

Joel Hellewell

List of Publications by Citations

Source: <https://exaly.com/author-pdf/8465639/joel-hellewell-publications-by-citations.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
46	Feasibility of controlling COVID-19 outbreaks by isolation of cases and contacts. <i>The Lancet Global Health</i> , 2020 , 8, e488-e496	13.6	1460
45	Early dynamics of transmission and control of COVID-19: a mathematical modelling study. <i>Lancet Infectious Diseases</i> , 2020 , 20, 553-558	25.5	1372
44	The effect of control strategies to reduce social mixing on outcomes of the COVID-19 epidemic in Wuhan, China: a modelling study. <i>Lancet Public Health</i> , 2020 , 5, e261-e270	22.4	1139
43	Effects of non-pharmaceutical interventions on COVID-19 cases, deaths, and demand for hospital services in the UK: a modelling study. <i>Lancet Public Health</i> , 2020 , 5, e375-e385	22.4	453
42	Estimating the infection and case fatality ratio for coronavirus disease (COVID-19) using age-adjusted data from the outbreak on the Diamond Princess cruise ship, February 2020. <i>Eurosurveillance</i> , 2020 , 25,	19.8	277
41	Practical considerations for measuring the effective reproductive number, Rt. <i>PLoS Computational Biology</i> , 2020 , 16, e1008409	5	140
40	Examining the human infectious reservoir for Plasmodium falciparum malaria in areas of differing transmission intensity. <i>Nature Communications</i> , 2017 , 8, 1133	17.4	117
39	Estimating the time-varying reproduction number of SARS-CoV-2 using national and subnational case counts. <i>Wellcome Open Research</i> , 5 , 112	4.8	98
38	Using a real-world network to model localized COVID-19 control strategies. <i>Nature Medicine</i> , 2020 , 26, 1616-1622	50.5	97
37	Feasibility of controlling 2019-nCoV outbreaks by isolation of cases and contacts		89
36	Reconstructing the early global dynamics of under-ascertained COVID-19 cases and infections. <i>BMC Medicine</i> , 2020 , 18, 332	11.4	80
35	Quarantine and testing strategies in contact tracing for SARS-CoV-2: a modelling study. <i>Lancet Public Health</i> , 2021 , 6, e175-e183	22.4	69
34	The transmissibility of novel Coronavirus in the early stages of the 2019-20 outbreak in Wuhan: Exploring initial point-source exposure sizes and durations using scenario analysis. <i>Wellcome Open Research</i> , 2020 , 5, 17	4.8	58
33	Estimating the time-varying reproduction number of SARS-CoV-2 using national and subnational case counts. <i>Wellcome Open Research</i> , 5 , 112	4.8	58
32	Practical considerations for measuring the effective reproductive number, 2020 ,		46
31	The contribution of asymptomatic SARS-CoV-2 infections to transmission on the Diamond Princess cruise ship. <i>ELife</i> , 2020 , 9,	8.9	43
30	Estimating the effectiveness of routine asymptomatic PCR testing at different frequencies for the detection of SARS-CoV-2 infections. <i>BMC Medicine</i> , 2021 , 19, 106	11.4	40

29	Response strategies for COVID-19 epidemics in African settings: a mathematical modelling study. <i>BMC Medicine</i> , 2020 , 18, 324	11.4	36
28	Variation in natural exposure to anopheles mosquitoes and its effects on malaria transmission. <i>ELife</i> , 2018 , 7,	8.9	28
27	Estimating the infection and case fatality ratio for COVID-19 using age-adjusted data from the outbreak on the Diamond Princess cruise ship		25
26	Evaluation of individual and ensemble probabilistic forecasts of COVID-19 mortality in the US		20
25	Ivermectin as a novel complementary malaria control tool to reduce incidence and prevalence: a modelling study. <i>Lancet Infectious Diseases</i> , 2020 , 20, 498-508	25.5	20
24	Genomic reconstruction of the SARS-CoV-2 epidemic in England. <i>Nature</i> , 2021 ,	50.4	16
23	The contribution of asymptomatic SARS-CoV-2 infections to transmission - a model-based analysis of the Diamond Princess outbreak		14
22	Combining fine-scale social contact data with epidemic modelling reveals interactions between contact tracing, quarantine, testing and physical distancing for controlling COVID-19		14
21	Reconstructing the early global dynamics of under-ascertained COVID-19 cases and infections		13
20	Evaluation of individual and ensemble probabilistic forecasts of COVID-19 mortality in the United States.. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2022 , 119, e2113561119 ³	11.5	13
19	A cross-sectional analysis of meteorological factors and SARS-CoV-2 transmission in 409 cities across 26 countries. <i>Nature Communications</i> , 2021 , 12, 5968	17.4	12
18	Implications of the school-household network structure on SARS-CoV-2 transmission under school reopening strategies in England. <i>Nature Communications</i> , 2021 , 12, 1942	17.4	12
17	Estimating the effectiveness of routine asymptomatic PCR testing at different frequencies for the detection of SARS-CoV-2 infections		10
16	Implications of the school-household network structure on SARS-CoV-2 transmission under different school reopening strategies in England		9
15	Genomic reconstruction of the SARS-CoV-2 epidemic in England		9
14	Estimating the impact of reopening schools on the reproduction number of SARS-CoV-2 in England, using weekly contact survey data. <i>BMC Medicine</i> , 2021 , 19, 233	11.4	7
13	An imperfect tool: contact tracing could provide valuable reductions in COVID-19 transmission if good adherence can be achieved and maintained.		6
12	Inference of the SARS-CoV-2 generation time using UK household data.. <i>ELife</i> , 2022 , 11,	8.9	5

11	Exploring surveillance data biases when estimating the reproduction number: with insights into subpopulation transmission of Covid-19 in England		5
10	Exploring surveillance data biases when estimating the reproduction number: with insights into subpopulation transmission of COVID-19 in England. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2021 , 376, 20200283	5.8	5
9	Using ante-natal clinic prevalence data to monitor temporal changes in malaria incidence in a humanitarian setting in the Democratic Republic of Congo. <i>Malaria Journal</i> , 2018 , 17, 312	3.6	5
8	Assessing the impact of low-technology emanators alongside long-lasting insecticidal nets to control malaria. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2021 , 376, 20190817	5.8	4
7	On the fallibility of simulation models in informing pandemic responses - Authorscreply. <i>The Lancet Global Health</i> , 2020 , 8, e778-e779	13.6	3
6	Evaluating the Performance of Malaria Genetics for Inferring Changes in Transmission Intensity Using Transmission Modeling. <i>Molecular Biology and Evolution</i> , 2021 , 38, 274-289	8.3	3
5	When intuition falters: repeated testing accuracy during an epidemic. <i>European Journal of Epidemiology</i> , 2021 , 36, 749-752	12.1	2
4	Contact tracing is an imperfect tool for controlling COVID-19 transmission and relies on population adherence. <i>Nature Communications</i> , 2021 , 12, 5412	17.4	2
3	Feasibility of controlling COVID-19 - Authorscreply. <i>The Lancet Global Health</i> , 2020 , 8, e775	13.6	1
2	Comparative assessment of methods for short-term forecasts of COVID-19 hospital admissions in England at the local level.. <i>BMC Medicine</i> , 2022 , 20, 86	11.4	1
1	Using high-resolution contact networks to evaluate SARS-CoV-2 transmission and control in large-scale multi-day events.. <i>Nature Communications</i> , 2022 , 13, 1956	17.4	1
