| # | Article  | IF  | CITATIONS |
|---|--|-----|-----------|
| 1 | Comparative secretome analysis of <i>Staphylococcus aureus</i> strains with different within-herd intramammary infection prevalence. Virulence, 2022, 13, 174-190.   | 4.4 | 5         |
| 2 | Milk proteins as mastitis markers in dairy ruminants - a systematic review. Veterinary Research Communications, 2022, 46, 329-351.   | 1.6 | 13        |
| 3 | Peptidomic changes in the milk of water buffaloes (Bubalus bubalis) with intramammary infection by non-aureus staphylococci. Scientific Reports, 2022, 12, 8371.   | 3.3 | 3         |
| 4 | Feeding Pre-weaned Calves With Waste Milk Containing Antibiotic Residues Is Related to a Higher Incidence of Diarrhea and Alterations in the Fecal Microbiota. Frontiers in Veterinary Science, 2021, 8, 650150.         | 2.2 | 20        |
| 5 | Proteomic datasets of uninfected and Staphylococcus aureus-infected goat milk. Data in Brief, 2020, 30, 105665.  | 1.0 | 1         |
| 6 | Impact of Staphylococcus aureus infection on the late lactation goat milk proteome: New perspectives for monitoring and understanding mastitis in dairy goats. Journal of Proteomics, 2020, 221, 103763.                 | 2.4 | 14        |
| 7 | Proteomic changes in the milk of water buffaloes (Bubalus bubalis) with subclinical mastitis due to intramammary infection by Staphylococcus aureus and by non-aureus staphylococci. Scientific Reports, 2019, 9, 15850. | 3.3 | 26        |
