#	ARTICLE	IF	CITATIONS
1	Foot-and-mouth disease virus: a long known virus, but a current threat. <i>Veterinary Research</i> , 2001, 32, 1-30.	1.1	226
2	Bovine Enteroviruses as Indicators of Fecal Contamination. <i>Applied and Environmental Microbiology</i> , 2002, 68, 3455-3461.	1.4	103
3	Interleukin 2-dependent activation of tumor-specific cytotoxic T lymphocytes in vivo. <i>European Journal of Immunology</i> , 1991, 21, 851-854.	1.6	79
4	Survey of Bovine Enterovirus in Biological and Environmental Samples by a Highly Sensitive Real-Time Reverse Transcription-PCR. <i>Applied and Environmental Microbiology</i> , 2005, 71, 3536-3543.	1.4	77
5	Teschoviruses as Indicators of Porcine Fecal Contamination of Surface Water. <i>Applied and Environmental Microbiology</i> , 2003, 69, 6311-6315.	1.4	74
6	Immunogenicity and T cell recognition in swine of foot-and-mouth disease virus polymerase 3D. <i>Virology</i> , 2004, 322, 264-275.	1.1	57
7	The structural protein p54 is essential for African swine fever virus viability. <i>Virus Research</i> , 1996, 40, 161-167.	1.1	44
8	Leisure-time physical activity and prevalence of non-communicable pathologies and prescription medication in Spain. <i>PLoS ONE</i> , 2018, 13, e0191542.	1.1	29
9	Inhibition of tumor growth by histoincompatible cells expressing interleukin-2. <i>International Immunology</i> , 1992, 4, 1429-1436.	1.8	27
10	Heparan sulphate mediates swine vesicular disease virus attachment to the host cell. <i>Journal of General Virology</i> , 2004, 85, 653-663.	1.3	25
11	Isolation of the major IgE-binding protein from <i>Parietaria judaica</i> pollen using monoclonal antibodies. <i>Molecular Immunology</i> , 1985, 22, 1081-1089.	1.0	24
12	Cloning and characterization of a gene coding for a protein (KAP) associated with the kinetoplast of epimastigotes and amastigotes of <i>Trypanosoma cruzi</i> . <i>Molecular and Biochemical Parasitology</i> , 1990, 40, 233-243.	0.5	23
13	Joint association of physical activity and body mass index with cardiovascular risk: a nationwide population-based cross-sectional study. <i>European Journal of Preventive Cardiology</i> , 2022, 29, e50-e52.	0.8	22
14	Structure of Swine Vesicular Disease Virus: Mapping of Changes Occurring during Adaptation of Human Coxsackie B5 Virus To Infect Swine. <i>Journal of Virology</i> , 2003, 77, 9780-9789.	1.5	21
15	The N-Terminal Region of the VP1 Protein of Swine Vesicular Disease Virus Contains a Neutralization Site That Arises upon Cell Attachment and Is Involved in Viral Entry. <i>Journal of Virology</i> , 2001, 75, 1044-1047.	1.5	18
16	Molecular cloning, expression and immunological analysis of the capsid precursor polypeptide (P1) from swine vesicular disease virus. <i>Virus Research</i> , 1998, 57, 163-170.	1.1	15
17	Swine vesicular disease virus. Pathology of the disease and molecular characteristics of the virion. <i>Animal Health Research Reviews</i> , 2000, 1, 119-126.	1.4	14
18	Association between physical activity and cardiovascular risk factors: Dose and sex matter. <i>Journal of Sport and Health Science</i> , 2021, 10, 604-606.	3.3	11

#	ARTICLE	IF	CITATIONS
19	More recent swine vesicular disease virus isolates retain binding to coxsackie adenovirus receptor, but have lost the ability to bind human decay-accelerating factor (CD55). <i>Journal of General Virology</i> , 2005, 86, 1369-1377.	1.3	10
20	<i>Trypanosoma cruzi</i> : mechanisms of cell-invasion and intracellular survival. <i>Memorias Do Instituto Oswaldo Cruz</i> , 1988, 83, 452-455.	0.8	6
21	Isolation and Characterization of a 92-KD surface Molecule of <i>Trypanosoma Cruzi</i> Amastigotes Recognized by a Monoclonal Antibody that Induces Complement-Mediated Killing. <i>American Journal of Tropical Medicine and Hygiene</i> , 1991, 45, 619-628.	0.6	5
22	Crystallization and preliminary X-ray analysis of swine vesicular disease virus (SVDV). <i>Acta Crystallographica Section D: Biological Crystallography</i> , 2003, 59, 541-543.	2.5	3
23	Research Evaluation: Institutions versus individuals. <i>RIV Rassegna Italiana Di Valutazione</i> , 2013, , 55-65.	0.1	1
24	Detection of Enteroviruses. <i>Methods in Biotechnology</i> , 2006, , 153-169.	0.2	0
