FENC XIAC

#	Article	IF	CITATIONS
1	The Constrained Interpolation Profile Method for Multiphase Analysis. Journal of Computational Physics, 2001, 169, 556-593.	3.8	646
2	A simple algebraic interface capturing scheme using hyperbolic tangent function. International Journal for Numerical Methods in Fluids, 2005, 48, 1023-1040.	1.6	337
3	Revisit to the THINC scheme: A simple algebraic VOF algorithm. Journal of Computational Physics, 2011, 230, 7086-7092.	3.8	177
4	An Exactly Conservative Semi-Lagrangian Scheme (CIP–CSL) in One Dimension. Monthly Weather Review, 2001, 129, 332-344.	1.4	158
5	An interface capturing method with a continuous function: The THINC method with multi-dimensional reconstruction. Journal of Computational Physics, 2012, 231, 2328-2358.	3.8	124
6	Completely Conservative and Oscillationless Semi-Lagrangian Schemes for Advection Transportation. Journal of Computational Physics, 2001, 170, 498-522.	3.8	106
7	An Eulerian interface sharpening algorithm for compressible two-phase flow: The algebraic THINC approach. Journal of Computational Physics, 2014, 268, 326-354.	3.8	101
8	Constructing oscillation preventing scheme for advection equation by rational function. Computer Physics Communications, 1996, 93, 1-12.	7.5	100
9	Unified formulation for compressible and incompressible flows by using multi-integrated moments II: Multi-dimensional version for compressible and incompressible flows. Journal of Computational Physics, 2006, 213, 31-56.	3.8	94
10	Shallow water model on cubed-sphere by multi-moment finite volume method. Journal of Computational Physics, 2008, 227, 5019-5044.	3.8	94
11	Unified formulation for compressible and incompressible flows by using multi-integrated moments I: one-dimensional inviscid compressible flow. Journal of Computational Physics, 2004, 195, 629-654.	3.8	91
12	LES of turbulent liquid jet primary breakup in turbulent coaxial air flow. International Journal of Multiphase Flow, 2014, 60, 103-118.	3.4	87
13	Boundary Variation Diminishing (BVD) reconstruction: A new approach to improve Godunov schemes. Journal of Computational Physics, 2016, 322, 309-325.	3.8	87
14	Description of Complex and Sharp Interface during Shock Wave Interaction with Liquid Drop. Journal of the Physical Society of Japan, 1993, 62, 2537-2540.	1.6	80
15	Conservative and oscillation-less atmospheric transport schemes based on rational functions. Journal of Geophysical Research, 2002, 107, ACL 2-1.	3.3	80
16	High fidelity discontinuity-resolving reconstruction for compressible multiphase flows with moving interfaces. Journal of Computational Physics, 2018, 371, 945-966.	3.8	80
17	Toward efficient and accurate interface capturing on arbitrary hybrid unstructured grids: The THINC method with quadratic surface representation and Gaussian quadrature. Journal of Computational Physics, 2017, 349, 415-440.	3.8	64
18	Large eddy simulation of liquid jet primary breakup in supersonic air crossflow. International Journal of Multiphase Flow, 2016, 87, 229-240.	3.4	62

#	Article	IF	CITATIONS
19	High order multi-moment constrained finite volume method. Part I: Basic formulation. Journal of Computational Physics, 2009, 228, 3669-3707.	3.8	57
20	An algorithm for simulating solid objects suspended in stratified flow. Computer Physics Communications, 1997, 102, 147-160.	7.5	56
21	Numerical simulations of free-interface fluids by a multi-integrated moment method. Computers and Structures, 2005, 83, 409-423.	4.4	55
22	A multi-moment finite volume method for incompressible Navier–Stokes equations on unstructured grids: Volume-average/point-value formulation. Journal of Computational Physics, 2014, 277, 138-162.	3.8	53
23	A Computational Model for Suspended Large Rigid Bodies in 3D Unsteady Viscous Flows. Journal of Computational Physics, 1999, 155, 348-379.	3.8	52
24	CIP/multi-moment finite volume method for Euler equations: A semi-Lagrangian characteristic formulation. Journal of Computational Physics, 2007, 222, 849-871.	3.8	52
25	Limiter-free discontinuity-capturing scheme for compressible gas dynamics with reactive fronts. Computers and Fluids, 2018, 171, 1-14.	2.5	51
26	An efficient and accurate algebraic interface capturing method for unstructured grids in 2 and 3 dimensions: The THINC method with quadratic surface representation. International Journal for Numerical Methods in Fluids, 2014, 76, 1025-1042.	1.6	49
27	An efficient method for capturing free boundaries in multi-fluid simulations. International Journal for Numerical Methods in Fluids, 2003, 42, 187-210.	1.6	48
28	An interface capturing method with a continuous function: The THINC method on unstructured triangular and tetrahedral meshes. Journal of Computational Physics, 2014, 259, 260-269.	3.8	46
29	A fifth-order shock capturing scheme with two-stage boundary variation diminishing algorithm. Journal of Computational Physics, 2019, 386, 323-349.	3.8	45
30	A global shallow water model using high order multi-moment constrained finite volume method and icosahedral grid. Journal of Computational Physics, 2010, 229, 1774-1796.	3.8	44
31	Constructing a multi-dimensional oscillation preventing scheme for the advection equation by a rational function. Computer Physics Communications, 1996, 94, 103-118.	7.5	42
32	A Multimoment Finite-Volume Shallow-Water Model on the Yin–Yang Overset Spherical Grid. Monthly Weather Review, 2008, 136, 3066-3086.	1.4	42
33	Three-dimensional numerical simulation of flows with complex geometries in a regular Cartesian grid and its application to blood flow in cerebral artery with multiple aneurysms. Journal of Computational Physics, 2005, 202, 1-19.	3.8	40
34	Conservative constraint for a quasi-uniform overset grid on the sphere. Quarterly Journal of the Royal Meteorological Society, 2006, 132, 979-996.	2.7	38
35	Simulation technique for dynamic evaporation processes. Nuclear Engineering and Design, 1995, 155, 45-53.	1.7	37
36	An unstructured-grid numerical model for interfacial multiphase fluids based on multi-moment finite volume formulation and THINC method. International Journal of Multiphase Flow, 2017, 89, 375-398.	3.4	37

#	Article	IF	CITATIONS
37	Coupled THINC and level set method: A conservative interface capturing scheme with high-order surface representations. Journal of Computational Physics, 2018, 373, 284-303.	3.8	36
38	Mechanism of structure formation in circular hydraulic jumps: numerical studies of strongly deformed free-surface shallow flows. Physica D: Nonlinear Phenomena, 2002, 161, 202-219.	2.8	34
39	A multi-moment constrained finite volume method on arbitrary unstructured grids for incompressible flows. Journal of Computational Physics, 2016, 327, 747-778.	3.8	34
40	A new formulation for two-wave Riemann solver accurate at contact interfaces. Physics of Fluids, 2019, 31, .	4.0	30
41	A 4th-order and single-cell-based advection scheme on unstructured grids using multi-moments. Computer Physics Communications, 2005, 173, 17-33.	7.5	28
42	Global shallow water models based on multi-moment constrained finite volume method and three quasi-uniform spherical grids. Journal of Computational Physics, 2014, 271, 191-223.	3.8	27
43	Two and three dimensional multi-moment finite volume solver for incompressible Navier–Stokes equations on unstructured grids with arbitrary quadrilateral and hexahedral elements. Computers and Fluids, 2014, 104, 40-54.	2.5	27
44	A hybrid pressure–density-based Mach uniform algorithm for 2D Euler equations on unstructured grids by using multi-moment finite volume method. Journal of Computational Physics, 2017, 335, 637-663.	3.8	27
45	A CIP/multiâ€moment finite volume method for shallow water equations with source terms. International Journal for Numerical Methods in Fluids, 2008, 56, 2245-2270.	1.6	23
46	A Multimoment Constrained Finite-Volume Model for Nonhydrostatic Atmospheric Dynamics. Monthly Weather Review, 2013, 141, 1216-1240.	1.4	23
47	A wind power forecasting system based on the weather research and forecasting model and Kalman filtering over a wind-farm in Japan. Journal of Renewable and Sustainable Energy, 2016, 8, .	2.0	23
48	A robust interface method for drop formation and breakup simulation at high density ratio using an extrapolated liquid velocity. Computers and Fluids, 2016, 136, 402-420.	2.5	23
49	Simulation of drop deformation and breakup in supersonic flow. Proceedings of the Combustion Institute, 2017, 36, 2417-2424.	3.9	23
50	LES of primary breakup of pulsed liquid jet in supersonic crossflow. Acta Astronautica, 2019, 154, 119-132.	3.2	23
51	A convexity preserving scheme for conservative advection transport. Journal of Computational Physics, 2004, 198, 389-402.	3.8	22
52	A multi-moment finite volume formulation for shallow water equations on unstructured mesh. Journal of Computational Physics, 2010, 229, 4567-4590.	3.8	22
53	An Adaptive Multimoment Global Model on a Cubed Sphere. Monthly Weather Review, 2011, 139, 523-548.	1.4	22
54	Constructing higher order discontinuity-capturing schemes with upwind-biased interpolations and boundary variation diminishing algorithm. Computers and Fluids, 2020, 200, 104433.	2.5	22

#	Article	IF	CITATIONS
55	Description of complex and sharp interface with fixed grids in incompressible and compressible fluid. Computers and Mathematics With Applications, 1995, 29, 15-25.	2.7	21
56	A numerical study of the transition in the circular hydraulic jump. Physics Letters, Section A: General, Atomic and Solid State Physics, 1999, 257, 153-157.	2.1	20
57	Simulation of all-scale atmospheric dynamics on unstructured meshes. Journal of Computational Physics, 2016, 322, 267-287.	3.8	19
58	A novel high-order low-dissipation TENO-THINC scheme for hyperbolic conservation laws. Journal of Computational Physics, 2022, 452, 110899.	3.8	19
59	A finite volume multi-moment method with boundary variation diminishing principle for Euler equation on three-dimensional hybrid unstructured grids. Computers and Fluids, 2017, 153, 85-101.	2.5	18
60	xmins:mml="http://www.w3.org/1998/Math/MathML" altimg="si1.svg"> <mml:mrow><mml:msub><mml:mrow><mml:mi mathvariant="normal"&gt;P</mml:mi </mml:mrow><mml:mi>n</mml:mi></mml:msub><mml:mrow> mathvariant="normal"&gt;T</mml:mrow><mml:mi>m</mml:mi><mml:mo< td=""><td><mand:mi< td=""><td>18</td></mand:mi<></td></mml:mo<></mml:mrow>	<mand:mi< td=""><td>18</td></mand:mi<>	18
61	Inebreak="goodbreak">a 'mathyariant="normal">BVDA fifth-ordetTow-dissipation discontinuity-resolving TENO scheme for compressible flow simulation. Journal of Computational Physics, 2022, 467, 111465.	3.8	18
62	A Global Multimoment Constrained Finite-Volume Scheme for Advection Transport on the Hexagonal Geodesic Grid. Monthly Weather Review, 2011, 140, 941-955.	1.4	17
63	Accurate and robust PISO algorithm on hybrid unstructured grids using the multimoment finite volume method. Numerical Heat Transfer, Part B: Fundamentals, 2017, 71, 146-172.	0.9	17
64	Low-dissipation BVD schemes for single and multi-phase compressible flows on unstructured grids. Journal of Computational Physics, 2021, 428, 110088.	3.8	17
65	Relationships between a roller and a dynamic pressure distribution in circular hydraulic jumps. Physical Review E, 2000, 61, R1016-R1019.	2.1	16
66	Conservative Semi-Lagrangian Transport on a Sphere and the Impact on Vapor Advection in an Atmospheric General Circulation Model. Monthly Weather Review, 2005, 133, 504-520.	1.4	16
67	THINC scaling method that bridges VOF and level set schemes. Journal of Computational Physics, 2021, 436, 110323.	3.8	16
68	Implementation of the semi-Lagrangian advection scheme on a quasi-uniform overset grid on a sphere. Advances in Atmospheric Sciences, 2006, 23, 792-801.	4.3	15
69	Effect of EOS on Break-Up of Shoemaker-Levy 9 Entering Jovian Atmosphere Journal of Geomagnetism and Geoelectricity, 1994, 46, 657-662.	0.9	14
70	A Finite-Volume Grid Using Multimoments for Geostrophic Adjustment. Monthly Weather Review, 2006, 134, 2515-2526.	1.4	13
71	A note on the general multi-moment constrained flux reconstruction formulation for high order schemes. Applied Mathematical Modelling, 2013, 37, 5092-5108.	4.2	13
72	A Slope Constrained 4th Order Multi-Moment Finite Volume Method with WENO Limiter. Communications in Computational Physics, 2015, 18, 901-930.	1.7	13

#	Article	IF	CITATIONS
73	An LES Turbulent Inflow Generator using A Recycling and Rescaling Method. Flow, Turbulence and Combustion, 2017, 98, 663-695.	2.6	13
74	High resolution multi-moment finite volume method for supersonic combustion on unstructured grids. Applied Mathematical Modelling, 2019, 66, 404-423.	4.2	13
75	A Novel Hybrid Model of WRF and Clearness Index-Based Kalman Filter for Day-Ahead Solar Radiation Forecasting. Applied Sciences (Switzerland), 2019, 9, 3967.	2.5	13
76	Possible explanation of the secondary flash and strong flare on IR lightcurves upon impact of Shoemaker-Levy 9. Geophysical Research Letters, 1995, 22, 2429-2432.	4.0	12
77	A global shallowâ€water model on an icosahedral–hexagonal grid by a multiâ€moment constrained finiteâ€volume scheme. Quarterly Journal of the Royal Meteorological Society, 2014, 140, 639-650.	2.7	12
78	Multimoment Finite Volume Solver for Euler Equations on Unstructured Grids. AIAA Journal, 2017, 55, 2617-2629.	2.6	12
79	A method to trace sharp interface of two fluids in calculations involving shocks. Shock Waves, 1994, 4, 101-107.	1.9	11
80	A Class of Single-Cell High-Order Semi-Lagrangian Advection Schemes. Monthly Weather Review, 2000, 128, 1165-1176.	1.4	11
81	An accurate multimoment constrained finite volume transport model on Yin-Yang grids. Advances in Atmospheric Sciences, 2013, 30, 1320-1330.	4.3	10
82	Interpreting dynamics of snap-off in a constricted capillary from the energy dissipation principle. Physics of Fluids, 2021, 33, .	4.0	10
83	An Accurate Semi-Lagrangian Scheme for Raindrop Sedimentation. Monthly Weather Review, 2003, 131, 974-983.	1.4	9
84	A multiâ€moment transport model on cubedâ€sphere grid. International Journal for Numerical Methods in Fluids, 2011, 67, 1993-2014.	1.6	9
85	A highâ€order multiâ€moment constrained finiteâ€volume global shallowâ€water model on the Yin‥ang grid. Quarterly Journal of the Royal Meteorological Society, 2015, 141, 2090-2102.	2.7	9
86	An integrated wind-forecast system based on the weather research and forecasting model, Kalman filter, and data assimilation with nacelle-wind observation. Journal of Renewable and Sustainable Energy, 2016, 8, .	2.0	9
87	High-order multi-moment finite volume method with smoothness adaptive fitting reconstruction for compressible viscous flow. Journal of Computational Physics, 2019, 394, 559-593.	3.8	9
88	Conservative CIP Transport in Meteorological Models. JSME International Journal Series B, 2004, 47, 725-734.	0.3	8
89	A semiâ€Lagrangian multiâ€moment finite volume method with fourthâ€order WENO projection. International Journal for Numerical Methods in Fluids, 2017, 83, 351-375.	1.6	8
90	New Accurate and Efficient Method for Stiff Detonation Capturing. AIAA Journal, 2018, 56, 4024-4038.	2.6	8

#	Article	IF	CITATIONS
91	Multi-moment finite volume method for incompressible flows on unstructured moving grids and its application to fluid-rigid body interactions. Computers and Structures, 2019, 221, 91-110.	4.4	8
92	A conservative solver for surface-tension-driven multiphase flows on collocated unstructured grids. Journal of Computational Physics, 2020, 401, 109025.	3.8	8
93	Solution property preserving reconstruction for finite volume scheme: a boundary variation diminishing+multidimensional optimal order detection framework. International Journal for Numerical Methods in Fluids, 2020, 92, 603-634.	1.6	8
94	Symmetry-preserving enforcement of low-dissipation method based on boundary variation diminishing principle. Computers and Fluids, 2022, 233, 105227.	2.5	8
95	Self-adjusting steepness-based schemes that preserve discontinuous structures in compressible flows. Journal of Computational Physics, 2022, 463, 111268.	3.8	8
96	A new paradigm of dissipation-adjustable, multi-scale resolving schemes for compressible flows. Journal of Computational Physics, 2022, 466, 111287.	3.8	8
97	Simulation and mitigation of the magneto-Rayleigh-Taylor instabilities in Z-pinch gas discharge extreme ultraviolet plasma radiation sources. Physics of Plasmas, 2013, 20, .	1.9	7
98	Fifth Order Multi-moment WENO Schemes for Hyperbolic Conservation Laws. Journal of Scientific Computing, 2015, 64, 477-507.	2.3	7
99	Multivariable neural network to postprocess shortâ€ŧerm, hubâ€height wind forecasts. Energy Science and Engineering, 2022, 10, 2561-2575.	4.0	7
100	A numerical procedure $\hat{a} \in \mathbb{C}$ CIP $\hat{a} \in \mathbb{C}$ to solve all phases of matter together. , 1998, , 439-457.		6
101	Implementations of multi-fluid hydrodynamic simulations on distributed memory computer with a fully parallelizable preconditioned Bi-CCSTAB method. Computer Physics Communications, 2001, 137, 274-285.	7.5	6
102	Large scale numerical simulations for multi-phase fluid dynamics with moving interfaces. International Journal of Computational Fluid Dynamics, 2008, 22, 405-410.	1.2	6
103	Fourth order transport model on Yin-Yang grid by multi-moment constrained ï¬nite volume scheme. Procedia Computer Science, 2012, 9, 1004-1013.	2.0	6
104	A nonâ€oscillatory multimoment finiteâ€volume global transport model on a cubedâ€sphere grid using the WENO slope limiter. Quarterly Journal of the Royal Meteorological Society, 2018, 144, 1611-1627.	2.7	6
105	Development of a less-dissipative hybrid AUSMD scheme for multi-component flow simulations. Shock Waves, 2019, 29, 691-704.	1.9	6
106	Implementation of the CIP as the Advection Solver in the MM5. Monthly Weather Review, 2003, 131, 1256-1271.	1.4	5
107	A high-order conservative collocation scheme and its application to global shallow-water equations. Geoscientific Model Development, 2015, 8, 221-233.	3.6	5
108	Development of a hybrid parallel MCV-based high-order global shallow-water model. Journal of Supercomputing, 2017, 73, 2823-2842.	3.6	5

#	Article	IF	CITATIONS
109	Uncertainty Quantification of a Coupled Model for Wind Prediction at a Wind Farm in Japan. Energies, 2019, 12, 1505.	3.1	5
110	Solution property preserving reconstruction BVD+MOOD scheme for compressible euler equations with source terms and detonations. Computers and Fluids, 2020, 206, 104594.	2.5	5
111	Profile-modifiable Conservative Transport Schemes and a Simple Multi-integrated Moment Formulation for Hydrodynamics. , 2003, , 106-111.		5
112	Development of Conservative Front-Capturing Scheme and Applications to Multi-fluid Simulations. The Proceedings of the JSME Annual Meeting, 2002, 2002.3, 301-302.	0.0	5
113	A Direct ALE Multi-Moment Finite Volume Scheme for the Compressible Euler Equations. Communications in Computational Physics, 2018, 24, .	1.7	5
114	Deep generative model for probabilistic wind speed and wind power estimation at a wind farm. Energy Science and Engineering, 2022, 10, 1855-1873.	4.0	5
115	An oscillation suppressing semi-Lagrangian solver for advection equation. Computer Physics Communications, 1999, 116, 121-135.	7.5	4
116	A Simple CIP Finite Volume Method for Incompressible Flows. JSME International Journal Series B, 2004, 47, 664-671.	0.3	4
117	A Non-oscillatory Multi-Moment Finite Volume Scheme with Boundary Gradient Switching. Journal of Scientific Computing, 2017, 72, 1146-1168.	2.3	4
118	A note on nonâ€negativity correction for a multimoment finiteâ€volume transport model with WENO limiter. Quarterly Journal of the Royal Meteorological Society, 2020, 146, 546-556.	2.7	4
119	A Positivity-preserving Conservative Semi-Lagrangian Multi-moment Global Transport Model on the Cubed Sphere. Advances in Atmospheric Sciences, 2021, 38, 1460-1473.	4.3	4
120	Revisit to the THINC/QQ scheme: Recent progress to improve accuracy and robustness. International Journal for Numerical Methods in Fluids, 2022, 94, 719-755.	1.6	4
121	A 3D Nonhydrostatic Compressible Atmospheric Dynamic Core by Multi-moment Constrained Finite Volume Method. Advances in Atmospheric Sciences, 2019, 36, 1129-1142.	4.3	3
122	Multiphase Fluid Simulations on a Multiple GPGPU PC Using Unsplit Time Integration VSIAM3. Progress in Nuclear Science and Technology, 2011, 2, 491-497.	0.3	3
123	A hybrid volume of fluid and level set interface capturing scheme with quartic surface representation for unstructured meshes. International Journal for Numerical Methods in Fluids, 0, , .	1.6	3
124	An efficient numerical model for multi-phase fluid dynamics. Advances in Engineering Software, 1998, 29, 345-352.	3.8	2
125	Frontiers in Computational Physics: Modeling the Earth System. Journal of Computational Physics, 2014, 271, 1.	3.8	2
126	GPU-accelerated large-scale simulations of interfacial multiphase fluids for real-case applications. Computers and Fluids, 2016, 141, 235-249.	2.5	2

#	Article	IF	CITATIONS
127	An ALE formulation for compressible flows based on multi-moment finite volume method. Engineering Applications of Computational Fluid Mechanics, 2018, 12, 791-809.	3.1	2
128	Uncertainty quantification of shock–bubble interaction simulations. Shock Waves, 2019, 29, 1191-1204.	1.9	2
129	Boundary variation diminishing algorithm for highâ€order local polynomialâ€based schemes. International Journal for Numerical Methods in Fluids, 2021, 93, 892-907.	1.6	2
130	Arbitrary high-order non-oscillatory scheme on hybrid unstructured grids based on multi-moment finite volume method. Journal of Computational Physics, 2021, 424, 109841.	3.8	2
131	Hybrid Discontinuous Galerkin/Finite Volume Method with Subcell Resolution for Shocked Flows. AIAA Journal, 2021, 59, 2027-2044.	2.6	2
132	A computational model for incompressible flow including surface tension. Communications in Numerical Methods in Engineering, 1999, 15, 887-894.	1.3	1
133	Strategy for unified solution of solid, liquid, gas and plasmas. , 1999, , .		1
134	A New Paradigm of Computer Graphics by Universal Solver for Solid, Liquid and Gas. JSME International Journal Series B, 2004, 47, 656-663.	0.3	1
135	Application of the characteristic CIP method to a shallow water model on the sphere. Advances in Atmospheric Sciences, 2010, 27, 728-740.	4.3	1
136	Global advection transport model on hexagonal-pentagonal geodesic grid by multi-moment scheme. Procedia Computer Science, 2011, 4, 2327-2336.	2.0	1
137	An MCV Nonhydrostatic Atmospheric Model with Height-Based Terrain following Coordinate: Tests of Waves over Steep Mountains. Advances in Meteorology, 2016, 2016, 1-12.	1.6	1
138	Design of Hybrid Reconstruction Scheme for Compressible Flow Using Data-Driven Methods. Journal of Mechanics, 2020, 36, 675-689.	1.4	1
139	A Two-Stage Fourth-Order Multimoment Global Shallow-Water Model on the Cubed Sphere. Monthly Weather Review, 2020, 148, 4267-4279.	1.4	1
140	An Adaptive Nonhydrostatic Atmospheric Dynamical Core Using a Multi-Moment Constrained Finite Volume Method. Advances in Atmospheric Sciences, 2022, 39, 487-501.	4.3	1
141	A new 3D OpenFoam solver with improved resolution for hyperbolic systems on hybrid unstructured grids. Applied Mathematical Modelling, 2022, 108, 142-166.	4.2	1
142	Multi-phase hydrodynamic simulations on parallel computer. Lecture Notes in Computer Science, 1999, , 157-168.	1.3	0
143	A 3D Numerical Model for Free Interfacial Flows and Applications to Offshore Waves with Submerged Obstacles. Applied Mechanics and Materials, 2013, 444-445, 544-548.	0.2	0
144	A Robust and Practical Multi-Moment Finite Volume Model for Computational Fluid Dynamics. Applied Mechanics and Materials, 0, 444-445, 534-538.	0.2	0
