#	ARTICLE	IF	CITATIONS
1	Active Time Use and Well-Being in Older Adulthood: Results From a Day Reconstruction Method Study. <i>Work, Aging and Retirement</i> , 2023, 9, 7-18.	2.0	5
2	How within-person effects shape between-person differences: A multilevel structural equation modeling perspective.. <i>Psychological Methods</i> , 2023, 28, 1069-1086.	3.5	3
3	Perspectives on resilience: Trait resilience, correlates of resilience in daily life, and longer-term change in affective distress. <i>Stress and Health</i> , 2023, 39, 59-73.	2.6	3
4	Why do my thoughts feel so bad? Getting at the reciprocal effects of rumination and negative affect using dynamic structural equation modeling.. <i>Emotion</i> , 2022, 22, 1773-1786.	1.8	21
5	Dynamic relations among COVID-19-related media exposure and worries during the COVID-19 pandemic. <i>Psychology and Health</i> , 2022, 37, 933-947.	2.2	11
6	Health sensitivity in the daily lives of younger and older adults: correlates and longer-term change in health. <i>Aging and Mental Health</i> , 2022, 26, 1261-1269.	2.8	2
7	Integrating state dynamics and trait change: A tutorial using the example of stress reactivity and change in well-being. <i>European Journal of Personality</i> , 2022, 36, 180-199.	3.1	7
8	Partner Pain and Affect in the Daily Lives of Older Couples. <i>Journals of Gerontology - Series B Psychological Sciences and Social Sciences</i> , 2022, 77, 1197-1209.	3.9	3
9	When and How to Regulate: Everyday Emotion-Regulation Strategy Use and Stressor Intensity. <i>Affective Science</i> , 2022, 3, 81-92.	2.6	7
10	Do Higher Educated People Feel Better in Everyday Life? Insights From a Day Reconstruction Method Study. <i>Social Indicators Research</i> , 2021, 153, 227-250.	2.7	10
11	Change in mental health symptoms during the COVID-19 pandemic: The role of appraisals and daily life experiences. <i>Journal of Personality</i> , 2021, 89, 468-482.	3.2	35
12	Personality and stress. , 2021, , 1209-1229.		2
13	Distance learning, parent-child interactions, and affective well-being of parents and children during the COVID-19 pandemic: A daily diary study.. <i>Developmental Psychology</i> , 2021, 57, 1719-1734.	1.6	27
14	Eight items of the ruminative response scale are sufficient to measure weekly within-person variation in rumination. <i>Current Psychology</i> , 2020, , 1.	2.8	7
15	The Shape of Emotion Regulation. <i>European Journal of Psychological Assessment</i> , 2020, 36, 447-455.	3.0	9
16	Higher well-being is related to reduced affective reactivity to positive events in daily life.. <i>Emotion</i> , 2020, 20, 376-390.	1.8	19
17	Mix it to fix it: Emotion regulation variability in daily life.. <i>Emotion</i> , 2020, 20, 473-485.	1.8	79
18	The measurement of within-person affect variation.. <i>Emotion</i> , 2020, 20, 677-699.	1.8	54

#	ARTICLE	IF	CITATIONS
19	Thinking mindfully: How mindfulness relates to rumination and reflection in daily life.. <i>Emotion</i> , 2020, 20, 1369-1381.	1.8	26
20	Trajectories of multiple subjective well-being facets across old age: The role of health and personality.. <i>Psychology and Aging</i> , 2020, 35, 894-909.	1.6	19
21	Perceived discrimination and risk of preterm birth among Turkish immigrant women in Germany. <i>Social Science and Medicine</i> , 2019, 236, 112427.	3.8	12
22	Neural correlates of up-regulating positive emotions in fMRI and their link to affect in daily life. <i>Social Cognitive and Affective Neuroscience</i> , 2019, 14, 1049-1059.	3.0	10
23	Capturing Affective Well-Being in Daily Life with the Day Reconstruction Method: A Refined View on Positive and Negative Affect. <i>Journal of Happiness Studies</i> , 2019, 20, 641-663.	3.2	17
24	At the Frontiers of Modeling Intensive Longitudinal Data: Dynamic Structural Equation Models for the Affective Measurements from the COGITO Study. <i>Multivariate Behavioral Research</i> , 2018, 53, 820-841.	3.1	231
25	Pathways to happiness are multidirectional: Associations between state mindfulness and everyday affective experience.. <i>Emotion</i> , 2018, 18, 202-211.	1.8	33
26	Improved Insight into and Prediction of Network Dynamics by Combining VAR and Dimension Reduction. <i>Multivariate Behavioral Research</i> , 2018, 53, 853-875.	3.1	18
27	The bipolarity of affect and depressive symptoms.. <i>Journal of Personality and Social Psychology</i> , 2018, 114, 323-341.	2.8	65
28	Long-term Effects of an Extensive Cognitive Training on Personality Development. <i>Journal of Personality</i> , 2017, 85, 454-463.	3.2	22
29	Capturing Context-Related Change in Emotional Dynamics via Fixed Moderated Time Series Analysis. <i>Multivariate Behavioral Research</i> , 2017, 52, 499-531.	3.1	12
30	Daily Stressful Experiences Precede But Do Not Succeed Depressive Symptoms: Results from a Longitudinal Experience Sampling Study. <i>Journal of Social and Clinical Psychology</i> , 2017, 36, 196-220.	0.5	13
31	Mindfulness in Daily Life: a Multidimensional Approach. <i>Mindfulness</i> , 2017, 8, 737-750.	2.8	39
32	Reduced impact of alcohol use on next-day tiredness in older relative to younger adults: A role for sleep duration.. <i>Psychology and Aging</i> , 2017, 32, 642-653.	1.6	4
33	Clustering Vector Autoregressive Models: Capturing Qualitative Differences in Within-Person Dynamics. <i>Frontiers in Psychology</i> , 2016, 7, 1540.	2.1	29
34	Using Raw VAR Regression Coefficients to Build Networks can be Misleading. <i>Multivariate Behavioral Research</i> , 2016, 51, 330-344.	3.1	51
35	Affective updating ability and stressful events interact to prospectively predict increases in depressive symptoms over time.. <i>Emotion</i> , 2016, 16, 73-82.	1.8	22
36	Co-variation between stressful events and rumination predicts depressive symptoms: An eighteen months prospective design in undergraduates. <i>Behaviour Research and Therapy</i> , 2016, 87, 128-133.	3.1	18

#	ARTICLE	IF	CITATIONS
37	Is Available Support Always Helpful for Older Adults? Exploring the Buffering Effects of State and Trait Social Support. <i>Journals of Gerontology - Series B Psychological Sciences and Social Sciences</i> , 2016, 71, 23-34.	3.9	8
38	The Factor Structure, Predictors, and Percentile Norms of the Center for Epidemiologic Studies Depression (CES-D) Scale in the Dutch-speaking Adult Population of Belgium. <i>Psychologica Belgica</i> , 2016, 56, 1-12.	1.9	11
39	Emotional inertia and external events: The roles of exposure, reactivity, and recovery.. <i>Emotion</i> , 2015, 15, 625-636.	1.8	82
40	Differences in the Betweenâ€“Person and Withinâ€“Person Structures of Affect Are A Matter of Degree. <i>European Journal of Personality</i> , 2015, 29, 55-71.	3.1	82
41	Older adultsâ€™ affective experiences across 100 days are less variable and less complex than younger adultsâ€™.. <i>Psychology and Aging</i> , 2015, 30, 194-208.	1.6	35
42	Emotional inertia contributes to depressive symptoms beyond perseverative thinking. <i>Cognition and Emotion</i> , 2015, 29, 527-538.	2.0	75
43	Ambulatory Assessment in the Research on Aging: Contemporary and Future Applications. <i>Gerontology</i> , 2015, 61, 372-380.	2.8	21
44	Toward a Unified Framework for the Study of Between-Person and Within-Person Structures: Building a Bridge Between Two Research Paradigms. <i>Multivariate Behavioral Research</i> , 2014, 49, 193-213.	3.1	136
45	Daily fluctuations in positive affect positively co-vary with working memory performance.. <i>Emotion</i> , 2014, 14, 1-6.	1.8	71
46	Physical and emotional well-being and the balance of needed and received emotional support: Age differences in a daily diary study. <i>Social Science and Medicine</i> , 2013, 91, 67-75.	3.8	34
47	Life contexts make a difference: Emotional stability in younger and older adults.. <i>Psychology and Aging</i> , 2013, 28, 148-159.	1.6	82
48	The neural representation of intrusive thoughts. <i>Social Cognitive and Affective Neuroscience</i> , 2013, 8, 688-693.	3.0	20
49	Affective states contribute to trait reports of affective well-being.. <i>Emotion</i> , 2013, 13, 940-948.	1.8	35
50	Intraindividual Variability and Stability of Affect and Well-Being. <i>GeroPsych: the Journal of Gerontopsychology and Geriatric Psychiatry</i> , 2013, 26, 185-199.	0.5	69
51	Health is health is health? Age differences in intraindividual variability and in within-person versus between-person factor structures of self-reported health complaints.. <i>Psychology and Aging</i> , 2012, 27, 881-891.	1.6	19
52	Daily variability in working memory is coupled with negative affect: The role of attention and motivation.. <i>Emotion</i> , 2012, 12, 605-617.	1.8	144
53	Normal aging dampens the link between intrusive thoughts and negative affect in reaction to daily stressors.. <i>Psychology and Aging</i> , 2011, 26, 488-502.	1.6	64
54	Adult Age Differences in Covariation of Motivation and Working Memory Performance: Contrasting Between-Person and Within-Person Findings. <i>Research in Human Development</i> , 2010, 7, 61-78.	1.3	52

#	ARTICLE	IF	CITATIONS
55	Cognitive Enrichment in Old Age. GeroPsych: the Journal of Gerontopsychology and Geriatric Psychiatry, 2010, 23, 59-67.	0.5	53
