| #  | ARTICLE                                                                                                                                                                                          | IF  | CITATIONS |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Movement of amphibians through agricultural landscapes: The role of habitat on edge permeability. <i>Biological Conservation</i> , 2014, 175, 148-155.                                           | 4.1 | 42        |
| 2  | Review of Ecosystem Level Impacts of Emerald Ash Borer on Black Ash Wetlands: What Does the Future Hold?. <i>Forests</i> , 2018, 9, 179.                                                         | 2.1 | 36        |
| 3  | Effects of land use on population presence and genetic structure of an amphibian in an agricultural landscape. <i>Landscape Ecology</i> , 2017, 32, 147-162.                                     | 4.2 | 26        |
| 4  | Potential Effects of Foundation Species Loss on Wetland Communities: A Case Study of Black Ash Wetlands Threatened by Emerald Ash Borer. <i>Wetlands</i> , 2017, 37, 787-799.                    | 1.5 | 25        |
| 5  | The Effects of Pond Drying and Predation on Blanchard's Cricket Frogs ( <i>Acris blanchardi</i> ). <i>Copeia</i> , 2016, 104, 482-486.                                                           | 1.3 | 7         |
| 6  | Potential impacts of emerald ash borer and adaptation strategies on wildlife communities in black ash wetlands. <i>Ecological Applications</i> , 2022, 32, e2567.                                | 3.8 | 6         |
| 7  | Competitive Interactions between Cricket Frogs ( <i>Acris blanchardi</i> ) and Other Anurans. <i>Herpetologica</i> , 2015, 71, 260.                                                              | 0.4 | 4         |
| 8  | Making the connection: combining habitat suitability and landscape connectivity to understand species distribution in an agricultural landscape. <i>Landscape Ecology</i> , 2021, 36, 2795-2809. | 4.2 | 4         |
| 9  | Foundation Species Loss Affects Leaf Breakdown and Aquatic Invertebrate Resource Use in Black Ash Wetlands. <i>Wetlands</i> , 2020, 40, 839-852.                                                 | 1.5 | 3         |
| 10 | Predicting Predatory Outcomes in the Context of Carryover Effects: Interactions between Juvenile Frogs and Spider Predators. <i>Ethology</i> , 2015, 121, 601-608.                               | 1.1 | 2         |
| 11 | Larval development and survival of pond-breeding anurans in an agricultural landscape impacted more by phytoplankton than surrounding habitat. <i>PLoS ONE</i> , 2021, 16, e0255058.             | 2.5 | 2         |
