#	Paper	IF	Citations
12	A clinical score for identifying active tuberculosis while awaiting microbiological results: Development and validation of a multivariable prediction model in sub-Saharan Africa. *PLoS Medicine*, **2020**, 17, e1003420	11.6	6
11	Prevalence and associated factors of alcohol use patterns among university students in Uganda. *Pan African Medical Journal*, **2020**, 37, 339	1.2	1
10	Evaluation of underweight status may improve identification of the highest-risk patients during outpatient evaluation for pulmonary tuberculosis. *PLoS ONE*, **2020**, 15, e0243542	3.7	
9	A clinical score for identifying active tuberculosis while awaiting microbiological results: Development and validation of a multivariable prediction model in sub-Saharan Africa **2020**, 17, e1003420		
8	A clinical score for identifying active tuberculosis while awaiting microbiological results: Development and validation of a multivariable prediction model in sub-Saharan Africa **2020**, 17, e1003420		
7	A clinical score for identifying active tuberculosis while awaiting microbiological results: Development and validation of a multivariable prediction model in sub-Saharan Africa **2020**, 17, e1003420		
6	A clinical score for identifying active tuberculosis while awaiting microbiological results: Development and validation of a multivariable prediction model in sub-Saharan Africa **2020**, 17, e1003420		
5	A clinical score for identifying active tuberculosis while awaiting microbiological results: Development and validation of a multivariable prediction model in sub-Saharan Africa **2020**, 17, e1003420		
4	Evaluation of underweight status may improve identification of the highest-risk patients during outpatient evaluation for pulmonary tuberculosis **2020**, 15, e0243542		
3	Evaluation of underweight status may improve identification of the highest-risk patients during outpatient evaluation for pulmonary tuberculosis **2020**, 15, e0243542		
2	Evaluation of underweight status may improve identification of the highest-risk patients during outpatient evaluation for pulmonary tuberculosis **2020**, 15, e0243542		
1	Evaluation of underweight status may improve identification of the highest-risk patients during outpatient evaluation for pulmonary tuberculosis **2020**, 15, e0243542
