#	ARTICLE	IF	CITATIONS
1	Finite unitary rings with a single subgroup of prime order of the group of units. Journal of Algebra and Its Applications, 2021, 20, .	0.4	0
2	Finite unitary ring with minimal non-nilpotent group of units. Journal of Algebra and Its Applications, 2021, 20, 2150108.	0.4	0
3	Finite unitary rings in which every subring is commutative, are commutative. Journal of Algebra and Its Applications, 2021, 20, 2150152.	0.4	0
4	FINITE UNITARY RINGS IN WHICH ALL SYLOW SUBGROUPS OF THE GROUP OF UNITS ARE CYCLIC. Bulletin of the Australian Mathematical Society, 2019, 99, 403-412.	0.5	2
5	Groups with an automorphism which inverts at least one-third of the elements. International Journal of Algebra and Computation, 2018, 28, 1175-1197.	0.5	0
6	Sum of the Element Orders in Groups of the Square-Free Orders. Bulletin of the Malaysian Mathematical Sciences Society, 2017, 40, 1025-1034.	0.9	11
7	Characterization of finite groups by a bijection with a divisible property on the element orders. Communications in Algebra, 2017, 45, 3396-3401.	0.6	2
8	Finite groups determined by the number of element centralizers. Communications in Algebra, 2017, 45, 3792-3797.	0.6	10
9	Finite groups in which at least $\frac{1}{3}$ of the elements are involutions. Journal of Algebra and Its Applications, 2016, 15, 1650184.	0.4	1
10	Conditions on Lie ideals in rings. Journal of Algebra and Its Applications, 2016, 15, 1650094.	0.4	0
11	Invariance conditions on substructures of division rings. Journal of Algebra and Its Applications, 2016, 15, 1650058.	0.4	2
12	Sum of the Products of the Orders of Two Distinct Elements in Finite Groups. Communications in Algebra, 2014, 42, 5319-5328.	0.6	9
13	Second maximum sum of element orders on finite groups. Journal of Pure and Applied Algebra, 2014, 218, 531-539.	0.6	21
