

Martin R Pool

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/8651170/martin-r-pool-publications-by-year.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

27
papers

1,770
citations

19

#	Paper	IF	Citations
27	Membrane protein biogenesis at the ER: the highways and byways. <i>FEBS Journal</i> , 2021 ,	5.7	5
26	The perplexing PEXEL protein secretory pathway. <i>Nature Microbiology</i> , 2018 , 3, 969-970	26.6	1
25	Cell biology: Sort of unexpected. <i>Nature</i> , 2016 , 540, 45-46	50.4	5
24	Analysis of the interplay of protein biogenesis factors at the ribosome exit site reveals new role for NAC. <i>Journal of Cell Biology</i> , 2015 , 210, 287-301	7.3	22
23	Structure and Switch Cycle of SRPs Ancestral Eukaryotic GTPase Associated with Secretory Membranes. <i>Structure</i> , 2015 , 23, 1838-1847	5.2	7
22	Mammalian SRP receptor switches the Sec61 translocase from Sec62 to SRP-dependent translocation. <i>Nature Communications</i> , 2015 , 6, 10133	17.4	31
21	Co-translational targeting and translocation of proteins to the endoplasmic reticulum. <i>Biochimica Et Biophysica Acta - Molecular Cell Research</i> , 2013 , 1833, 2392-402	4.9	127
20	Interplay between signal sequence recognition and N-terminal protein modification at the ribosome exit site. <i>FASEB Journal</i> , 2012 , 26, 542.2	0.9	
19	Polytopic membrane protein folding at L17 in the ribosome tunnel initiates cyclical changes at the translocon. <i>Journal of Cell Biology</i> , 2011 , 195, 55-70	7.3	30
18	N-terminal acetylation inhibits protein targeting to the endoplasmic reticulum. <i>PLoS Biology</i> , 2011 , 9, e1001073	9.7	128
17	A trans-membrane segment inside the ribosome exit tunnel triggers RAMP4 recruitment to the Sec61p translocase. <i>Journal of Cell Biology</i> , 2009 , 185, 889-902	7.3	40
16	Eeyarestatin I inhibits Sec61-mediated protein translocation at the endoplasmic reticulum. <i>Journal of Cell Science</i> , 2009 , 122, 4393-400	5.3	74
15	Access to ribosomal protein Rpl25p by the signal recognition particle is required for efficient cotranslational translocation. <i>Molecular Biology of the Cell</i> , 2008 , 19, 2876-84	3.5	12
14	Signal recognition particle receptor exposes the ribosomal translocon binding site. <i>Science</i> , 2006 , 312, 745-7	33.3	120
13	Following the signal sequence from ribosomal tunnel exit to signal recognition particle. <i>Nature</i> , 2006 , 444, 507-11	50.4	162
12	Signal recognition particles in chloroplasts, bacteria, yeast and mammals (review). <i>Molecular Membrane Biology</i> , 2005 , 22, 3-15	3.4	92
11	Signal recognition particle mediates post-translational targeting in eukaryotes. <i>EMBO Journal</i> , 2004 , 23, 2755-64	13	104

10	Structure of the signal recognition particle interacting with the elongation-arrested ribosome. <i>Nature</i> , 2004 , 427, 808-14	50.4	328
9	Signal recognition particle Alu domain occupies a defined site at the ribosomal subunit interface upon signal sequence recognition. <i>Biochemistry</i> , 2004 , 43, 107-17	3.2	28
8	Distinct modes of signal recognition particle interaction with the ribosome. <i>Science</i> , 2002 , 297, 1345-8	33.3	160
7	SRbeta coordinates signal sequence release from SRP with ribosome binding to the translocon. <i>EMBO Journal</i> , 2001 , 20, 2338-47	13	68
6	Scp160p, an RNA-binding, polysome-associated protein, localizes to the endoplasmic reticulum of <i>Saccharomyces cerevisiae</i> in a microtubule-dependent manner. <i>Journal of Biological Chemistry</i> , 2001 , 276, 15905-12	5.4	87
5	Arabidopsis 22-kilodalton peroxisomal membrane protein. Nucleotide sequence analysis and biochemical characterization. <i>Plant Physiology</i> , 1999 , 120, 309-20	6.6	45
4	The ribosome regulates the GTPase of the beta-subunit of the signal recognition particle receptor. <i>Journal of Cell Biology</i> , 1999 , 146, 723-30	7.3	47
3	Characterization of intermediates in the process of plant peroxisomal protein import. <i>EMBO Journal</i> , 1998 , 17, 6854-62	13	21
2	NADPH is a specific inhibitor of protein import into glyoxysomes. <i>Plant Journal</i> , 1998 , 15, 1-14	6.9	17
1	Protein targeting and translocation; a comparative survey. <i>Biological Reviews</i> , 1996 , 71, 637-702	13.5	8
