

Peter A Troch

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/8748060/peter-a-troch-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

104
papers

1,734
citations

#	Paper	IF	Citations
104	Quantification of Measurement and Model Effects in Monopile Foundation Scour Protection Experiments. <i>Journal of Marine Science and Engineering</i> , 2021 , 9, 585	2.4	0
103	A new average wave overtopping prediction formula with improved accuracy for smooth steep low-crested structures. <i>Coastal Engineering</i> , 2021 , 163, 103800	4.8	2
102	On the accuracy of internal wave generation method in a non-hydrostatic wave model to generate and absorb dispersive and directional waves. <i>Ocean Engineering</i> , 2021 , 219, 108303	3.9	2
101	High-resolution, large-scale laboratory measurements of a sandy beach and dynamic cobble berm revetment. <i>Scientific Data</i> , 2021 , 8, 22	8.2	1
100	ROMS Based Hydrodynamic Modelling Focusing on the Belgian Part of the Southern North Sea. <i>Journal of Marine Science and Engineering</i> , 2021 , 9, 58	2.4	3
99	Influence of Power Take-Off Modelling on the Far-Field Effects of Wave Energy Converter Farms. <i>Water (Switzerland)</i> , 2021 , 13, 429	3	0
98	Influence of the Drag Force on the Average Absorbed Power of Heaving Wave Energy Converters Using Smoothed Particle Hydrodynamics. <i>Water (Switzerland)</i> , 2021 , 13, 384	3	9
97	Efficient response of an onshore Oscillating Water Column Wave Energy Converter using a one-phase SPH model coupled with a multiphysics library. <i>Applied Ocean Research</i> , 2021 , 115, 102856	3.4	8
96	Large Scale Experimental Study of the Scour Protection Damage Around a Monopile Foundation Under Combined Wave and Current Conditions. <i>Journal of Marine Science and Engineering</i> , 2020 , 8, 417	2.4	12
95	Efficiency and Survivability of a Floating Oscillating Water Column Wave Energy Converter Moored to the Seabed: An Overview of the EsfLOWC MaRINET2 Database. <i>Water (Switzerland)</i> , 2020 , 12, 992	3	5
94	An Inter-Model Comparison for Wave Interactions with Sea Dikes on Shallow Foreshores. <i>Journal of Marine Science and Engineering</i> , 2020 , 8, 985	2.4	7
93	Validation of RANS Modelling for Wave Interactions with Sea Dikes on Shallow Foreshores Using a Large-Scale Experimental Dataset. <i>Journal of Marine Science and Engineering</i> , 2020 , 8, 650	2.4	9
92	SPH simulation of floating structures with moorings. <i>Coastal Engineering</i> , 2019 , 153, 103560	4.8	49
91	Large-Scale Experiments to Improve Monopile Scour Protection Design Adapted to Climate Change—the PROTEUS Project. <i>Energies</i> , 2019 , 12, 1709	3.1	16
90	Experimental Study of a Moored Floating Oscillating Water Column Wave-Energy Converter and of a Moored Cubic Box. <i>Energies</i> , 2019 , 12, 1834	3.1	7
89	Internal Wave Generation in a Non-Hydrostatic Wave Model. <i>Water (Switzerland)</i> , 2019 , 11, 986	3	5
88	A fundamental coupling methodology for modeling near-field and far-field wave effects of floating structures and wave energy devices. <i>Renewable Energy</i> , 2019 , 143, 1608-1627	8.1	8

87	Irregular Wave Validation of a Coupling Methodology for Numerical Modelling of Near and Far Field Effects of Wave Energy Converter Arrays. <i>Energies</i> , 2019 , 12, 538	3.1	9
86	Implementation of Open Boundaries within a Two-Way Coupled SPH Model to Simulate Nonlinear Wave-Structure Interactions. <i>Energies</i> , 2019 , 12, 697	3.1	15
85	Accurate and Fast Generation of Irregular Short Crested Waves by Using Periodic Boundaries in a Mild-Slope Wave Model. <i>Energies</i> , 2019 , 12, 785	3.1	8
84	Wake Effect Assessment in Long- and Short-Crested Seas of Heaving-Point Absorber and Oscillating Wave Surge WEC Arrays. <i>Water (Switzerland)</i> , 2019 , 11, 1126	3	3
83	Analysing the Near-Field Effects and the Power Production of Near-Shore WEC Array Using a New Wave-to-Wire Model. <i>Water (Switzerland)</i> , 2019 , 11, 1137	3	3
82	The gravity database for Belgium. <i>Geoscience Data Journal</i> , 2019 , 6, 116-125	2.5	1
81	Non-linear wave generation and absorption using open boundaries within DualSPHysics. <i>Computer Physics Communications</i> , 2019 , 240, 46-59	4.2	19
80	Accelerated numerical simulations of a heaving floating body by coupling a motion solver with a two-phase fluid solver. <i>Computers and Mathematics With Applications</i> , 2019 , 77, 1605-1625	2.7	5
79	Wake effect assessment of a flap type wave energy converter farm under realistic environmental conditions by using a numerical coupling methodology. <i>Coastal Engineering</i> , 2019 , 143, 96-112	4.8	9
78	Performance of a buoyancy-modified k- ϵ and k- ϵ -ST turbulence model for simulating wave breaking under regular waves using OpenFOAM. <i>Coastal Engineering</i> , 2018 , 138, 49-65	4.8	44
77	Validation of large-scale particle image velocimetry to acquire free-surface flow fields in vegetated rivers. <i>Journal of Applied Water Engineering and Research</i> , 2018 , 6, 171-182	1.2	5
76	Coping with waves: Plasticity in tidal marsh plants as self-adapting coastal ecosystem engineers. <i>Limnology and Oceanography</i> , 2018 , 63, 799-815	4.8	25
75	A Critical Analysis and Validation of the Accuracy of Wave Overtopping Prediction Formulae for OWECs. <i>Energies</i> , 2018 , 11, 133	3.1	1
74	CFD Simulations of Floating Point Absorber Wave Energy Converter Arrays Subjected to Regular Waves. <i>Energies</i> , 2018 , 11, 641	3.1	30
73	What is a macrophyte patch? Patch identification in aquatic ecosystems and guidelines for consistent delineation. <i>Ecohydrology and Hydrobiology</i> , 2018 , 18, 1-9	2.8	11
72	Assessment of the Power Output of a Two-Array Clustered WEC Farm Using a BEM Solver Coupling and a Wave-Propagation Model. <i>Energies</i> , 2018 , 11, 2907	3.1	14
71	Analyzing the Near-Field Effects and the Power Production of an Array of Heaving Cylindrical WECs and OSWECs Using a Coupled Hydrodynamic-PTO Model. <i>Energies</i> , 2018 , 11, 3489	3.1	8
70	Coupling Methodology for Studying the Far Field Effects of Wave Energy Converter Arrays over a Varying Bathymetry. <i>Energies</i> , 2018 , 11, 2899	3.1	15

69	Coupling methodology for smoothed particle hydrodynamics modelling of non-linear wave-structure interactions. <i>Coastal Engineering</i> , 2018 , 138, 184-198	4.8	46
68	Efficient and robust wave overtopping estimation for impermeable coastal structures in shallow foreshores using SWASH. <i>Coastal Engineering</i> , 2017 , 122, 108-123	4.8	54
67	Application of a buoyancy-modified k- ϵ SST turbulence model to simulate wave run-up around a monopile subjected to regular waves using OpenFOAM \square . <i>Coastal Engineering</i> , 2017 , 125, 81-94	4.8	53
66	Modelling of a flap-type wave energy converter farm in a mild-slope equation model for a wake effect assessment. <i>IET Renewable Power Generation</i> , 2017 , 11, 1142-1152	2.9	3
65	Hydrodynamic conditions in front of a vertical wall with an overhanging horizontal cantilever slab. <i>Journal of Ocean University of China</i> , 2017 , 16, 978-990	1	3
64	A Comparison Study of a Generic Coupling Methodology for Modeling Wake Effects of Wave Energy Converter Arrays. <i>Energies</i> , 2017 , 10, 1697	3.1	17
63	Biogeomorphic feedback between plant growth and flooding causes alternative stable states in an experimental floodplain. <i>Advances in Water Resources</i> , 2016 , 93, 223-235	4.7	17
62	Resistance and reconfiguration of natural flexible submerged vegetation in hydrodynamic river modelling. <i>Environmental Fluid Mechanics</i> , 2016 , 16, 245-265	2.2	20
61	Quantifying critical conditions for seaward expansion of tidal marshes: A transplantation experiment. <i>Estuarine, Coastal and Shelf Science</i> , 2016 , 169, 227-237	2.9	18
60	Effects of contrasting wave conditions on scour and drag on pioneer tidal marsh plants. <i>Geomorphology</i> , 2016 , 255, 49-62	4.3	13
59	Wave-induced uprush jet velocity on a vertical structure. <i>Ocean Engineering</i> , 2016 , 127, 103-113	3.9	2
58	A geometric multigrid solver for the free-surface equation in environmental models featuring irregular coastlines. <i>Journal of Computational and Applied Mathematics</i> , 2015 , 289, 22-36	2.4	2
57	2D numerical simulation of large-scale physical model tests of wave interaction with a rubble-mound breakwater. <i>Coastal Engineering</i> , 2015 , 103, 22-41	4.8	29
56	Effect of lubrication layer on velocity profile of concrete in a pumping pipe. <i>Materials and Structures/Materiaux Et Constructions</i> , 2015 , 48, 3991-4003	3.4	46
55	Influence of the viscosity of self-compacting concrete and the presence of rebars on the formwork pressure while filling bottom-up. <i>Engineering Structures</i> , 2015 , 101, 698-714	4.7	15
54	Sea-state modification and heaving float interaction factors from physical modelling of arrays of wave energy converters. <i>Journal of Renewable and Sustainable Energy</i> , 2015 , 7, 061705	2.5	15
53	Evaluation of the Effectiveness of a Living Shoreline in a Confined, Non-Tidal Waterway Subject to Heavy Shipping Traffic. <i>River Research and Applications</i> , 2015 , 31, 1028-1039	2.3	10
52	MODELLING OF WAVE ATTENUATION INDUCED BY MULTI-PURPOSE FLOATING STRUCTURES USED FOR POWER SUPPLY AND COASTAL PROTECTION. <i>Coastal Engineering Proceedings</i> , 2015 , 1, 20	1.4	3

51	Ecosystem Engineering by Plants on Wave-Exposed Intertidal Flats Is Governed by Relationships between Effect and Response Traits. <i>PLoS ONE</i> , 2015 , 10, e0138086	3.7	33
50	EXPERIMENTAL STUDY OF OVERTOPPING PERFORMANCE FOR THE CASES OF VERY STEEP SLOPES AND VERTICAL WALLS WITH VERY SMALL FREEBOARDS. <i>Coastal Engineering Proceedings</i> , 2015 , 1, 2	1.4	2
49	THE INFLUENCE OF AN EXISTING VERTICAL STRUCTURE ON THE INCEPTION OF WAVE BREAKING POINT. <i>Coastal Engineering Proceedings</i> , 2015 , 1, 54	1.4	
48	Effects of wind waves versus ship waves on tidal marsh plants: a flume study on different life stages of <i>Scirpus maritimus</i> . <i>PLoS ONE</i> , 2015 , 10, e0118687	3.7	60
47	COMPARISON OF NUMERICAL MODELS FOR WAVE OVERTOPPING AND IMPACT ON A SEA WALL. <i>Coastal Engineering Proceedings</i> , 2015 , 1, 5	1.4	9
46	Numerical simulation of formwork pressure while pumping self-compacting concrete bottom-up. <i>Engineering Structures</i> , 2014 , 70, 218-233	4.7	20
45	Investigation of uplift impact forces on a vertical wall with an overhanging horizontal cantilever slab. <i>Coastal Engineering</i> , 2014 , 90, 12-22	4.8	24
44	An approximate solution to the flow field on vegetated intertidal platforms: Applicability and limitations. <i>Journal of Geophysical Research F: Earth Surface</i> , 2014 , 119, 1682-1703	3.8	13
43	Wave Basin Experiments with Large Wave Energy Converter Arrays to Study Interactions between the Converters and Effects on Other Users in the Sea and the Coastal Area. <i>Energies</i> , 2014 , 7, 701-734	3.1	63
42	Feasibility of a Dynamically Stable Rock Armour Layer Scour Protection for Offshore Wind Farms 2014 ,		6
41	Submerged macrophytes avoiding a negative feedback in reaction to hydrodynamic stress. <i>Limnologica</i> , 2013 , 43, 371-380	2	29
40	Field Monitoring of Ship Wave Action on Environmentally Friendly Bank Protection in a Confined Waterway. <i>Journal of Waterway, Port, Coastal and Ocean Engineering</i> , 2013 , 139, 527-534	1.7	11
39	Experimental study of violent wave impact on a vertical structure with an overhanging horizontal cantilever slab. <i>Ocean Engineering</i> , 2012 , 49, 1-15	3.9	22
38	Description of loading conditions due to violent wave impacts on a vertical structure with an overhanging horizontal cantilever slab. <i>Coastal Engineering</i> , 2012 , 60, 201-226	4.8	38
37	Empirical design of scour protections around monopile foundations. Part 2: Dynamic approach. <i>Coastal Engineering</i> , 2012 , 60, 286-298	4.8	34
36	Probability distribution of individual wave overtopping volumes for smooth impermeable steep slopes with low crest freeboards. <i>Coastal Engineering</i> , 2012 , 64, 87-101	4.8	34
35	An improved calculation model for the wave-induced pore pressure distribution in a rubble-mound breakwater core. <i>Coastal Engineering</i> , 2012 , 66, 8-23	4.8	11
34	Wave Overtopping at Smooth Impermeable Steep Slopes with Low Crest Freeboards. <i>Journal of Waterway, Port, Coastal and Ocean Engineering</i> , 2012 , 138, 372-385	1.7	23

33	A Review of Numerical Modelling of Wave Energy Converter Arrays 2012 ,		21
32	A simplified model for frictionally dominated tidal flows. <i>Geophysical Research Letters</i> , 2012 , 39, n/a-n/a	4.9	10
31	Empirical design of scour protections around monopile foundations. <i>Coastal Engineering</i> , 2011 , 58, 540-558		33
30	Deriving the relationship among discharge, biomass and Manning's coefficient through a calibration approach. <i>Hydrological Processes</i> , 2011 , 25, 1979-1995	3.3	6
29	A methodology for production and cost assessment of a farm of wave energy converters. <i>Renewable Energy</i> , 2011 , 36, 3402-3416	8.1	41
28	Validation of the STRIVE model for coupling ecological processes and surface water flow. <i>Journal of Hydroinformatics</i> , 2011 , 13, 741-759	2.6	1
27	On the Effects of Geometry Control on the Performance of Overtopping Wave Energy Converters. <i>Energies</i> , 2011 , 4, 1574-1600	3.1	12
26	NUMERICAL MODELING OF WAVE PENETRATION IN OSTEND HARBOUR. <i>Coastal Engineering Proceedings</i> , 2011 , 1, 42	1.4	5
25	Numerical implementation and sensitivity analysis of a wave energy converter in a time-dependent mild-slope equation model. <i>Coastal Engineering</i> , 2010 , 57, 471-492	4.8	48
24	Modelling river-floodplain interaction during flood propagation. <i>Natural Hazards</i> , 2010 , 55, 111-121	3	14
23	Application of the time-dependent mild-slope equations for the simulation of wake effects in the lee of a farm of Wave Dragon wave energy converters. <i>Renewable Energy</i> , 2010 , 35, 1644-1661	8.1	55
22	Numerical modelling of the filling of formworks with self-compacting concrete 2010 ,		2
21	Fair and sustainable irrigation water management in the Babai basin, Nepal. <i>Water Science and Technology</i> , 2009 , 59, 1505-13	2.2	2
20	Appropriate rehabilitation strategy for a traditional irrigation supply system: a case from the Babai area in Nepal. <i>Water Science and Technology</i> , 2009 , 60, 2819-28	2.2	3
19	Determination of the Manning roughness coefficient influenced by vegetation in the river Aa and Biebrza river. <i>Environmental Fluid Mechanics</i> , 2009 , 9, 549-567	2.2	55
18	Relation between resistance characteristics due to aquatic weed growth and the hydraulic capacity of the river Aa. <i>River Research and Applications</i> , 2009 , 25, 1287-1303	2.3	22
17	Numerical investigations of wave overtopping at coastal structures. <i>Coastal Engineering</i> , 2009 , 56, 190-202	4.8	24
16	Effects of new variables on the overtopping discharge at steep rubble mound breakwaters – The Zeebrugge case. <i>Coastal Engineering</i> , 2009 , 56, 141-153	4.8	10

15	Water rights of the head reach farmers in view of a water supply scenario at the extension area of the Babai Irrigation Project, Nepal. <i>Physics and Chemistry of the Earth</i> , 2009 , 34, 99-106	3	2
14	Simulation of the filling and emptying processes between a river and its storage areas 2009 , 37-39		
13	Accuracy of discharge measurements in a vegetated river. <i>Flow Measurement and Instrumentation</i> , 2008 , 19, 29-40	2.2	7
12	Wave Run-Up on the Zeebrugge Rubble Mound Breakwater: Full-Scale Measurement Results Versus Laboratory Results. <i>Journal of Coastal Research</i> , 2007 , 233, 584-591	0.6	3
11	Wave overtopping at coastal structures: prediction tools and related hazard analysis. <i>Journal of Cleaner Production</i> , 2007 , 15, 1514-1521	10.3	10
10	Interactions of breaking waves with a current over cut cells. <i>Journal of Computational Physics</i> , 2007 , 223, 865-897	4.1	14
9	Wave Run-Up on the Zeebrugge Rubble Mound Breakwater: Full-Scale Measurement Results. <i>Journal of Coastal Research</i> , 2007 , 233, 577-583	0.6	1
8	Risk assessment and water management. <i>Environmental Modelling and Software</i> , 2005 , 20, 141-151	5.2	22
7	Wave overtopping over a sea dike. <i>Journal of Computational Physics</i> , 2004 , 198, 686-726	4.1	53
6	Full-scale wave-overtopping measurements on the Zeebrugge rubble mound breakwater. <i>Coastal Engineering</i> , 2004 , 51, 609-628	4.8	20
5	Wave run-up on sloping coastal structures: prototype measurements versus scale model tests 2002 , 233-244		1
4	An active wave generating/absorbing boundary condition for VOF type numerical model. <i>Coastal Engineering</i> , 1999 , 38, 223-247	4.8	40
3	Wave Run-Up and Overtopping: Prototype Versus Scale Models 1999 , 1039		1
2	Development of Two-Dimensional Numerical Wave Flume for Wave Interaction with Rubble Mound Breakwaters 1999 , 1638		7
1	Instrumentation and prototype measurements at the Zeebrugge rubble mound breakwater. <i>Coastal Engineering</i> , 1998 , 35, 141-166	4.8	19
