

Beatrice Cousin

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/8594804/beatrice-cousin-publications-by-year.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

20
papers

7,304
citations

#	Paper	IF	Citations
20	The hematopoietic potential of stem cells from the adipose tissue 2022 , 415-426		
19	Driving regeneration, instead of healing, in adult mammals: the decisive role of resident macrophages through efferocytosis. <i>Npj Regenerative Medicine</i> , 2021 , 6, 41	15.8	3
18	Opioids prevent regeneration in adult mammals through inhibition of ROS production. <i>Scientific Reports</i> , 2018 , 8, 12170	4.9	11
17	Rapid and Efficient Production of Human Functional Mast Cells through a Three-Dimensional Culture of Adipose Tissue-Derived Stromal Vascular Cells. <i>Journal of Immunology</i> , 2018 , 201, 3815-3821	5.3	8
16	Corrupted adipose tissue endogenous myelopoiesis initiates diet-induced metabolic disease. <i>ELife</i> , 2017 , 6,	8.9	10
15	Mast cells regulate myofilament calcium sensitization and heart function after myocardial infarction. <i>Journal of Experimental Medicine</i> , 2016 , 213, 1353-74	16.6	70
14	Differential Hematopoietic Activity in White Adipose Tissue Depending on its Localization. <i>Journal of Cellular Physiology</i> , 2015 , 230, 3076-83	7	8
13	Prospects for Using Adipose Tissue in Regenerative Medicine 2013 , 39-49		
12	In situ production of innate immune cells in murine white adipose tissue. <i>Blood</i> , 2012 , 120, 4952-62	2.2	24
11	Human adipose-derived stromal cells efficiently support hematopoiesis in vitro and in vivo: a key step for therapeutic studies. <i>Stem Cells and Development</i> , 2011 , 20, 2127-38	4.4	51
10	Adipose-derived stromal cells: Their identity and uses in clinical trials, an update. <i>World Journal of Stem Cells</i> , 2011 , 3, 25-33	5.6	170
9	Adipose tissue as a dedicated reservoir of functional mast cell progenitors. <i>Stem Cells</i> , 2010 , 28, 2065-72	5.8	86
8	Adult stromal cells derived from human adipose tissue provoke pancreatic cancer cell death both in vitro and in vivo. <i>PLoS ONE</i> , 2009 , 4, e6278	3.7	169
7	Cell specific differences between human adipose-derived and mesenchymal-stromal cells despite similar differentiation potentials. <i>Experimental Cell Research</i> , 2008 , 314, 1575-84	4.2	271
6	Metabolic endotoxemia initiates obesity and insulin resistance. <i>Diabetes</i> , 2007 , 56, 1761-72	0.9	3888
5	Human subcutaneous adipose cells support complete differentiation but not self-renewal of hematopoietic progenitors. <i>Journal of Cellular Physiology</i> , 2006 , 208, 282-8	7	106
4	Immunomodulatory effect of human adipose tissue-derived adult stem cells: comparison with bone marrow mesenchymal stem cells. <i>British Journal of Haematology</i> , 2005 , 129, 118-29	4.5	738

3	Plasticity of human adipose lineage cells toward endothelial cells: physiological and therapeutic perspectives. <i>Circulation</i> , 2004 , 109, 656-63	16.7	1144
2	Reconstitution of lethally irradiated mice by cells isolated from adipose tissue. <i>Biochemical and Biophysical Research Communications</i> , 2003 , 301, 1016-22	3.4	177
1	Preadipocyte conversion to macrophage. Evidence of plasticity. <i>Journal of Biological Chemistry</i> , 2003 , 278, 9850-5	5.4	370
