

Beatriz Sf Cury

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/8627167/beatriz-sf-cury-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
34	Nose-to-brain co-delivery of drugs for glioblastoma treatment using nanostructured system. <i>International Journal of Pharmaceutics</i> , 2021 , 603, 120714	6.5	5
33	Computational and experimental approaches for chitosan-based nano PECs design: Insights on a deeper comprehension of nanostructure formation. <i>Carbohydrate Polymers</i> , 2021 , 254, 117444	10.3	4
32	The role of polysaccharides from natural resources to design oral insulin micro- and nanoparticles intended for the treatment of Diabetes mellitus: A review. <i>Carbohydrate Polymers</i> , 2021 , 256, 117504	10.3	9
31	Rational design of nanocarriers based on gellan gum/retrograded starch exploiting polyelectrolyte complexation and ionic cross-linking processes: A potential technological platform for oral delivery of bevacizumab. <i>Journal of Drug Delivery Science and Technology</i> , 2021 , 66, 102765	4.5	1
30	Mucin-polysaccharide interactions: A rheological approach to evaluate the effect of pH on the mucoadhesive properties. <i>International Journal of Biological Macromolecules</i> , 2020 , 149, 234-245	7.9	14
29	Insights into the impact of cross-linking processes on physicochemical characteristics and mucoadhesive potential of gellan gum/retrograded starch microparticles as a platform for colonic drug release. <i>Journal of Drug Delivery Science and Technology</i> , 2020 , 55, 101445	4.5	9
28	Design of chitosan-based particle systems: A review of the physicochemical foundations for tailored properties. <i>Carbohydrate Polymers</i> , 2020 , 250, 116968	10.3	14
27	Modulating chitosan-PLGA nanoparticle properties to design a co-delivery platform for glioblastoma therapy intended for nose-to-brain route. <i>Drug Delivery and Translational Research</i> , 2020 , 10, 1729-1747	6.2	15
26	Mucoadhesive films based on gellan gum/pectin blends as potential platform for buccal drug delivery. <i>Pharmaceutical Development and Technology</i> , 2020 , 25, 159-167	3.4	13
25	Alginate-Based Delivery Systems for Bevacizumab Local Therapy: In Vitro Structural Features and Release Properties. <i>Journal of Pharmaceutical Sciences</i> , 2019 , 108, 1559-1568	3.9	8
24	Mucoadhesive nanostructured polyelectrolytes complexes modulate the intestinal permeability of methotrexate. <i>European Journal of Pharmaceutical Sciences</i> , 2018 , 111, 73-82	5.1	29
23	Effect of in situ modification of bacterial cellulose with carboxymethylcellulose on its nano/microstructure and methotrexate release properties. <i>Carbohydrate Polymers</i> , 2018 , 179, 126-134	10.3	58
22	Gellan Gum/Pectin Beads Are Safe and Efficient for the Targeted Colonic Delivery of Resveratrol. <i>Polymers</i> , 2018 , 10,	4.5	33
21	Retrograded starch/pectin coated gellan gum-microparticles for oral administration of insulin: A technological platform for protection against enzymatic degradation and improvement of intestinal permeability. <i>European Journal of Pharmaceutics and Biopharmaceutics</i> , 2018 , 123, 84-94	5.7	40
20	Synthesis and characterization of 3,6-O,Ob dimyristoyl chitosan micelles for oral delivery of paclitaxel. <i>Colloids and Surfaces B: Biointerfaces</i> , 2017 , 152, 220-228	6	31
19	Evaluation of retrograded starch as excipient for controlled release matrix tablets. <i>Journal of Drug Delivery Science and Technology</i> , 2017 , 40, 83-94	4.5	12
18	Porosity effects of natural latex (<i>Hevea brasiliensis</i>) on release of compounds for biomedical applications. <i>Journal of Biomaterials Science, Polymer Edition</i> , 2017 , 28, 2117-2130	3.5	21

17	Resistant starch/pectin free-standing films reinforced with nanocellulose intended for colonic methotrexate release. <i>Carbohydrate Polymers</i> , 2017 , 157, 1013-1023	10.3	58
16	Development and characterization of cross-linked gellan gum and retrograded starch blend hydrogels for drug delivery applications. <i>Journal of the Mechanical Behavior of Biomedical Materials</i> , 2017 , 65, 317-333	4.1	59
15	Cellulose triacetate films obtained from sugarcane bagasse: Evaluation as coating and mucoadhesive material for drug delivery systems. <i>Carbohydrate Polymers</i> , 2016 , 152, 764-774	10.3	16
14	Preparation and Characterization of Amylose Inclusion Complexes for Drug Delivery Applications. <i>Journal of Pharmaceutical Sciences</i> , 2016 , 105, 231-41	3.9	26
13	Gellan gum microspheres crosslinked with trivalent ion: effect of polymer and crosslinker concentrations on drug release and mucoadhesive properties. <i>Drug Development and Industrial Pharmacy</i> , 2016 , 42, 1283-90	3.6	32
12	Polyacrylic acid polymers hydrogels intended to topical drug delivery: preparation and characterization. <i>Pharmaceutical Development and Technology</i> , 2015 , 20, 490-6	3.4	68
11	Insights into the swelling process and drug release mechanisms from cross-linked pectin/high amylose starch matrices. <i>Asian Journal of Pharmaceutical Sciences</i> , 2014 , 9, 27-34	9	111
10	Mucoadhesive beads of gellan gum/pectin intended to controlled delivery of drugs. <i>Carbohydrate Polymers</i> , 2014 , 113, 286-95	10.3	106
9	Films from resistant starch-pectin dispersions intended for colonic drug delivery. <i>Carbohydrate Polymers</i> , 2014 , 99, 140-9	10.3	80
8	Blends of cross-linked high amylose starch/pectin loaded with diclofenac. <i>Carbohydrate Polymers</i> , 2013 , 91, 135-42	10.3	66
7	Effect of drying technique on some physical properties of cross-linked high amylose/pectin mixtures. <i>Drug Development and Industrial Pharmacy</i> , 2013 , 39, 284-9	3.6	4
6	Physical properties of pectin-high amylose starch mixtures cross-linked with sodium trimetaphosphate. <i>International Journal of Pharmaceutics</i> , 2012 , 423, 281-8	6.5	54
5	Preparation and characterization of free films of high amylose/pectin mixtures cross-linked with sodium trimetaphosphate. <i>Drug Development and Industrial Pharmacy</i> , 2012 , 38, 1354-9	3.6	29
4	A new approach to the granulation of β -cyclodextrin inclusion complexes. <i>Chemical Engineering Journal</i> , 2010 , 164, 316-321	14.7	14
3	Modeling a system of phosphated cross-linked high amylose for controlled drug release. Part 2: physical parameters, cross-linking degrees and drug delivery relationships. <i>International Journal of Pharmaceutics</i> , 2009 , 371, 8-15	6.5	31
2	Influence of phosphated cross-linked high amylose on in vitro release of different drugs. <i>Carbohydrate Polymers</i> , 2009 , 78, 789-793	10.3	9
1	Modeling a system of phosphated cross-linked high amylose for controlled drug release. Part 1: Synthesis and polymer characterization. <i>Reactive and Functional Polymers</i> , 2008 , 68, 1200-1206	4.6	15
