin, granulysin and granzymes A/B-expressing cells in peripheral blood lymphocytes. <i>Preventive Medicine</i> , 2007 , 44, 117-23	4.3	35
9	New mechanism of organophosphorus pesticide-induced immunotoxicity. <i>Journal of Nippon Medical School</i> , 2007 , 74, 70-3	1.3	3
8	Phytoncides (wood essential oils) induce human natural killer cell activity. <i>Immunopharmacology and Immunotoxicology</i> , 2006 , 28, 319-33	3.2	104
7	The mechanism of organophosphorus pesticide-induced inhibition of cytolytic activity of killer cells. <i>Cellular and Molecular Immunology</i> , 2006 , 3, 171-8	15.4	19
6	Effect of electric foot shock and psychological stress on activities of murine splenic natural killer and lymphokine-activated killer cells, cytotoxic T lymphocytes, natural killer receptors and mRNA transcripts for granzymes and perforin. <i>Stress</i> , 2005 , 8, 107-16	3	23
5	Dimethyl 2,2-dichlorovinyl phosphate (DDVP) markedly decreases the expression of perforin, granzyme A and granulysin in human NK-92Cl cell line. <i>Toxicology</i> , 2005 , 213, 107-16	4.4	32
4	Elevated frequency of sister chromatid exchanges of lymphocytes in sarin-exposed victims of the Tokyo sarin disaster 3 years after the event. <i>Toxicology</i> , 2004 , 201, 209-17	4.4	16
3	Dimethyl 2,2-dichlorovinyl phosphate (DDVP) markedly inhibits activities of natural killer cells, cytotoxic T lymphocytes and lymphokine-activated killer cells via the Fas-ligand/Fas pathway in perforin-knockout (PKO) mice. <i>Toxicology</i> , 2004 , 204, 41-50	4.4	29
2	Organophosphorus pesticides markedly inhibit the activities of natural killer, cytotoxic T lymphocyte and lymphokine-activated killer: a proposed inhibiting mechanism via granzyme inhibition. <i>Toxicology</i> , 2002 , 172, 181-90	4.4	60
1	Occupational Allergic Dermatitis Induced by an Epoxy Hardener Alkylamine. <i>Journal of Occupational Health</i> , 2002 , 44, 264-266	2.3
