citing authors

#	ARTICLE	IF	CITATIONS
1	A case for addressing the unresolved role of permeable shelf sediments in ocean denitrification. <i>Limnology and Oceanography Letters</i> , 2022, 7, 11-25.	1.6	6
2	Generation Mechanisms of Mesoscale Eddies in the Mauritanian Upwelling Region. <i>Journal of Physical Oceanography</i> , 2022, 52, 161-182.	0.7	4
3	Elucidating Coastal Ocean Carbon Transport Processes: A Novel Approach Applied to the Northwest North Atlantic Shelf. <i>Geophysical Research Letters</i> , 2022, 49, .	1.5	4
4	An observation-based evaluation and ranking of historical Earth system model simulations in the northwest North Atlantic Ocean. <i>Biogeosciences</i> , 2021, 18, 1803-1822.	1.3	21
5	Ideas and perspectives: Biogeochemistry “ some key foci for the future. <i>Biogeosciences</i> , 2021, 18, 3005-3013.	1.3	8
6	Can assimilation of satellite observations improve subsurface biological properties in a numerical model? A case study for the Gulf of Mexico. <i>Ocean Science</i> , 2021, 17, 1141-1156.	1.3	1
7	Reanalysis in Earth System Science: Toward Terrestrial Ecosystem Reanalysis. <i>Reviews of Geophysics</i> , 2021, 59, e2020RG000715.	9.0	24
8	A modelling study of temporal and spatial variability on the biologically active and temperature-dominated Scotian Shelf. <i>Biogeosciences</i> , 2021, 18, 6271-6286.	1.3	8
9	Fusion-Based Hypoxia Estimates: Combining Geostatistical and Mechanistic Models of Dissolved Oxygen Variability. <i>Environmental Science &amp; Technology</i> , 2020, 54, 13016-13025.	4.6	7
10	Benthic Respiration in Hypoxic Waters Enhances Bottom Water Acidification in the Northern Gulf of Mexico. <i>Journal of Geophysical Research: Oceans</i> , 2020, 125, e2020JC016152.	1.0	6
11	Monitoring ocean biogeochemistry with autonomous platforms. <i>Nature Reviews Earth &amp; Environment</i> , 2020, 1, 315-326.	12.2	114
12	Quantifying the contributions of riverine vs. oceanic nitrogen to hypoxia in the East China Sea. <i>Biogeosciences</i> , 2020, 17, 2701-2714.	1.3	19
13	Assessing the value of biogeochemical Argo profiles versus ocean color observations for biogeochemical model optimization in the Gulf of Mexico. <i>Biogeosciences</i> , 2020, 17, 4059-4074.	1.3	17
14	Can ocean community production and respiration be determined by measuring high-frequency oxygen profiles from autonomous floats?. <i>Biogeosciences</i> , 2020, 17, 4119-4134.	1.3	11
15	A numerical model study of the main factors contributing to hypoxia and its interannual and short-term variability in the East China Sea. <i>Biogeosciences</i> , 2020, 17, 5745-5761.	1.3	20
16	Biogeochemical Controls on Coastal Hypoxia. <i>Annual Review of Marine Science</i> , 2019, 11, 105-130.	5.1	221
17	On the Future of Argo: A Global, Full-Depth, Multi-Disciplinary Array. <i>Frontiers in Marine Science</i> , 2019, 6, .	1.2	235
18	Quantifying the Relative Importance of Riverine and Ocean Nitrogen Sources for Hypoxia Formation in the Northern Gulf of Mexico. <i>Journal of Geophysical Research: Oceans</i> , 2019, 124, 5451-5467.	1.0	18

#	ARTICLE	IF	CITATIONS
19	Evaluating ecosystem model complexity for the northwest North Atlantic through surrogate-based optimization. <i>Ocean Modelling</i> , 2019, 142, 101437.	1.0	9
20	Community composition influences the population growth and ecological impact of invasive species in response to climate change. <i>Oecologia</i> , 2019, 189, 537-548.	0.9	11
21	Carbon cycling in the North American coastal ocean: a synthesis. <i>Biogeosciences</i> , 2019, 16, 1281-1304.	1.3	45
22	Globally Consistent Quantitative Observations of Planktonic Ecosystems. <i>Frontiers in Marine Science</i> , 2019, 6, .	1.2	234
23	Advancing Marine Biogeochemical and Ecosystem Reanalyses and Forecasts as Tools for Monitoring and Managing Ecosystem Health. <i>Frontiers in Marine Science</i> , 2019, 6, .	1.2	62
24	Physical and Biochemical Structure Measured by APEX-EM Floats. , 2019, , .		3
25	Evaluation of nonidentical versus identical twin approaches for observation impact assessments: an ensemble-Kalman-filter-based ocean assimilation application for the Gulf of Mexico. <i>Ocean Science</i> , 2019, 15, 1801-1814.	1.3	11
26	Time-Evolving, Spatially Explicit Forecasts of the Northern Gulf of Mexico Hypoxic Zone. <i>Environmental Science &amp; Technology</i> , 2019, 53, 14449-14458.	4.6	15
27	Ocean Acidification Post-Paris: Gauging Law and Policy Responses in Light of Evolving Scientific Knowledge. <i>Ocean Yearbook</i> , 2019, 33, 207-249.	0.2	0
28	Satellite estimation of coastal pCO <sub>2</sub> and air-sea flux of carbon dioxide in the northern Gulf of Mexico. <i>Remote Sensing of Environment</i> , 2018, 207, 71-83.	4.6	42
29	Insights on multivariate updates of physical and biogeochemical ocean variables using an Ensemble Kalman Filter and an idealized model of upwelling. <i>Ocean Modelling</i> , 2018, 126, 13-28.	1.0	29
30	Climate Change Projected to Exacerbate Impacts of Coastal Eutrophication in the Northern Gulf of Mexico. <i>Journal of Geophysical Research: Oceans</i> , 2018, 123, 3408-3426.	1.0	72
31	Estimating the Cross-Shelf Export of Riverine Materials: Part 1. General Relationships From an Idealized Numerical Model. <i>Global Biogeochemical Cycles</i> , 2018, 32, 160-175.	1.9	9
32	Estimating the Cross-Shelf Export of Riverine Materials: Part 2. Estimates of Global Freshwater and Nutrient Export. <i>Global Biogeochemical Cycles</i> , 2018, 32, 176-186.	1.9	16
33	Hurricane Arthur and its effect on the short-term variability of $\text{CO}_2$ on the Scotian Shelf, NW Atlantic. <i>Biogeosciences</i> , 2018, 15, 2111-2123.	1.3	4
34	Modelling the biogeochemical effects of heterotrophic and autotrophic N <sub>2</sub> fixation in the Gulf of Aqaba (Israel), Red Sea. <i>Biogeosciences</i> , 2018, 15, 7379-7401.	1.3	10
35	Diagnosing transit times on the northwestern North Atlantic continental shelf. <i>Ocean Science</i> , 2018, 14, 1207-1221.	1.3	26
36	Modeling of nitrogen and phosphorus profiles in sediment of Osaka Bay, Japan with parameter optimization using the polynomial chaos expansion. <i>Coastal Engineering Journal</i> , 2018, 60, 499-515.	0.7	3

#	ARTICLE	IF	CITATIONS
37	N and P as ultimate and proximate limiting nutrients in the northern Gulf of Mexico: implications for hypoxia reduction strategies. <i>Biogeosciences</i> , 2018, 15, 3121-3131.	1.3	29
38	Copernicus Marine Service Ocean State Report. <i>Journal of Operational Oceanography</i> , 2018, 11, S1-S142.	0.6	96
39	Rapid coastal deoxygenation due to ocean circulation shift in the northwest Atlantic. <i>Nature Climate Change</i> , 2018, 8, 868-872.	8.1	69
40	Impact of Seabed Resuspension on Oxygen and Nitrogen Dynamics in the Northern Gulf of Mexico: A Numerical Modeling Study. <i>Journal of Geophysical Research: Oceans</i> , 2018, 123, 7237-7263.	1.0	31
41	Beyond Chlorophyll Fluorescence: The Time is Right to Expand Biological Measurements in Ocean Observing Programs. <i>Limnology and Oceanography Bulletin</i> , 2018, 27, 89-90.	0.2	25
42	A reevaluation of the magnitude and impacts of anthropogenic atmospheric nitrogen inputs on the ocean. <i>Global Biogeochemical Cycles</i> , 2017, 31, 289-305.	1.9	146
43	Eutrophication-induced acidification of coastal waters in the northern Gulf of Mexico: Insights into origin and processes from a coupled physical-biogeochemical model. <i>Geophysical Research Letters</i> , 2017, 44, 946-956.	1.5	89
44	What proportion of riverine nutrients reaches the open ocean?. <i>Global Biogeochemical Cycles</i> , 2017, 31, 39-58.	1.9	105
45	Ocean hotspots of nitrogen loss. <i>Nature</i> , 2017, 551, 305-306.	13.7	6
46	The roles of resuspension, diffusion and biogeochemical processes on oxygen dynamics offshore of the Rhône River, France: a numerical modeling study. <i>Biogeosciences</i> , 2017, 14, 1919-1946.	1.3	37
47	Numerical Modeling of Hypoxia and Its Effects: Synthesis and Going Forward. , 2017, , 401-421.		5
48	Modeling River-Induced Phosphorus Limitation in the Context of Coastal Hypoxia. , 2017, , 149-171.		4
49	A Test Bed for Coastal and Ocean Modeling. <i>Eos</i> , 2017, , .	0.1	7
50	Modeling &lt;i>p</i>&lt;/sub>&lt;/sub> variability in the Gulf of Mexico. <i>Biogeosciences</i> , 2016, 13, 4359-4377.	1.3	21
51	Parameterization of biogeochemical sediment-water fluxes using in situ measurements and a diagenetic model. <i>Biogeosciences</i> , 2016, 13, 77-94.	1.3	20
52	Effects of model physics on hypoxia simulations for the northern Gulf of Mexico: A model intercomparison. <i>Journal of Geophysical Research: Oceans</i> , 2016, 121, 5731-5750.	1.0	37
53	Developing priority variables (‘‘ecosystem Essential Ocean Variables’’ eEOVs) for observing dynamics and change in Southern Ocean ecosystems. <i>Journal of Marine Systems</i> , 2016, 161, 26-41.	0.9	89
54	Interannual and seasonal variabilities in air-sea CO <sub>2</sub> fluxes along the U.S. eastern continental shelf and their sensitivity to increasing air temperatures and variable winds. <i>Journal of Geophysical Research G: Biogeosciences</i> , 2016, 121, 295-311.	1.3	17

#	ARTICLE	IF	CITATIONS
55	Ocean biogeochemical models as management tools: a case study for Atlantic wolffish and declining oxygen. <i>ICES Journal of Marine Science</i> , 2016, 73, 263-274.	1.2	19
56	Sensitivity of Northwest North Atlantic Shelf Circulation to Surface and Boundary Forcing: A Regional Model Assessment. <i>Atmosphere - Ocean</i> , 2016, 54, 230-247.	0.6	17
57	Putting Temperature and Oxygen Thresholds of Marine Animals in Context of Environmental Change: A Regional Perspective for the Scotian Shelf and Gulf of St. Lawrence. <i>PLoS ONE</i> , 2016, 11, e0167411.	1.1	28
58	Processes controlling mid-water column oxygen minima over the Texas-Louisiana shelf. <i>Journal of Geophysical Research: Oceans</i> , 2015, 120, 2800-2812.	1.0	21
59	A modeling study of physical controls on hypoxia generation in the northern Gulf of Mexico. <i>Journal of Geophysical Research: Oceans</i> , 2015, 120, 5019-5039.	1.0	39
60	Numerical analysis of the primary processes controlling oxygen dynamics on the Louisiana shelf. <i>Biogeosciences</i> , 2015, 12, 2063-2076.	1.3	49
61	Model investigations of the North Atlantic spring bloom initiation. <i>Progress in Oceanography</i> , 2015, 138, 176-193.	1.5	25
62	Biogeochemistry and ecosystems of continental margins in the western North Pacific Ocean and their interactions and responses to external forcing – an overview and synthesis. <i>Biogeosciences</i> , 2014, 11, 7061-7075.	1.3	16
63	Effect of Changes in Dissolved Oxygen Concentrations on the Spatial Dynamics of the Gulf Menhaden Fishery in the Northern Gulf of Mexico. <i>Marine and Coastal Fisheries</i> , 2014, 6, 223-234.	0.6	22
64	A model-based insight into the coupling of nitrogen and sulfur cycles in a coastal upwelling system. <i>Journal of Geophysical Research G: Biogeosciences</i> , 2014, 119, 264-285.	1.3	22
65	Coupling 3-D Eulerian bio-physics (ROMS) with individual-based shellfish ecophysiology (SHELL-E): A hybrid model for carrying capacity and environmental impacts of bivalve aquaculture. <i>Ecological Modelling</i> , 2014, 273, 63-78.	1.2	19
66	Assessing the utility of frequency dependent nudging for reducing biases in biogeochemical models. <i>Ocean Modelling</i> , 2014, 81, 25-35.	1.0	2
67	A model study of the response of hypoxia to upwelling-favorable wind on the northern Gulf of Mexico shelf. <i>Journal of Marine Systems</i> , 2014, 131, 63-73.	0.9	60
68	Periodic time-dependent parameters improving forecasting abilities of biological ocean models. <i>Geophysical Research Letters</i> , 2014, 41, 6848-6854.	1.5	9
69	Perspectives and Integration in SOLAS Science. <i>Springer Earth System Sciences</i> , 2014, , 247-306.	0.1	2
70	Simulated reduction of hypoxia in the northern Gulf of Mexico due to phosphorus limitation. <i>Elementa</i> , 2014, 2, .	1.1	22
71	Other Nutrients and Dissolved Oxygen and Climate Change. , 2014, , 111-116.		0
72	Simulating sediment-water exchange of nutrients and oxygen: A comparative assessment of models against mesocosm observations. <i>Continental Shelf Research</i> , 2013, 63, 69-84.	0.9	21

#	ARTICLE	IF	CITATIONS
73	Introduction to special section on The U.S. IOOS Coastal and Ocean Modeling Testbed. <i>Journal of Geophysical Research: Oceans</i> , 2013, 118, 6319-6328.	1.0	22
74	Sensitivity and uncertainty analysis of model hypoxia estimates for the Texas-Louisiana shelf. <i>Journal of Geophysical Research: Oceans</i> , 2013, 118, 1316-1332.	1.0	32
75	Sensitivity of hypoxia predictions for the northern Gulf of Mexico to sediment oxygen consumption and model nesting. <i>Journal of Geophysical Research: Oceans</i> , 2013, 118, 990-1002.	1.0	117
76	Particle filter-based data assimilation for a three-dimensional biological ocean model and satellite observations. <i>Journal of Geophysical Research: Oceans</i> , 2013, 118, 2746-2760.	1.0	38
77	Modeling ocean circulation and biogeochemical variability in the Gulf of Mexico. <i>Biogeosciences</i> , 2013, 10, 7219-7234.	1.3	70
78	Sediment-water column fluxes of carbon, oxygen and nutrients in Bedford Basin, Nova Scotia, inferred from $\delta^{13}C$ measurements. <i>Biogeosciences</i> , 2013, 10, 53-66.	1.3	25
79	Simulating the effects of phosphorus limitation in the Mississippi and Atchafalaya River plumes. <i>Biogeosciences</i> , 2012, 9, 4707-4723.	1.3	53
80	Role of sediment denitrification in water column oxygen dynamics: comparison of the North American East and West Coasts. <i>Biogeosciences</i> , 2012, 9, 2673-2682.	1.3	10
81	Data assimilation with a local Ensemble Kalman Filter applied to a three-dimensional biological model of the Middle Atlantic Bight. <i>Journal of Marine Systems</i> , 2012, 94, 145-156.	0.9	54
82	Estimating time-dependent parameters for a biological ocean model using an emulator approach. <i>Journal of Marine Systems</i> , 2012, 96-97, 32-47.	0.9	52
83	Autonomous data describe North Atlantic spring bloom. <i>Eos</i> , 2011, 92, 465-466.	0.1	11
84	Modeling the Dynamics of Continental Shelf Carbon. <i>Annual Review of Marine Science</i> , 2011, 3, 93-122.	5.1	86
85	Seasonal and interannual variability of physical and biological dynamics at the shelfbreak front of the Middle Atlantic Bight: nutrient supply mechanisms. <i>Biogeosciences</i> , 2011, 8, 2935-2946.	1.3	13
86	A coupled physical-biological model of the Northern Gulf of Mexico shelf: model description, validation and analysis of phytoplankton variability. <i>Biogeosciences</i> , 2011, 8, 1881-1899.	1.3	110
87	Optimizing models of the North Atlantic spring bloom using physical, chemical and bio-optical observations from a Lagrangian float. <i>Biogeosciences</i> , 2011, 8, 1291-1307.	1.3	50
88	Sequential data assimilation applied to a physical-biological model for the Bermuda Atlantic time series station. <i>Journal of Marine Systems</i> , 2010, 79, 144-156.	0.9	20
89	Modeling the dynamics and export of dissolved organic matter in the Northeastern U.S. continental shelf. <i>Estuarine, Coastal and Shelf Science</i> , 2010, 88, 488-507.	0.9	52
90	The role of continental shelves in nitrogen and carbon cycling: Northwestern North Atlantic case study. <i>Ocean Science</i> , 2010, 6, 539-548.	1.3	55

#	ARTICLE	IF	CITATIONS
91	Introduction and Assessment of Measures for Quantitative Model-Data Comparison Using Satellite Images. <i>Remote Sensing</i> , 2010, 2, 794-818.	1.8	10
92	Domoic acid uptake and elimination kinetics in oysters and mussels in relation to body size and anatomical distribution of toxin. <i>Aquatic Toxicology</i> , 2010, 100, 17-29.	1.9	57
93	Modeling denitrification in aquatic sediments. <i>Biogeochemistry</i> , 2009, 93, 159-178.	1.7	103
94	A one ocean model of biodiversity. <i>Deep-Sea Research Part II: Topical Studies in Oceanography</i> , 2009, 56, 1816-1823.	0.6	21
95	Quantifying biological carbon export for the northwest North Atlantic continental shelves. <i>Geophysical Research Letters</i> , 2009, 36, .	1.5	58
96	Interannual variability in atmospheric CO <sub>2</sub> uptake on the northeast U.S. continental shelf. <i>Journal of Geophysical Research</i> , 2009, 114, .	3.3	34
97	Statistical validation of a 3-D bio-physical model of the western North Atlantic. <i>Biogeosciences</i> , 2009, 6, 1961-1974.	1.3	21
98	Ocean forecasting in terrain-following coordinates: Formulation and skill assessment of the Regional Ocean Modeling System. <i>Journal of Computational Physics</i> , 2008, 227, 3595-3624.	1.9	1,032
99	Feedbacks Between the Nitrogen, Carbon and Oxygen Cycles. , 2008, , 1537-1563.		9
100	Denitrification effects on air-sea CO <sub>2</sub> flux in the coastal ocean: Simulations for the northwest North Atlantic. <i>Geophysical Research Letters</i> , 2008, 35, .	1.5	153
101	Eastern US Continental Shelf Carbon Budget: Integrating Models, Data Assimilation, and Analysis. <i>Oceanography</i> , 2008, 21, 86-104.	0.5	52
102	Widespread implementation of controlled upwelling in the North Pacific Subtropical Gyre would counteract diazotrophic N <sub>2</sub> fixation. <i>Marine Ecology - Progress Series</i> , 2008, 371, 301-303.	0.9	8
103	Geochemical and Biological Consequences of Phytoplankton Evolution. , 2007, , 405-430.		22
104	Measurements of spectral optical properties and their relation to biogeochemical variables and processes in Crater Lake, Crater Lake National Park, OR. <i>Hydrobiologia</i> , 2007, 574, 149-159.	1.0	76
105	Seasonal nutrient and plankton dynamics in a physical-biological model of Crater Lake. <i>Hydrobiologia</i> , 2007, 574, 265-280.	1.0	7
106	Measurements of spectral optical properties and their relation to biogeochemical variables and processes in Crater Lake, Crater Lake National Park, OR. , 2007, , 149-159.		10
107	Nitrogen cycling in the Middle Atlantic Bight: Results from a three-dimensional model and implications for the North Atlantic nitrogen budget. <i>Global Biogeochemical Cycles</i> , 2006, 20, n/a-n/a.	1.9	378
108	Modeling Ocean Ecosystems: The PARADIGM Program. <i>Oceanography</i> , 2006, 19, 22-51.	0.5	27

#	ARTICLE	IF	CITATIONS
109	Biological overprint of the geological carbon cycle. <i>Marine Geology</i> , 2005, 217, 323-338.	0.9	166
110	The co-evolution of the nitrogen, carbon and oxygen cycles in the Proterozoic ocean. <i>Numerische Mathematik</i> , 2005, 305, 526-545.	0.7	148
111	The Rise of Oxygen over the Past 205 Million Years and the Evolution of Large Placental Mammals. <i>Science</i> , 2005, 309, 2202-2204.	6.0	304
112	Modeling controls of phytoplankton production in the southwest Pacific sector of the Southern Ocean. <i>Deep-Sea Research Part II: Topical Studies in Oceanography</i> , 2003, 50, 769-798.	0.6	17
113	Impacts of iron control on phytoplankton production in the modern and glacial Southern Ocean. <i>Deep-Sea Research Part II: Topical Studies in Oceanography</i> , 2003, 50, 833-851.	0.6	22
114	Subsurface maxima of phytoplankton and chlorophyll: Steady-state solutions from a simple model. <i>Limnology and Oceanography</i> , 2003, 48, 1521-1534.	1.6	228
115	A deterministic model for N <sub>2</sub> fixation at stn. ALOHA in the subtropical North Pacific Ocean. <i>Deep-Sea Research Part II: Topical Studies in Oceanography</i> , 2001, 49, 149-174.	0.6	54
116	The generation of phytoplankton patchiness by mesoscale current patterns. <i>Ocean Dynamics</i> , 2001, 52, 58-70.	0.9	21
117	Testing a marine ecosystem model: sensitivity analysis and parameter optimization. <i>Journal of Marine Systems</i> , 2001, 28, 45-63.	0.9	146
118	A box model approach for a long-term assessment of estuarine eutrophication, Szczecin Lagoon, southern Baltic. <i>Journal of Marine Systems</i> , 2000, 25, 387-403.	0.9	50
119	Convection and the Timing of Phytoplankton Spring Blooms in the Western Baltic Sea. <i>Estuarine, Coastal and Shelf Science</i> , 1999, 49, 113-128.	0.9	29
120	Title is missing!. <i>Hydrobiologia</i> , 1999, 393, 25-33.	1.0	5
