#	ARTICLE	IF	CITATIONS
1	Preschool Children and Physical Activity. American Journal of Preventive Medicine, 2008, 34, 435-441.e7.	3.0	446
2	Tracking Physical Activity and Sedentary Behavior in Childhood. American Journal of Preventive Medicine, 2013, 44, 651-658.	3.0	414
3	A collaborative approach to adopting/adapting guidelines - The Australian 24-Hour Movement Guidelines for the early years (Birth to 5 years): an integration of physical activity, sedentary behavior, and sleep. BMC Public Health, 2017, 17, 869.	2.9	261
4	Preschoolers's Physical Activity, Screen Time, and Compliance with Recommendations. Medicine and Science in Sports and Exercise, 2012, 44, 458-465.	0.4	234
5	Objectively measured sedentary behaviour and health and development in children and adolescents: systematic review and meta-analysis. Obesity Reviews, 2016, 17, 330-344.	6.5	227
6	Systematic review of physical activity and cognitive development in early childhood. Journal of Science and Medicine in Sport, 2016, 19, 573-578.	1.3	202
7	Physical activity, sedentary behavior and their correlates in children with Autism Spectrum Disorder: A systematic review. PLoS ONE, 2017, 12, e0172482.	2.5	187
8	Correlates of sedentary behaviours in preschool children: a review. International Journal of Behavioral Nutrition and Physical Activity, 2010, 7, 66.	4.6	186
9	A Review of Preschool Children's Physical Activity and Sedentary Time Using Objective Measures. American Journal of Preventive Medicine, 2014, 47, 487-497.	3.0	151
10	Systematic review of sedentary behavior and cognitive development in early childhood. Preventive Medicine, 2015, 78, 115-122.	3.4	148
11	A systematic review of the prevalence of sedentary behavior during the after-school period among children aged 5-18 years. International Journal of Behavioral Nutrition and Physical Activity, 2016, 13, 93.	4.6	145
12	Early Childhood Electronic Media Use as a Predictor of Poorer Well-being. JAMA Pediatrics, 2014, 168, 485.	6.2	142
13	Predictive Validity and Classification Accuracy of ActiGraph Energy Expenditure Equations and Cut-Points in Young Children. PLoS ONE, 2013, 8, e79124.	2.5	122
14	Child, family and environmental correlates of children's motor skill proficiency. Journal of Science and Medicine in Sport, 2013, 16, 332-336.	1.3	107
15	Early childhood physical activity, sedentary behaviors and psychosocial well-being: A systematic review. Preventive Medicine, 2014, 62, 182-192.	3.4	101
16	Physical Activity During the Early Years. American Journal of Preventive Medicine, 2016, 51, 384-402.	3.0	98
17	Children's physical activity and screen time: qualitative comparison of views of parents of infants and preschool children. International Journal of Behavioral Nutrition and Physical Activity, 2012, 9, 152.	4.6	89
18	Correlates of Preschool Children's Physical Activity. American Journal of Preventive Medicine, 2012, 43, 159-167.	3.0	88

#	ARTICLE	IF	CITATIONS
19	Cross sectional associations of screen time and outdoor play with social skills in preschool children. PLoS ONE, 2018, 13, e0193700.	2.5	82
20	Assessing Volume of Accelerometry Data for Reliability in Preschool Children. Medicine and Science in Sports and Exercise, 2012, 44, 2436-2441.	0.4	79
21	5-Year Changes in Afterschool Physical Activity and Sedentary Behavior. American Journal of Preventive Medicine, 2013, 44, 605-611.	3.0	68
22	The HAPPY Study: Development and reliability of a parent survey to assess correlates of preschool children's physical activity. Journal of Science and Medicine in Sport, 2012, 15, 407-417.	1.3	67
23	Use of Electronic Games by Young Children and Fundamental Movement Skills?. Perceptual and Motor Skills, 2012, 114, 1023-1034.	1.3	60
24	Patterns of physical activity and sedentary behaviour in preschool children. International Journal of Behavioral Nutrition and Physical Activity, 2012, 9, 138.	4.6	58
25	Do the correlates of screen time and sedentary time differ in preschool children?. BMC Public Health, 2017, 17, 285.	2.9	57
26	Interventions to increase physical activity in children 0-5 years old: a systematic review, meta-analysis and realist synthesis. Obesity Reviews, 2019, 20, 75-87.	6.5	55
27	Interventions to reduce sedentary behaviour in 0-5-year-olds: a systematic review and meta-analysis of randomised controlled trials. British Journal of Sports Medicine, 2018, 52, 314-321.	6.7	54
28	Promoting gross motor skills and physical activity in childcare: A translational randomized controlled trial. Journal of Science and Medicine in Sport, 2016, 19, 744-749.	1.3	47
29	Physical activity and sedentary behavior across three time-points and associations with social skills in early childhood. BMC Public Health, 2019, 19, 27.	2.9	47
30	Contribution of the After-School Period to Children's Daily Participation in Physical Activity and Sedentary Behaviours. PLoS ONE, 2015, 10, e0140132.	2.5	44
31	Conceptual Understanding of Screen Media Parenting: Report of a Working Group. Childhood Obesity, 2013, 9, S-110-S-118.	1.5	39
32	Associations of Parental Rules and Socioeconomic Position With Preschool Children's Sedentary Behaviour and Screen Time. Journal of Physical Activity and Health, 2015, 12, 515-521.	2.0	38
33	Prospective associations with physiological, psychosocial and educational outcomes of meeting Australian 24-Hour Movement Guidelines for the Early Years. International Journal of Behavioral Nutrition and Physical Activity, 2020, 17, 36.	4.6	37
34	The correlates of preschoolers' compliance with screen recommendations exist across multiple domains. Preventive Medicine, 2013, 57, 212-219.	3.4	36
35	Preschool and childcare center characteristics associated with children's physical activity during care hours: an observational study. International Journal of Behavioral Nutrition and Physical Activity, 2016, 13, 117.	4.6	34
36	Does Preschool Physical Activity and Electronic Media Use Predict Later Social and Emotional Skills at 6 to 8 Years? A Cohort Study. Journal of Physical Activity and Health, 2017, 14, 308-316.	2.0	31

#	ARTICLE	IF	CITATIONS
37	Influences on Preschool Children's Physical Activity. Family and Community Health, 2011, 34, 39-50.	1.1	30
38	The correlates of after-school sedentary behavior among children aged 5â€“18 years: a systematic review. BMC Public Health, 2015, 16, 58.	2.9	30
39	Feasibility and Efficacy of A Parent-Focused, Text Messageâ€‘Delivered Intervention to Reduce Sedentary Behavior in 2- to 4-Year-Old Children (Mini Movers): Pilot Randomized Controlled Trial. JMIR MHealth and UHealth, 2018, 6, e39.	3.7	30
40	Developing Intervention Strategies to Optimise Body Composition in Early Childhood in South Africa. BioMed Research International, 2017, 2017, 1-13.	1.9	28
41	Wrist Acceleration Cut Points for Moderate-to-Vigorous Physical Activity in Youth. Medicine and Science in Sports and Exercise, 2018, 50, 609-616.	0.4	28
42	Reducing electronic media use in 2â€“3 year-old children: feasibility and efficacy of the Family@play pilot randomised controlled trial. BMC Public Health, 2015, 15, 779.	2.9	27
43	Increasing physical activity among young children from disadvantaged communities: study protocol of a group randomised controlled effectiveness trial. BMC Public Health, 2016, 16, 1095.	2.9	27
44	Wrist Accelerometer Cut Points for Classifying Sedentary Behavior in Children. Medicine and Science in Sports and Exercise, 2017, 49, 813-822.	0.4	26
45	Validation of activPAL Defined Sedentary Time and Breaks in Sedentary Time in 4- to 6-Year-Olds. Pediatric Exercise Science, 2014, 26, 110-117.	1.0	25
46	Mothersâ€™ and fathersâ€™ perceptions of the risks and benefits of screen time and physical activity during early childhood: a qualitative study. BMC Public Health, 2018, 18, 1271.	2.9	25
47	Gross motor skills of South African preschool-aged children across different income settings. Journal of Science and Medicine in Sport, 2019, 22, 689-694.	1.3	25
48	Longitudinal levels and bouts of objectively measured sedentary time among young Australian children in the HAPPY study. Journal of Science and Medicine in Sport, 2016, 19, 232-236.	1.3	24
49	Evaluation of Actical equations and thresholds to predict physical activity intensity in young children. Journal of Sports Sciences, 2015, 33, 498-506.	2.0	23
50	Validation and calibration of the activPAL, for estimating METs and physical activity in 4â€“6 year olds. Journal of Science and Medicine in Sport, 2014, 17, 602-606.	1.3	21
51	Young Children with ASD Participate in the Same Level of Physical Activity as Children Without ASD: Implications for Early Intervention to Maintain Good Health. Journal of Autism and Developmental Disorders, 2019, 49, 3278-3289.	2.7	21
52	What mums think matters: A mediating model of maternal perceptions of the impact of screen time on preschoolers' actual screen time. Preventive Medicine Reports, 2017, 6, 339-345.	1.8	20
53	Pictorial Scale of Physical Self-Concept for Younger Children (P-PSC-C): A Feasibility Study. Journal of Motor Learning and Development, 2018, 6, S391-S402.	0.4	20
54	Practicalities and Research Considerations for Conducting Childhood Obesity Prevention Interventions with Families. Children, 2016, 3, 24.	1.5	17
