Christian Rominger

List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/8710575/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	New directions in hypnosis research: strategies for advancing the cognitive and clinical neuroscience of hypnosis. Neuroscience of Consciousness, 2017, 2017, .	1.4	83
2	The creative brain in the figural domain: Distinct patterns of EEG alpha power during idea generation and idea elaboration. Neuropsychologia, 2018, 118, 13-19.	0.7	71
3	EEG alpha activity during imagining creative moves in soccer decision-making situations. Neuropsychologia, 2018, 114, 118-124.	0.7	52
4	Decrease of prefrontal–posterior EEG coherence: Loose control during social–emotional stimulation. Brain and Cognition, 2012, 80, 144-154.	0.8	51
5	Creative ways to well-being: Reappraisal inventiveness in the context of anger-evoking situations. Cognitive, Affective and Behavioral Neuroscience, 2017, 17, 94-105.	1.0	46
6	Creativity is associated with a characteristic U-shaped function of alpha power changes accompanied by an early increase in functional coupling. Cognitive, Affective and Behavioral Neuroscience, 2019, 19, 1012-1021.	1.0	45
7	Affective creativity meets classic creativity in the scanner. Human Brain Mapping, 2018, 39, 393-406.	1.9	32
8	Gender Differences in Generating Cognitive Reappraisals for Threatening Situations: Reappraisal Capacity Shields Against Depressive Symptoms in Men, but Not Women. Frontiers in Psychology, 2019, 10, 553.	1.1	32
9	Humorous cognitive reappraisal: More benign humour and less "dark" humour is affiliated with more adaptive cognitive reappraisal strategies. PLoS ONE, 2019, 14, e0211618.	1.1	31
10	Brain and soccer: Functional patterns of brain activity during the generation of creative moves in real soccer decisionâ€making situations. Human Brain Mapping, 2019, 40, 755-764.	1.9	27
11	Functional coupling of brain networks during creative idea generation and elaboration in the figural domain. NeuroImage, 2020, 207, 116395.	2.1	27
12	Carriers of the COMT Met/Met Allele Have Higher Degrees of Hypnotizability, Provided That They Have Good Attentional Control: <i>A Case of Gene–Trait Interaction</i> . International Journal of Clinical and Experimental Hypnosis, 2014, 62, 455-482.	1.1	26
13	The Use of Bright and Dark Types of Humour is Rooted in the Brain. Scientific Reports, 2017, 7, 42967.	1.6	26
14	Neurophysiological indicators of internal attention: An electroencephalography–eyeâ€ŧracking coregistration study. Brain and Behavior, 2020, 10, e01790.	1.0	26
15	Creative, Antagonistic, and Angry? Exploring the Roots of Malevolent Creativity with a Realâ€World Idea Generation Task. Journal of Creative Behavior, 2021, 55, 710-722.	1.6	25
16	Reappraisal inventiveness: impact of appropriate brain activation during efforts to generate alternative appraisals on the perception of chronic stress in women. Anxiety, Stress and Coping, 2018, 31, 206-221.	1.7	24
17	The fear of other persons' laughter: Poor neuronal protection against social signals of anger and aggression. Psychiatry Research, 2016, 235, 61-68.	1.7	23
18	Humor comprehension and creative cognition: Shared and distinct neurocognitive mechanisms as indicated by EEG alpha activity. NeuroImage, 2020, 213, 116695.	2.1	23

CHRISTIAN ROMINGER

#	Article	IF	CITATIONS
19	More habitual physical activity is linked to the use of specific, more adaptive cognitive reappraisal strategies in dealing with stressful events. Stress and Health, 2020, 36, 274-286.	1.4	23
20	Auditory top-down control and affective theory of mind in schizophrenia with and without hallucinations. Schizophrenia Research, 2016, 174, 192-196.	1.1	22
21	Creative Thinking in an Emotional Context: Specific Relevance of Executive Control of Emotion-Laden Representations in the Inventiveness in Generating Alternative Appraisals of Negative Events. Creativity Research Journal, 2018, 30, 256-265.	1.7	22
22	Allusive thinking (remote associations) and auditory top-down inhibition skills differentially predict creativity and positive schizotypy. Cognitive Neuropsychiatry, 2017, 22, 108-121.	0.7	21
23	Different patterns of university students' integration of lecture podcasts, learning materials, and lecture attendance in a psychology course. Education and Information Technologies, 2018, 23, 165-178.	3.5	20
24	DSM-5 personality trait domains and withdrawal versus approach motivational tendencies in response to the perception of other people's desperation and angry aggression. Biological Psychology, 2018, 132, 106-115.	1.1	19
25	Allusive thinking (cognitive looseness) and the propensity to perceive "meaningful―coincidences. Personality and Individual Differences, 2011, 51, 1002-1006.	1.6	18
26	Enhancement of figural creativity by motor activation: Effects of unilateral hand contractions on creativity are moderated by positive schizotypy. Laterality, 2014, 19, 424-438.	0.5	17
27	Learning Unicycling Evokes Manifold Changes in Gray and White Matter Networks Related to Motor and Cognitive Functions. Scientific Reports, 2019, 9, 4324.	1.6	14
28	Acute and Chronic Physical Activity Increases Creative Ideation Performance: A Systematic Review and Multilevel Meta-analysis. Sports Medicine - Open, 2022, 8, 62.	1.3	14
29	Less differentiated facial responses to naturalistic films of another person's emotional expressions in adolescents and adults with High-Functioning Autism Spectrum Disorder. Progress in Neuro-Psychopharmacology and Biological Psychiatry, 2019, 89, 341-346.	2.5	13
30	Everyday bodily movement is associated with creativity independently from active positive affect: a Bayesian mediation analysis approach. Scientific Reports, 2020, 10, 11985.	1.6	13
31	Feelings from the heart: Developing HRV decreaseâ€trigger algorithms via multilevel hyperplane simulation to detect psychosocially meaningful episodes in everyday life. Psychophysiology, 2021, 58, e13914.	1.2	13
32	How to Use Heart Rate Variability: Quantification of Vagal Activity in Toddlers and Adults in Long-Term ECG. Sensors, 2020, 20, 5959.	2.1	12
33	Motivational Factors in the Typical Display of Humor and Creative Potential: The Case of Malevolent Creativity. Frontiers in Psychology, 2020, 11, 1213.	1.1	10
34	Does contingent biofeedback improve cardiac interoception? A preregistered replication of Meyerholz, Irzinger, WithA¶ft, Gerlach, and Pohl (2019) using the heartbeat discrimination task in a randomised control trial. PLoS ONE, 2021, 16, e0248246.	1.1	10
35	Failure to reappraise: Malevolent creativity is linked to revenge ideation and impaired reappraisal inventiveness in the face of stressful, anger-eliciting events. Anxiety, Stress and Coping, 2021, 34, 437-449.	1.7	10
36	Families' digital media use: Intentions, rules and activities. British Journal of Educational Technology, 2021, 52, 2162-2177.	3.9	10

#	Article	IF	CITATIONS
37	Cognitive reappraisal capacity mediates the relationship between prefrontal recruitment during reappraisal of anger-eliciting events and paranoia-proneness. Brain and Cognition, 2019, 132, 108-117.	0.8	9
38	Impact of humorâ€related communication elements in natural dyadic interactions on interpersonal physiological synchrony. Psychophysiology, 2019, 56, e13320.	1.2	9
39	Meaning in meaninglessness: The propensity to perceive meaningful patterns in coincident events and randomly arranged stimuli is linked to enhanced attention in early sensory processing. Psychiatry Research, 2018, 263, 225-232.	1.7	8
40	Humor creation during efforts to find humorous cognitive reappraisals of threatening situations. Current Psychology, 2019, , 1.	1.7	8
41	The propensity to perceive meaningful coincidences is associated with increased posterior alpha power during retention of information in a modified Sternberg paradigm. Consciousness and Cognition, 2019, 76, 102832.	0.8	8
42	A shy heart may benefit from everyday life social interactions with close others: An ecological momentary assessment trial using Bayesian multilevel modeling. Biological Psychology, 2020, 152, 107864.	1.1	8
43	Creativity in an Affective Context. European Psychologist, 2022, 27, 216-226.	1.8	8
44	Antisocial Schizotypy Is Linked to Malevolent Creativity. Creativity Research Journal, 2022, 34, 355-367.	1.7	8
45	Creativity and Cognitive Control in the Cognitive and Affective Domains. , 0, , 318-332.		7
46	Female and male soccer players recruited different cognitive processes when generating creative soccer moves. Psychology of Sport and Exercise, 2020, 50, 101748.	1.1	7
47	Brain activation during the observation of real soccer game situations predicts creative goal scoring. Social Cognitive and Affective Neuroscience, 2021, 16, 707-715.	1.5	7
48	Social exclusion increases antisocial tendencies: Evidence from retaliatory ideation in a malevolent creativity task Psychology of Aesthetics, Creativity, and the Arts, 0, , .	1.0	7
49	Creative challenge: Regular exercising moderates the association between task-related heart rate variability changes and individual differences in originality. PLoS ONE, 2019, 14, e0220205.	1.1	6
50	A two-week running intervention reduces symptoms related to depression and increases hippocampal volume in young adults. Cortex, 2021, 144, 70-81.	1.1	6
51	Feelings from the Heart Part II: Simulation and Validation of Static and Dynamic HRV Decrease-Trigger Algorithms to Detect Stress in Firefighters. Sensors, 2022, 22, 2925.	2.1	6
52	The Reflecting Brain: Reflection Competence in an Educational Setting Is Associated With Increased Electroencephalogram Activity in the Alpha Band. Mind, Brain, and Education, 2017, 11, 54-63.	0.9	5
53	Short-term fasting induced changes in HRV are associated with interoceptive accuracy: Evidence from two independent within-subjects studies. Physiology and Behavior, 2021, 241, 113558.	1.0	5
54	The impact of chronic pain on creative ideation: An examination of the underlying attentionâ€related psychophysiological mechanisms. European Journal of Pain, 0, , .	1.4	5

#	Article	IF	CITATIONS
55	In your face? Exploring multimodal response patterns involving facial responses to verbal and gestural stance-taking expressions. Journal of Pragmatics, 2022, 190, 6-17.	0.8	4
56	A brief positive psychological intervention prior to a potentially stressful task facilitates more challengeâ€like cardiovascular reactivity in high trait anxious individuals. Psychophysiology, 2021, 58, e13709.	1.2	2
57	Creative, yet not unique? Paranormal belief, but not self-rated creative ideation behavior is associated with a higher propensity to perceive unique meanings in randomness. Heliyon, 2022, 8, e09269.	1.4	2
58	Singing at 0.1 Hz as a Resonance Frequency Intervention to Reduce Cardiovascular Stress Reactivity?. Frontiers in Psychiatry, 2022, 13, 876344.	1.3	1
59	High avoidance and low approach motivation affect cognitive reappraisal generation in the face of anger. Current Psychology, 0, , 1.	1.7	0
