

Pierre Ladevze

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/8615173/pierre-ladeveze-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
77	On a Physics-Compatible Approach for Data-Driven Computational Mechanics 2022 , 287-294		
76	On a wave-based reduced order model for transient effects computation including mid frequencies. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2022 , 395, 114990	5.7	0
75	Industrial Digital Twins based on the non-linear LATIN-PGD. <i>Advanced Modeling and Simulation in Engineering Sciences</i> , 2021 , 8,	2.7	1
74	A Semi-incremental Scheme for Cyclic Damage Computations. <i>Lecture Notes in Applied and Computational Mechanics</i> , 2020 , 229-247	0.3	
73	Toward Optimality of Proper Generalised Decomposition Bases. <i>Mathematical and Computational Applications</i> , 2019 , 24, 30	1	2
72	A kinetic two-scale damage model for high-cycle fatigue simulation using multi-temporal Latin framework. <i>European Journal of Mechanics, A/Solids</i> , 2019 , 77, 103808	3.7	10
71	Data-driven computation for history-dependent materials. <i>Comptes Rendus - Mecanique</i> , 2019 , 347, 831-844	2.4	11
70	A Model Reduction Technique in Space and Time for Fatigue Simulation. <i>Lecture Notes in Applied and Computational Mechanics</i> , 2018 , 183-203	0.3	2
69	Towards simplified and optimized a posteriori error estimation using PGD reduced models. <i>International Journal for Numerical Methods in Engineering</i> , 2018 , 113, 967-998	2.4	1
68	A multi-temporal scale model reduction approach for the computation of fatigue damage. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2018 , 340, 630-656	5.7	13
67	A door to model reduction in high-dimensional parameter space. <i>Comptes Rendus - Mecanique</i> , 2018 , 346, 524-531	2.1	5
66	A LATIN-based model reduction approach for the simulation of cycling damage. <i>Computational Mechanics</i> , 2018 , 62, 725-743	4	15
65	A Virtual Testing Approach for Laminated Composites Based on Micromechanics 2017 , 667-698		2
64	A posteriori error estimation and adaptive strategy for PGD model reduction applied to parametrized linear parabolic problems. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2017 , 327, 118-146	5.7	10
63	Data-driven non-linear elasticity: constitutive manifold construction and problem discretization. <i>Computational Mechanics</i> , 2017 , 60, 813-826	4	67
62	The Constitutive Relation Error Method: A General Verification Tool. <i>SpringerBriefs in Applied Sciences and Technology</i> , 2016 , 59-94	0.4	3
61	On reduced models in nonlinear solid mechanics. <i>European Journal of Mechanics, A/Solids</i> , 2016 , 60, 227-237	3.7	17

60	Extension of the variational theory of complex rays to orthotropic shallow shell structures. <i>Advances in Aircraft and Spacecraft Science</i> , 2016 , 3, 317-330		
59	Integration of PGD-virtual charts into an engineering design process. <i>Computational Mechanics</i> , 2016 , 57, 637-651	4	19
58	The Variational Theory of Complex Rays applied to the shallow shell theory. <i>Computers and Structures</i> , 2015 , 158, 98-107	4.5	4
57	Variational theory of complex rays applied to shell structures: in-plane inertia, quasi-symmetric ray distribution, and orthotropic materials. <i>Computational Mechanics</i> , 2015 , 56, 983-997	4	2
56	Proper Generalized Decomposition computational methods on a benchmark problem: introducing a new strategy based on Constitutive Relation Error minimization. <i>Advanced Modeling and Simulation in Engineering Sciences</i> , 2015 , 2,	2.7	10
55	Proper Generalized Decomposition applied to linear acoustic: A new tool for broad band calculation. <i>Journal of Sound and Vibration</i> , 2014 , 333, 2422-2431	3.9	16
54	Damage and Lifetime Modeling for Structure Computations 2014 , 465-519		4
53	On structural computations until fracture based on an anisotropic and unilateral damage theory. <i>International Journal of Damage Mechanics</i> , 2014 , 23, 483-506	3	11
52	On Trefftz and weak Trefftz discontinuous Galerkin approaches for medium-frequency acoustics. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2014 , 278, 729-743	5.7	10
51	Goal-oriented updating of mechanical models using the adjoint framework. <i>Computational Mechanics</i> , 2014 , 54, 1415-1430	4	9
50	Identification and validation of an enhanced mesomodel for laminated composites within the WWFE-III. <i>Journal of Composite Materials</i> , 2013 , 47, 2675-2693	2.7	36
49	Guaranteed error bounds on pointwise quantities of interest for transient viscodynamics problems. <i>Computational Mechanics</i> , 2012 , 49, 291-307	4	23
48	An enhanced method with local energy minimization for the robust a posteriori construction of equilibrated stress fields in finite element analyses. <i>Computational Mechanics</i> , 2012 , 49, 357-378	4	15
47	Strict upper bounds of the error in calculated outputs of interest for plasticity problems. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2012 , 245-246, 194-205	5.7	10
46	AN ADAPTIVE NUMERICAL STRATEGY FOR THE MEDIUM-FREQUENCY ANALYSIS OF HELMHOLTZ'S PROBLEM. <i>Journal of Computational Acoustics</i> , 2012 , 20, 1250001		14
45	THE VARIATIONAL THEORY OF COMPLEX RAYS FOR THREE-DIMENSIONAL HELMHOLTZ PROBLEMS. <i>Journal of Computational Acoustics</i> , 2012 , 20, 1250021		13
44	The Fourier version of the Variational Theory of Complex Rays for medium-frequency acoustics. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2012 , 225-228, 142-153	5.7	20
43	Robust control of PGD-based numerical simulations. <i>European Journal of Computational Mechanics</i> , 2012 , 21, 195-207	0.5	10

42	A Short Review on Model Order Reduction Based on Proper Generalized Decomposition. <i>Archives of Computational Methods in Engineering</i> , 2011 , 18, 395-404	7.8	354
41	On the verification of model reduction methods based on the proper generalized decomposition. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2011 , 200, 2032-2047	5.7	82
40	A new approach to the subcritical cracking of ceramic fibers. <i>Composites Science and Technology</i> , 2010 , 70, 1575-1583	8.6	15
39	Proper Generalized Decomposition for Multiscale and Multiphysics Problems. <i>Archives of Computational Methods in Engineering</i> , 2010 , 17, 351-372	7.8	66
38	A new non-intrusive technique for the construction of admissible stress fields in model verification. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2010 , 199, 766-777	5.7	37
37	Micromodel-based simulations for laminated composites. <i>Composites Science and Technology</i> , 2009 , 69, 1364-1371	8.6	36
36	Strict and practical bounds through a non-intrusive and goal-oriented error estimation method for linear viscoelasticity problems. <i>Finite Elements in Analysis and Design</i> , 2009 , 45, 251-262	2.2	16
35	Model verification in dynamics through strict upper error bounds. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2009 , 198, 1775-1784	5.7	16
34	Validation of Intralaminar Behaviour of the Laminated Composites by Damage Mesomodel 2009 ,		1
33	A non-intrusive approach of goal-oriented error estimation for evolution problems solved by the finite element method. <i>European Journal of Computational Mechanics</i> , 2008 , 17, 981-992	0.5	
32	THE MULTISCALE VTQR APPROACH APPLIED TO ACOUSTICS PROBLEMS. <i>Journal of Computational Acoustics</i> , 2008 , 16, 487-505		47
31	Strict upper error bounds on computed outputs of interest in computational structural mechanics. <i>Computational Mechanics</i> , 2008 , 42, 271-286	4	50
30	A non-intrusive method for the calculation of strict and efficient bounds of calculated outputs of interest in linear viscoelasticity problems. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2008 , 197, 994-1014	5.7	32
29	On a mixed and multiscale domain decomposition method. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2007 , 196, 1526-1540	5.7	30
28	Transient analysis including the low- and the medium-frequency ranges of engineering structures. <i>Computers and Structures</i> , 2007 , 85, 1431-1444	4.5	10
27	Upper error bounds on calculated outputs of interest for linear and nonlinear structural problems. <i>Comptes Rendus - Mecanique</i> , 2006 , 334, 399-407	2.1	20
26	A Computational Damage Micromodel of Laminated Composites. <i>International Journal of Fracture</i> , 2006 , 137, 139-150	2.3	43
25	A new computational method for transient dynamics including the low- and the medium-frequency ranges. <i>International Journal for Numerical Methods in Engineering</i> , 2005 , 64, 503-527	2.4	21

24	A Bridge Between the Micro- and Mesomechanics of Laminates: Fantasy or Reality? 2005 , 187-201		1
23	Towards a Micromechanics-Based Damage Mesomodel for CFRP Laminates under Thermomechanical Cyclic Loading. <i>Science and Engineering of Composite Materials</i> , 2005 , 12, 71-82	1.5	3
22	On a multiscale computational strategy with time and space homogenization for structural mechanics. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2003 , 192, 3061-3087	5.7	114
21	The variational theory of complex rays: a predictive tool for medium-frequency vibrations. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2003 , 192, 3301-3315	5.7	42
20	On a damage mesomodel for laminates: micromechanics basis and improvement. <i>Mechanics of Materials</i> , 2003 , 35, 763-775	3.3	59
19	Pont entre les « micro » et « mēso » mēcaniques des composites stratifiē. <i>Comptes Rendus - Mecanique</i> , 2003 , 331, 537-544	2.1	24
18	A Multi-Time-Scale Strategy for Multiphysics Problems: Application to Poroelasticity. <i>International Journal for Multiscale Computational Engineering</i> , 2003 , 1, 387-400	2.4	16
17	Une stratēgie de calcul multiēchelle avec homogēnisation en espace et en temps. <i>Comptes Rendus - Mecanique</i> , 2002 , 330, 683-689	2.1	9
16	The Exact Theory of Plate Bending. <i>Journal of Elasticity</i> , 2002 , 68, 37-71	1.5	9
15	Mise en ōuvre numērique d'un mēsomodēle d'endommagement des stratifiē. <i>Revue Europeenne Des Elements</i> , 2001 , 10, 473-487		2
14	Constitutive relation errors for F.E. analysis considering (visco-) plasticity and damage. <i>International Journal for Numerical Methods in Engineering</i> , 2001 , 52, 527-542	2.4	14
13	A mesomodel for localisation and damage computation in laminates. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2000 , 183, 105-122	5.7	127
12	Duality preserving discretization of the large time increment methods. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2000 , 189, 205-232	5.7	7
11	Constitutive relation error estimators for time-dependent non-linear FE analysis. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2000 , 188, 775-788	5.7	6
10	La Thēorie Variationnelle des Rayons Complexes pour le calcul des vibrations moyennes frēquences. <i>Revue Europeenne Des Elements</i> , 2000 , 9, 67-88		3
9	Application of a posteriori error estimation for structural model updating. <i>Inverse Problems</i> , 1999 , 15, 49-58	2.3	64
8	Adaptive control for finite element analysis in plasticity. <i>Computers and Structures</i> , 1999 , 73, 45-60	4.5	15
7	Une nouvelle stratēgie de calcul micro/macro en mēcanique des structures. <i>Comptes Rendus De L'Academie De Sciences - Serie IIb: Mecanique, Physique, Chimie, Astronomie</i> , 1999 , 327, 1237-1244		4

6	Constitutive relation error estimators for (visco)plastic finite element analysis with softening. <i>Computer Methods in Applied Mechanics and Engineering</i> , 1999 , 176, 247-264	5.7	35
5	Nonlinear Computational Structural Mechanics. <i>Mechanical Engineering Series</i> , 1999 ,	0.3	170
4	A new a posteriori error estimation for nonlinear time-dependent finite element analysis. <i>Computer Methods in Applied Mechanics and Engineering</i> , 1998 , 157, 45-68	5.7	38
3	New concepts for linear beam theory with arbitrary geometry and loading. <i>European Journal of Mechanics, A/Solids</i> , 1998 , 17, 377-402	3.7	80
2	A Posteriori Constitutive Relation Error Estimators for Nonlinear Finite Element Analysis and Adaptive Control. <i>Studies in Applied Mechanics</i> , 1998 , 231-256		9
1	A damage prediction method for composite structures. <i>International Journal for Numerical Methods in Engineering</i> , 1989 , 27, 271-283	2.4	52
