

Luis Castaeda

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/8772409/luis-castaneda-publications-by-year.pdf>

Version: 2024-04-23

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
10	Analytic conic constants to reduce the spherical aberration of a single lens used in collimated light. <i>Applied Optics</i> , 2017 , 56, 6244-6254	1.7	10
9	Design of Hartmann type null screens for testing a plano-convex aspheric lens with a CCD sensor inside the caustic. <i>Optics Express</i> , 2016 , 24, 19405-16	3.3	8
8	Analytic aspheric coefficients to reduce the spherical aberration of lens elements used in collimated light. <i>Applied Optics</i> , 2014 , 53, 4939-46	1.7	9
7	Chromium and ruthenium-doped zinc oxide thin films for propane sensing applications. <i>Sensors</i> , 2013 , 13, 3432-44	3.8	24
6	Caustics in a meridional plane produced by concave conic mirrors. <i>Journal of the Optical Society of America A: Optics and Image Science, and Vision</i> , 2012 , 29, 1977-85	1.8	5
5	Caustics in a meridional plane produced by plano-convex conic lenses. <i>Journal of the Optical Society of America A: Optics and Image Science, and Vision</i> , 2011 , 28, 2619-28	1.8	20
4	Null Ronchi-Hartmann test for a lens. <i>Optics Express</i> , 2010 , 18, 21131-7	3.3	19
3	Properties of caustics produced by a positive lens: meridional rays. <i>Journal of the Optical Society of America A: Optics and Image Science, and Vision</i> , 2010 , 27, 2252-60	1.8	18
2	Caustics and wavefronts by multiple reflections in a circular surface. <i>American Journal of Physics</i> , 2010 , 78, 1195-1198	0.7	8
1	Synthesis and structural characterization of novel flower-like titanium dioxide nanostructures. <i>Physica B: Condensed Matter</i> , 2007 , 390, 143-146	2.8	18
