| #  | ARTICLE                                                                                                                                                                                                                                     | IF  | CITATIONS |
|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | A Comparison of Associations Between Self-Reported and Device-Based Sedentary Behavior and Obesity Markers in Adults: A Multi-National Cross-Sectional Study. <i>Assessment</i> , 2022, 29, 1441-1457.                                      | 1.9 | 6         |
| 2  | Breakfast in Latin America: Evaluation of Nutrient and Food Group Intake Toward a Nutrient-Based Recommendation. <i>Journal of the Academy of Nutrition and Dietetics</i> , 2022, 122, 1099-1113.e3.                                        | 0.4 | 11        |
| 3  | Lifestyle risk factors and all-cause and cause-specific mortality: assessing the influence of reverse causation in a prospective cohort of 457,021 US adults. <i>European Journal of Epidemiology</i> , 2022, 37, 11-23.                    | 2.5 | 12        |
| 4  | Measurement of physical activity and sedentary behavior in national health surveys, South America. <i>Revista Panamericana De Salud Publica/Pan American Journal of Public Health</i> , 2022, 46, 1.                                        | 0.6 | 1         |
| 5  | Energy Imbalance Gap, Anthropometric Measures, Lifestyle, and Sociodemographic Correlates in Latin American Adults—Results from the ELANS Study. <i>International Journal of Environmental Research and Public Health</i> , 2022, 19, 1129. | 1.2 | 3         |
| 6  | The association between physical activity and mental health during the first year of the COVID-19 pandemic: a systematic review. <i>BMC Public Health</i> , 2022, 22, 209.                                                                  | 1.2 | 86        |
| 7  | Prevalence and sociodemographic correlates of meeting the Canadian 24-hour movement guidelines among latin american adults: a multi-national cross-sectional study. <i>BMC Public Health</i> , 2022, 22, 217.                               | 1.2 | 12        |
| 8  | Association of Body Weight and Physical Fitness during the Elementary School Years. <i>International Journal of Environmental Research and Public Health</i> , 2022, 19, 3441.                                                              | 1.2 | 3         |
| 9  | Development and Cross-Validation of a Predictive Equation for Fat-Free Mass in Brazilian Adolescents by Bioelectrical Impedance. <i>Frontiers in Nutrition</i> , 2022, 9, 820736.                                                           | 1.6 | 8         |
| 10 | Sub Maximal Ergospirometry Parameters in Untrained Non-Frail Octogenarian Subjects. <i>Medicina (Lithuania)</i> , 2022, 58, 378.                                                                                                            | 0.8 | 2         |
| 11 | Time trends and inequalities of physical activity domains and sitting time in South America. <i>Journal of Global Health</i> , 2022, 12, 04027.                                                                                             | 1.2 | 8         |
| 12 | Association between 24-h movement guidelines and cardiometabolic health in Chilean adults. <i>Scientific Reports</i> , 2022, 12, 5805.                                                                                                      | 1.6 | 6         |
| 13 | Relationship between socio-demographic correlates and human development index with physical activity and sedentary time in a cross-sectional multicenter study. <i>BMC Public Health</i> , 2022, 22, 669.                                   | 1.2 | 2         |
| 14 | The effect of school year and summer break in health-related cardiorespiratory fitness: A 2-year longitudinal analysis. <i>Journal of Sports Sciences</i> , 2022, 40, 1175-1182.                                                            | 1.0 | 2         |
| 15 | Impact of Exercise Training on Depressive Symptoms in Cancer Patients: A Critical Analysis. <i>Biology</i> , 2022, 11, 614.                                                                                                                 | 1.3 | 4         |
| 16 | The economic burden of overweight and obesity in Brazil: perspectives for the Brazilian Unified Health System. <i>Public Health</i> , 2022, 207, 82-87.                                                                                     | 1.4 | 8         |
| 17 | Association of the “Weekend Warrior” and Other Leisure-time Physical Activity Patterns With All-Cause and Cause-Specific Mortality. <i>JAMA Internal Medicine</i> , 2022, 182, 840.                                                         | 2.6 | 25        |
| 18 | Meeting 24-h movement guidelines and markers of adiposity in adults from eight Latin America countries: the ELANS study. <i>Scientific Reports</i> , 2022, 12, .                                                                            | 1.6 | 4         |

| #  | ARTICLE                                                                                                                                                                                                                                     | IF  | CITATIONS |
|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Physical activity for cancer patients during COVID-19 pandemic: a call to action. <i>Cancer Causes and Control</i> , 2021, 32, 1-3.                                                                                                         | 0.8 | 15        |
| 20 | Association of Physical Activity Intensity With Mortality. <i>JAMA Internal Medicine</i> , 2021, 181, 203.                                                                                                                                  | 2.6 | 102       |
| 21 | The Association of Healthy Lifestyle Behaviors with Overweight and Obesity among Older Adults from 21 Countries. <i>Nutrients</i> , 2021, 13, 315.                                                                                          | 1.7 | 12        |
| 22 | Changes in total physical activity, leisure and commuting in the largest city in Latin America, 2003-2015. <i>Revista Brasileira De Epidemiologia</i> , 2021, 24, e210030.                                                                  | 0.3 | 4         |
| 23 | Muscular Strength of Upper and Lower Limbs and Self-Esteem in Chilean School Children: Independent Associations with Body Composition Indicators. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 361. | 1.2 | 4         |
| 24 | Physical activity and all-cause and cause-specific mortality: assessing the impact of reverse causation and measurement error in two large prospective cohorts. <i>European Journal of Epidemiology</i> , 2021, 36, 275-285.                | 2.5 | 31        |
| 25 | Hospital Admissions Associated With Noncommunicable Diseases During the COVID-19 Outbreak in Brazil. <i>JAMA Network Open</i> , 2021, 4, e210799.                                                                                           | 2.8 | 8         |
| 26 | Physical fitness and its association with cognitive performance in Chilean schoolchildren: The Cogni-Action Project. <i>Scandinavian Journal of Medicine and Science in Sports</i> , 2021, 31, 1352-1362.                                   | 1.3 | 16        |
| 27 | ¿Cuál es la asociación entre actividad física, sedentarismo y riesgo de desarrollar cáncer en población adulta? Una revisión de la literatura. <i>Revista Chilena De Nutrición</i> , 2021, 48, 245-254.                                     | 0.1 | 2         |
| 28 | Association between weight control behaviors and diet quality among Brazilian adolescents and young adults: Health Survey of São Paulo with Focus on Nutrition, 2015. <i>Eating and Weight Disorders</i> , 2021, , 1.                       | 1.2 | 1         |
| 29 | Accelerometer-Measured Daily Step Counts and Adiposity Indicators among Latin American Adults: A Multi-Country Study. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 4641.                            | 1.2 | 8         |
| 30 | Breakfast: A Crucial Meal for Adolescents' Cognitive Performance According to Their Nutritional Status. The Cogni-Action Project. <i>Nutrients</i> , 2021, 13, 1320.                                                                        | 1.7 | 14        |
| 31 | Trends of Healthy Lifestyles Among Adolescents: An Analysis of More Than Half a Million Participants From 32 Countries Between 2006 and 2014. <i>Frontiers in Pediatrics</i> , 2021, 9, 645074.                                             | 0.9 | 11        |
| 32 | Co-Occurrence and Clustering of Sedentary Behaviors, Diet, Sugar-Sweetened Beverages, and Alcohol Intake among Adolescents and Adults: The Latin American Nutrition and Health Study (ELANS). <i>Nutrients</i> , 2021, 13, 1809.            | 1.7 | 4         |
| 33 | Changes in Sitting Time, Screen Exposure and Physical Activity during COVID-19 Lockdown in South American Adults: A Cross-Sectional Study. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 5239.       | 1.2 | 18        |
| 34 | Food Sources of Shortfall Nutrients among Latin Americans: Results from the Latin American Study of Health and Nutrition (ELANS). <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 4967.                | 1.2 | 6         |
| 35 | Muscle-strengthening activities and cancer incidence and mortality: a systematic review and meta-analysis of observational studies. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2021, 18, 69.              | 2.0 | 24        |
| 36 | Reduction in prostate cancer hospitalizations in the COVID-19 pandemic epicenter of Latin America.. <i>Journal of Clinical Oncology</i> , 2021, 39, e18814-e18814.                                                                          | 0.8 | 0         |

| #  | ARTICLE                                                                                                                                                                                                                             | IF  | CITATIONS |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 37 | Impact of COVID-19 pandemic in hospitalizations due to brain tumors from the epicenter of Latin America.. <i>Journal of Clinical Oncology</i> , 2021, 39, e18785-e18785.                                                            | 0.8 | 0         |
| 38 | Effects of Motor-Games-Based Concurrent Training Program on Body Composition Indicators of Chilean Adults with Down Syndrome. <i>Sustainability</i> , 2021, 13, 5737.                                                               | 1.6 | 9         |
| 39 | Food intake, physical activity and body composition of adolescents and young adults: data from Brazilian Study of Nutrition and Health. <i>BMC Public Health</i> , 2021, 21, 1123.                                                  | 1.2 | 0         |
| 40 | Bidirectional Association between Physical Activity and Dopamine Across Adulthood—A Systematic Review. <i>Brain Sciences</i> , 2021, 11, 829.                                                                                       | 1.1 | 21        |
| 41 | Changes in Physical Fitness during Summer Months and the School Year in Austrian Elementary School Children—A 4-Year Longitudinal Study. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 6920. | 1.2 | 4         |
| 42 | Relative Age Effect in Physical Fitness during the Elementary School Years. <i>Pediatric Reports</i> , 2021, 13, 322-333.                                                                                                           | 0.5 | 3         |
| 43 | Economic burden of colorectal and breast cancers attributable to lack of physical activity in Brazil. <i>BMC Public Health</i> , 2021, 21, 1190.                                                                                    | 1.2 | 6         |
| 44 | Escuelas especiales de Chile: ¿Responsables del desarrollo de la condición física-funcional para la inclusión laboral de personas con discapacidad intelectual?. <i>Journal of Movement &amp; Health</i> , 2021, 18, .              | 0.0 | 1         |
| 45 | Psychological Distress and All-Cause, Cardiovascular Disease, Cancer Mortality Among Adults with and without Diabetes. <i>Clinical Epidemiology</i> , 2021, Volume 13, 555-565.                                                     | 1.5 | 8         |
| 46 | Non-communicable diseases deaths attributable to high body mass index in Chile. <i>Scientific Reports</i> , 2021, 11, 15500.                                                                                                        | 1.6 | 10        |
| 47 | A Systematic Review of the Association Between Muscular Fitness and Telomere Length Across the Adult Lifespan. <i>Frontiers in Physiology</i> , 2021, 12, 706189.                                                                   | 1.3 | 3         |
| 48 | Socioeconomic Status Impact on Diet Quality and Body Mass Index in Eight Latin American Countries: ELANS Study Results. <i>Nutrients</i> , 2021, 13, 2404.                                                                          | 1.7 | 25        |
| 49 | Socioeconomic inequalities in physical activity in Brazil: a pooled cross-sectional analysis from 2013 to 2019. <i>International Journal for Equity in Health</i> , 2021, 20, 188.                                                  | 1.5 | 9         |
| 50 | Sociodemographic inequities and active transportation in adults from Latin America: an eight-country observational study. <i>International Journal for Equity in Health</i> , 2021, 20, 190.                                        | 1.5 | 9         |
| 51 | Exploring grip strength as a predictor of depression in middle-aged and older adults. <i>Scientific Reports</i> , 2021, 11, 15946.                                                                                                  | 1.6 | 8         |
| 52 | Associations between grip strength and incident type 2 diabetes: findings from the UK Biobank prospective cohort study. <i>BMJ Open Diabetes Research and Care</i> , 2021, 9, e001865.                                              | 1.2 | 25        |
| 53 | Patterns Of Recommended Levels Of Physical Activity And Mortality: A Prospective Cohort Study. <i>Medicine and Science in Sports and Exercise</i> , 2021, 53, 192-193.                                                              | 0.2 | 0         |
| 54 | School environment and physical activity in adolescents from São Paulo city. <i>Scientific Reports</i> , 2021, 11, 18118.                                                                                                           | 1.6 | 2         |
