| #  | Article  | IF  | CITATIONS |
|----|--|-----|-----------|
| 1  | Effects of a virtual reality-based pottery making approach on junior high school students' creativity and learning engagement. Interactive Learning Environments, 2023, 31, 2016-2032. | 6.4 | 27        |
| 2  | 0.2ÂMa or 1.2ÂMa? Timing of the Linking of the Middle and Lower Reaches of the Yellow River Inferred From Loessâ€Palaeosol Sequences. Geophysical Research Letters, 2022, 49, .        | 4.0 | 2         |
| 3  | Anthropogenic Influences on Soil Erosion since the Late Holocene and Contrasting Regional Sustainability in China. Sustainability, 2022, 14, 6600.                                     | 3.2 | 1         |
| 4  | Magnetic monitoring of topsoil and street dust in Xinyang (China) and their environmental implications. Environmental Monitoring and Assessment, 2021, 193, 602.                       | 2.7 | 2         |
| 5  | Magnetic characteristics of Guangshan loess from northern piedmont of Dabie Mountains, east-central China. Geophysical Journal International, 2020, 222, 1213-1223.                    | 2.4 | 2         |
| 6  | Early middle Holocene climate oscillations recorded in the Beihuqiao Core, Yuhang, Zhejiang Province, China. Journal of Paleolimnology, 2018, 59, 263-278.                             | 1.6 | 7         |
| 7  | Can the magnetic susceptibility record of Chinese Red Clay sequence be used for palaeomonsoon reconstructions?. Geophysical Journal International, 2016, 204, 1421-1429.               | 2.4 | 13        |
| 8  | Paleoclimatic evolution of Holocene loess and discussion of the sensitivity of magnetic susceptibility and median diameter. Quaternary International, 2013, 296, 160-167.              | 1.5 | 18        |
| 9  | The magnetic mechanism of paleosol S5 in the Baoji section of the southern Chinese Loess Plateau.<br>Quaternary International, 2013, 306, 129-136.                                     | 1.5 | 21        |
| 10 | Susceptibility variations of multiple origins of loess from the Ily Basin (NW China). Science Bulletin, 2012, 57, 1844-1855.   | 1.7 | 24        |
