#	ARTICLE	IF	CITATIONS
1	Associations of subclinical atherosclerosis with nonalcoholic fatty liver disease and fibrosis assessed by noninvasive score. <i>Liver International</i> , 2020, 40, 806-814.	3.9	27
2	The progression and regression of metabolic dysfunction-associated fatty liver disease are associated with the development of subclinical atherosclerosis: A prospective analysis. <i>Metabolism: Clinical and Experimental</i> , 2021, 120, 154779.	3.4	23
3	New Nonalcoholic Fatty Liver Disease and Fibrosis Progression Associate With the Risk of Incident Chronic Kidney Disease. <i>Journal of Clinical Endocrinology and Metabolism</i> , 2021, 106, e3957-e3968.	3.6	10
4	Discordance between the triglyceride glucose index and HOMA-IR in incident albuminuria: a cohort study from China. <i>Lipids in Health and Disease</i> , 2021, 20, 176.	3.0	10
5	Urinary albumin-to-creatinine ratio levels are associated with subclinical atherosclerosis and predict CVD events and all-cause deaths: a prospective analysis. <i>BMJ Open</i> , 2021, 11, e040890.	1.9	9
6	The association of low-grade albuminuria with incident nonalcoholic fatty liver disease and noninvasive markers of liver fibrosis by glycaemia status. <i>Liver International</i> , 2021, 41, 101-109.	3.9	5
7	New definition of metabolic dysfunction-associated fatty liver disease with elevated brachial-ankle pulse wave velocity and albuminuria: a prospective cohort study. <i>Frontiers of Medicine</i> , 2022, 16, 714-722.	3.4	4
8	The association of low-grade albuminuria with incident nonalcoholic fatty liver disease and noninvasive markers of liver fibrosis by glycemic status. <i>Liver International</i> , 2021, 41, 422-423.	3.9	3
9	The 2017 ACC/AHA stage 1 hypertension is associated with arterial stiffness: a prospective analysis. <i>Aging</i> , 2021, 13, 10075-10086.	3.1	2
