#	ARTICLE	IF	CITATIONS
1	Multidimensional health changes after a multimodal pain rehabilitation program: a registry-based study. <i>Pain Reports</i> , 2021, 6, e938.	2.7	4
2	Effects of high-frequency, high-intensity transcutaneous electrical nerve stimulation versus intravenous opioids for pain relief after hysteroscopy: a randomized controlled study. <i>Obstetrics and Gynecology Science</i> , 2020, 63, 660-669.	1.6	2
3	Vulnerability and Resilience in Patients with Chronic Pain in Occupational Healthcare: A Pilot Study with a Patient-Centered Approach. <i>Pain Research and Treatment</i> , 2018, 2018, 1-12.	1.7	3
4	Effects of high-frequency, high-intensity transcutaneous electrical nerve stimulation versus intravenous opioids for pain relief after gynecologic laparoscopic surgery: a randomized controlled study. <i>Korean Journal of Anesthesiology</i> , 2018, 71, 149-156.	2.5	10
5	Determining the Feasibility of Spinal Cord Neuromodulation for the Treatment of Chronic Systolic Heart Failure. <i>JACC: Heart Failure</i> , 2016, 4, 129-136.	4.1	90
6	Time to gain trust and change—Experiences of attachment and mindfulness-based cognitive therapy among patients with chronic pain and psychiatric co-morbidity. <i>International Journal of Qualitative Studies on Health and Well-being</i> , 2014, 9, 24420.	1.6	11
7	A comparative study of the effect of high-intensity transcutaneous nerve stimulation and oral naproxen on intrauterine pressure and menstrual pain in patients with primary dysmenorrhea. <i>American Journal of Obstetrics and Gynecology</i> , 1994, 170, 123-129.	1.3	51
8	A comparative study of the effect of high-intensity transcutaneous nerve stimulation and oral naproxen on intrauterine pressure and menstrual pain in patients with primary dysmenorrhea. <i>American Journal of Obstetrics and Gynecology</i> , 1994, 170, 123-129.	1.3	54
9	The effect of transcutaneous electrical nerve stimulation (TENS) on catecholamine metabolism during pacing-induced angina pectoris and the influence of naloxone. <i>Pain</i> , 1990, 41, 27-34.	4.2	28
10	Transcutaneous electrical nerve stimulation (TENS) in angina pectoris. <i>Pain</i> , 1986, 26, 291-300.	4.2	47
