

R Harald Baayen

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/8702506/r-harald-baayen-publications-by-year.pdf>

Version: 2024-04-23

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
196	Modeling Morphology With Linear Discriminative Learning: Considerations and Design Choices. <i>Frontiers in Psychology</i> , 2021 , 12, 720713	3.4	2
195	Romance N Prep N constructions in visual word recognition. <i>Mental Lexicon</i> , 2021 , 16, 98-132	0.7	
194	The processing of pseudoword form and meaning in production and comprehension: A computational modeling approach using linear discriminative learning. <i>Behavior Research Methods</i> , 2021 , 53, 945-976	6.1	19
193	Bilingual and Multilingual Mental Lexicon: A Modeling Study With Linear Discriminative Learning. <i>Language Learning</i> , 2021 , 71, 219-292	5.1	2
192	Hyphenation as a compounding technique in English. <i>Language Sciences</i> , 2021 , 83, 101326	0.8	0
191	Phonetic effects of morphology and context: Modeling the duration of word-final S in English with naïve discriminative learning. <i>Journal of Linguistics</i> , 2021 , 57, 123-161	0.6	37
190	Paradigmatic enhancement of stem vowels in regular English inflected verb forms. <i>Morphology</i> , 2021 , 31, 171-199	1.6	7
189	Deconfounding the Effects of Competition and Attrition on Dialect across the Lifespan 2021 , 235-264		1
188	Type-specific dendritic integration in mouse retinal ganglion cells. <i>Nature Communications</i> , 2020 , 11, 2101	17.4	9
187	Psycho-computational modelling of the mental lexicon 2020 , 23-82		2
186	Modeling Morphological Priming in German With Naive Discriminative Learning. <i>Frontiers in Communication</i> , 2020 , 5,	2.5	7
185	Generalized Additive Mixed Models 2020 , 563-591		4
184	Simulating phonological and semantic impairment of English tense inflection with linear discriminative learning. <i>Mental Lexicon</i> , 2020 , 15, 385-421	0.7	2
183	Learning Precise Spike Timings with Eligibility Traces. <i>Lecture Notes in Computer Science</i> , 2020 , 659-669	0.9	
182	On the semantics of nonwords and their lexical category. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2020 , 46, 621-637	2.2	4
181	Estonian Case Inflection Made Simple 2020 , 119-141		8
180	Analyzing the Time Course of Pupillometric Data. <i>Trends in Hearing</i> , 2019 , 23, 2331216519832483	3.2	48

179	Twenty-eight years of vowels: Tracking phonetic variation through young to middle age adulthood. <i>Journal of Phonetics</i> , 2019 , 74, 42-54	2.2	16
178	The Indonesian prefixes PE- and PEN-: A study in productivity and allomorphy. <i>Morphology</i> , 2019 , 29, 385-407	1.6	4
177	Constructing two vietnamese corpora and building a lexical database. <i>Language Resources and Evaluation</i> , 2019 , 53, 465-498	1.8	1
176	The Discriminative Lexicon: A Unified Computational Model for the Lexicon and Lexical Processing in Comprehension and Production Grounded Not in (De)Composition but in Linear Discriminative Learning. <i>Complexity</i> , 2019 , 2019, 1-39	1.6	70
175	NDRA: A single route model of response times in the reading aloud task based on discriminative learning. <i>PLoS ONE</i> , 2019 , 14, e0218802	3.7	3
174	Chapter 5: Abstraction, storage and naive discriminative learning 2019 , 115-139		2
173	Emergent data analysis in phonetic sciences: Towards pluralism and reproducibility. <i>Journal of Phonetics</i> , 2019 , 73, 1-7	2.2	19
172	Lexical frequency co-determines the speed-curvature relation in articulation. <i>Journal of Phonetics</i> , 2018 , 68, 103-116	2.2	16
171	Whole-word frequency and inflectional paradigm size facilitate Estonian case-inflected noun processing. <i>Cognition</i> , 2018 , 175, 20-25	3.5	28
170	Production of Estonian case-inflected nouns shows whole-word frequency and paradigmatic effects. <i>Morphology</i> , 2018 , 28, 71-97	1.6	35
169	Language comprehension as a multi-label classification problem. <i>Statistica Neerlandica</i> , 2018 , 72, 339-353.9		6
168	Distributional learning is error-driven: the role of surprise in the acquisition of phonetic categories. <i>Linguistics Vanguard: Multimodal Online Journal</i> , 2018 , 4,	0.8	12
167	Autocorrelated Errors in Experimental Data in the Language Sciences: Some Solutions Offered by Generalized Additive Mixed Models. <i>Quantitative Methods in the Humanities and Social Sciences</i> , 2018 , 49-69	0	31
166	Border Effects Among Catalan Dialects. <i>Quantitative Methods in the Humanities and Social Sciences</i> , 2018 , 71-97	0	33
165	What does constituent priming mean in the investigation of compound processing?. <i>Mental Lexicon</i> , 2018 , 13, 269-284	0.7	6
164	Inflectional morphology with linear mappings. <i>Mental Lexicon</i> , 2018 , 13, 230-268	0.7	36
163	9. Morphological development 2018 , 181-202		6
162	Practice makes perfect: the consequences of lexical proficiency for articulation. <i>Linguistics Vanguard: Multimodal Online Journal</i> , 2018 , 4,	0.8	28

161	Strategies for addressing collinearity in multivariate linguistic data. <i>Journal of Phonetics</i> , 2018 , 71, 249-262	6.2	83
160	Chinese lexical database (CLD) : A large-scale lexical database for simplified Mandarin Chinese. <i>Behavior Research Methods</i> , 2018 , 50, 2606-2629	6.1	20
159	The cave of shadows: Addressing the human factor with generalized additive mixed models. <i>Journal of Memory and Language</i> , 2017 , 94, 206-234	3.8	88
158	Balancing Type I error and power in linear mixed models. <i>Journal of Memory and Language</i> , 2017 , 94, 305-315	3.8	660
157	Idiom Variation: Experimental Data and a Blueprint of a Computational Model. <i>Topics in Cognitive Science</i> , 2017 , 9, 653-669	2.5	13
156	Distinct ERP signatures of word frequency, phrase frequency, and prototypicality in speech production. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2017 , 43, 128-149	2.2	13
155	Are baboons learning "orthographic" representations? Probably not. <i>PLoS ONE</i> , 2017 , 12, e0183876	3.7	13
154	The Mismeasurement of Mind: Life-Span Changes in Paired-Associate-Learning Scores Reflect the "Cost" of Learning, Not Cognitive Decline. <i>Psychological Science</i> , 2017 , 28, 1171-1179	7.9	46
153	Discrimination in lexical decision. <i>PLoS ONE</i> , 2017 , 12, e0171935	3.7	59
152	Words from spontaneous conversational speech can be recognized with human-like accuracy by an error-driven learning algorithm that discriminates between meanings straight from smart acoustic features, bypassing the phoneme as recognition unit. <i>PLoS ONE</i> , 2017 , 12, e0174623	3.7	36
151	Understanding Idiomatic Variation 2017 ,		4
150	A learning perspective on individual differences in skilled reading: Exploring and exploiting orthographic and semantic discrimination cues. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2017 , 43, 1730-1751	2.2	16
149	Investigating dialectal differences using articulography. <i>Journal of Phonetics</i> , 2016 , 59, 122-143	2.2	27
148	Towards cognitively plausible data science in language research. <i>Cognitive Linguistics</i> , 2016 , 27, 507-526	1.1	28
147	Early Vocabulary in Relation to Gender, Bilingualism, Type, and Duration of Childcare. <i>Advances in Cognitive Psychology</i> , 2016 , 12, 130-144	1	8
146	The temporal dynamics of perceptual uncertainty: eye movement evidence from Cantonese segment and tone perception. <i>Journal of Memory and Language</i> , 2016 , 90, 103-125	3.8	32
145	Frequency in lexical processing. <i>Aphasiology</i> , 2016 , 30, 1174-1220	1.6	94
144	Comprehension without segmentation: a proof of concept with naive discriminative learning. <i>Language, Cognition and Neuroscience</i> , 2016 , 31, 106-128	2.4	56

143	Cross-language activation of morphological relatives in cognates: the role of orthographic overlap and task-related processing. <i>Frontiers in Human Neuroscience</i> , 2015 , 9, 16	3.3	5
142	Learning and Cognitive Maturation 2015 , 1-5		
141	Representational deficit or processing effect? An electrophysiological study of noun-noun compound processing by very advanced L2 speakers of English. <i>Frontiers in Psychology</i> , 2015 , 6, 77	3.4	15
140	5. Abstraction, storage and naive discriminative learning 2015 , 100-120		7
139	Vietnamese compounds show an anti-frequency effect in visual lexical decision. <i>Language, Cognition and Neuroscience</i> , 2015 , 30, 1077-1095	2.4	23
138	Learning is not decline. <i>Contemporary Discourses of Hate and Radicalism Across Space and Genres</i> , 2015 , 199-230	0.1	
137	The time-course of lexical activation in Japanese morphographic word recognition: evidence for a character-driven processing model. <i>Quarterly Journal of Experimental Psychology</i> , 2014 , 67, 79-113	1.8	15
136	Effects of primary and secondary morphological family size in monolingual and bilingual word processing. <i>Journal of Memory and Language</i> , 2014 , 72, 59-84	3.8	64
135	A cognitively grounded measure of pronunciation distance. <i>PLoS ONE</i> , 2014 , 9, e75734	3.7	7
134	Lexical differences between Tuscan dialects and standard Italian: Accounting for geographic and sociodemographic variation using generalized additive mixed modeling. <i>Language</i> , 2014 , 90, 669-692	1.4	37
133	The myth of cognitive decline: non-linear dynamics of lifelong learning. <i>Topics in Cognitive Science</i> , 2014 , 6, 5-42	2.5	196
132	Reading English with Japanese in mind: Effects of frequency, phonology, and meaning in different-script bilinguals*. <i>Bilingualism</i> , 2014 , 17, 445-463	3.2	23
131	The myth of cognitive decline: why our minds improve as we age. <i>New Scientist</i> , 2014 , 221, 28-29	0.6	
130	Electrophysiological correlates of noun-noun compound processing by non-native speakers of English 2014 ,		2
129	N-gram probability effects in a cloze task. <i>Mental Lexicon</i> , 2014 , 9, 437-472	0.7	11
128	Making choices in Russian: pros and cons of statistical methods for rival forms. <i>Russian Linguistics</i> , 2013 , 37, 253-291	0.1	50
127	Learning is not decline. <i>Mental Lexicon</i> , 2013 , 8, 450-481	0.7	33
126	Prominence in triconstituent compounds: pitch contours and linguistic theory. <i>Language and Speech</i> , 2013 , 56, 529-54	1.5	13

125	Sidestepping the combinatorial explosion: an explanation of n-gram frequency effects based on naive discriminative learning. <i>Language and Speech</i> , 2013 , 56, 329-47	1.5	70
124	Production, comprehension, and synthesis: a communicative perspective on language. <i>Frontiers in Psychology</i> , 2013 , 4, 233	3.4	12
123	Semantic relations and compound transparency: A regression study in CARIN theory. <i>Psihologija</i> , 2013 , 46, 455-478	0.9	12
122	The subjective frequency of word n-grams. <i>Psihologija</i> , 2013 , 46, 497-537	0.9	11
121	Effects of morphological Family Size for young readers. <i>British Journal of Developmental Psychology</i> , 2012 , 30, 432-45	2	10
120	Danger and usefulness are detected early in auditory lexical processing: evidence from electroencephalography. <i>Brain and Language</i> , 2012 , 122, 81-91	2.9	38
119	Probability and surprisal in auditory comprehension of morphologically complex words. <i>Cognition</i> , 2012 , 125, 80-106	3.5	51
118	Models, forests, and trees of York English: Was/were variation as a case study for statistical practice. <i>Language Variation and Change</i> , 2012 , 24, 135-178	1	334
117	Semantic radicals in Japanese two-character word recognition. <i>Language and Cognitive Processes</i> , 2012 , 27, 142-158		7
116	Corpora and Exemplars in Phonology 2011 , 374-400		8
115	Corpus linguistics and naive discriminative learning. <i>Revista Brasileira De Linguistica Aplicada</i> , 2011 , 11, 295-328	0.2	12
114	The hyphen as a segmentation cue in triconstituent compound processing: it's getting better all the time. <i>Scandinavian Journal of Psychology</i> , 2011 , 52, 530-44	2.2	16
113	Frequency effects in the production of Dutch deverbal adjectives and inflected verbs. <i>Language and Cognitive Processes</i> , 2011 , 26, 683-715		22
112	An amorphous model for morphological processing in visual comprehension based on naive discriminative learning. <i>Psychological Review</i> , 2011 , 118, 438-481	6.3	308
111	Quantitative social dialectology: explaining linguistic variation geographically and socially. <i>PLoS ONE</i> , 2011 , 6, e23613	3.7	68
110	Predicting new words from newer words: Lexical borrowings in French. <i>Linguistics</i> , 2010 , 48,	1	20
109	Capturing correlational structure in Russian paradigms: A case study in logistic mixed-effects modeling. <i>Corpus Linguistics and Linguistic Theory</i> , 2010 , 6,	2.2	12
108	Producing inflected verbs. <i>Mental Lexicon</i> , 2010 , 5, 22-46	0.7	26

107	Processing trade-offs in the reading of Dutch derived words. <i>Journal of Memory and Language</i> , 2010 , 62, 83-97	3.8	78
106	How cross-language similarity and task demands affect cognate recognition. <i>Journal of Memory and Language</i> , 2010 , 62, 284-301	3.8	183
105	Analyzing reaction times. <i>International Journal of Psychological Research</i> , 2010 , 3, 12-28	0.9	475
104	Suffix Ordering and Morphological Processing. <i>Language</i> , 2009 , 85, 109-152	1.4	41
103	Reading polymorphemic Dutch compounds: toward a multiple route model of lexical processing. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2009 , 35, 876-95	2.6	142
102	41. Corpus linguistics in morphology: Morphological productivity. <i>Handb�cher Zur Sprach- Und Kommunikationswissenschaft</i> , 2009 ,		35
101	Morphological effects in auditory word recognition: Evidence from Danish. <i>Language and Cognitive Processes</i> , 2008 , 23, 1159-1190		44
100	Morphological dynamics in compound processing. <i>Language and Cognitive Processes</i> , 2008 , 23, 1089-1132		103
99	Frequency distributions of uniphones, diphones, and triphones in spontaneous speech. <i>Journal of the Acoustical Society of America</i> , 2008 , 124, 3897-908	2.2	14
98	Native language influences on word recognition in a second language: a megastudy. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2008 , 34, 12-31	2.2	119
97	Paradigmatic effects in auditory word recognition: The case of alternating voice in Dutch. <i>Language and Cognitive Processes</i> , 2007 , 22, 1-24		40
96	Analogical effects on linking elements in German compound words. <i>Language and Cognitive Processes</i> , 2007 , 22, 25-57		35
95	Morphological predictability and acoustic duration of interfixes in Dutch compounds. <i>Journal of the Acoustical Society of America</i> , 2007 , 121, 2261-71	2.2	50
94	Regular morphologically complex neologisms leave detectable traces in the mental lexicon. <i>Mental Lexicon</i> , 2007 , 2, 1-23	0.7	35
93	Fitting the development of periphrastic do in all sentence types 2007 , 679-688		4
92	Lexical frequency and voice assimilation. <i>Journal of the Acoustical Society of America</i> , 2006 , 120, 1040-51	2.2	43
91	The nature of anterior negativities caused by misapplications of morphological rules. <i>Journal of Cognitive Neuroscience</i> , 2006 , 18, 1616-30	3.1	20
90	Learnability of graphotactic rules in visual word identification. <i>Learning and Instruction</i> , 2006 , 16, 538-548	3.8	15

89	Formal and semantic constraints on the interpretation of the suffix -s in reading Dutch nominal compounds. <i>Written Language and Literacy</i> , 2006 , 9, 247-264	0.2	2
88	Dynamics of the auditory comprehension of prefixed words. <i>Mental Lexicon</i> , 2006 , 1, 125-146	0.7	18
87	Morphological Processing 2006 ,		2
86	Morphological influences on the recognition of monosyllabic monomorphemic words. <i>Journal of Memory and Language</i> , 2006 , 55, 290-313	3.8	156
85	Articulatory planning is continuous and sensitive to informational redundancy. <i>Phonetica</i> , 2005 , 62, 146-597		97
84	A roommate in cream: Morphological family size effects on interlingual homograph recognition. <i>Language and Cognitive Processes</i> , 2005 , 20, 7-41		36
83	Shifting paradigms: gradient structure in morphology. <i>Trends in Cognitive Sciences</i> , 2005 , 9, 342-8	14	155
82	Prosodic cues for morphological complexity in Dutch and English. <i>Language and Cognitive Processes</i> , 2005 , 20, 43-73		47
81	Changing places: A cross-language perspective on frequency and family size in Dutch and Hebrew. <i>Journal of Memory and Language</i> , 2005 , 53, 496-512	3.8	59
80	Prosodic cues for morphological complexity: the case of Dutch plural nouns. <i>Memory and Cognition</i> , 2005 , 33, 430-46	2.2	61
79	Semantic Density and Past-Tense Formation in Three Germanic Languages. <i>Language</i> , 2005 , 81, 666-698	1.4	60
78	Frequency effects in compound production. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2005 , 102, 17876-81	11.5	51
77	Lexical frequency and acoustic reduction in spoken Dutch. <i>Journal of the Acoustical Society of America</i> , 2005 , 118, 2561-9	2.2	141
76	New Machine Learning Methods Demonstrate the Existence of a Human Stylome. <i>Journal of Quantitative Linguistics</i> , 2005 , 12, 65-77	0.5	63
75	Variation in Dutch: From written MOGELIJK to spoken MOK. <i>Corpus Linguistics and Linguistic Theory</i> , 2005 , 1,	2.2	18
74	Lexical Statistics and Lexical Processing: Semantic Density, Information Complexity, Sex, and Irregularity in Dutch. <i>Studies in Generative Grammar</i> , 2005 , 529-556		16
73	Probability in the grammar of German and Dutch: interfixation in triconstituent compounds. <i>Language and Speech</i> , 2004 , 47, 83-106	1.5	40
72	Analogical effects in regular past tense production in Dutch. <i>Linguistics</i> , 2004 , 42,	1	22

71	Morphological family size in a morphologically rich language: the case of Finnish compared with Dutch and Hebrew. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2004 , 30, 1271-8 ^{2.2}		58
70	Processing reduced word forms: the suffix restoration effect. <i>Brain and Language</i> , 2004 , 90, 117-27	2.9	49
69	Putting the bits together: an information theoretical perspective on morphological processing. <i>Cognition</i> , 2004 , 94, 1-18	3.5	154
68	Do type and token effects reflect different mechanisms? Connectionist modeling of Dutch past-tense formation and final devoicing. <i>Brain and Language</i> , 2004 , 90, 287-98	2.9	10
67	Orthographic constraints and frequency effects in complex word identification. <i>Written Language and Literacy</i> , 2004 , 7, 49-59	0.2	3
66	Acquiring Unaccusativity: A Cross-Linguistic look 2004 , 332-354		11
65	Predicting the Unpredictable: Interpreting Neutralized Segments in Dutch. <i>Language</i> , 2003 , 79, 5-38	1.4	112
64	Units of Analysis in Reading Dutch Bisyllabic Pseudowords. <i>Scientific Studies of Reading</i> , 2003 , 7, 255-271 ^{3.8}		16
63	Morphological Structure in Language Processing 2003 ,		40
62	Parsing and Semantic Opacity. <i>Neuropsychology and Cognition</i> , 2003 , 159-189		8
61	Morphology by itself in planning the production of spoken words. <i>Psychonomic Bulletin and Review</i> , 2002 , 9, 132-8	4.1	63
60	Semantic Influence on Linkers in Dutch Noun-Noun Compounds. <i>Folia Linguistica</i> , 2002 , 36,	0.4	18
59	The subjects as a simple random effect fallacy: subject variability and morphological family effects in the mental lexicon. <i>Brain and Language</i> , 2002 , 81, 55-65	2.9	63
58	The recognition of reduced word forms. <i>Brain and Language</i> , 2002 , 81, 162-73	2.9	114
57	The processing and representation of Dutch and English compounds: peripheral morphological and central orthographic effects. <i>Brain and Language</i> , 2002 , 81, 555-67	2.9	78
56	Linking elements in Dutch noun-noun compounds: constituent families as analogical predictors for response latencies. <i>Brain and Language</i> , 2002 , 81, 708-22	2.9	30
55	Dutch Inflection: The Rules that Prove the Exception. <i>Studies in Theoretical Psycholinguistics</i> , 2002 , 61-92 ^{0.3}		21
54	Parsing and productivity. <i>Morphology</i> , 2002 , 203-235		81

53	A note on the function of Dutch linking elements. <i>Morphology</i> , 2002 , 237-252		2
52	Computing Historical Consciousness. A Quantitative Inquiry into the Presence of the Past in Newspaper Texts. <i>Computers and the Humanities</i> , 2001 , 35, 237-253		6
51	Analogy in morphology: modeling the choice of linking morphemes in Dutch. <i>Linguistics</i> , 2001 , 39,	1	44
50	Word Frequency Distributions. <i>Text, Speech and Language Technology</i> , 2001 ,		326
49	The balance of storage and computation in morphological processing: The role of word formation type, affixal homonymy, and productivity.. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2000 , 26, 489-511	2.2	103
48	Towards a psycholinguistic computational model for morphological parsing. <i>Philosophical Transactions Series A, Mathematical, Physical, and Engineering Sciences</i> , 2000 , 358, 1281-1293	3	11
47	Effects of Family Size for Complex Words. <i>Journal of Memory and Language</i> , 2000 , 42, 390-405	3.8	125
46	Affixal homonymy triggers full-form storage, even with inflected words, even in a morphologically rich language. <i>Cognition</i> , 2000 , 74, B13-25	3.5	54
45	Extracting the Lowest-Frequency Words: Pitfalls and Possibilities. <i>Computational Linguistics</i> , 2000 , 26, 301-317	2.8	20
44	The morphological family size effect and morphology. <i>Language and Cognitive Processes</i> , 2000 , 15, 329-365		151
43	Morphology in the Mental Lexicon: A Computational Model for Visual Word Recognition. <i>Text, Speech and Language Technology</i> , 2000 , 267-293		6
42	Rules and rote: Beyond the linguistic either-or fallacy. <i>Behavioral and Brain Sciences</i> , 1999 , 22, 1038-1039.	0.9	14
41	Complex words in complex words. <i>Linguistics</i> , 1999 , 37,	1	7
40	War and peace: morphemes and full forms in a noninteractive activation parallel dual-route model. <i>Brain and Language</i> , 1999 , 68, 27-32	2.9	70
39	Morphological productivity across speech and writing. <i>English Language and Linguistics</i> , 1999 , 3, 209-228.	0.5	54
38	Nominalizations in a calculus of lexical semantic representations. <i>Morphology</i> , 1999 , 175-197		13
37	How Variable May a Constant be? Measures of Lexical Richness in Perspective. <i>Computers and the Humanities</i> , 1998 , 32, 323-352		177
