

# Robert Zeillinger

## List of Publications by Citations

**Source:** <https://exaly.com/author-pdf/847708/robert-zeillinger-publications-by-citations.pdf>

**Version:** 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

214  
papers

| #   | Paper                                                                                                                                                                                                                                                        | IF   | Citations |
|-----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-----------|
| 214 | Correlation of circular RNA abundance with proliferation--exemplified with colorectal and ovarian cancer, idiopathic lung fibrosis, and normal human tissues. <i>Scientific Reports</i> , <b>2015</b> , 5, 8057                                              | 4.9  | 506       |
| 213 | Detection of EpCAM positive and negative circulating tumor cells in metastatic breast cancer patients. <i>Acta Oncologica</i> , <b>2011</b> , 50, 700-10                                                                                                     | 3.2  | 186       |
| 212 | Quantitative detection of reverse transcriptase-PCR products by means of a novel and sensitive DNA stain. <i>Genome Research</i> , <b>1995</b> , 4, 234-8                                                                                                    | 9.7  | 156       |
| 211 | Serum C-reactive protein as independent prognostic variable in patients with ovarian cancer. <i>Clinical Cancer Research</i> , <b>2008</b> , 14, 710-4                                                                                                       | 12.9 | 149       |
| 210 | Cyclin gene amplification and overexpression in breast and ovarian cancers: evidence for the selection of cyclin D1 in breast and cyclin E in ovarian tumors. <i>International Journal of Cancer</i> , <b>1996</b> , 69, 247-53                              | 7.5  | 138       |
| 209 | Contribution of epigenetic silencing of tumor necrosis factor-related apoptosis inducing ligand receptor 1 (DR4) to TRAIL resistance and ovarian cancer. <i>Molecular Cancer Research</i> , <b>2005</b> , 3, 335-43                                          | 6.6  | 123       |
| 208 | Transdominant DeltaTAp73 isoforms are frequently up-regulated in ovarian cancer. Evidence for their role as epigenetic p53 inhibitors in vivo. <i>Cancer Research</i> , <b>2004</b> , 64, 2449-60                                                            | 10.1 | 121       |
| 207 | Preoperative serum vascular endothelial growth factor as a prognostic parameter in ovarian cancer. <i>Gynecologic Oncology</i> , <b>2006</b> , 103, 512-7                                                                                                    | 4.9  | 117       |
| 206 | Vascular endothelial growth factor (VEGF) in human breast cancer: correlation with disease-free survival. <i>International Journal of Cancer</i> , <b>1997</b> , 74, 455-8                                                                                   | 7.5  | 111       |
| 205 | Vascular endothelial growth factor gene polymorphisms are associated with prognosis in ovarian cancer. <i>Clinical Cancer Research</i> , <b>2007</b> , 13, 898-901                                                                                           | 12.9 | 93        |
| 204 | Expression of KLF5 is a prognostic factor for disease-free survival and overall survival in patients with breast cancer. <i>Clinical Cancer Research</i> , <b>2006</b> , 12, 2442-8                                                                          | 12.9 | 88        |
| 203 | Interleukin-1 and interleukin-6 gene polymorphisms and the risk of breast cancer in caucasian women. <i>Clinical Cancer Research</i> , <b>2005</b> , 11, 5718-21                                                                                             | 12.9 | 88        |
| 202 | Molecular characterization of circulating tumor cells in patients with ovarian cancer improves their prognostic significance -- a study of the OVCAD consortium. <i>Gynecologic Oncology</i> , <b>2013</b> , 128, 15-21                                      | 4.9  | 86        |
| 201 | Five genes from chromosomal band 8p22 are significantly down-regulated in ovarian carcinoma: N33 and EFA6R have a potential impact on overall survival. <i>Cancer</i> , <b>2005</b> , 104, 2417-29                                                           | 6.4  | 81        |
| 200 | A prognostic gene expression index in ovarian cancer - validation across different independent data sets. <i>Journal of Pathology</i> , <b>2009</b> , 218, 273-80                                                                                            | 9.4  | 80        |
| 199 | The time interval from surgery to start of chemotherapy significantly impacts prognosis in patients with advanced serous ovarian carcinoma - analysis of patient data in the prospective OVCAD study. <i>Gynecologic Oncology</i> , <b>2013</b> , 131, 15-20 | 4.9  | 79        |
| 198 | Patterns of DNA amplification at band q13 of chromosome 11 in human breast cancer. <i>Genes Chromosomes and Cancer</i> , <b>1994</b> , 9, 42-8                                                                                                               | 5    | 79        |

|     |                                                                                                                                                                                                                                        |      |    |
|-----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|----|
| 197 | Assessment of a six gene panel for the molecular detection of circulating tumor cells in the blood of female cancer patients. <i>BMC Cancer</i> , <b>2010</b> , 10, 666                                                                | 4.8  | 78 |
| 196 | The neuronal guidance cue Slit2 induces targeted migration and may play a role in brain metastasis of breast cancer cells. <i>Breast Cancer Research and Treatment</i> , <b>2007</b> , 106, 333-42                                     | 4.4  | 78 |
| 195 | Clinical relevance of dominant-negative p73 isoforms for responsiveness to chemotherapy and survival in ovarian cancer: evidence for a crucial p53-p73 cross-talk in vivo. <i>Clinical Cancer Research</i> , <b>2005</b> , 11, 8372-83 | 12.9 | 78 |
| 194 | KRAS mutation analysis in ovarian samples using a high sensitivity biochip assay. <i>BMC Cancer</i> , <b>2009</b> , 9, 111                                                                                                             | 4.8  | 72 |
| 193 | Expression of estrogen receptor beta isoforms in human breast cancer tissues and cell lines. <i>Breast Cancer Research and Treatment</i> , <b>2002</b> , 71, 249-55                                                                    | 4.4  | 72 |
| 192 | Prognostic value of residual tumor size in patients with epithelial ovarian cancer FIGO stages IIA-IV: analysis of the OVCAD data. <i>International Journal of Gynecological Cancer</i> , <b>2012</b> , 22, 380-5                      | 3.5  | 67 |
| 191 | Tissue expression and serum levels of HER-2/neu in patients with breast cancer. <i>Oncology</i> , <b>1997</b> , 54, 475-81                                                                                                             | 3.8  | 66 |
| 190 | CXCR4 is expressed in ductal carcinoma in situ of the breast and in atypical ductal hyperplasia. <i>Breast Cancer Research and Treatment</i> , <b>2004</b> , 84, 247-50                                                                | 4.4  | 66 |
| 189 | An interleukin-6 gene promoter polymorphism influences the biological phenotype of ovarian cancer. <i>Cancer Research</i> , <b>2003</b> , 63, 3066-8                                                                                   | 10.1 | 65 |
| 188 | In ovarian cancer the prognostic influence of HER2/neu is not dependent on the CXCR4/SDF-1 signalling pathway. <i>British Journal of Cancer</i> , <b>2007</b> , 96, 485-91                                                             | 8.7  | 63 |
| 187 | Patterns of allele losses suggest the existence of five distinct regions of LOH on chromosome 17 in breast cancer. <i>International Journal of Cancer</i> , <b>1994</b> , 56, 193-9                                                    | 7.5  | 63 |
| 186 | DNA amplifications at 20q13 and MDM2 define distinct subsets of evolved breast and ovarian tumours. <i>British Journal of Cancer</i> , <b>1996</b> , 74, 1984-9                                                                        | 8.7  | 61 |
| 185 | Role of miR-34a as a suppressor of L1CAM in endometrial carcinoma. <i>Oncotarget</i> , <b>2014</b> , 5, 462-72                                                                                                                         | 3.3  | 61 |
| 184 | Expression of organic anion-transporting polypeptides 1B1 and 1B3 in ovarian cancer cells: relevance for paclitaxel transport. <i>Biomedicine and Pharmacotherapy</i> , <b>2011</b> , 65, 417-26                                       | 7.5  | 60 |
| 183 | Alternative splicing of p53 and p73: the novel p53 splice variant p53delta is an independent prognostic marker in ovarian cancer. <i>Oncogene</i> , <b>2010</b> , 29, 1997-2004                                                        | 9.2  | 60 |
| 182 | Endothelial nitric oxide synthase gene polymorphism in women with idiopathic recurrent miscarriage. <i>Human Reproduction</i> , <b>2001</b> , 16, 1644-7                                                                               | 5.7  | 60 |
| 181 | Lavage of the Uterine Cavity for Molecular Detection of Müllerian Duct Carcinomas: A Proof-of-Concept Study. <i>Journal of Clinical Oncology</i> , <b>2015</b> , 33, 4293-300                                                          | 2.2  | 57 |
| 180 | Enrichment of circulating tumor cells from a large blood volume using leukapheresis and elutriation: proof of concept. <i>Cytometry Part B - Clinical Cytometry</i> , <b>2011</b> , 80, 100-11                                         | 3.4  | 53 |

|     |                                                                                                                                                                                                                                                         |      |    |
|-----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|----|
| 179 | Prognostic significance of L1CAM in ovarian cancer and its role in constitutive NF- $\kappa$ B activation. <i>Annals of Oncology</i> , <b>2012</b> , 23, 1795-802                                                                                       | 10.3 | 53 |
| 178 | Chromosome region 8p11-p21: refined mapping and molecular alterations in breast cancer. <i>Genes Chromosomes and Cancer</i> , <b>1998</b> , 22, 186-99                                                                                                  | 5    | 53 |
| 177 | Vascular endothelial growth factor splice variants and their prognostic value in breast and ovarian cancer. <i>Clinical Cancer Research</i> , <b>2002</b> , 8, 2253-9                                                                                   | 12.9 | 53 |
| 176 | A human model of epithelial to mesenchymal transition to monitor drug efficacy in hepatocellular carcinoma progression. <i>Molecular Cancer Therapeutics</i> , <b>2011</b> , 10, 850-60                                                                 | 6.1  | 52 |
| 175 | Concentration of vascular endothelial growth factor (VEGF) in the serum of patients with suspected ovarian cancer. <i>British Journal of Cancer</i> , <b>1998</b> , 77, 1870-4                                                                          | 8.7  | 52 |
| 174 | Perturbation of the tumor necrosis factor--related apoptosis-inducing ligand cascade in ovarian cancer: overexpression of FLIPL and deregulation of the functional receptors DR4 and DR5. <i>Clinical Cancer Research</i> , <b>2005</b> , 11, 8585-91   | 12.9 | 52 |
| 173 | Preoperative HE4 expression in plasma predicts surgical outcome in primary ovarian cancer patients: results from the OVCAD study. <i>Gynecologic Oncology</i> , <b>2013</b> , 128, 245-51                                                               | 4.9  | 50 |
| 172 | Oncogenic BARD1 isoforms expressed in gynecological cancers. <i>Cancer Research</i> , <b>2007</b> , 67, 11876-85                                                                                                                                        | 10.1 | 50 |
| 171 | Prognostic impact of tumor infiltrating CD8+ T cells in association with cell proliferation in ovarian cancer patients--a study of the OVCAD consortium. <i>BMC Cancer</i> , <b>2013</b> , 13, 422                                                      | 4.8  | 49 |
| 170 | Expression profiling of mammary carcinoma cell lines: correlation of in vitro invasiveness with expression of CD24. <i>Tumor Biology</i> , <b>2002</b> , 23, 139-45                                                                                     | 2.9  | 49 |
| 169 | Polymorphisms of the endothelial nitric oxide synthase gene in ovarian cancer. <i>Gynecologic Oncology</i> , <b>2002</b> , 86, 134-7                                                                                                                    | 4.9  | 47 |
| 168 | Circulating cell-free DNA in plasma of locally advanced rectal cancer patients undergoing preoperative chemoradiation: a potential diagnostic tool for therapy monitoring. <i>Disease Markers</i> , <b>2008</b> , 25, 159-65                            | 3.2  | 46 |
| 167 | Recommended Guidelines for Validation, Quality Control, and Reporting of Variants in Clinical Practice. <i>Cancer Research</i> , <b>2017</b> , 77, 1250-1260                                                                                            | 10.1 | 45 |
| 166 | Ultra-Sensitive TP53 Sequencing for Cancer Detection Reveals Progressive Clonal Selection in Normal Tissue over a Century of Human Lifespan. <i>Cell Reports</i> , <b>2019</b> , 28, 132-144.e3                                                         | 10.6 | 45 |
| 165 | Association of in vitro invasiveness and gene expression of estrogen receptor, progesterone receptor, pS2 and plasminogen activator inhibitor-1 in human breast cancer cell lines. <i>Breast Cancer Research and Treatment</i> , <b>1999</b> , 56, 91-7 | 4.4  | 45 |
| 164 | Small cell lung cancer: model of circulating tumor cell tumorspheres in chemoresistance. <i>Scientific Reports</i> , <b>2017</b> , 7, 5337                                                                                                              | 4.9  | 44 |
