SANDY LACK

#	Article	IF	CITATIONS
1	Assessment of functional capacity before major non-cardiac surgery: an international, prospective cohort study. Lancet, The, 2018, 391, 2631-2640.	6.3	317
2	Perioperative cardiopulmonary exercise testing (CPET): consensus clinical guidelines on indications, organization, conduct, and physiological interpretation. British Journal of Anaesthesia, 2018, 120, 484-500.	1.5	313
3	Effect of prehabilitation on objectively measured physical fitness after neoadjuvant treatment in preoperative rectal cancer patients: a blinded interventional pilot study. British Journal of Anaesthesia, 2015, 114, 244-251.	1.5	273
4	Cardiopulmonary exercise variables are associated with postoperative morbidity after major colonic surgery: a prospective blinded observational study. British Journal of Anaesthesia, 2014, 112, 665-671.	1.5	143
5	Preoperative aerobic exercise training in elective intra-cavity surgery: a systematic review. British Journal of Anaesthesia, 2013, 110, 679-689.	1.5	114
6	Ventilatory Responses to Inhaled Carbon Dioxide, Hypoxia, and Exercise in Idiopathic Hyperventilation. American Journal of Respiratory and Critical Care Medicine, 2004, 170, 118-125.	2.5	74
7	The description of cough sounds by healthcare professionals. Cough, 2006, 2, 1.	2.7	64
8	Exercise prehabilitation may lead to augmented tumor regression following neoadjuvant chemoradiotherapy in locally advanced rectal cancer. Acta Oncológica, 2019, 58, 588-595.	0.8	55
9	Multiphasic Prehabilitation Across the Cancer Continuum: A Narrative Review and Conceptual Framework. Frontiers in Oncology, 2020, 10, 598425.	1.3	45
10	Exercise-Induced Systemic Venous Hypertension in the Fontan Circulation. American Journal of Cardiology, 2016, 117, 1667-1671.	0.7	44
11	A systematic review of the safety and efficacy of aerobic exercise during cytotoxic chemotherapy treatment. Supportive Care in Cancer, 2018, 26, 3337-3351.	1.0	44
12	Myosteatosis is associated with poor physical fitness in patients undergoing hepatopancreatobiliary surgery. Journal of Cachexia, Sarcopenia and Muscle, 2019, 10, 860-871.	2.9	42
13	Patients' perceptions of quality of life during active treatment for locally advanced rectal cancer: the importance of preoperative exercise. Supportive Care in Cancer, 2013, 21, 3345-3353.	1.0	40
14	The Effect of Neoadjuvant Chemoradiotherapy on Whole-Body Physical Fitness and Skeletal Muscle Mitochondrial Oxidative Phosphorylation In Vivo in Locally Advanced Rectal Cancer Patients – An Observational Pilot Study. PLoS ONE, 2014, 9, e111526.	1.1	33
15	Cardiopulmonary exercise testing before liver surgery. Journal of Surgical Oncology, 2014, 110, 439-444.	0.8	31
16	Physical activity levels in locally advanced rectal cancer patients following neoadjuvant chemoradiotherapy and an exercise training programme before surgery: a pilot study. Perioperative Medicine (London, England), 2017, 6, 3.	0.6	28
17	Prehabilitation before surgery: Is it for all patients?. Bailliere's Best Practice and Research in Clinical Anaesthesiology, 2021, 35, 507-516.	1.7	28
18	The effects of exercise on pain, fatigue, insomnia, and health perceptions in patients with operable advanced stage rectal cancer prior to surgery: a pilot trial. BMC Cancer, 2017, 17, 153.	1.1	26

SANDY JACK

#	Article	IF	CITATIONS
19	Behavioral Influences and Physiological Indices of Ventilatory Control in Subjects with Idiopathic Hyperventilation. Behavior Modification, 2003, 27, 637-652.	1.1	24
20	Exercise interventions for people undergoing multimodal cancer treatment that includes surgery. The Cochrane Library, 2018, 2018, CD012280.	1.5	23
21	Comparison of oxygen uptake during arm or leg cardiopulmonary exercise testing in vascular surgery patients and control subjects. British Journal of Anaesthesia, 2014, 112, 57-65.	1.5	22
22	From Theory to Practice: An International Approach to Establishing Prehabilitation Programmes. Current Anesthesiology Reports, 2022, 12, 129-137.	0.9	20
23	Timing of surgery following neoadjuvant chemoradiotherapy in locally advanced rectal cancer – A comparison of magnetic resonance imaging at two time points and histopathological responses. European Journal of Surgical Oncology, 2016, 42, 1350-1358.	0.5	19
24	The effects of neoadjuvant chemoradiotherapy and an in-hospital exercise training programme on physical fitness and quality of life in locally advanced rectal cancer patients (The EMPOWER Trial): study protocol for a randomised controlled trial. Trials, 2016, 17, 24.	0.7	17
25	The effects of neoadjuvant chemoradiotherapy and an in-hospital exercise training programme on physical fitness and quality of life in locally advanced rectal cancer patients: a randomised controlled trial (The EMPOWER Trial). Perioperative Medicine (London, England), 2021, 10, 23.	0.6	17
26	Exploring the experience of adhering to a prescribed pre-surgical exercise program for patients with advanced rectal cancer: A phenomenological study. Psychology of Sport and Exercise, 2015, 16, 88-95.	1.1	14
27	SafeFit Trial: virtual clinics to deliver a multimodal intervention to improve psychological and physical well-being in people with cancer. Protocol of a COVID-19 targeted non-randomised phase III trial. BMJ Open, 2021, 11, e048175.	0.8	12
28	Systematic review of evidence for relationships between physiological and CT indices of small airways and clinical outcomes in COPD. Respiratory Medicine, 2018, 139, 117-125.	1.3	11
29	How is physical activity measured in lung cancer?A systematic review of outcome measures and their psychometric properties. Respirology, 2017, 22, 263-277.	1.3	9
30	Correlation between Perceived Asthma Control and Thoraco-Abdominal Asynchrony in Primary Care Patients Diagnosed with Asthma. Journal of Asthma, 2012, 49, 822-829.	0.9	8
31	The Effect of beta-blockade on objectively measured physical fitness in patients with abdominal aortic aneurysms – A blinded interventional study. British Journal of Anaesthesia, 2015, 114, 878-885.	1.5	8
32	Cardiopulmonary exercise testing has greater prognostic value than sarcopenia in oesophagoâ€gastric cancer patients undergoing neoadjuvant therapy and surgical resection. Journal of Surgical Oncology, 2021, 124, 1306-1316.	0.8	8
33	Physical and Psychological Health Behavior Changes During the COVID-19 Pandemic that May Inform Surgical Prehabilitation: a Narrative Review. Current Anesthesiology Reports, 2022, 12, 109-124.	0.9	8
34	No effect of glutamine ingestion on indices of oxidative metabolism in stable COPD. Respiratory Physiology and Neurobiology, 2011, 177, 41-46.	0.7	7
35	Normalizing <scp><scp>CO₂</scp> in chronic hyperventilation by means of a novel breathing mask: a pilot study. Clinical Respiratory Journal, 2013, 7, 359-366.</scp>	0.6	6
36	Exercise Training Induces a Shift in Extracellular Redox Status with Alterations in the Pulmonary and Systemic Redox Landscape in Asthma. Antioxidants, 2021, 10, 1926.	2.2	5

#	Article	IF	CITATIONS
37	The Wessex Fit-4-Cancer Surgery Trial (WesFit): a protocol for a factorial-design, pragmatic randomised-controlled trial investigating the effects of a multi-modal prehabilitation programme in patients undergoing elective major intra–cavity cancer surgery. F1000Research, 0, 10, 952.	0.8	4
38	Exercise interventions for people undergoing multimodal cancer treatment that includes surgery. The Cochrane Library, 2016, , .	1.5	2
39	Effect of β-blockade on lung function, exercise performance and dynamic hyperinflation in people with arterial vascular disease with and without COPD. BMJ Open Respiratory Research, 2017, 4, e000164.	1.2	2
40	The effects of cancer therapies on physical fitness before oesophagogastric cancer surgery: a prospective, blinded, multi-centre, observational, cohort study. NIHR Open Research, 2021, 1, 1.	0.0	2
41	Interval Exercise Training in Poorly Controlled Asthma: Preliminary Clinical Trial Results. , 2019, , .		2
42	Exercise Regimen Post Chemoradiotherapy In Patients With Operable Rectal Cancer (empower). Medicine and Science in Sports and Exercise, 2014, 46, 365-366.	0.2	1
43	The Effect Of Neoadjuvant Chemoradiotherapy On Physical Activity In Operable Rectal Cancer Patients. , 2012, , .		0
44	The effect of neoadjuvant chemoradiotherapy and prehabilitation on physical activity in operable rectal cancer patients. Journal of Geriatric Oncology, 2013, 4, S42-S43.	0.5	0
45	A pilot study of respiratory and nutritional outcomes of moderate/late preterm birth. , 2015, , .		0
46	Abstract 1488: Altered skeletal muscle mitochondrial function and redox biology with chemotherapy and exercise in a colorectal cancer mouse model. , 2017, , .		0
47	Exercise moderates inflammation in asthma through increased redox buffering capacity. , 2020, , .		0
48	Feasibility of a cardiopulmonary exercise test (CPET) derived high-intensity interval training programme (HIIT) in idiopathic pulmonary fibrosis (IPF). , 2020, , .		0
