#	ARTICLE	IF	CITATIONS
1	Thermodynamic structure of a generic null surface and the zeroth law in scalar-tensor theory. Physical Review D, 2021, 104, .	4.7	10
2	Fluid-gravity correspondence in the scalar-tensor theory of gravity: (in)equivalence of Einstein and Jordan frames. Journal of High Energy Physics, 2020, 2020, 1.	4.7	8
3	Thermogeometric study of van der Waals like phase transition in black holes: An alternative approach. Physics Letters, Section B: Nuclear, Elementary Particle and High-Energy Physics, 2020, 802, 135224.	4.1	8
4	General framework to study the extremal phase transition of black holes. Physical Review D, 2019, 99, .	4.7	12
5	Abbott-Deser-Tekin like conserved quantities in Lanczos-Lovelock gravity: beyond Killing diffeomorphisms. Classical and Quantum Gravity, 2019, 36, 065009.	4.0	5
6	Fluctuation-dissipation relation in accelerated frames. Physical Review D, 2018, 97, .	4.7	9
7	Noncommutative Heisenberg algebra in the neighbourhood of a generic null surface. Nuclear Physics B, 2018, 934, 557-577.	2.5	9
8	Noether and Abbott-Deser-Tekin conserved quantities in scalar-tensor theory of gravity both in Jordan and Einstein frames. Physical Review D, 2018, 97, .	4.7	15
9	Fresh look at the scalar-tensor theory of gravity in Jordan and Einstein frames from undiscussed standpoints. Physical Review D, 2017, 95, .	4.7	35
10	van der Waals criticality in AdS black holes: A phenomenological study. Physical Review D, 2017, 96, .	4.7	44
11	Thermogeometric description of the van der Waals like phase transition in AdS black holes. Physical Review D, 2017, 95, .	4.7	42
12	Temperature and thermodynamic structure of Einstein's equations for a cosmological black hole. Physical Review D, 2016, 94, .	4.7	18
