IAMES MODTON

#	Article	IF	CITATIONS
1	An audit of performance nutrition services in English soccer academies: implications for optimising player development. Science and Medicine in Football, 2023, 7, 146-156.	1.0	6
2	An audit of hormonal contraceptive use in Women's Super League soccer players; implications on symptomology. Science and Medicine in Football, 2022, 6, 153-158.	1.0	12
3	Fuelling the female athlete: Carbohydrate and protein recommendations. European Journal of Sport Science, 2022, 22, 684-696.	1.4	20
4	Carbohydrate for endurance athletes in competition questionnaire (CEAC-Q): validation of a practical and time-efficient tool for knowledge assessment. Sport Sciences for Health, 2022, 18, 235-247.	0.4	4
5	The genetic association with injury risk in male academy soccer players depends on maturity status. Scandinavian Journal of Medicine and Science in Sports, 2022, 32, 338-350.	1.3	12
6	A pilot sequential multiple assignment randomized trial (SMART) protocol for developing an adaptive coaching intervention around a mobile application for athletes to improve carbohydrate periodization behavior. Contemporary Clinical Trials Communications, 2022, 26, 100899.	0.5	2
7	Physical loading in professional soccer players: Implications for contemporary guidelines to encompass carbohydrate periodization. Journal of Sports Sciences, 2022, 40, 1000-1019.	1.0	9
8	Energy Expenditure of Female International Standard Soccer Players: A Doubly Labeled Water Investigation. Medicine and Science in Sports and Exercise, 2022, 54, 769-779.	0.2	10
9	¹³ C-glucose-fructose labeling reveals comparable exogenous CHO oxidation during exercise when consuming 120 g/h in fluid, gel, jelly chew, or coingestion. Journal of Applied Physiology, 2022, 132, 1394-1406.	1.2	9
10	Carbohydrate fear, skinfold targets and body image issues: a qualitative analysis of player and stakeholder perceptions of the nutrition culture within elite female soccer. Science and Medicine in Football, 2022, 6, 675-685.	1.0	14
11	Montmorency tart cherry juice does not reduce markers of muscle soreness, function and inflammation following professional male rugby League matchâ€play. European Journal of Sport Science, 2021, 21, 1003-1012.	1.4	16
12	Energy Requirements of Male Academy Soccer Players from the English Premier League. Medicine and Science in Sports and Exercise, 2021, 53, 200-210.	0.2	21
13	UEFA expert group statement on nutrition in elite football. Current evidence to inform practical recommendations and guide future research. British Journal of Sports Medicine, 2021, 55, 416-416.	3.1	111
14	Come Back Skinfolds, All Is Forgiven: A Narrative Review of the Efficacy of Common Body Composition Methods in Applied Sports Practice. Nutrients, 2021, 13, 1075.	1.7	76
15	An Assessment of the Validity of the Remote Food Photography Method (Termed Snap-N-Send) in Experienced and Inexperienced Sport Nutritionists. International Journal of Sport Nutrition and Exercise Metabolism, 2021, 31, 125-134.	1.0	9
16	Seasonal training and match load and micro-cycle periodization in male Premier League academy soccer players. Journal of Sports Sciences, 2021, 39, 1-12.	1.0	20
17	Quantification of training load distribution in mixed martial arts athletes: A lack of periodisation and load management. PLoS ONE, 2021, 16, e0251266.	1.1	22
18	Post-exercise recovery for the endurance athlete with type 1 diabetes: a consensus statement. Lancet Diabetes and Endocrinology,the, 2021, 9, 304-317.	5.5	18

#	Article	IF	CITATIONS
19	Carbohydrate improves exercise capacity but does not affect subcellular lipid droplet morphology, AMPK and p53 signalling in human skeletal muscle. Journal of Physiology, 2021, 599, 2823-2849.	1.3	16
20	Four Weeks of Probiotic Supplementation Alters the Metabolic Perturbations Induced by Marathon Running: Insight from Metabolomics. Metabolites, 2021, 11, 535.	1.3	7
21	"Fuel for the Damage Induced― Untargeted Metabolomics in Elite Rugby Union Match Play. Metabolites, 2021, 11, 544.	1.3	7
22	The Psychological and Physiological Consequences of Low Energy Availability in a Male Combat Sport Athlete. Medicine and Science in Sports and Exercise, 2021, 53, 673-683.	0.2	28
23	Three weeks of a home-based "sleep low-train low―intervention improves functional threshold power in trained cyclists: A feasibility study. PLoS ONE, 2021, 16, e0260959.	1.1	4
24	DXAâ€derived estimates of energy balance and its relationship with changes in body composition across a season in team sport athletes. European Journal of Sport Science, 2020, 20, 859-867.	1.4	11
25	Daily Changes of Resting Metabolic Rate in Elite Rugby Union Players. Medicine and Science in Sports and Exercise, 2020, 52, 637-644.	0.2	14
26	Development of anthropometric characteristics in professional Rugby League players: Is there too much emphasis on the preâ€season period?. European Journal of Sport Science, 2020, 20, 1013-1022.	1.4	1
27	The physical demands of mixed martial arts: A narrative review using the ARMSS model to provide a hierarchy of evidence. Journal of Sports Sciences, 2020, 38, 2819-2841.	1.0	19
28	Graded reductions in preâ€exercise glycogen concentration do not augment exerciseâ€induced nuclear AMPK and PGCâ€iα protein content in human muscle. Experimental Physiology, 2020, 105, 1882-1894.	0.9	8
29	Achieving energy balance with a highâ€fat meal does not enhance skeletal muscle adaptation and impairs glycaemic response in a sleep″ow training model. Experimental Physiology, 2020, 105, 1778-1791.	0.9	13
30	PGC-1α alternative promoter (Exon 1b) controls augmentation of total PGC-1α gene expression in response to cold water immersion and low glycogen availability. European Journal of Applied Physiology, 2020, 120, 2487-2493.	1.2	6
31	Energy and Macronutrient Considerations for Young Athletes. Strength and Conditioning Journal, 2020, 42, 109-119.	0.7	15
32	Glycogen Utilization during Running: Intensity, Sex, and Muscle-Specific Responses. Medicine and Science in Sports and Exercise, 2020, 52, 1966-1975.	0.2	16
33	Cross-sectional comparison of body composition and resting metabolic rate in Premier League academy soccer players: Implications for growth and maturation. Journal of Sports Sciences, 2020, 38, 1326-1334.	1.0	21
34	An injury audit in high-level male youth soccer players from English, Spanish, Uruguayan and Brazilian academies. Physical Therapy in Sport, 2020, 44, 53-60.	0.8	27
35	Case Study: Extreme Weight Making Causes Relative Energy Deficiency, Dehydration, and Acute Kidney Injury in a Male Mixed Martial Arts Athlete. International Journal of Sport Nutrition and Exercise Metabolism, 2019, 29, 331-338.	1.0	42
36	Performance Nutrition in the digital era – An exploratory study into the use of social media by sports nutritionists. Journal of Sports Sciences, 2019, 37, 2467-2474.	1.0	12

#	Article	IF	CITATIONS
37	Postâ€exercise carbohydrate and energy availability induce independent effects on skeletal muscle cell signalling and bone turnover: implications for training adaptation. Journal of Physiology, 2019, 597, 4779-4796.	1.3	43
38	Reply to "Letter to the Editor Re: Scott S.N., et al. Nutrients 2019, 11(5), 1022― Nutrients, 2019, 11, 2699.	1.7	0
39	From Paper to Podium: Quantifying the Translational Potential of Performance Nutrition Research. Sports Medicine, 2019, 49, 25-37.	3.1	31
40	Low preâ€exercise muscle glycogen availability offsets the effect of postâ€exercise cold water immersion in augmenting PGCâ€1α gene expression. Physiological Reports, 2019, 7, e14082.	0.7	5
41	Carbohydrate Restriction in Type 1 Diabetes: A Realistic Therapy for Improved Glycaemic Control and Athletic Performance?. Nutrients, 2019, 11, 1022.	1.7	37
42	Graded reductions in preexercise muscle glycogen impair exercise capacity but do not augment skeletal muscle cell signaling: implications for CHO periodization. Journal of Applied Physiology, 2019, 126, 1587-1597.	1.2	31
43	Case Study: Muscle Atrophy, Hypertrophy, and Energy Expenditure of a Premier League Soccer Player During Rehabilitation From Anterior Cruciate Ligament Injury. International Journal of Sport Nutrition and Exercise Metabolism, 2019, 29, 559-566.	1.0	8
44	Four weeks of probiotic supplementation reduces GI symptoms during a marathon race. European Journal of Applied Physiology, 2019, 119, 1491-1501.	1.2	76
45	Ultrasound Does Not Detect Acute Changes in Glycogen in Vastus Lateralis of Man. Medicine and Science in Sports and Exercise, 2019, 51, 2286-2293.	0.2	13
46	Carbohydrate Metabolism During Exercise. , 2019, , 251-270.		1
47	Assessment of Energy Expenditure of a Professional Goalkeeper From the English Premier League Using the Doubly Labeled Water Method. International Journal of Sports Physiology and Performance, 2019, 14, 681-684.	1.1	14
48	A Framework for Periodized Nutrition for Athletics. International Journal of Sport Nutrition and Exercise Metabolism, 2019, 29, 141-151.	1.0	63
49	The change in external match loads and characteristics for a newly promoted European super league rugby league team over a three season period. Science and Medicine in Football, 2018, 2, 309-314.	1.0	3
50	Fuel for the Work Required: A Theoretical Framework for Carbohydrate Periodization and the Glycogen Threshold Hypothesis. Sports Medicine, 2018, 48, 1031-1048.	3.1	146
51	Male Flat Jockeys Do Not Display Deteriorations in Bone Density or Resting Metabolic Rate in Accordance With Race Riding Experience: Implications for RED-S. International Journal of Sport Nutrition and Exercise Metabolism, 2018, 28, 434-439.	1.0	13
52	Isometric maximal voluntary force evaluated using an isometric mid-thigh pull differentiates English Premier League youth soccer players from a maturity-matched control group. Science and Medicine in Football, 2018, 2, 209-215.	1.0	15
53	Training duration may not be a predisposing factor in potential maladaptations in talent development programmes that promote early specialisation in elite youth soccer. International Journal of Sports Science and Coaching, 2018, 13, 674-678.	0.7	12
54	Reliability of "in-season―fitness assessments in youth elite soccer players: a working model for practitioners and coaches. Science and Medicine in Football, 2018, 2, 177-183.	1.0	24

#	Article	IF	CITATIONS
55	Energy expenditure in professional flat jockeys using doubly labelled water during the racing season: Implications for body weight management. European Journal of Sport Science, 2018, 18, 235-242.	1.4	6
56	Toward a Common Understanding of Diet–Exercise Strategies to Manipulate Fuel Availability for Training and Competition Preparation in Endurance Sport. International Journal of Sport Nutrition and Exercise Metabolism, 2018, 28, 451-463.	1.0	85
57	Whey Protein Augments Leucinemia and Postexercise p70S6K1 Activity Compared With a Hydrolyzed Collagen Blend When in Recovery From Training With Low Carbohydrate Availability. International Journal of Sport Nutrition and Exercise Metabolism, 2018, 28, 651-659.	1.0	6
58	Relative Energy Deficiency in Sport in Male Athletes: A Commentary on Its Presentation Among Selected Groups of Male Athletes. International Journal of Sport Nutrition and Exercise Metabolism, 2018, 28, 364-374.	1.0	81
59	Regulation of Muscle Glycogen Metabolism during Exercise: Implications for Endurance Performance and Training Adaptations. Nutrients, 2018, 10, 298.	1.7	144
60	Prevalence, Severity and Potential Nutritional Causes of Gastrointestinal Symptoms during a Marathon in Recreational Runners. Nutrients, 2018, 10, 811.	1.7	30
61	Energy Intake and Expenditure of Professional Soccer Players of the English Premier League: Evidence of Carbohydrate Periodization. International Journal of Sport Nutrition and Exercise Metabolism, 2017, 27, 228-238.	1.0	83
62	Free-sugar, total-sugar, fibre, and micronutrient intake within elite youth British soccer players: a nutritional transition from schoolboy to fulltime soccer player. Applied Physiology, Nutrition and Metabolism, 2017, 42, 517-522.	0.9	5
63	Acute high-intensity interval running increases markers of gastrointestinal damage and permeability but not gastrointestinal symptoms. Applied Physiology, Nutrition and Metabolism, 2017, 42, 941-947.	0.9	45
64	Postexercise cold water immersion modulates skeletal muscle PGC-11± mRNA expression in immersed and nonimmersed limbs: evidence of systemic regulation. Journal of Applied Physiology, 2017, 123, 451-459.	1.2	28
65	The horseracing industry's perception of nutritional and weight-making practices of professional jockeys. Qualitative Research in Sport, Exercise and Health, 2017, 9, 568-582.	3.3	14
66	Implementing concurrent-training and nutritional strategies in professional football: a complex challenge for coaches and practitioners. Science and Medicine in Football, 2017, 1, 65-73.	1.0	11
67	Daily Distribution of Macronutrient Intakes of Professional Soccer Players From the English Premier League. International Journal of Sport Nutrition and Exercise Metabolism, 2017, 27, 491-498.	1.0	24
68	Age- and Activity-Related Differences in the Abundance of Myosin Essential and Regulatory Light Chains in Human Muscle. Proteomes, 2016, 4, 15.	1.7	10
69	Postexercise High-Fat Feeding Suppresses p70S6K1 Activity in Human Skeletal Muscle. Medicine and Science in Sports and Exercise, 2016, 48, 2108-2117.	0.2	26
70	Fuel for the work required: a practical approach to amalgamating train-low paradigms for endurance athletes. Physiological Reports, 2016, 4, e12803.	0.7	79
71	Muscle glycogen utilisation during Rugby match play: Effects of pre-game carbohydrate. Journal of Science and Medicine in Sport, 2016, 19, 1033-1038.	0.6	31
72	Quantification of Seasonal-Long Physical Load in Soccer Players With Different Starting Status From the English Premier League: Implications for Maintaining Squad Physical Fitness. International Journal of Sports Physiology and Performance, 2016, 11, 1038-1046.	1.1	105

#	Article	IF	CITATIONS
73	Passive and post-exercise cold-water immersion augments PGC-1α and VEGF expression in human skeletal muscle. European Journal of Applied Physiology, 2016, 116, 2315-2326.	1.2	40
74	Daily Distribution of Carbohydrate, Protein and Fat Intake in Elite Youth Academy Soccer Players Over a 7-Day Training Period. International Journal of Sport Nutrition and Exercise Metabolism, 2016, 26, 473-480.	1.0	27
75	Carbohydrate mouth rinse and caffeine improves highâ€intensity interval running capacity when carbohydrate restricted. European Journal of Sport Science, 2016, 16, 560-568.	1.4	41
76	New strategies in sport nutrition to increase exercise performance. Free Radical Biology and Medicine, 2016, 98, 144-158.	1.3	132
77	Altering fatty acid availability does not impair prolonged, continuous running to fatigue: evidence for carbohydrate dependence. Journal of Applied Physiology, 2016, 120, 107-113.	1.2	22
78	Quantification of training load during one-, two- and three-game week schedules in professional soccer players from the English Premier League: implications for carbohydrate periodisation. Journal of Sports Sciences, 2016, 34, 1250-1259.	1.0	131
79	Season-long increases in perceived muscle soreness in professional rugby league players: role of player position, match characteristics and playing surface. Journal of Sports Sciences, 2016, 34, 1067-1072.	1.0	21
80	Extreme Variation of Nutritional Composition and Osmolality of Commercially Available Carbohydrate Energy Gels. International Journal of Sport Nutrition and Exercise Metabolism, 2015, 25, 504-509.	1.0	6
81	Quantification of Training Load, Energy Intake, and Physiological Adaptations During a Rugby Preseason. Journal of Strength and Conditioning Research, 2015, 29, 534-544.	1.0	68
82	Exercise improves mitochondrial and redox-regulated stress responses in the elderly: better late than never!. Biogerontology, 2015, 16, 249-264.	2.0	52
83	Seasonal Training-Load Quantification in Elite English Premier League Soccer Players. International Journal of Sports Physiology and Performance, 2015, 10, 489-497.	1.1	250
84	Position specific differences in the anthropometric characteristics of elite European Super League rugby players. European Journal of Sport Science, 2015, 15, 523-529.	1.4	23
85	Current controversies in sports nutrition. European Journal of Sport Science, 2015, 15, 1-2.	1.4	21
86	Body composition assessment of English Premier League soccer players: a comparative DXA analysis of first team, U21 and U18 squads. Journal of Sports Sciences, 2015, 33, 1799-1806.	1.0	60
87	The effect of concurrent training organisation in youth elite soccer players. European Journal of Applied Physiology, 2015, 115, 2367-2381.	1.2	36
88	Acute simulated soccer-specific training increases PGC-1α mRNA expression in human skeletal muscle. Journal of Sports Sciences, 2015, 33, 1493-1503.	1.0	10
89	Influence of vitamin C and vitamin E on redox signaling: Implications for exercise adaptations. Free Radical Biology and Medicine, 2015, 84, 65-76.	1.3	94
90	Elite male Flat jockeys display lower bone density and lower resting metabolic rate than their female counterparts: implications for athlete welfare. Applied Physiology, Nutrition and Metabolism, 2015, 40, 1318-1320.	0.9	23

#	Article	IF	CITATIONS
91	The physical demands of Super League rugby: Experiences of a newly promoted franchise. European Journal of Sport Science, 2015, 15, 505-513.	1.4	13
92	Fasted Exercise and Increased Dietary Protein Reduces Body Fat and Improves Strength in Jockeys. International Journal of Sports Medicine, 2015, 36, 1008-1014.	0.8	20
93	Energy intake and expenditure assessed â€`inâ€season' in an elite European rugby union squad. European Journal of Sport Science, 2015, 15, 469-479.	1.4	57
94	Leucine-enriched protein feeding does not impair exercise-induced free fatty acid availability and lipid oxidation: beneficial implications for training in carbohydrate-restricted states. Amino Acids, 2015, 47, 407-416.	1.2	28
95	Carbohydrate availability and exercise training adaptation: Too much of a good thing?. European Journal of Sport Science, 2015, 15, 3-12.	1.4	169
96	An Intensive Winter Fixture Schedule Induces a Transient Fall in Salivary IgA in English Premier League Soccer Players. Research in Sports Medicine, 2014, 22, 346-354.	0.7	48
97	Case Study: Muscle Atrophy and Hypertrophy in a Premier League Soccer Player During Rehabilitation From ACL Injury. International Journal of Sport Nutrition and Exercise Metabolism, 2014, 24, 543-552.	1.0	36
98	Self-selecting Fluid Intake while Maintaining High Carbohydrate Availability Does not Impair Half-marathon Performance. International Journal of Sports Medicine, 2014, 35, 1216-1222.	0.8	24
99	Ramping up the signal: promoting endurance training adaptation in skeletal muscle by nutritional manipulation. Clinical and Experimental Pharmacology and Physiology, 2014, 41, 608-613.	0.9	52
100	Application of the [l̂³- ³² P] ATP kinase assay to study anabolic signaling in human skeletal muscle. Journal of Applied Physiology, 2014, 116, 504-513.	1.2	34
101	Lifelong training preserves some redox-regulated adaptive responses after an acute exercise stimulus in aged human skeletal muscle. Free Radical Biology and Medicine, 2014, 70, 23-32.	1.3	74
102	Weight-Making Strategies in Professional Jockeys: Implications for Physical and Mental Health and Well-Being. Sports Medicine, 2014, 44, 785-796.	3.1	51
103	The Emerging Role of p53 in Exercise Metabolism. Sports Medicine, 2014, 44, 303-309.	3.1	74
104	Rapid weight-loss impairs simulated riding performance and strength in jockeys: implications for making-weight. Journal of Sports Sciences, 2014, 32, 383-391.	1.0	45
105	Lifelong endurance training attenuates age-related genotoxic stress in human skeletal muscle. Longevity & Healthspan, 2013, 2, 11.	6.7	30
106	Protein ingestion does not impair exercise-induced AMPK signalling when in a glycogen-depleted state: implications for train-low compete-high. European Journal of Applied Physiology, 2013, 113, 1457-1468.	1.2	37
107	p53: the tumour suppressor turns mitochondrial regulator. Journal of Physiology, 2013, 591, 3455-3456.	1.3	3
108	Assessment of energy expenditure in elite jockeys during simulated race riding and a working day: implications for making weight. Applied Physiology, Nutrition and Metabolism, 2013, 38, 415-420.	0.9	23

#	Article	IF	CITATIONS
109	Markers of Bone Health, Renal Function, Liver Function, Anthropometry and Perception of Mood: A Comparison between Flat and National Hunt Jockeys. International Journal of Sports Medicine, 2013, 34, 453-459.	0.8	25
110	Reduced carbohydrate availability enhances exercise-induced p53 signaling in human skeletal muscle: implications for mitochondrial biogenesis. American Journal of Physiology - Regulatory Integrative and Comparative Physiology, 2013, 304, R450-R458.	0.9	123
111	Label-Free LC-MS Profiling of Skeletal Muscle Reveals Heart-Type Fatty Acid Binding Protein as a Candidate Biomarker of Aerobic Capacity. Proteomes, 2013, 1, 290-308.	1.7	30
112	Matched work high-intensity interval and continuous running induce similar increases in PGC-1α mRNA, AMPK, p38, and p53 phosphorylation in human skeletal muscle. Journal of Applied Physiology, 2012, 112, 1135-1143.	1.2	155
113	An Alternative Dietary Strategy to Make Weight While Improving Mood, Decreasing Body Fat, and Not Dehydrating: A Case Study of a Professional Jockey. International Journal of Sport Nutrition and Exercise Metabolism, 2012, 22, 225-231.	1.0	22
114	PGC-1α transcriptional response and mitochondrial adaptation to acute exercise is maintained in skeletal muscle of sedentary elderly males. Biogerontology, 2012, 13, 621-631.	2.0	47
115	High-intensity interval running is perceived to be more enjoyable than moderate-intensity continuous exercise: Implications for exercise adherence. Journal of Sports Sciences, 2011, 29, 547-553.	1.0	402
116	Vitamin C Consumption Does Not Impair Training-Induced Improvements in Exercise Performance. International Journal of Sports Physiology and Performance, 2011, 6, 58-69.	1.1	46
117	Making Weight in Combat Sports. Strength and Conditioning Journal, 2011, 33, 25-39.	0.7	80
118	Making the Weight: A Case Study From Professional Boxing. International Journal of Sport Nutrition and Exercise Metabolism, 2010, 20, 80-85.	1.0	69
119	Reviewing scientific manuscripts: how much statistical knowledge should a reviewer really know?. American Journal of Physiology - Advances in Physiology Education, 2009, 33, 7-9.	0.8	31
120	Reduced carbohydrate availability does not modulate training-induced heat shock protein adaptations but does upregulate oxidative enzyme activity in human skeletal muscle. Journal of Applied Physiology, 2009, 106, 1513-1521.	1.2	157
121	Critical reflections from a neophyte lecturer in higher education: a selfâ€narrative from an exercise †physiologist'!. Reflective Practice, 2009, 10, 233-243.	0.7	7
122	Exercise training–induced genderâ€specific heat shock protein adaptations in human skeletal muscle. Muscle and Nerve, 2009, 39, 230-233.	1.0	34
123	Proteomic investigation of changes in human vastus lateralis muscle in response to intervalâ€exercise training. Proteomics, 2009, 9, 5155-5174.	1.3	94
124	High-intensity interval training attenuates the exercise-induced increase in plasma IL-6 in response to acute exercise. Applied Physiology, Nutrition and Metabolism, 2009, 34, 1098-1107.	0.9	52
125	The Exercise-Induced Stress Response of Skeletal Muscle, with Specific Emphasis on Humans. Sports Medicine, 2009, 39, 643-662.	3.1	199
126	The exercise-induced stress response in skeletal muscle: failure during aging. Applied Physiology, Nutrition and Metabolism, 2008, 33, 1033-1041.	0.9	35
