#	ARTICLE	IF	CITATIONS
1	Mesozoic contractional deformation in central East Asia: Constraints from deformation and sedimentary record of the Helanshan fold and thrust belt, North China Craton. <i>Gondwana Research</i> , 2022, 107, 235-255.	6.0	2
2	A Multiscale Numerical Modeling Investigation on the Significance of Flow Partitioning for the Development of Quartz c-axis Fabrics. <i>Journal of Geophysical Research: Solid Earth</i> , 2021, 126, e2020JB021040.	3.4	7
3	Comment on "Pressure-Depth Conversion Models for Metamorphic Rocks: Derivation and Applications" by Bauville and Yamato. <i>Geochemistry, Geophysics, Geosystems</i> , 2021, 22, e2021GC009737.	2.5	0
4	Constrictional Strain and Linear Fabrics as a Result of Deformation Partitioning: A Multiscale Modeling Investigation and Tectonic Significance. <i>Tectonics</i> , 2019, 38, 2829-2849.	2.8	11
5	Quartz Flow Law Revisited: The Significance of Pressure Dependence of the Activation Enthalpy. <i>Journal of Geophysical Research: Solid Earth</i> , 2019, 124, 241-256.	3.4	25
6	Pressure variations among rheologically heterogeneous elements in Earth's lithosphere: A micromechanics investigation. <i>Earth and Planetary Science Letters</i> , 2018, 498, 397-407.	4.4	15
7	Tectonic setting of the Late Triassic magmatism in the Qinling Orogen: New constraints from the interplay between granite emplacement and shear zone deformation in the Shagou area. <i>Geological Journal</i> , 2017, 52, 250-271.	1.3	7
8	An optimal scheme for numerical evaluation of Eshelby tensors and its implementation in a MATLAB package for simulating the motion of viscous ellipsoids in slow flows. <i>Computers and Geosciences</i> , 2016, 96, 98-108.	4.2	14
9	Viscous inclusions in anisotropic materials: Theoretical development and perspective applications. <i>Tectonophysics</i> , 2016, 693, 116-142.	2.2	27
10	Rapid change from compression to extension in the North China Craton during the Early Cretaceous: Evidence from the Yunmengshan metamorphic core complex. <i>Tectonophysics</i> , 2015, 656, 91-110.	2.2	106
11	Deformation characteristics and formation mechanism of the Yunmengshan metamorphic core complex. <i>Science Bulletin</i> , 2014, 59, 2419-2438.	1.7	10
12	Structural geology meets micromechanics: A self-consistent model for the multiscale deformation and fabric development in Earth's ductile lithosphere. <i>Journal of Structural Geology</i> , 2014, 68, 247-272.	2.3	55
13	The formation of micafish: A modeling investigation based on micromechanics. <i>Journal of Structural Geology</i> , 2014, 68, 300-315.	2.3	9
14	Introduction to <i>Journal of Structural Geology</i> special issue on "Deformation Processes in Lithospheric High-Strain Zones". <i>Journal of Structural Geology</i> , 2014, 68, 245-246.	2.3	0
15	Small-scale ductile shear zones as transposed rheologically weak domains: A numerical modeling investigation and practical application. <i>Journal of Structural Geology</i> , 2013, 54, 184-198.	2.3	7
16	The motion of deformable ellipsoids in power-law viscous materials: Formulation and numerical implementation of a micromechanical approach applicable to flow partitioning and heterogeneous deformation in Earth's lithosphere. <i>Journal of Structural Geology</i> , 2013, 50, 22-34.	2.3	26
17	A micromechanical approach for simulating multiscale fabrics in large-scale high-strain zones: Theory and application. <i>Journal of Geophysical Research</i> , 2012, 117, .	3.3	24
18	Evolution of the Yiwulushan metamorphic core complex from distributed to localized deformation and its tectonic implications. <i>Tectonics</i> , 2012, 31, .	2.8	50

#	ARTICLE	IF	CITATIONS
19	A general approach for modeling the motion of rigid and deformable ellipsoids in ductile flows. <i>Computers and Geosciences</i> , 2012, 38, 52-61.	4.2	24
20	Destruction of the eastern North China Craton in a backarc setting: Evidence from crustal deformation kinematics. <i>Gondwana Research</i> , 2012, 22, 86-103.	6.0	310
21	Deformation partitioning in transpressional shear zones with an along-strike stretch component: An example from the Superior Boundary Zone, Manitoba, Canada. <i>Journal of Structural Geology</i> , 2011, 33, 192-202.	2.3	20
22	A critique of vorticity analysis using rigid clasts. <i>Journal of Structural Geology</i> , 2011, 33, 203-219.	2.3	37
23	Structural and geochronological evidence for Early Cretaceous orogen-parallel extension of the ductile lithosphere in the northern Dabie orogenic belt, East China. <i>Journal of Structural Geology</i> , 2011, 33, 362-380.	2.3	64
24	Kinematics of deformation constructed from deformed planar and linear elements: The method and its application. <i>Tectonophysics</i> , 2010, 492, 175-191.	2.2	13
25	Flow and finite deformation of surface elements in three dimensional homogeneous progressive deformations. <i>Tectonophysics</i> , 2010, 487, 85-99.	2.2	19
26	Numerical modeling of the motion of deformable ellipsoidal objects in slow viscous flows. <i>Journal of Structural Geology</i> , 2007, 29, 435-452.	2.3	51
27	Numerical modeling of the motion of rigid ellipsoidal objects in slow viscous flows: A new approach. <i>Journal of Structural Geology</i> , 2007, 29, 189-200.	2.3	42
28	Importance of differentiating ductile slickenside striations from stretching lineations and variation of shear direction across a high-strain zone. <i>Journal of Structural Geology</i> , 2007, 29, 850-862.	2.3	32
29	Relationship between non-cylindrical fold geometry and the shear direction in monoclinic and triclinic shear zones. <i>Journal of Structural Geology</i> , 2007, 29, 1022-1033.	2.3	23
30	Sustainable transpression: An examination of strain and kinematics in deforming zones with migrating boundaries. <i>Journal of Structural Geology</i> , 2007, 29, 1984-2005.	2.3	36
31	Interpretation of deformation fabrics of infrastructure zone rocks in the context of channel flow and other tectonic models. <i>Geological Society Special Publication</i> , 2006, 268, 221-235.	1.3	19
32	An investigation of lower crustal deformation: Evidence for channel flow and its implications for tectonics and structural studies. <i>Journal of Structural Geology</i> , 2005, 27, 1486-1504.	2.3	77
33	Reply to the comments by Domingo Aerden on "Reference frame, angular momentum, and porphyroblast rotation". <i>Journal of Structural Geology</i> , 2005, 27, 1134-1137.	2.3	1
34	Reference frame, angular momentum, and porphyroblast rotation. <i>Journal of Structural Geology</i> , 2004, 26, 2211-2224.	2.3	28
35	Kinematics and Vorticity of High-Strain Zones. <i>GSA Today</i> , 2003, 13, 37.	2.0	1
36	Deformation path in high-strain zones, with reference to slip partitioning in transpressional plate-boundary regions. <i>Journal of Structural Geology</i> , 2001, 23, 991-1005.	2.3	81

#	ARTICLE	IF	CITATIONS
37	Reading history of folding from porphyroblasts. <i>Journal of Structural Geology</i> , 2001, 23, 1327-1335.	2.3	34
38	Using along-strike variation in strain and kinematics to define the movement direction of curved transpressional shear zones: An example from northwestern Superior Province, Manitoba. <i>Geology</i> , 2001, 29, 767.	4.4	49
39	Vorticity decomposition and its application to sectional flow characterization: Reply. <i>Tectonophysics</i> , 2000, 327, 153-155.	2.2	0
40	Rotating garnets. <i>Journal of Metamorphic Geology</i> , 1999, 17, 367-378.	3.4	70
41	When do dragfolds not develop into sheath folds in shear zones?. <i>Journal of Structural Geology</i> , 1999, 21, 577-583.	2.3	38
42	A fundamental problem with the kinematic interpretation of geological structures. <i>Journal of Structural Geology</i> , 1999, 21, 933-937.	2.3	37
43	Vorticity decomposition and its application to sectional flow characterization. <i>Tectonophysics</i> , 1999, 301, 243-259.	2.2	35
44	High-strain zones: a unified model. <i>Journal of Structural Geology</i> , 1998, 20, 1105-1120.	2.3	148
45	Forward modeling of non-steady-state deformations and the "minimum strain path": Discussion. <i>Journal of Structural Geology</i> , 1998, 20, 975-977.	2.3	22
46	Transpression (or transtension) zones of triclinic symmetry: natural example and theoretical modelling. <i>Geological Society Special Publication</i> , 1998, 135, 41-57.	1.3	103
47	Fracturing of garnet crystals in anisotropic metamorphic rocks during uplift: Discussion. <i>Journal of Structural Geology</i> , 1997, 19, 1429-1431.	2.3	1
48	Kinematics of rock flow and the interpretation of geological structures, with particular reference to shear zones. <i>Journal of Structural Geology</i> , 1995, 17, 1249-1265.	2.3	65
49	Vorticity determination, distribution, partitioning and the heterogeneity and non-steadiness of natural deformations. <i>Journal of Structural Geology</i> , 1994, 16, 121-130.	2.3	60
50	Flow variation in layered rocks subjected to bulk flow of various kinematic vorticities: theory and geological implications. <i>Journal of Structural Geology</i> , 1994, 16, 1159-1172.	2.3	53
