

Gianni Pedrizzetti

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/8563363/gianni-pedrizzetti-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
132	Biomechanics in AIMETA 2022 , 453-475		
131	A Novel Approach to Left Ventricular Filling Pressure Assessment: The Role of Hemodynamic Forces Analysis. <i>Frontiers in Cardiovascular Medicine</i> , 2021 , 8, 704909	5.4	
130	Computed tomography derived left ventricular inward displacement as a novel tool for quantification of segmental wall motion abnormalities. <i>International Journal of Cardiovascular Imaging</i> , 2021 , 37, 3589-3590	2.5	1
129	The hemodynamic power of the heart differentiates normal from diseased right ventricles. <i>Journal of Biomechanics</i> , 2021 , 119, 110312	2.9	2
128	Comparative Analysis of Right Ventricle Fluid Dynamics. <i>Frontiers in Bioengineering and Biotechnology</i> , 2021 , 9, 667408	5.8	2
127	Impact of synchronous atrioventricular delay optimization on left ventricle flow force angle evaluated by echocardiographic particle image velocimetry. <i>Journal of Interventional Cardiac Electrophysiology</i> , 2021 , 1	2.4	1
126	Implantable Fiber Bragg Grating Sensor for Continuous Heart Activity Monitoring: Ex-Vivo and In-Vivo Validation. <i>IEEE Sensors Journal</i> , 2021 , 1-1	4	3
125	Introduction to Hemodynamic Forces Analysis: Moving Into the New Frontier of Cardiac Deformation Analysis. <i>Journal of the American Heart Association</i> , 2021 , e023417	6	2
124	Impact of intraventricular haemodynamic forces misalignment on left ventricular remodelling after myocardial infarction.. <i>ESC Heart Failure</i> , 2021 ,	3.7	3
123	Simultaneous Volumetric and Functional Assessment of the Right Ventricle in Hypoplastic Left Heart Syndrome After Fontan Palliation, Utilizing 3-Dimensional Speckle-Tracking Echocardiography. <i>Circulation Journal</i> , 2020 , 84, 235-244	2.9	7
122	Cardiac Fluid Dynamics in Prolapsed and Repaired Mitral Valve. <i>Lecture Notes in Mechanical Engineering</i> , 2020 , 857-867	0.4	
121	A new integrated approach to cardiac mechanics: reference values for normal left ventricle. <i>International Journal of Cardiovascular Imaging</i> , 2020 , 36, 2173-2185	2.5	5
120	Evaluation of Left Atrial Size and Function: Relevance for Clinical Practice. <i>Journal of the American Society of Echocardiography</i> , 2020 , 33, 934-952	5.8	32
119	Intracardiac flow analysis in cardiac resynchronization therapy: A new challenge?. <i>Echocardiography</i> , 2019 , 36, 1919-1929	1.5	5
118	Simplified mitral valve modeling for prospective clinical application of left ventricular fluid dynamics. <i>Journal of Computational Physics</i> , 2019 , 398, 108895	4.1	8
117	Assessment of Global Longitudinal and Circumferential Strain Using Computed Tomography Feature Tracking: Intra-Individual Comparison with CMR Feature Tracking and Myocardial Tagging in Patients with Severe Aortic Stenosis. <i>Journal of Clinical Medicine</i> , 2019 , 8,	5.1	8
116	On the computation of hemodynamic forces in the heart chambers. <i>Journal of Biomechanics</i> , 2019 , 95, 109323	2.9	8

115	The Relationship Between EF and Strain Permits a More Accurate Assessment of LV Systolic Function. <i>JACC: Cardiovascular Imaging</i> , 2019 , 12, 1893-1895	8.4	13
114	Left Ventricular Response to Cardiac Resynchronization Therapy: Insights From Hemodynamic Forces Computed by Speckle Tracking. <i>Frontiers in Cardiovascular Medicine</i> , 2019 , 6, 59	5.4	3
113	Combined flow-based imaging assessment of optimal cardiac resynchronization therapy pacing vector: a case report. <i>Journal of Medical Case Reports</i> , 2019 , 13, 161	1.2	
112	Intraventricular flow patterns during right ventricular apical pacing. <i>Open Heart</i> , 2019 , 6, e001057	3	2
111	Changes in Intraventricular Flow Patterns after MitraClip Implant in Patients with Functional Severe Mitral Regurgitation. <i>Journal of the American Society of Echocardiography</i> , 2019 , 32, 1250-1253.e1	5.8	5
110	Diagnostic and prognostic significance of cardiovascular vortex formation. <i>Journal of Cardiology</i> , 2019 , 74, 403-411	3	18
109	Range Variability in CMR Feature Tracking Multilayer Strain across Different Stages of Heart Failure. <i>Scientific Reports</i> , 2019 , 9, 16478	4.9	11
108	Analysis of mitral valve regurgitation by computational fluid dynamics. <i>APL Bioengineering</i> , 2019 , 3, 036105	10.5	5
107	Right Ventricle Systolic And Diastolic Function In Renal Transplant Recipients after 12 Months Of Unsupervised Exercise Training. <i>Medicine and Science in Sports and Exercise</i> , 2019 , 51, 609-609	1.2	
106	Integration between volumetric change and strain for describing the global mechanical function of the left ventricle. <i>Medical Engineering and Physics</i> , 2019 , 74, 65-72	2.4	1
105	Influence of mitral valve elasticity on flow development in the left ventricle. <i>European Journal of Mechanics, B/Fluids</i> , 2019 , 75, 110-118	2.4	4
104	Intracardiac Flow Analysis: Techniques and Potential Clinical Applications. <i>Journal of the American Society of Echocardiography</i> , 2019 , 32, 319-332	5.8	31
103	The Intraventricular Hemodynamic Forces Estimated Using Routine CMR Cine Images: A New Marker of the Failing Heart. <i>JACC: Cardiovascular Imaging</i> , 2019 , 12, 377-379	8.4	8
102	Global longitudinal strain assessment by computed tomography in severe aortic stenosis patients - Feasibility using feature tracking analysis. <i>Journal of Cardiovascular Computed Tomography</i> , 2019 , 13, 157-162	2.8	20
101	Cardiac fluid dynamics meets deformation imaging. <i>Cardiovascular Ultrasound</i> , 2018 , 16, 4	2.4	1
100	Usefulness of Left Ventricular Vortex Flow Analysis for Predicting Clinical Outcomes in Patients with Chronic Heart Failure: A Quantitative Vorticity Imaging Study Using Contrast Echocardiography. <i>Ultrasound in Medicine and Biology</i> , 2018 , 44, 1951-1959	3.5	10
99	Hemodynamic forces in the left and right ventricles of the human heart using 4D flow magnetic resonance imaging: Phantom validation, reproducibility, sensitivity to respiratory gating and free analysis software. <i>PLoS ONE</i> , 2018 , 13, e0195597	3.7	13
98	Home-based Exercise Improves Heart Contractility Determined by 2D Speckle Tracking Strain in Renal Transplant Recipients. <i>Medicine and Science in Sports and Exercise</i> , 2018 , 50, 421-422	1.2	

97	Optimal helical entry flow in a helical vessel. <i>Fluid Dynamics Research</i> , 2018 , 50, 065503	1.2	2
96	Hemodynamic forces using four-dimensional flow MRI: an independent biomarker of cardiac function in heart failure with left ventricular dyssynchrony?. <i>American Journal of Physiology - Heart and Circulatory Physiology</i> , 2018 , 315, H1627-H1639	5.2	12
95	Changes in global longitudinal strain in renal transplant recipients following 12 months of exercise. <i>Internal and Emergency Medicine</i> , 2018 , 13, 805-809	3.7	4
94	Fluid flow in a helical vessel in presence of a stenosis. <i>Meccanica</i> , 2017 , 52, 545-553	2.1	3
93	Precision Phenotyping in Heart Failure and Pattern Clustering of Ultrasound Data for the Assessment of Diastolic Dysfunction. <i>JACC: Cardiovascular Imaging</i> , 2017 , 10, 1291-1303	8.4	50
92	Cardiac resynchronization therapy by multipoint pacing improves response of left ventricular mechanics and fluid dynamics: a three-dimensional and particle image velocimetry echo study. <i>Europace</i> , 2017 , 19, 1833-1840	3.9	21
91	Left and right ventricular hemodynamic forces in healthy volunteers and elite athletes assessed with 4D flow magnetic resonance imaging. <i>American Journal of Physiology - Heart and Circulatory Physiology</i> , 2017 , 312, H314-H328	5.2	25
90	Special issue on Advances in biomechanics: from foundations to applications. <i>Meccanica</i> , 2017 , 52, 487-488		1
89	2D longitudinal LV speckle tracking strain pattern in breast cancer survivors: sports activity vs exercise as prescription model. <i>Internal and Emergency Medicine</i> , 2017 , 12, 1149-1157	3.7	5
88	On estimating intraventricular hemodynamic forces from endocardial dynamics: A comparative study with 4D flow MRI. <i>Journal of Biomechanics</i> , 2017 , 60, 203-210	2.9	21
87	Assessment Of Myocardial Mechanics In Renal Transplant Recipients Using Speckle Tracking Echocardiography. <i>Medicine and Science in Sports and Exercise</i> , 2017 , 49, 157-158	1.2	
86	Cardioprotection in Brest Cancer Survivors. <i>Medicine and Science in Sports and Exercise</i> , 2017 , 49, 675	1.2	
85	Intracardiac hemodynamic forces using 4D flow: a new reproducible method applied to healthy controls, elite athletes and heart failure patients. <i>Journal of Cardiovascular Magnetic Resonance</i> , 2016 , 18,	6.9	3
84	Left ventricular pacing vector selection by novel echo-particle imaging velocimetry analysis for optimization of quadripolar cardiac resynchronization device: a case report. <i>Journal of Medical Case Reports</i> , 2016 , 10, 191	1.2	5
83	Differences in aortic vortex flow pattern between normal and patients with stroke: qualitative and quantitative assessment using transesophageal contrast echocardiography. <i>International Journal of Cardiovascular Imaging</i> , 2016 , 32 Suppl 1, 45-52	2.5	2
82	Changes in electrical activation modify the orientation of left ventricular flow momentum: novel observations using echocardiographic particle image velocimetry. <i>European Heart Journal Cardiovascular Imaging</i> , 2016 , 17, 203-9	4.1	34
81	Hemodynamic forces in a model left ventricle. <i>Physical Review Fluids</i> , 2016 , 1,	2.8	12
80	Cardiovascular Outcomes in Renal Transplant Recipients: Feasibility and Clinical Role of 2D Speckle Tracking to Assess Myocardial Function. <i>Journal of Functional Morphology and Kinesiology</i> , 2016 , 1, 109-114		3

79	Clinical Application of 2D Speckle Tracking Strain for Assessing Cardio-Toxicity in Oncology. <i>Journal of Functional Morphology and Kinesiology</i> , 2016 , 1, 343-354	2.4	3
78	Principles of cardiovascular magnetic resonance feature tracking and echocardiographic speckle tracking for informed clinical use. <i>Journal of Cardiovascular Magnetic Resonance</i> , 2016 , 18, 51	6.9	189
77	Comments on Defining the Contribution of Diastolic Vortex Ring to Left Ventricular Filling. <i>Journal of the American College of Cardiology</i> , 2015 , 65, 2573-4	15.1	0
76	Definitions for a common standard for 2D speckle tracking echocardiography: consensus document of the EACVI/ASE/Industry Task Force to standardize deformation imaging. <i>European Heart Journal Cardiovascular Imaging</i> , 2015 , 16, 1-11	4.1	541
75	Cardiac fluid dynamics anticipates heart adaptation. <i>Journal of Biomechanics</i> , 2015 , 48, 388-91	2.9	36
74	Left ventricular fluid mechanics: the long way from theoretical models to clinical applications. <i>Annals of Biomedical Engineering</i> , 2015 , 43, 26-40	4.7	37
73	Asymptotic Model of Fluid-Tissue Interaction for Mitral Valve Dynamics. <i>Cardiovascular Engineering and Technology</i> , 2015 , 6, 95-104	2.2	21
72	123 Myocardial and Fluid Mechanics by Echocardiography Detect Subclinical Changes in Type 2 Diabetes Mellitus. <i>Heart</i> , 2015 , 101, A70-A71	5.1	
71	Tissue Tracking Technology for Assessing Cardiac Mechanics: Principles, Normal Values, and Clinical Applications. <i>JACC: Cardiovascular Imaging</i> , 2015 , 8, 1444-1460	8.4	236
70	Definitions for a common standard for 2D speckle tracking echocardiography: consensus document of the EACVI/ASE/Industry Task Force to standardize deformation imaging. <i>Journal of the American Society of Echocardiography</i> , 2015 , 28, 183-93	5.8	428
69	Three-dimensional reconstruction of cardiac flows based on multi-planar velocity fields. <i>Experiments in Fluids</i> , 2014 , 55, 1	2.5	13
68	Effects of right ventricular hemodynamic burden on intraventricular flow in tetralogy of Fallot: an echocardiographic contrast particle imaging velocimetry study. <i>Journal of the American Society of Echocardiography</i> , 2014 , 27, 1311-8	5.8	13
67	3D Strain helps relating LV function to LV and structure in athletes. <i>Cardiovascular Ultrasound</i> , 2014 , 12, 33	2.4	12
66	Three-dimensional principal strain analysis for characterizing subclinical changes in left ventricular function. <i>Journal of the American Society of Echocardiography</i> , 2014 , 27, 1041-1050.e1	5.8	50
65	On the geometrical relationship between global longitudinal strain and ejection fraction in the evaluation of cardiac contraction. <i>Journal of Biomechanics</i> , 2014 , 47, 746-9	2.9	20
64	The vortex--an early predictor of cardiovascular outcome?. <i>Nature Reviews Cardiology</i> , 2014 , 11, 545-53	14.8	174
63	Diagnostic concordance of echocardiography and cardiac magnetic resonance-based tissue tracking for differentiating constrictive pericarditis from restrictive cardiomyopathy. <i>Circulation: Cardiovascular Imaging</i> , 2014 , 7, 819-27	3.9	37
62	Quantitative analysis of intraventricular blood flow dynamics by echocardiographic particle image velocimetry in patients with acute myocardial infarction at different stages of left ventricular dysfunction. <i>European Heart Journal Cardiovascular Imaging</i> , 2014 , 15, 1203-12	4.1	51

61	Contrast echocardiography for assessing left ventricular vortex strength in heart failure: a prospective cohort study. <i>European Heart Journal Cardiovascular Imaging</i> , 2013 , 14, 1049-60	4.1	81
60	Ultrasound assessment of the force-frequency relationship from the law of conservation of momentum in patients with left ventricular dysfunction. <i>Ultrasound in Medicine and Biology</i> , 2013 , 39, 585-91	3.5	1
59	CRT improves LV filling dynamics: insights from echocardiographic particle imaging velocimetry. <i>JACC: Cardiovascular Imaging</i> , 2013 , 6, 704-13	8.4	31
58	Comparative numerical study on left ventricular fluid dynamics after dilated cardiomyopathy. <i>Journal of Biomechanics</i> , 2013 , 46, 1611-7	2.9	55
57	Echocardiography and cardiac magnetic resonance-based feature tracking in the assessment of myocardial mechanics in tetralogy of Fallot: an intermodality comparison. <i>Echocardiography</i> , 2013 , 30, 203-10	1.5	56
56	Myocardial stretch in early systole is a key determinant of the synchrony of left ventricular mechanical activity in vivo. <i>Circulation Journal</i> , 2013 , 77, 2526-34	2.9	5
55	Aging does not affect radial viscoelastic behavior of the left ventricle. <i>Cardiology</i> , 2013 , 125, 38-49	1.6	
54	Current clinical application of intracardiac flow analysis using echocardiography. <i>Journal of Cardiovascular Imaging</i> , 2013 , 21, 155-62	0	30
53	Assessment of Myocardial Contractile Function Using Global and Segmental Circumferential Strain following Intracoronary Stem Cell Infusion after Myocardial Infarction: MRI Feature Tracking Feasibility Study. <i>ISRN Radiology</i> , 2013 , 2013, 371028		3
52	Vortex Formation in the Heart 2012 , 45-79		9
51	Diagnostic Vortex Imaging 2012 , 125-157		
50	Vortex Dynamics 2012 , 17-44		2
49	Effect of Cardiac Devices and Surgery on Vortex Formation 2012 , 81-124		
48	Emerging trends in CV flow visualization. <i>JACC: Cardiovascular Imaging</i> , 2012 , 5, 305-16	8.4	174
47	Vortex Formation in the Cardiovascular System 2012 ,		22
46	Three-dimensional reconstruction of the functional strain-line pattern in the left ventricle from 3-dimensional echocardiography. <i>Circulation: Cardiovascular Imaging</i> , 2012 , 5, 808-9	3.9	11
45	Functional strain-line pattern in the human left ventricle. <i>Physical Review Letters</i> , 2012 , 109, 048103	7.4	23
44	Magnetic resonance derived myocardial strain assessment using feature tracking. <i>Journal of Visualized Experiments</i> , 2011 ,	1.6	98

43	The effect of exercise training on left ventricular function in young elite athletes. <i>Cardiovascular Ultrasound</i> , 2011 , 9, 27	2.4	22
42	Intraventricular vortex flow changes in the infarcted left ventricle: numerical results in an idealised 3D shape. <i>Computer Methods in Biomechanics and Biomedical Engineering</i> , 2011 , 14, 95-101	2.1	33
41	Opening of a wall-mounted leaflet by a single flow pulse. <i>Physical Review E</i> , 2011 , 84, 017301	2.4	
40	Role of inertia in the interaction between oscillatory flow and a wall-mounted leaflet. <i>Physical Review E</i> , 2011 , 83, 016310	2.4	3
39	Echocardiographic particle image velocimetry: a novel technique for quantification of left ventricular blood vorticity pattern. <i>Journal of the American Society of Echocardiography</i> , 2010 , 23, 86-94	5.8	358
38	Vortex formation out of two-dimensional orifices. <i>Journal of Fluid Mechanics</i> , 2010 , 655, 198-216	3.7	24
37	On the left ventricular vortex reversal after mitral valve replacement. <i>Annals of Biomedical Engineering</i> , 2010 , 38, 769-73	4.7	80
36	Left ventricular flow patterns in healthy subjects and patients with prosthetic mitral valves: an in vivo study using echocardiographic particle image velocimetry. <i>Journal of Thoracic and Cardiovascular Surgery</i> , 2010 , 139, 1501-10	1.5	164
35	Speckle tracking for left ventricle performance in young athletes with bicuspid aortic valve and mild aortic regurgitation. <i>European Journal of Echocardiography</i> , 2009 , 10, 527-31		32
34	Real-time evaluation of longitudinal peak systolic strain (speckle tracking measurement) in left and right ventricles of athletes. <i>Cardiovascular Ultrasound</i> , 2009 , 7, 17	2.4	32
33	Characterization and quantification of vortex flow in the human left ventricle by contrast echocardiography using vector particle image velocimetry. <i>JACC: Cardiovascular Imaging</i> , 2008 , 1, 705-17	8.4	238
32	Supernormal functional reserve of apical segments in elite soccer players: an ultrasound speckle tracking handgrip stress study. <i>Cardiovascular Ultrasound</i> , 2008 , 6, 14	2.4	22
31	Combined experimental and numerical analysis of the flow structure into the left ventricle. <i>Journal of Biomechanics</i> , 2007 , 40, 1988-94	2.9	62
30	Two-dimensional tracking and TDI are consistent methods for evaluating myocardial longitudinal peak strain in left and right ventricle basal segments in athletes. <i>Cardiovascular Ultrasound</i> , 2007 , 5, 7	2.4	32
29	Asymmetric opening of a simple bileaflet valve. <i>Physical Review Letters</i> , 2007 , 98, 214503	7.4	13
28	Three-dimensional filling flow into a model left ventricle. <i>Journal of Fluid Mechanics</i> , 2005 , 539, 179	3.7	121
27	Nature optimizes the swirling flow in the human left ventricle. <i>Physical Review Letters</i> , 2005 , 95, 108101	7.4	175
26	Effect of cardiac resynchronization therapy on longitudinal and circumferential left ventricular mechanics by velocity vector imaging: description and initial clinical application of a novel method using high-frame rate B-mode echocardiographic images. <i>Echocardiography</i> , 2005 , 22, 826-30	1.5	108

25	Kinematic characterization of valvular opening. <i>Physical Review Letters</i> , 2005 , 94, 194502	7.4	11
24	Clinical application of quantitative analysis in real-time MCE. <i>European Journal of Echocardiography</i> , 2004 , 5 Suppl 2, S17-23		12
23	Flow-tissue interaction with compliance mismatch in a model stented artery. <i>Journal of Biomechanics</i> , 2004 , 37, 1-11	2.9	33
22	Model and influence of mitral valve opening during the left ventricular filling. <i>Journal of Biomechanics</i> , 2003 , 36, 355-61	2.9	42
21	Birth of three-dimensionality in a pulsed jet through a circular orifice. <i>Journal of Fluid Mechanics</i> , 2003 , 493, 209-218	3.7	21
20	Vortex dynamics in a model left ventricle during filling. <i>European Journal of Mechanics, B/Fluids</i> , 2002 , 21, 527-543	2.4	28
19	Fluid dynamics of the left ventricular filling in dilated cardiomyopathy. <i>Journal of Biomechanics</i> , 2002 , 35, 665-71	2.9	79
18	Pulsatile flow inside moderately elastic arteries, its modelling and effects of elasticity. <i>Computer Methods in Biomechanics and Biomedical Engineering</i> , 2002 , 5, 219-31	2.1	5
17	Space and time dependency of inertial and convective contribution to the transmitral pressure drop during ventricular filling. <i>Journal of the American College of Cardiology</i> , 2001 , 38, 290-2	15.1	12
16	Flow about a circular cylinder between parallel walls. <i>Journal of Fluid Mechanics</i> , 2001 , 440, 1-25	3.7	138
15	Interscale transfer in two-dimensional compact vortices. <i>Journal of Fluid Mechanics</i> , 2000 , 406, 109-129	3.7	4
14	Quadratic Markov modeling for intermittent turbulence. <i>Physics of Fluids</i> , 1999 , 11, 1694-1696	4.4	4
13	Dynamical control for capturing vortices near bluff bodies. <i>Physical Review E</i> , 1998 , 58, 1883-1898	2.4	10
12	Impulsively started flow separation in wavy-walled tubes. <i>Journal of Fluid Mechanics</i> , 1998 , 359, 1-22	3.7	3
11	Fluid flow in a tube with an elastic membrane insertion. <i>Journal of Fluid Mechanics</i> , 1998 , 375, 39-64	3.7	25
10	Impulsive and pressure-driven transient flows in closed ducts. <i>Physics of Fluids</i> , 1997 , 9, 3575-3577	4.4	2
9	Unsteady tube flow over an expansion. <i>Journal of Fluid Mechanics</i> , 1996 , 310, 89-111	3.7	36
8	Self-similarity and probability distributions of turbulent intermittency. <i>Physical Review E</i> , 1996 , 53, 475-484	4.4	31

7	Controlled capture of a continuous vorticity distribution. <i>Physics Letters, Section A: General, Atomic and Solid State Physics</i> , 1995 , 204, 108-114	2.3	7
6	On Markov modelling of turbulence. <i>Journal of Fluid Mechanics</i> , 1994 , 280, 69-93	3.7	45
5	Chaotic capture of vortices by a moving body. II. Bound pair model. <i>Chaos</i> , 1994 , 4, 681-691	3.3	6
4	Chaotic trapping phenomena in extended systems. <i>Physical Review E</i> , 1993 , 48, 3299-3308	2.4	4
3	Close interaction between a vortex filament and a rigid sphere. <i>Journal of Fluid Mechanics</i> , 1992 , 245, 701	3.7	19
2	Insight into singular vortex flows. <i>Fluid Dynamics Research</i> , 1992 , 10, 101-115	1.2	12
1	Space temporal maps for vortical flow field construction. <i>Meccanica</i> , 1991 , 26, 33-36	2.1	1
