| # | ARTICLE                                                                                                                                                                                    | IF  | CITATIONS |
|---|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1 | Optimal germination timing in unpredictable environments: the importance of dormancy for both among- and within-season variation. <i>Ecology Letters</i> , 2020, 23, 620-630.              | 6.4 | 26        |
| 2 | The Evolutionary Ecology of Metamorphosis. <i>American Naturalist</i> , 2019, 193, E116-E131.                                                                                              | 2.1 | 22        |
| 3 | Disentangling Verbal Arguments: Intralocus Sexual Conflict in Haplodiploids. <i>American Naturalist</i> , 2021, 198, 678-693.                                                              | 2.1 | 13        |
| 4 | A Parent-Offspring Trade-Off Limits the Evolution of an Ontogenetic Niche Shift. <i>American Naturalist</i> , 2017, 190, 45-60.                                                            | 2.1 | 10        |
| 5 | Do intraspecific or interspecific interactions determine responses to predators feeding on a shared size-structured prey community?. <i>Journal of Animal Ecology</i> , 2015, 84, 414-426. | 2.8 | 7         |
| 6 | Competition among small individuals hinders adaptive radiation despite ecological opportunity. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2022, 289, 20212655.       | 2.6 | 7         |
| 7 | Large-amplitude consumer-resource cycles allow for the evolution of ontogenetic niche shifts in consumer life history. <i>Journal of Theoretical Biology</i> , 2018, 457, 237-248.         | 1.7 | 6         |
| 8 | Habitat deterioration promotes the evolution of direct development in metamorphosing species. <i>Evolution; International Journal of Organic Evolution</i> , 2020, 74, 1826-1850.          | 2.3 | 6         |
