

Christelle Guibert

List of Publications by Citations

Source: <https://exaly.com/author-pdf/8738230/christelle-guibert-publications-by-citations.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
50	Circulating microparticles from pulmonary hypertensive rats induce endothelial dysfunction. <i>American Journal of Respiratory and Critical Care Medicine</i> , 2010 , 182, 261-8	10.2	73
49	Inhibition of MRP4 prevents and reverses pulmonary hypertension in mice. <i>Journal of Clinical Investigation</i> , 2011 , 121, 2888-97	15.9	70
48	[Ca ²⁺] _i oscillations induced by muscarinic stimulation in airway smooth muscle cells: receptor subtypes and correlation with the mechanical activity. <i>British Journal of Pharmacology</i> , 1997 , 120, 1294-301	8.6	50
47	Positive and negative coupling of the endothelin ETA receptor to Ca ²⁺ -permeable channels in rabbit cerebral cortex arterioles. <i>Journal of Physiology</i> , 1999 , 514 (Pt 3), 843-56	3.9	49
46	Vascular smooth muscle modulates endothelial control of vasoreactivity via reactive oxygen species production through myoendothelial communications. <i>PLoS ONE</i> , 2009 , 4, e6432	3.7	48
45	Evidence that CFTR is expressed in rat tracheal smooth muscle cells and contributes to bronchodilation. <i>Respiratory Research</i> , 2006 , 7, 113	7.3	47
44	Serotonin-induced activation of TRPV4-like current in rat intrapulmonary arterial smooth muscle cells. <i>Cell Calcium</i> , 2008 , 43, 315-23	4	45
43	Expression and physiological roles of TRP channels in smooth muscle cells. <i>Advances in Experimental Medicine and Biology</i> , 2011 , 704, 687-706	3.6	44
42	Voltage-independent calcium influx in smooth muscle. <i>Progress in Biophysics and Molecular Biology</i> , 2008 , 98, 10-23	4.7	43
41	Reactive oxygen species as therapeutic targets in pulmonary hypertension. <i>Therapeutic Advances in Respiratory Disease</i> , 2013 , 7, 175-200	4.9	40
40	Oscillatory Cl ⁻ current induced by angiotensin II in rat pulmonary arterial myocytes: Ca ²⁺ dependence and physiological implication. <i>Cell Calcium</i> , 1997 , 21, 421-9	4	40
39	5-HT induces an arachidonic acid-sensitive calcium influx in rat small intrapulmonary artery. <i>American Journal of Physiology - Lung Cellular and Molecular Physiology</i> , 2004 , 286, L1228-36	5.8	39
38	Modulation of ion channels in pulmonary arterial hypertension. <i>Current Pharmaceutical Design</i> , 2007 , 13, 2443-55	3.3	38
37	Mitochondria: roles in pulmonary hypertension. <i>International Journal of Biochemistry and Cell Biology</i> , 2014 , 55, 93-7	5.6	36
36	Expression and function of cystic fibrosis transmembrane conductance regulator in rat intrapulmonary arteries. <i>European Respiratory Journal</i> , 2007 , 30, 857-64	13.6	33
35	Cellular mechanisms and role of endothelin-1-induced calcium oscillations in pulmonary arterial myocytes. <i>American Journal of Physiology - Lung Cellular and Molecular Physiology</i> , 1998 , 275, L269-82	5.8	32
34	Effect of chronic hypoxia on voltage-independent calcium influx activated by 5-HT in rat intrapulmonary arteries. <i>Pflugers Archiv European Journal of Physiology</i> , 2007 , 454, 41-51	4.6	31

33	Role of the gap junctions in the contractile response to agonists in pulmonary artery from two rat models of pulmonary hypertension. <i>Respiratory Research</i> , 2011 , 12, 30	7.3	30
32	Role of alpha-adrenergic receptors in the effect of the beta-adrenergic receptor ligands, CGP 12177, bupranolol, and SR 59230A, on the contraction of rat intrapulmonary artery. <i>Journal of Pharmacology and Experimental Therapeutics</i> , 2004 , 309, 137-45	4.7	30
31	Development and characterization of an animal model of severe pulmonary arterial hypertension. <i>Journal of Vascular Research</i> , 2012 , 49, 33-42	1.9	28
30	Stretch-activated Piezo1 Channel in Endothelial Cells Relaxes Mouse Intrapulmonary Arteries. <i>American Journal of Respiratory Cell and Molecular Biology</i> , 2019 , 60, 650-658	5.7	24
29	Signalling pathways involved in the contractile response to 5-HT in the human pulmonary artery. <i>European Respiratory Journal</i> , 2009 , 34, 1338-47	13.6	23
28	Involvement of oxidative stress and calcium signaling in airborne particulate matter - induced damages in human pulmonary artery endothelial cells. <i>Toxicology in Vitro</i> , 2017 , 45, 340-350	3.6	22
27	Effect of short-term organoid culture on the pharmaco-mechanical properties of rat extra- and intrapulmonary arteries. <i>British Journal of Pharmacology</i> , 2005 , 146, 692-701	8.6	21
26	Expression and role of connexin-based gap junctions in pulmonary inflammatory diseases. <i>Pharmacology & Therapeutics</i> , 2016 , 164, 105-19	13.9	18
25	Dependence of P2-nucleotide receptor agonist-mediated endothelium-independent relaxation on ectonucleotidase activity and A2A-receptors in rat portal vein. <i>British Journal of Pharmacology</i> , 1998 , 123, 1732-40	8.6	18
24	Effect of extracellular ATP on cytosolic Ca ²⁺ concentration in rat pulmonary artery myocytes. <i>American Journal of Physiology - Lung Cellular and Molecular Physiology</i> , 1996 , 271, L450-8	5.8	17
23	Heterogeneity in 5-HT-induced contractile and proliferative responses in rat pulmonary arterial bed. <i>Journal of Vascular Research</i> , 2008 , 45, 181-92	1.9	16
22	Sodium-potassium-ATPase electrogenicity in cerebral precapillary arterioles. <i>American Journal of Physiology - Heart and Circulatory Physiology</i> , 2000 , 279, H351-60	5.2	14
21	Effect of engineered nanoparticles on vasomotor responses in rat intrapulmonary artery. <i>Toxicology and Applied Pharmacology</i> , 2010 , 245, 203-10	4.6	13
20	Altered vasoreactivity in neonatal rats with pulmonary hypertension associated with bronchopulmonary dysplasia: Implication of both eNOS phosphorylation and calcium signaling. <i>PLoS ONE</i> , 2017 , 12, e0173044	3.7	12
19	TRPV4 channel mediates adventitial fibroblast activation and adventitial remodeling in pulmonary hypertension. <i>American Journal of Physiology - Lung Cellular and Molecular Physiology</i> , 2020 , 318, L135-L146	5.8	12
18	ORAI Channels as Potential Therapeutic Targets in Pulmonary Hypertension. <i>Physiology</i> , 2018 , 33, 261-268	9.8	10
17	Signaling Pathways Linked to Serotonin-Induced Superoxide Anion Production: A Physiological Role for Mitochondria in Pulmonary Arteries. <i>Frontiers in Physiology</i> , 2017 , 8, 76	4.6	9
16	Hypoxia/hypercapnia-induced adaptation maintains functional capacity of cord blood stem and progenitor cells at 4°C. <i>Journal of Cellular Physiology</i> , 2014 , 229, 2153-65	7	9

15	Connexin-43 is a promising target for pulmonary hypertension due to hypoxaemic lung disease. <i>European Respiratory Journal</i> , 2020 , 55,	13.6	9
14	Effects of omega-hydroxylase product on distal human pulmonary arteries. <i>American Journal of Physiology - Heart and Circulatory Physiology</i> , 2008 , 294, H1435-43	5.2	8
13	Prevention of a hypoxic Ca ²⁺ (i) response by SERCA inhibitors in cerebral arterioles. <i>British Journal of Pharmacology</i> , 2002 , 135, 927-34	8.6	8
12	Human and rat airway smooth muscle responsiveness after ozone exposure in vitro. <i>American Journal of Physiology - Lung Cellular and Molecular Physiology</i> , 1996 , 271, L631-6	5.8	8
11	Chronic hypoxia aggravates monocrotaline-induced pulmonary arterial hypertension: a rodent relevant model to the human severe form of the disease. <i>Respiratory Research</i> , 2017 , 18, 47	7.3	6
10	The influence of gap junction network complexity on pulmonary artery smooth muscle reactivity in normoxic and chronically hypoxic conditions. <i>Experimental Physiology</i> , 2014 , 99, 272-85	2.4	6
9	In vitro study of carbon black nanoparticles on human pulmonary artery endothelial cells: effects on calcium signaling and mitochondrial alterations. <i>Archives of Toxicology</i> , 2020 , 94, 2331-2348	5.8	5
8	Hydrogen Sulfide Metabolism and Pulmonary Hypertension. <i>Cells</i> , 2021 , 10,	7.9	5
7	Effect of chronic hypoxia on pulmonary artery blood velocity in rats as assessed by electrocardiography-triggered three-dimensional time-resolved MR angiography. <i>NMR in Biomedicine</i> , 2011 , 24, 225-30	4.4	4
6	Hepatitis C virus proteins do not directly trigger fibrogenic events in cultured human liver myofibroblasts. <i>Journal of Viral Hepatitis</i> , 2003 , 10, 427-32	3.4	4
5	Mechanosensitivity in Pulmonary Circulation: Pathophysiological Relevance of Stretch-Activated Channels in Pulmonary Hypertension. <i>Biomolecules</i> , 2021 , 11,	5.9	3
4	Effects of FW2 Nanoparticles Toxicity in a New In Vitro Pulmonary Vascular Cells Model Mimicking Endothelial Dysfunction. <i>Cardiovascular Toxicology</i> , 2021 , 1	3.4	2
3	NiONPs-induced alteration in calcium signaling and mitochondrial function in pulmonary artery endothelial cells involves oxidative stress and TRPV4 channels disruption.. <i>Nanotoxicology</i> , 2022 , 1-23	5.3	1
2	NiONP-Induced Oxidative Stress and Mitochondrial Impairment in an In Vitro Pulmonary Vascular Cell Model Mimicking Endothelial Dysfunction. <i>Antioxidants</i> , 2022 , 11, 847	7.1	1
1	Plasma membrane Ca ²⁺ -ATPase equals no NO. <i>Cardiovascular Research</i> , 2010 , 87, 401-2	9.9
