#	ARTICLE	IF	CITATIONS
1	The Lancet Psychiatry Commission: a blueprint for protecting physical health in people with mental illness. <i>Lancet Psychiatry</i> , 2019, 6, 675-712.	3.7	815
2	A meta-review of "lifestyle psychiatry": the role of exercise, smoking, diet and sleep in the prevention and treatment of mental disorders. <i>World Psychiatry</i> , 2020, 19, 360-380.	4.8	424
3	The Effects of Dietary Improvement on Symptoms of Depression and Anxiety: A Meta-Analysis of Randomized Controlled Trials. <i>Psychosomatic Medicine</i> , 2019, 81, 265-280.	1.3	312
4	Evaluating an individualized lifestyle and life skills intervention to prevent antipsychotic-induced weight gain in first-episode psychosis. <i>Microbial Biotechnology</i> , 2016, 10, 267-276.	0.9	177
5	Dietary intake of people with severe mental illness: systematic review and meta-analysis. <i>British Journal of Psychiatry</i> , 2019, 214, 251-259.	1.7	160
6	Solving a weighty problem: Systematic review and meta-analysis of nutrition interventions in severe mental illness. <i>British Journal of Psychiatry</i> , 2017, 210, 110-118.	1.7	153
7	The efficacy and safety of nutrient supplements in the treatment of mental disorders: a meta-review of meta-analyses of randomized-controlled trials. <i>World Psychiatry</i> , 2019, 18, 308-324.	4.8	139
8	Diet as a hot topic in psychiatry: a population-scale study of nutritional intake and inflammatory potential in severe mental illness. <i>World Psychiatry</i> , 2018, 17, 365-367.	4.8	102
9	The Dietary Inflammatory Index and Human Health: An Umbrella Review of Meta-Analyses of Observational Studies. <i>Advances in Nutrition</i> , 2021, 12, 1681-1690.	2.9	95
10	Integrating physical activity as medicine in the care of people with severe mental illness. <i>Australian and New Zealand Journal of Psychiatry</i> , 2015, 49, 681-682.	1.3	69
11	Nutritional Deficiencies and Clinical Correlates in First-Episode Psychosis: A Systematic Review and Meta-analysis. <i>Schizophrenia Bulletin</i> , 2018, 44, 1275-1292.	2.3	61
12	The effects of vitamin and mineral supplementation on symptoms of schizophrenia: a systematic review and meta-analysis. <i>Psychological Medicine</i> , 2017, 47, 1515-1527.	2.7	58
13	A nutrition intervention is effective in improving dietary components linked to cardiometabolic risk in youth with first-episode psychosis. <i>British Journal of Nutrition</i> , 2016, 115, 1987-1993.	1.2	51
14	A review of the nutritional challenges experienced by people living with severe mental illness: a role for dietitians in addressing physical health gaps. <i>Journal of Human Nutrition and Dietetics</i> , 2017, 30, 545-553.	1.3	47
15	Why moving more should be promoted for severe mental illness. <i>Lancet Psychiatry</i> , 2015, 2, 295.	3.7	42
16	From impact factors to real impact: translating evidence on lifestyle interventions into routine mental health care. <i>Translational Behavioral Medicine</i> , 2020, 10, 1070-1073.	1.2	41
17	Cardio-metabolic risk and its management in a cohort of clozapine-treated outpatients. <i>Schizophrenia Research</i> , 2018, 199, 367-373.	1.1	34
18	Physical and mental health impact of COVID-19 on children, adolescents, and their families: The Collaborative Outcomes study on Health and Functioning during Infection Times - Children and Adolescents (COH-FIT-C&A). <i>Journal of Affective Disorders</i> , 2022, 299, 367-376.	2.0	33

#	ARTICLE	IF	CITATIONS
19	Dietary intake, food addiction and nutrition knowledge in young people with mental illness. <i>Nutrition and Dietetics</i> , 2020, 77, 315-322.	0.9	21
20	Keeping the body in mind: A qualitative analysis of the experiences of people experiencing first episode psychosis participating in a lifestyle intervention programme. <i>International Journal of Mental Health Nursing</i> , 2020, 29, 278-289.	2.1	21
21	Expanding collaborative care: integrating the role of dietitians and nutrition interventions in services for people with mental illness. <i>Australasian Psychiatry</i> , 2018, 26, 47-49.	0.4	19
22	Aerobic exercise capacity: an important correlate of psychosocial function in first episode psychosis. <i>Acta Psychiatrica Scandinavica</i> , 2015, 131, 234-234.	2.2	18
23	Stepping up early treatment for help-seeking youth with at-risk mental states: Feasibility and acceptability of a real-world exercise program. <i>Microbial Biotechnology</i> , 2020, 14, 450-462.	0.9	18
24	Nutritional psychiatry in the treatment of psychotic disorders: Current hypotheses and research challenges. <i>Brain, Behavior, & Immunity - Health</i> , 2020, 5, 100070.	1.3	18
25	“An Apple a Day”™?: Psychiatrists, Psychologists and Psychotherapists Report Poor Literacy for Nutritional Medicine: International Survey Spanning 52 Countries. <i>Nutrients</i> , 2021, 13, 822.	1.7	18
26	Adjunctive nutrients in first episode psychosis: A systematic review of efficacy, tolerability and neurobiological mechanisms. <i>Microbial Biotechnology</i> , 2018, 12, 774-783.	0.9	17
27	The effectiveness of the Keeping the Body in Mind Xtend pilot lifestyle program on dietary intake in first-episode psychosis: Two-year outcomes. <i>Obesity Research and Clinical Practice</i> , 2019, 13, 214-216.	0.8	17
28	Cardio-metabolic risk in individuals prescribed long-acting injectable antipsychotic medication. <i>Psychiatry Research</i> , 2019, 281, 112606.	1.7	16
29	Changing health workforce attitudes to promote improved physical health in mental health service users: Keeping our Staff in Mind (KoSIM). <i>Health Promotion Journal of Australia</i> , 2020, 31, 447-455.	0.6	15
30	Dietary intake, physical activity and sedentary behaviour patterns in a sample with established psychosis and associations with mental health symptomatology. <i>Psychological Medicine</i> , 2023, 53, 1565-1575.	2.7	15
31	Social media interventions targeting exercise and diet behaviours in people with noncommunicable diseases (NCDs): A systematic review. <i>Internet Interventions</i> , 2022, 27, 100497.	1.4	15
32	Individual Dietetic Consultations in First Episode Psychosis: A Novel Intervention to Reduce Cardiometabolic Risk. <i>Community Mental Health Journal</i> , 2015, 51, 211-214.	1.1	14
33	Is Obesity in Young People With Psychosis a Foregone Conclusion? Markedly Excessive Energy Intake Is Evident Soon After Antipsychotic Initiation. <i>Frontiers in Psychiatry</i> , 2018, 9, 725.	1.3	13
34	Prevalence of food insecurity in people with major depression, bipolar disorder, and schizophrenia and related psychoses: A systematic review and meta-analysis. <i>Critical Reviews in Food Science and Nutrition</i> , 2023, 63, 4485-4502.	5.4	13
35	2-year follow-up: Still keeping the body in mind. <i>Australian and New Zealand Journal of Psychiatry</i> , 2018, 52, 602-603.	1.3	11
36	Dietary Intake, Adherence to Mediterranean Diet and Lifestyle-Related Factors in People with Schizophrenia. <i>Issues in Mental Health Nursing</i> , 2019, 40, 851-860.	0.6	11

#	ARTICLE	IF	CITATIONS
37	Effectiveness of dietary interventions in mental health treatment: A rapid review of reviews. <i>Nutrition and Dietetics</i> , 2022, 79, 279-290.	0.9	11
38	Prevalence and correlates of food insecurity in community-based individuals with severe mental illness receiving long-acting injectable antipsychotic treatment. <i>British Journal of Nutrition</i> , 2020, 124, 470-477.	1.2	10
39	Do reductions in ghrelin contribute towards antipsychotic-induced weight gain?. <i>Schizophrenia Research</i> , 2019, 210, 301-302.	1.1	8
40	How should we judge edible oils and fats? An umbrella review of the health effects of nutrient and bioactive components found in edible oils and fats. <i>Critical Reviews in Food Science and Nutrition</i> , 2022, 62, 5167-5182.	5.4	7
41	The Development of a Nutrition Screening Tool for Mental Health Settings Prone to Obesity and Cardiometabolic Complications: Study Protocol for the NutriMental Screener. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 11269.	1.2	7
42	“Get Healthy!” A physical activity and nutrition program for older adults with intellectual disability: pilot study protocol. <i>Pilot and Feasibility Studies</i> , 2018, 4, 144.	0.5	6
43	Feasibility of an online, mental health-informed lifestyle program for people aged 60+ years during the COVID-19 pandemic. <i>Health Promotion Journal of Australia</i> , 2022, 33, 545-552.	0.6	6
44	Implications of Dietary Intake and Eating Behaviors for People with Serious Mental Illness: A Qualitative Study. <i>Nutrients</i> , 2022, 14, 2616.	1.7	6
45	A qualitative exploration of barriers and enablers of healthy lifestyle engagement for older Australians with intellectual disabilities. <i>Research and Practice in Intellectual and Developmental Disabilities</i> , 2019, 6, 182-191.	0.5	5
46	Feasibility and Acceptability of Photographic Food Record, Food Diary and Weighed Food Record in People with Serious Mental Illness. <i>Nutrients</i> , 2021, 13, 2862.	1.7	5
47	Prevalence of food insecurity in community-dwelling people living with severe mental illness. <i>Nutrition and Dietetics</i> , 2022, 79, 374-379.	0.9	5
48	Preventing weight gain and increased waist circumference during the first two years after antipsychotic initiation in youth with first-episode psychosis. <i>European Psychiatry</i> , 2016, 33, S112-S113.	0.1	4
49	Dietary intervention in the dystopian world of severe mental illness: measure for measure, then manage. <i>Acta Psychiatrica Scandinavica</i> , 2017, 135, 180-180.	2.2	4
50	Cost effectiveness of dietary interventions for individuals with mental disorders: A scoping review of experimental studies. <i>Nutrition and Dietetics</i> , 2021, , .	0.9	4
51	Preventing antipsychotic-induced weight gain in first-episode psychosis: Transitioning dietitians into routine care. <i>Nutrition and Dietetics</i> , 2016, 73, 303-304.	0.9	3
52	“You are what you eat” (not what you said you ate yesterday): Why a one-off 24-hour dietary recall fails capture usual dietary intake in schizophrenia. <i>Schizophrenia Research</i> , 2018, 199, 447-448.	1.1	3
53	Keeping our staff in mind: Dietary results of a lifestyle intervention targeting mental health staff. <i>Health Promotion Journal of Australia</i> , 2020, 32, 451-457.	0.6	3
54	Recommendations for dietetics in mental healthcare. <i>Journal of Human Nutrition and Dietetics</i> , 2020, 33, 149-150.	1.3	3

#	ARTICLE	IF	CITATIONS
55	Poster #M191 KEEPING THE BODY IN MIND FOR YOUNG PEOPLE WITH FIRST EPISODE PSYCHOSIS. Schizophrenia Research, 2014, 153, S259-S260.	1.1	1
56	S204. NUTRITIONAL DEFICIENCIES AND CLINICAL CORRELATES IN FIRST-EPISODE PSYCHOSIS: A SYSTEMATIC REVIEW AND META-ANALYSIS. Schizophrenia Bulletin, 2018, 44, S405-S405.	2.3	1
57	Authors'™ Response. Psychosomatic Medicine, 2020, 82, 534-535.	1.3	1
58	Tackling change in mental health service delivery: A qualitative evaluation of a lifestyle program targeting mental health staff •Keeping our Staff in Mind (KoSiM). Health Promotion Journal of Australia, 0, , .	0.6	1
59	Dietary Inflammation and Mental Health. , 2021, , 417-429.		0
60	Confidence levels of exercise physiology and dietetic students'™ pre- and post-practicum within mental health facilities. Journal of Mental Health Training, Education and Practice, 2021, ahead-of-print, .	0.3	0
