#	ARTICLE	IF	CITATIONS
1	The costs of chronic noise exposure for terrestrial organisms. <i>Trends in Ecology and Evolution</i> , 2010, 25, 180-189.	4.2	748
2	A framework for understanding noise impacts on wildlife: an urgent conservation priority. <i>Frontiers in Ecology and the Environment</i> , 2013, 11, 305-313.	1.9	395
3	Phylogenomics reveals the evolutionary timing and pattern of butterflies and moths. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2019, 116, 22657-22663.	3.3	291
4	A framework to assess evolutionary responses to anthropogenic light and sound. <i>Trends in Ecology and Evolution</i> , 2015, 30, 550-560.	4.2	248
5	An experimental investigation into the effects of traffic noise on distributions of birds: avoiding the phantom road. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2013, 280, 20132290.	1.2	210
6	A phantom road experiment reveals traffic noise is an invisible source of habitat degradation. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2015, 112, 12105-12109.	3.3	202
7	Anthropogenic noise exposure in protected natural areas: estimating the scale of ecological consequences. <i>Landscape Ecology</i> , 2011, 26, 1281-1295.	1.9	173
8	Tiger Moth Jams Bat Sonar. <i>Science</i> , 2009, 325, 325-327.	6.0	136
9	Why conservation biology can benefit from sensory ecology. <i>Nature Ecology and Evolution</i> , 2020, 4, 502-511.	3.4	131
10	Acoustic mimicry in a predator prey interaction. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2007, 104, 9331-9334.	3.3	109
11	An improved method for utilizing high-throughput amplicon sequencing to determine the diets of insectivorous animals. <i>Molecular Ecology Resources</i> , 2019, 19, 176-190.	2.2	109
12	Sensory pollutants alter bird phenology and fitness across a continent. <i>Nature</i> , 2020, 587, 605-609.	13.7	94
13	Anthropogenic noise impairs owl hunting behavior. <i>Biological Conservation</i> , 2016, 199, 29-32.	1.9	78
14	Can two streams of auditory information be processed simultaneously? Evidence from the gleaning bat <i>Antrozous pallidus</i> . <i>Journal of Comparative Physiology A: Neuroethology, Sensory, Neural, and Behavioral Physiology</i> , 2003, 189, 843-855.	0.7	73
15	Anthropogenic noise alters bat activity levels and echolocation calls. <i>Global Ecology and Conservation</i> , 2015, 3, 62-71.	1.0	71
16	Moth tails divert bat attack: Evolution of acoustic deflection. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2015, 112, 2812-2816.	3.3	66
17	The Effect of Human Activities and Their Associated Noise on Ungulate Behavior. <i>PLoS ONE</i> , 2012, 7, e40505.	1.1	60
18	Acoustic environments matter: Synergistic benefits to humans and ecological communities. <i>Journal of Environmental Management</i> , 2017, 203, 245-254.	3.8	57

#	ARTICLE	IF	CITATIONS
19	Tempo and mode of antibat ultrasound production and sonar jamming in the diverse hawkmoth radiation. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2015, 112, 6407-6412.	3.3	55
20	Anthropogenic noise changes arthropod abundances. <i>Ecology and Evolution</i> , 2017, 7, 2977-2985.	0.8	52
21	Phylogenomics resolves major relationships and reveals significant diversification rate shifts in the evolution of silk moths and relatives. <i>BMC Evolutionary Biology</i> , 2019, 19, 182.	3.2	49
22	Noise from a phantom road experiment alters the age structure of a community of migrating birds. <i>Animal Conservation</i> , 2017, 20, 164-172.	1.5	44
23	Artificial nightlight alters the predator-prey dynamics of an apex carnivore. <i>Ecography</i> , 2021, 44, 149-161.	2.1	42
24	Tiger moth responses to a simulated bat attack: timing and duty cycle. <i>Journal of Experimental Biology</i> , 2006, 209, 2637-2650.	0.8	41
25	Anti-bat tiger moth sounds: Form and function. <i>Environmental Epigenetics</i> , 2010, 56, 358-369.	0.9	40
26	How do tiger moths jam bat sonar?. <i>Journal of Experimental Biology</i> , 2011, 214, 2416-2425.	0.8	40
27	The phantom chorus: birdsong boosts human well-being in protected areas. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2020, 287, 20201811.	1.2	40
28	Eight simple actions that individuals can take to save insects from global declines. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2021, 118, .	3.3	40
29	The ecological implications of visitor transportation in parks and protected areas: Examples from research in US National Parks. <i>Journal of Transport Geography</i> , 2016, 51, 27-35.	2.3	39
30	Diel behavior in moths and butterflies: a synthesis of data illuminates the evolution of temporal activity. <i>Organisms Diversity and Evolution</i> , 2018, 18, 13-27.	0.7	37
31	Hawkmoths produce anti-bat ultrasound. <i>Biology Letters</i> , 2013, 9, 20130161.	1.0	36
32	The evolution of anti-bat sensory illusions in moths. <i>Science Advances</i> , 2018, 4, eaar7428.	4.7	35
33	Artificial night light and anthropogenic noise interact to influence bird abundance over a continental scale. <i>Global Change Biology</i> , 2021, 27, 3987-4004.	4.2	34
34	Fireflies thwart bat attack with multisensory warnings. <i>Science Advances</i> , 2018, 4, eaat6601.	4.7	32
35	Naïve bats discriminate arctiid moth warning sounds but generalize their aposematic meaning. <i>Journal of Experimental Biology</i> , 2009, 212, 2141-2148.	0.8	28
36	Ecosystem services enhanced through soundscape management link people and wildlife. <i>People and Nature</i> , 2021, 3, 176-189.	1.7	27

#	ARTICLE	IF	CITATIONS
37	Natural and anthropogenic sounds reduce song performance: insights from two emberizid species. <i>Behavioral Ecology</i> , 2017, 28, 974-982.	1.0	26
38	Noise distracts foraging bats. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2021, 288, 20202689.	1.2	25
39	Using the Past to Understand the Present: Coping with Natural and Anthropogenic Noise. <i>BioScience</i> , 2021, 71, 223-234.	2.2	23
40	First to Flush: The Effects of Ambient Noise on Songbird Flight Initiation Distances and Implications for Human Experiences with Nature. <i>Frontiers in Ecology and Evolution</i> , 0, 5, .	1.1	21
41	Time of night and moonlight structure vertical space use by insectivorous bats in a Neotropical rainforest: an acoustic monitoring study. <i>PeerJ</i> , 2020, 8, e10591.	0.9	20
42	Pavement and riparian forest shape the bird community along an urban river corridor. <i>Global Ecology and Conservation</i> , 2015, 4, 291-310.	1.0	19
43	Large-scale manipulation of the acoustic environment can alter the abundance of breeding birds: Evidence from a phantom natural gas field. <i>Journal of Applied Ecology</i> , 2019, 56, 2091-2101.	1.9	19
44	Natural sounds alter California ground squirrel, <i>Otospermophilus beecheyi</i> , foraging, vigilance and movement behaviours. <i>Animal Behaviour</i> , 2019, 157, 51-60.	0.8	17
45	Phantom rivers filter birds and bats by acoustic niche. <i>Nature Communications</i> , 2021, 12, 3029.	5.8	14
46	Bio-acoustic tracking and localization using heterogeneous, scalable microphone arrays. <i>Communications Biology</i> , 2021, 4, 1275.	2.0	13
47	Anti-bat ultrasound production in moths is globally and phylogenetically widespread. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2022, 119, .	3.3	13
48	Natural noise affects conspecific signal detection and territorial defense behaviors in songbirds. <i>Behavioral Ecology</i> , 2021, 32, 993-1003.	1.0	11
49	Phantom river noise alters orb-weaving spider abundance, web size and prey capture. <i>Functional Ecology</i> , 2021, 35, 717-726.	1.7	10
50	A molecular phylogeny of <i>Eumorpha</i> (<i>Lepidoptera</i> : <i>Sphingidae</i>) and the evolution of anti-predator larval eyespots. <i>Systematic Entomology</i> , 2015, 40, 401-408.	1.7	8
51	Modeling anthropogenic noise impacts on animals in natural areas. <i>Landscape and Urban Planning</i> , 2018, 180, 76-84.	3.4	6
52	Natural and anthropogenic noise increase vigilance and decrease foraging behaviors in song sparrows. <i>Behavioral Ecology</i> , 2022, 33, 288-297.	1.0	6
53	Assessing the Vulnerabilities of Vertebrate Species to Light and Noise Pollution: Expert Surveys Illuminate the Impacts on Specialist Species. <i>Integrative and Comparative Biology</i> , 2021, 61, 1202-1215.	0.9	5
54	Adaptive shifts underlie the divergence in wing morphology in bombycoid moths. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2021, 288, 20210677.	1.2	5

#	ARTICLE	IF	CITATIONS
55	Experimental river noise alters arthropod abundance. <i>Oikos</i> , 2021, 130, 2001-2014.	1.2	5
56	Hidden Phylogenomic Signal Helps Elucidate Arsenurine Silkmoth Phylogeny and the Evolution of Body Size and Wing Shape Trade-Offs. <i>Systematic Biology</i> , 2022, 71, 859-874.	2.7	5
57	Does experimentally quieting traffic noise benefit people and birds?. <i>Ecology and Society</i> , 2021, 26, .	1.0	2
58	A stochastic simulation model for assessing the masking effects of road noise for wildlife, outdoor recreation, and bioacoustic monitoring. <i>Oecologia</i> , 2022, 199, 217-228.	0.9	2
59	A phantom ultrasonic insect chorus repels low-flying bats, but most are undeterred. <i>Functional Ecology</i> , 0, , .	1.7	1
60	Experimentally broadcast ocean surf and river noise alters birdsong. <i>PeerJ</i> , 0, 10, e13297.	0.9	1
61	Experimental exclusion of insectivorous predators results in no responses across multiple trophic levels in a water-limited, sagebrush-steppe ecosystem. <i>Journal of Arid Environments</i> , 2019, 160, 74-81.	1.2	0
