

# Ann Wennerberg

## List of Publications by Year in Descending Order

**Source:** <https://exaly.com/author-pdf/8596972/ann-wennerberg-publications-by-year.pdf>

**Version:** 2024-04-25

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

53  
papers

4,315  
citations

30

#	Paper	IF	Citations
53	High-resolution analysis of the degradation and osseointegration of Mg-xGd implant screws in 3D.. <i>Bioactive Materials</i> , <b>2022</b> , 13, 37-52	16.7	3
52	Fixed full-arch maxillary prostheses supported by four versus six implants with a titanium CAD/CAM milled framework: 3-year multicentre RCT. <i>Clinical Oral Implants Research</i> , <b>2021</b> , 32, 44-59	4.8	0
51	Multimodal ex vivo methods reveal that Gd-rich corrosion byproducts remain at the implant site of biodegradable Mg-Gd screws. <i>Acta Biomaterialia</i> , <b>2021</b> , 136, 582-591	10.8	2
50	Analysis of the bone ultrastructure around biodegradable Mg-xGd implants using small angle X-ray scattering and X-ray diffraction. <i>Acta Biomaterialia</i> , <b>2020</b> , 101, 637-645	10.8	14
49	Cobalt-chromium alloys fabricated with four different techniques: Ion release, toxicity of released elements and surface roughness. <i>Dental Materials</i> , <b>2020</b> , 36, e352-e363	5.7	9
48	Production tolerance of conventional and digital workflow in the manufacturing of glass ceramic crowns. <i>Dental Materials</i> , <b>2019</b> , 35, 486-494	5.7	3
47	Bone Immune Response to Materials, Part II: Copper and Polyetheretherketone (PEEK) Compared to Titanium at 10 and 28 Days in Rabbit Tibia. <i>Journal of Clinical Medicine</i> , <b>2019</b> , 8,	5.1	6
46	Rational design and in vitro characterization of novel dental implant and abutment surfaces for balancing clinical and biological needs. <i>Clinical Implant Dentistry and Related Research</i> , <b>2019</b> , 21 Suppl 1, 15-24	3.9	10
45	On osseointegration in relation to implant surfaces. <i>Clinical Implant Dentistry and Related Research</i> , <b>2019</b> , 21 Suppl 1, 4-7	3.9	99
44	Patient satisfaction and clinical outcomes in implant-supported overdentures retained by milled bars: Two-year follow-up. <i>Journal of Oral Rehabilitation</i> , <b>2019</b> , 46, 624-633	3.4	2
43	Infraposition of anterior maxillary implant-supported single-tooth restorations in adolescent and adult patients-A prospective follow-up study up to 6 years. <i>Clinical Implant Dentistry and Related Research</i> , <b>2019</b> , 21, 953-959	3.9	1
42	Aseptic Ligatures Induce Marginal Peri-Implant Bone Loss-An 8-Week Trial in Rabbits. <i>Journal of Clinical Medicine</i> , <b>2019</b> , 8,	5.1	4
41	Osseointegration effects of local release of strontium ranelate from implant surfaces in rats. <i>Journal of Materials Science: Materials in Medicine</i> , <b>2019</b> , 30, 116	4.5	10
40	On inflammation-immunological balance theory-A critical apprehension of disease concepts around implants: Mucositis and marginal bone loss may represent normal conditions and not necessarily a state of disease. <i>Clinical Implant Dentistry and Related Research</i> , <b>2019</b> , 21, 183-189	3.9	36
39	Biomechanical, histological, and computed X-ray tomographic analyses of hydroxyapatite coated PEEK implants in an extended healing model in rabbit. <i>Journal of Biomedical Materials Research - Part A</i> , <b>2018</b> , 106, 1440-1447	5.4	28
38	Osseointegration and foreign body reaction: Titanium implants activate the immune system and suppress bone resorption during the first 4 weeks after implantation. <i>Clinical Implant Dentistry and Related Research</i> , <b>2018</b> , 20, 82-91	3.9	80
37	A retrospective study on clinical and radiological outcomes of oral implants in patients followed up for a minimum of 20 years. <i>Clinical Implant Dentistry and Related Research</i> , <b>2018</b> , 20, 199-207	3.9	65

36	Ligature-Induced Experimental Peri-Implantitis-A Systematic Review. <i>Journal of Clinical Medicine</i> , <b>2018</b> , 7,	5.1	12
35	Bone Immune Response to Materials, Part I: Titanium, PEEK and Copper in Comparison to Sham at 10 Days in Rabbit Tibia. <i>Journal of Clinical Medicine</i> , <b>2018</b> , 7,	5.1	26
34	Magnesium release from mesoporous carriers on endosseus implants does not influence bone maturation at 6 weeks in rabbit bone. <i>Journal of Biomedical Materials Research - Part B Applied Biomaterials</i> , <b>2017</b> , 105, 2118-2125	3.5	3
33	Foreign Body Reaction to Biomaterials: On Mechanisms for Buildup and Breakdown of Osseointegration. <i>Clinical Implant Dentistry and Related Research</i> , <b>2016</b> , 18, 192-203	3.9	202
32	Production tolerance of additive manufactured polymeric objects for clinical applications. <i>Dental Materials</i> , <b>2016</b> , 32, 853-61	5.7	61
31	Engineered protein coatings to improve the osseointegration of dental and orthopaedic implants. <i>Biomaterials</i> , <b>2016</b> , 83, 269-82	15.6	84
30	Survival and Complications of Zygomatic Implants: An Updated Systematic Review. <i>Journal of Oral and Maxillofacial Surgery</i> , <b>2016</b> , 74, 1949-64	1.8	97
29	Osteoconductive Potential of Mesoporous Titania Implant Surfaces Loaded with Magnesium: An Experimental Study in the Rabbit. <i>Clinical Implant Dentistry and Related Research</i> , <b>2015</b> , 17, 1048-59	3.9	21
28	Local release of magnesium from mesoporous TiO <sub>2</sub> coatings stimulates the peri-implant expression of osteogenic markers and improves osteoconductivity in vivo. <i>Acta Biomaterialia</i> , <b>2014</b> , 10, 5193-5201	10.8	54
27	Biomechanical evaluation and surface characterization of a nano-modified surface on PEEK implants: a study in the rabbit tibia. <i>International Journal of Nanomedicine</i> , <b>2014</b> , 9, 3903-11	7.3	40
26	Evaluation of bone healing on sandblasted and Acid etched implants coated with nanocrystalline hydroxyapatite: an in vivo study in rabbit femur. <i>International Journal of Dentistry</i> , <b>2014</b> , 2014, 197581	1.9	8
25	Nanostructures and hydrophilicity influence osseointegration: a biomechanical study in the rabbit tibia. <i>Clinical Oral Implants Research</i> , <b>2014</b> , 25, 1041-50	4.8	102
24	Is marginal bone loss around oral implants the result of a provoked foreign body reaction?. <i>Clinical Implant Dentistry and Related Research</i> , <b>2014</b> , 16, 155-65	3.9	184
23	Spontaneously formed nanostructures on titanium surfaces. <i>Clinical Oral Implants Research</i> , <b>2013</b> , 24, 203-9	4.8	72
22	Characteristics of 2 Different Commercially Available Implants with or without Nanotopography. <i>International Journal of Dentistry</i> , <b>2013</b> , 2013, 769768	1.9	8
21	Importance of Ca(2+) modifications for osseointegration of smooth and moderately rough anodized titanium implants - a removal torque and histological evaluation in rabbit. <i>Clinical Implant Dentistry and Related Research</i> , <b>2012</b> , 14, 737-45	3.9	16
20	In vivo biomechanical stability of osseointegrating mesoporous TiO <sub>2</sub> implants. <i>Acta Biomaterialia</i> , <b>2012</b> , 8, 4438-46	10.8	39
19	Reasons for marginal bone loss around oral implants. <i>Clinical Implant Dentistry and Related Research</i> , <b>2012</b> , 14, 792-807	3.9	138

18	The biological response to three different nanostructures applied on smooth implant surfaces. <i>Clinical Oral Implants Research</i> , <b>2012</b> , 23, 706-712	4.8	31
17	Histological and three-dimensional evaluation of osseointegration to nanostructured calcium phosphate-coated implants. <i>Acta Biomaterialia</i> , <b>2011</b> , 7, 4229-34	10.8	67
16	Cellular responses to cobalt-chrome and CP titanium--an in vitro comparison of frameworks for implant-retained oral prostheses. <i>Swedish Dental Journal</i> , <b>2011</b> , 35, 177-86		9
15	Surface characterization of commercial oral implants on the nanometer level. <i>Journal of Biomedical Materials Research - Part B Applied Biomaterials</i> , <b>2010</b> , 92, 462-9	3.5	25
14	On implant surfaces: a review of current knowledge and opinions. <i>International Journal of Oral and Maxillofacial Implants</i> , <b>2010</b> , 25, 63-74	2.8	305
13	Nano hydroxyapatite structures influence early bone formation. <i>Journal of Biomedical Materials Research - Part A</i> , <b>2008</b> , 87, 299-307	5.4	136
12	The effect of chemical and nanotopographical modifications on the early stages of osseointegration. <i>International Journal of Oral and Maxillofacial Implants</i> , <b>2008</b> , 23, 641-7	2.8	76
11	Increased bone formation to unstable nano rough titanium implants. <i>Clinical Oral Implants Research</i> , <b>2007</b> , 18, 326-32	4.8	74
10	The role of functional parameters for topographical characterization of bone-anchored implants. <i>Clinical Implant Dentistry and Related Research</i> , <b>2006</b> , 8, 70-6	3.9	18
9	Optimum surface properties of oxidized implants for reinforcement of osseointegration: surface chemistry, oxide thickness, porosity, roughness, and crystal structure. <i>International Journal of Oral and Maxillofacial Implants</i> , <b>2005</b> , 20, 349-59	2.8	114
8	Improved retention and bone-to-implant contact with fluoride-modified titanium implants. <i>International Journal of Oral and Maxillofacial Implants</i> , <b>2004</b> , 19, 659-66	2.8	195
7	Oral implant surfaces: Part 1--review focusing on topographic and chemical properties of different surfaces and in vivo responses to them. <i>International Journal of Prosthodontics</i> , <b>2004</b> , 17, 536-43	1.9	568
6	Characteristics of the surface oxides on turned and electrochemically oxidized pure titanium implants up to dielectric breakdown: the oxide thickness, micropore configurations, surface roughness, crystal structure and chemical composition. <i>Biomaterials</i> , <b>2002</b> , 23, 491-501	15.6	423
5	Histologic evaluation of the bone integration of TiO <sub>2</sub> blasted and turned titanium microimplants in humans. <i>Clinical Oral Implants Research</i> , <b>2001</b> , 12, 128-34	4.8	142
4	Determining optimal surface roughness of TiO <sub>2</sub> blasted titanium implant material for attachment, proliferation and differentiation of cells derived from human mandibular alveolar bone. <i>Clinical Oral Implants Research</i> , <b>2001</b> , 12, 515-25	4.8	190
3	In vitro dentin pretreatment: surface roughness and adhesive shear bond strength. <i>European Journal of Oral Sciences</i> , <b>1999</b> , 107, 400-13	2.3	30
2	Torque and histomorphometric evaluation of c.p. titanium screws blasted with 25- and 75-microns-sized particles of Al <sub>2</sub> O <sub>3</sub> . <i>Journal of Biomedical Materials Research Part B</i> , <b>1996</b> , 30, 251-60		165
1	Anchorage of TiO <sub>2</sub> -blasted, HA-coated, and machined implants: an experimental study with rabbits. <i>Journal of Biomedical Materials Research Part B</i> , <b>1995</b> , 29, 1223-31		208
