citing authors

#	ARTICLE	IF	CITATIONS
1	Highly efficient electro-gene therapy of solid tumor by using an expression plasmid for the herpes simplex virus thymidine kinase gene. Proceedings of the National Academy of Sciences of the United States of America, 2000, 97, 354-359.	7.1	147
2	<i>In vivo</i> imaging of T cell delivery to tumors after adoptive transfer therapy. Proceedings of the National Academy of Sciences of the United States of America, 2007, 104, 12457-12461.	7.1	113
3	Intratumoral Delivery of Interleukin 12 Expression Plasmids with In Vivo Electroporation Is Effective for Colon and Renal Cancer. Human Gene Therapy, 2001, 12, 1265-1276.	2.7	63
4	Combination electro-gene therapy using herpes virus thymidine kinase and interleukin-12 expression plasmids is highly efficient against murine carcinomas in vivo. Molecular Therapy, 2004, 10, 929-937.	8.2	31
5	Application of In Vivo Electroporation to Cancer Gene Therapy. Current Gene Therapy, 2003, 3, 59-64.	2.0	27
6	HUB1, a novel Kruppel type zinc finger protein, represses the human T cell leukemia virus type I long terminal repeat-mediated expression. Nucleic Acids Research, 1997, 25, 5025-5032.	14.5	23
7	Combination of IL-12 and IL-18 of electro-gene therapy synergistically inhibits tumor growth. Anticancer Research, 2003, 23, 1173-9.	1.1	23
8	Prevention of Experimental Cerebral Malaria by Flt3 Ligand during Infection with Plasmodium berghei ANKA. Infection and Immunity, 2011, 79, 3947-3956.	2.2	21
9	DAF-shielded baculovirus-vectored vaccine enhances protection against malaria sporozoite challenge in mice. Malaria Journal, 2017, 16, 390.	2.3	19
10	STEAP4 regulates focal adhesion kinase activation and CpG motifs within STEAP4 promoter region are frequently methylated in DU145, human androgen-independent prostate cancer cells. International Journal of Molecular Medicine, 2009, 24, 599-604.	4.0	16
11	Gene therapy with TRAIL against renal cell carcinoma. Molecular Cancer Therapeutics, 2006, 5, 2165-2171.	4.1	14
12	Production of Antibodies against Multipass Membrane Proteins Expressed in Human Tumor Cells Using Dendritic Cell Immunization. Journal of Biomedicine and Biotechnology, 2009, 2009, 1-9.	3.0	13
13	Reduction of conventional dendritic cells during Plasmodium infection is dependent on activation induced cell death by type I and II interferons. Experimental Parasitology, 2015, 159, 127-135.	1.2	12
14	Protection of Baculovirus Vectors Expressing Complement Regulatory Proteins against Serum Complement Attack. Biological and Pharmaceutical Bulletin, 2018, 41, 1600-1605.	1.4	9
15	Malaria sporozoite protein expression enhances baculovirus-mediated gene transfer to hepatocytes. Journal of Gene Medicine, 2016, 18, 75-85.	2.8	8
16	cDNA microarray analysis of lactoferrin expression in non-neoplastic human hepatocyte PH5CH8 cells. Biochimica Et Biophysica Acta - General Subjects, 2005, 1721, 73-80.	2.4	6
17	Flt3 ligand treatment modulates parasitemia during infection with rodent malaria parasites via MyD88 and IFN- β -dependent mechanisms. Parasite Immunology, 2014, 36, 87-99.	1.5	6
18	Plasmodium infection cure cycles induce modulation of conventional dendritic cells. Microbiology and Immunology, 2020, 64, 377-386.	1.4	4

#	ARTICLE	IF	CITATIONS
19	Transcription Factor HUB1 Represses Sp1-Mediated Gene Expression through the CACCC Box of HTLV-I U5RE but not the GC Box. <i>Journal of Health Science</i> , 2004, 50, 417-422.	0.9	1
20	Evaluation of Combinatory Effects of <i>Plasmodium</i> Circumsporozoite Protein and Complement Regulatory Protein Expression of Recombinant Baculovirus Vectors. <i>Biological and Pharmaceutical Bulletin</i> , 2021, 44, 219-224.	1.4	1
21	Accumulation of major histocompatibility complex class II ⁺ CD11c ⁺ non-lymphoid cells in the spleen during infection with <i>Plasmodium yoelii</i> is lymphocyte-dependent. <i>Microbiology and Immunology</i> , 2013, 57, 213-223.	1.4	0
