

Yuri Feito

List of Publications by Citations

Source: <https://exaly.com/author-pdf/856746/yuri-feito-publications-by-citations.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
73	Evaluation of activity monitors in controlled and free-living environments. <i>Medicine and Science in Sports and Exercise</i> , 2012 , 44, 733-41	1.2	95
72	High-Intensity Functional Training (HIFT): Definition and Research Implications for Improved Fitness. <i>Sports</i> , 2018 , 6,	3	94
71	Evaluation of ActiGraph's low-frequency filter in laboratory and free-living environments. <i>Medicine and Science in Sports and Exercise</i> , 2015 , 47, 211-7	1.2	41
70	Effects of body mass index and step rate on pedometer error in a free-living environment. <i>Medicine and Science in Sports and Exercise</i> , 2011 , 43, 350-6	1.2	33
69	A 4-Year Analysis of the Incidence of Injuries Among CrossFit-Trained Participants. <i>Orthopaedic Journal of Sports Medicine</i> , 2018 , 6, 2325967118803100	3.5	32
68	Effects of body mass index on step count accuracy of physical activity monitors. <i>Journal of Physical Activity and Health</i> , 2012 , 9, 594-600	2.5	30
67	Changes in body composition, bone metabolism, strength, and skill-specific performance resulting from 16-weeks of HIFT. <i>PLoS ONE</i> , 2018 , 13, e0198324	3.7	27
66	Effects of body mass index and tilt angle on output of two wearable activity monitors. <i>Medicine and Science in Sports and Exercise</i> , 2011 , 43, 861-6	1.2	25
65	Effect of ActiGraph's low frequency extension for estimating steps and physical activity intensity. <i>PLoS ONE</i> , 2017 , 12, e0188242	3.7	20
64	Repeated anaerobic tests predict performance among a group of advanced CrossFit-trained athletes. <i>Applied Physiology, Nutrition and Metabolism</i> , 2019 , 44, 727-735	3	20
63	Physiological differences between advanced CrossFit athletes, recreational CrossFit participants, and physically-active adults. <i>PLoS ONE</i> , 2020 , 15, e0223548	3.7	18
62	Self-reported Measures of Strength and Sport-Specific Skills Distinguish Ranking in an International Online Fitness Competition. <i>Journal of Strength and Conditioning Research</i> , 2018 , 32, 3474-3484	3.2	18
61	Effects of Probiotic (<i>Bacillus subtilis</i>) Supplementation During Offseason Resistance Training in Female Division I Athletes. <i>Journal of Strength and Conditioning Research</i> , 2020 , 34, 3173-3181	3.2	17
60	Individual differences influence exercise behavior: how personality, motivation, and behavioral regulation vary among exercise mode preferences. <i>Heliyon</i> , 2019 , 5, e01459	3.6	15
59	Testosterone and Cortisol Responses to Five High-Intensity Functional Training Competition Workouts in Recreationally Active Adults. <i>Sports</i> , 2018 , 6,	3	15
58	Normative Values for Self-Reported Benchmark Workout Scores in CrossFit [®] Practitioners. <i>Sports Medicine - Open</i> , 2018 , 4, 39	6.1	15
57	Monitoring Training Load, Well-Being, Heart Rate Variability, and Competitive Performance of a Functional-Fitness Female Athlete: A Case Study. <i>Sports</i> , 2019 , 7,	3	13

56	Motivational Factors in CrossFit Training Participation. <i>Health Behavior and Policy Review</i> , 2017 , 4, 539-550		12
55	Effects of Eight Weeks of High Intensity Functional Training on Glucose Control and Body Composition among Overweight and Obese Adults. <i>Sports</i> , 2019 , 7,	3	11
54	A practical approach to incorporating Twitter in a college course. <i>American Journal of Physiology - Advances in Physiology Education</i> , 2018 , 42, 152-158	1.9	11
53	Effects of a pilates school program on hamstrings flexibility of adolescents. <i>Revista Brasileira De Medicina Do Esporte</i> , 2015 , 21, 302-307	0.5	11
52	A content analysis of the High-Intensity Functional Training Literature: a look at the past and directions for the future. <i>Human Movement</i> , 2019 , 20, 1-15	0.8	10
51	Mood State Changes Accompanying the Crossfit Open Competition in Healthy Adults. <i>Sports</i> , 2018 , 6,	3	10
50	Fitness Trends From Around the Globe. <i>ACSM's Health and Fitness Journal</i> , 2021 , 25, 20-31	0.9	10
49	The use of a smart-textile garment during high-intensity functional training: a pilot study. <i>Journal of Sports Medicine and Physical Fitness</i> , 2019 , 59, 947-954	1.4	9
48	Effect of HIIT with Tabata Protocol on Serum Irisin, Physical Performance, and Body Composition in Men. <i>International Journal of Environmental Research and Public Health</i> , 2020 , 17,	4.6	9
47	High Intensity Functional Training (HIFT) and competitions: How motives differ by length of participation. <i>PLoS ONE</i> , 2019 , 14, e0213812	3.7	7
46	Effects of a high-intensity interval training program versus a moderate-intensity continuous training program on maximal oxygen uptake and blood pressure in healthy adults: study protocol for a randomized controlled trial. <i>Trials</i> , 2016 , 17, 413	2.8	7
45	Metabolic cost of stride rate, resistance, and combined use of arms and legs on the elliptical trainer. <i>Research Quarterly for Exercise and Sport</i> , 2006 , 77, 507-13	1.9	7
44	The affective interval: An investigation of the peaks and valleys during high- and moderate-intensity interval exercise in regular exercisers. <i>Psychology of Sport and Exercise</i> , 2020 , 49, 101686	4.2	6
43	An Investigation Into How Motivational Factors Differed Among Individuals Engaging in CrossFit Training. <i>SAGE Open</i> , 2018 , 8, 215824401880313	1.5	6
42	Effects of high-intensity interval training compared to moderate-intensity continuous training on maximal oxygen consumption and blood pressure in healthy men: A randomized controlled trial. <i>Biomedica</i> , 2019 , 39, 524-536	0.9	5
41	Breaking the myths of competition: a cross-sectional analysis of injuries among CrossFit trained participants. <i>BMJ Open Sport and Exercise Medicine</i> , 2020 , 6, e000750	3.4	5
40	Safety of Short-Term Supplementation with Methylliberine (Dynamine) Alone and in Combination with TeaCrine in Young Adults. <i>Nutrients</i> , 2020 , 12,	6.7	5
39	Neuromuscular function of the plantar flexors and predictors of peak power in middle-aged and older males. <i>Experimental Gerontology</i> , 2019 , 125, 110677	4.5	5

38	Predictors of CrossFit Open Performance. <i>Sports</i> , 2020 , 8,	3	5
37	Motivation to CrossFit training: a narrative review. <i>Sport Sciences for Health</i> , 2020 , 16, 195-206	1.3	4
36	Early and late rapid torque characteristics and select physiological correlates in middle-aged and older males. <i>PLoS ONE</i> , 2020 , 15, e0231907	3.7	4
35	Body Composition And Strength Changes Following 16-weeks Of High-intensity Functional Training.. <i>Medicine and Science in Sports and Exercise</i> , 2016 , 48, 1001	1.2	4
34	Effect of BMI on pedometers in early adolescents under free-living conditions. <i>Medicine and Science in Sports and Exercise</i> , 2013 , 45, 569-73	1.2	4
33	Hybrid-type, multicomponent interval training upregulates musculoskeletal fitness of adults with overweight and obesity in a volume-dependent manner: A 1-year dose-response randomised controlled trial.. <i>European Journal of Sport Science</i> , 2022 , 1-62	3.9	4
32	Is age just a number? Differences in exercise participatory motives across adult cohorts and the relationships with exercise behaviour. <i>International Journal of Sport and Exercise Psychology</i> , 2021 , 19, 61-73	2.5	4
31	Weight Management and Appearance Motivate Non-Competitive CrossFit Participants. <i>Medicine and Science in Sports and Exercise</i> , 2016 , 48, 696	1.2	3
30	The Effect of BMI and Walking Speed on Step Count Validity of Wearable Activity Monitors. <i>Medicine and Science in Sports and Exercise</i> , 2010 , 45, 489	1.2	3
29	Resting cardiac autonomic activity and body composition following a 16-week high-intensity functional training intervention in women: A pilot study. <i>Journal of Human Sport and Exercise</i> , 2017 , 12,	1.5	3
28	Effect of four different forms of high intensity training on BDNF response to Wingate and Graded Exercise Test. <i>Scientific Reports</i> , 2021 , 11, 8599	4.9	3
27	Comparative Efficacy of 5 Exercise Types on Cardiometabolic Health in Overweight and Obese Adults: A Systematic Review and Network Meta-Analysis of 81 Randomized Controlled Trials.. <i>Circulation: Cardiovascular Quality and Outcomes</i> , 2022 , 101161CIRCOUTCOMES121008243	5.8	3
26	PILATES TRAINING INDUCES CHANGES IN THE TRUNK MUSCULATURE OF ADOLESCENTS. <i>Revista Brasileira De Medicina Do Esporte</i> , 2019 , 25, 235-239	0.5	2
25	The Effect of ProHydrolase on the Amino Acid and Intramuscular Anabolic Signaling Response to Resistance Exercise in Trained Males. <i>Sports</i> , 2020 , 8,	3	2
24	Breaking Barriers: Women's Experiences of CrossFit Training During Pregnancy. <i>Women in Sport and Physical Activity Journal</i> , 2018 , 26, 33-42	1.3	2
23	Prevalence of Injury Among CrossFit Participants. <i>Medicine and Science in Sports and Exercise</i> , 2014 , 46, 762	1.2	2
22	Prevalence and Incidence Rates Are Not the Same: Letter to the Editor. <i>Orthopaedic Journal of Sports Medicine</i> , 2014 , 2, 2325967114543254	3.5	2
21	Venipuncture procedure affects heart rate variability and chronotropic response. <i>PACE - Pacing and Clinical Electrophysiology</i> , 2017 , 40, 1080-1086	1.6	2

20	Workout Pacing Predictors of Crossfit Open Performance: A Pilot Study. <i>Journal of Human Kinetics</i> , 2021 , 78, 89-100	2.6	2
19	Isometric versus isotonic contractions: Sex differences in the fatigability and recovery of isometric strength and high-velocity contractile parameters. <i>Physiological Reports</i> , 2021 , 9, e14821	2.6	2
18	REGIONAL COMPARISONS: THE WORLDWIDE SURVEY OF FITNESS TRENDS. <i>ACSM's Health and Fitness Journal</i> , 2019 , 23, 41-48	0.9	2
17	The addition of β-Hydroxy β-Methylbutyrate (HMB) to creatine monohydrate supplementation does not improve anthropometric and performance maintenance across a collegiate rugby season. <i>Journal of the International Society of Sports Nutrition</i> , 2020 , 17, 28	4.5	1
16	Physiological Differences Between Advanced Crossfit Athletes, Recreational Crossfit Participants, and Physically-Active Adults		1
15	To Discern Differences of Cardiovascular Response Over Four Rounds of a High-Intensity Functional Training (Hift) Session.. <i>Medicine and Science in Sports and Exercise</i> , 2017 , 49, 64	1.2	1
14	Physiological and Anthropometric Differences among Endurance, Strength and High-Intensity Functional Training Participants: A Cross-Sectional Study.. <i>Research Quarterly for Exercise and Sport</i> , 2022 , 1-12	1.9	1
13	Let us identify exercise recommendations that are effective and not denounce specific training programs simply because they are misunderstood. <i>Journal of Sports Medicine and Physical Fitness</i> , 2017 , 57, 720-721	1.4	0
12	Management of Type 2 Diabetes Mellitus. <i>Strength and Conditioning Journal</i> , 2013 , 35, 15-19	2	0
11	Sit-to-Stand Kinetics and Correlates of Performance in Young and Older Males. <i>Archives of Gerontology and Geriatrics</i> , 2020 , 91, 104215	4	0
10	New Trends Suggest the Fitness Industry Needs You. <i>ACSM's Health and Fitness Journal</i> , 2018 , 22, 58-58	0.9	0
9	Globalizing the ACSM Certified Personal Trainer Job Task Analysis. <i>Medicine and Science in Sports and Exercise</i> , 2017 , 49, 1013	1.2	
8	Response: Is High-Intensity Functional Training (HIFT)/CrossFit Safe for Military Fitness Training?. <i>Military Medicine</i> , 2017 , 182, 1476-1479	1.3	
7	Characterizing Injuries and Participation in High Intensity Functional Training. <i>Medicine and Science in Sports and Exercise</i> , 2017 , 49, 423	1.2	
6	Niveles y estados de cambio de la actividad física en una comunidad universitaria de Medellín-Colombia 2014 , 33, 153-173		
5	Programming Resistance Training for Clients With Type 2 Diabetes Mellitus. <i>Strength and Conditioning Journal</i> , 2013 , 35, 20-23	2	
4	The Relationship Between Motivational Factors And High Intensity Functional Training (HIFT). <i>Medicine and Science in Sports and Exercise</i> , 2017 , 49, 563	1.2	
3	Comparison of Mood Response Through Five Weeks of a High Intensity Functional Training Competition. <i>Medicine and Science in Sports and Exercise</i> , 2017 , 49, 845	1.2	

- 2 Endocrine and Body Composition Changes Across a Competitive Season in Collegiate Speed-Power Track and Field Athletes. *Journal of Strength and Conditioning Research*, **2021**, 35, 2067-2074 3.2
- 1 Preference and tolerance for high-intensity exercise performance and enjoyment. *International Journal of Sport and Exercise Psychology*, 1-11 2.5
