

Vinita Jagannath

List of Publications by Citations

Source: <https://exaly.com/author-pdf/854445/vinita-jagannath-publications-by-citations.pdf>

Version: 2024-04-20

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
9	Epigenetic mechanisms in schizophrenia and other psychotic disorders: a systematic review of empirical human findings. <i>Molecular Psychiatry</i> , 2020 , 25, 1718-1748	15.1	48
8	Expression of D-Amino Acid Oxidase (DAO) and D-Amino Acid Oxidase Activator (DAOA) during Development and Aging in the Human Post-mortem Brain. <i>Frontiers in Neuroanatomy</i> , 2017 , 11, 31	3.6	21
7	A systematic meta-analysis of the association of Neuregulin 1 (NRG1), D-amino acid oxidase (DAO), and DAO activator (DAOA)/G72 polymorphisms with schizophrenia. <i>Journal of Neural Transmission</i> , 2018 , 125, 89-102	4.3	16
6	Association of depression with social support and self-esteem among HIV positives. <i>Asian Journal of Psychiatry</i> , 2011 , 4, 288-92	6.7	15
5	Study of Depression and Its Associated Factors among Women Living with HIV/AIDS in Coastal South India. <i>Isrn Aids</i> , 2012 , 2012, 684972		14
4	Prediction Analysis for Transition to Schizophrenia in Individuals at Clinical High Risk for Psychosis: The Relationship of NRG1, DAO, and DAOA Variants with Negative Symptoms and Cognitive Deficits. <i>Frontiers in Psychiatry</i> , 2017 , 8, 292	5	11
3	Controversial Effects of D-Amino Acid Oxidase Activator (DAOA)/G72 on D-Amino Acid Oxidase (DAO) Activity in Human Neuronal, Astrocyte and Kidney Cell Lines: The N-methyl D-aspartate (NMDA) Receptor Hypofunction Point of View. <i>Frontiers in Molecular Neuroscience</i> , 2017 , 10, 342	6.1	4
2	Neuregulin 1 (NRG1) gene expression predicts functional outcomes in individuals at clinical high-risk for psychosis. <i>Psychiatry Research</i> , 2018 , 266, 143-146	9.9	3
1	Rare copy number variants in individuals at clinical high risk for psychosis: Enrichment of synaptic/brain-related functional pathways. <i>American Journal of Medical Genetics Part B: Neuropsychiatric Genetics</i> , 2020 , 183, 140-151	3.5
