

Chi Peng

List of Publications by Citations

Source: <https://exaly.com/author-pdf/8775733/chi-peng-publications-by-citations.pdf>

Version: 2024-04-26

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
68	Polycyclic aromatic hydrocarbons in urban soils of Beijing: status, sources, distribution and potential risk. <i>Environmental Pollution</i> , 2011 , 159, 802-8	9.3	339
67	Assessing the effectiveness of green infrastructures on urban flooding reduction: A community scale study. <i>Ecological Modelling</i> , 2014 , 291, 6-14	3	140
66	Risk assessment of Cd polluted paddy soils in the industrial and township areas in Hunan, Southern China. <i>Chemosphere</i> , 2016 , 144, 346-51	8.4	92
65	Spatial pattern of heavy metals accumulation risk in urban soils of Beijing and its influencing factors. <i>Environmental Pollution</i> , 2016 , 210, 174-81	9.3	81
64	A GIS technology based potential eco-risk assessment of metals in urban soils in Beijing, China. <i>Environmental Pollution</i> , 2012 , 161, 235-42	9.3	81
63	Assessing the combined risks of PAHs and metals in urban soils by urbanization indicators. <i>Environmental Pollution</i> , 2013 , 178, 426-32	9.3	72
62	Phytoextraction potential of <i>Pteris vittata</i> L. co-planted with woody species for As, Cd, Pb and Zn in contaminated soil. <i>Science of the Total Environment</i> , 2019 , 650, 594-603	10.2	71
61	Identification of heavy metal pollutants using multivariate analysis and effects of land uses on their accumulation in urban soils in Beijing, China. <i>Environmental Monitoring and Assessment</i> , 2012 , 184, 5889-97	9.7	68
60	Regional probabilistic risk assessment of heavy metals in different environmental media and land uses: An urbanization-affected drinking water supply area. <i>Scientific Reports</i> , 2016 , 6, 37084	4.9	58
59	Regional accumulation characteristics of cadmium in vegetables: Influencing factors, transfer model and indication of soil threshold content. <i>Environmental Pollution</i> , 2016 , 219, 1036-1043	9.3	54
58	Vegetative cover and PAHs accumulation in soils of urban green space. <i>Environmental Pollution</i> , 2012 , 161, 36-42	9.3	47
57	Accumulation of Cd in agricultural soil under long-term reclaimed water irrigation. <i>Environmental Pollution</i> , 2013 , 178, 294-9	9.3	47
56	Microbial biomass carbon and enzyme activities of urban soils in Beijing. <i>Environmental Science and Pollution Research</i> , 2011 , 18, 958-67	5.1	45
55	Immobilization of cadmium and improvement of bacterial community in contaminated soil following a continuous amendment with lime mixed with fertilizers: A four-season field experiment. <i>Ecotoxicology and Environmental Safety</i> , 2019 , 171, 425-434	7	43
54	Atmospheric deposition as a source of cadmium and lead to soil-rice system and associated risk assessment. <i>Ecotoxicology and Environmental Safety</i> , 2019 , 180, 160-167	7	39
53	Effects of urbanization on heavy metal accumulation in surface soils, Beijing. <i>Journal of Environmental Sciences</i> , 2018 , 64, 328-334	6.4	37
52	Release of cadmium in contaminated paddy soil amended with NPK fertilizer and lime under water management. <i>Ecotoxicology and Environmental Safety</i> , 2018 , 159, 38-45	7	36

51	Influences of setting sizes and combination of green infrastructures on community stormwater runoff reduction. <i>Ecological Modelling</i> , 2015 , 318, 236-244	3	35
50	Cadmium Accumulation Risk in Vegetables and Rice in Southern China: Insights from Solid-Solution Partitioning and Plant Uptake Factor. <i>Journal of Agricultural and Food Chemistry</i> , 2017 , 65, 5463-5469	5.7	34
49	Atmospheric bulk deposition of heavy metal(loid)s in central south China: Fluxes, influencing factors and implication for paddy soils. <i>Journal of Hazardous Materials</i> , 2019 , 371, 634-642	12.8	34
48	Spatial Analysis of PAHs in Soils along an Urban-Suburban-Rural Gradient: scale effect, distribution patterns, diffusion and influencing factors. <i>Scientific Reports</i> , 2016 , 6, 37185	4.9	33
47	Assessing cadmium exposure risks of vegetables with plant uptake factor and soil property. <i>Environmental Pollution</i> , 2018 , 238, 263-269	9.3	32
46	Impacts of urbanization on the distribution of heavy metals in soils along the Huangpu River, the drinking water source for Shanghai. <i>Environmental Science and Pollution Research</i> , 2016 , 23, 5222-31	5.1	32
45	Effects of tree-herb co-planting on the bacterial community composition and the relationship between specific microorganisms and enzymatic activities in metal(loid)-contaminated soil. <i>Chemosphere</i> , 2019 , 220, 237-248	8.4	31
44	Modelling cadmium contamination in paddy soils under long-term remediation measures: Model development and stochastic simulations. <i>Environmental Pollution</i> , 2016 , 216, 146-155	9.3	30
43	Cost-Benefit Analysis of Green Infrastructures on Community Stormwater Reduction and Utilization: A Case of Beijing, China. <i>Environmental Management</i> , 2016 , 58, 1015-1026	3.1	29
42	Distribution and risks of polycyclic aromatic hydrocarbons in suburban and rural soils of Beijing with various land uses. <i>Environmental Monitoring and Assessment</i> , 2016 , 188, 162	3.1	28
41	Complementarity of co-planting a hyperaccumulator with three metal(loid)-tolerant species for metal(loid)-contaminated soil remediation. <i>Ecotoxicology and Environmental Safety</i> , 2019 , 169, 306-315	7	27
40	Physiological stress responses, mineral element uptake and phytoremediation potential of <i>Morus alba</i> L. in cadmium-contaminated soil. <i>Ecotoxicology and Environmental Safety</i> , 2020 , 189, 109973	7	25
39	Heavy metals in soils around non-ferrous smelteries in China: Status, health risks and control measures. <i>Environmental Pollution</i> , 2021 , 282, 117038	9.3	25
38	Evaluating the potential health risk of toxic trace elements in vegetables: Accounting for variations in soil factors. <i>Science of the Total Environment</i> , 2017 , 584-585, 942-949	10.2	24
37	Polycyclic aromatic hydrocarbons in urban soils of China: Distribution, influencing factors, health risk and regression prediction. <i>Environmental Pollution</i> , 2019 , 254, 112930	9.3	24
36	Chelator-assisted phytoextraction of arsenic, cadmium and lead by <i>L.</i> and soil microbial community structure response. <i>International Journal of Phytoremediation</i> , 2019 , 21, 1032-1040	3.9	23
35	Health Risk Assessment of Trace Metals in Various Environmental Media, Crops and Human Hair from a Mining Affected Area. <i>International Journal of Environmental Research and Public Health</i> , 2017 , 14,	4.6	23
34	Dynamic response of enzymatic activity and microbial community structure in metal(loid)-contaminated soil with tree-herb intercropping. <i>Geoderma</i> , 2019 , 345, 5-16	6.7	22

33	Ecological risks of polycyclic musk in soils irrigated with reclaimed municipal wastewater. <i>Ecotoxicology and Environmental Safety</i> , 2013 , 97, 242-7	7	20
32	Modelling mass balance of cadmium in paddy soils under long term control scenarios. <i>Environmental Sciences: Processes and Impacts</i> , 2018 , 20, 1158-1166	4.3	19
31	Effects of mixed amendments on the phytoavailability of Cd in contaminated paddy soil under a rice-rape rotation system. <i>Environmental Science and Pollution Research</i> , 2019 , 26, 14128-14136	5.1	18
30	Geochemistry and ecological risk of metal(loid)s in overbank sediments near an abandoned lead/zinc mine in Central South China. <i>Environmental Earth Sciences</i> , 2018 , 77, 1	2.9	18
29	Feasibility of anaerobic digestion on the release of biogas and heavy metals from rice straw pretreated with sodium hydroxide. <i>Environmental Science and Pollution Research</i> , 2019 , 26, 19434-19444	5.1	16
28	Feasibility of aluminum recovery and MgAl ₂ O ₄ spinel synthesis from secondary aluminum dross. <i>International Journal of Minerals, Metallurgy and Materials</i> , 2019 , 26, 309-318	3.1	16
27	Potential of Pyrolysis for the Recovery of Heavy Metals and Bioenergy from Contaminated <i>Broussonetia papyrifera</i> Biomass. <i>BioResources</i> , 2018 , 13,	1.3	14
26	Mass balance-based regression modeling of PAHs accumulation in urban soils, role of urban development. <i>Environmental Pollution</i> , 2015 , 197, 21-27	9.3	13
25	Removal of cadmium, lead, and zinc from multi-metal-contaminated soil using chelate-assisted <i>Sedum alfredii</i> Hance. <i>Environmental Science and Pollution Research</i> , 2019 , 26, 28319-28327	5.1	13
24	Changes in chemical fractions and ecological risk prediction of heavy metals in estuarine sediments of Chunfeng Lake estuary, China. <i>Marine Pollution Bulletin</i> , 2019 , 138, 575-583	6.7	11
23	Response to cadmium and phytostabilization potential of <i>Platycladus orientalis</i> in contaminated soil. <i>International Journal of Phytoremediation</i> , 2018 , 20, 1337-1345	3.9	11
22	Mass balance-based regression modeling of Cd and Zn accumulation in urban soils of Beijing. <i>Journal of Environmental Sciences</i> , 2017 , 53, 99-106	6.4	10
21	Effect of Liming with Various Water Regimes on Both Immobilization of Cadmium and Improvement of Bacterial Communities in Contaminated Paddy: A Field Experiment. <i>International Journal of Environmental Research and Public Health</i> , 2019 , 16,	4.6	10
20	Physiological responses of <i>Morus alba</i> L. in heavy metal(loid)-contaminated soil and its associated improvement of the microbial diversity. <i>Environmental Science and Pollution Research</i> , 2020 , 27, 4294-4308	5.1	10
19	Identifying sources and transport routes of heavy metals in soil with different land uses around a smelting site by GIS based PCA and PMF.. <i>Science of the Total Environment</i> , 2022 , 823, 153759	10.2	8
18	Cleanup of arsenic, cadmium, and lead in the soil from a smelting site using N,N-bis(carboxymethyl)-L-glutamic acid combined with ascorbic acid: A lab-scale experiment. <i>Journal of Environmental Management</i> , 2021 , 296, 113174	7.9	8
17	Bioaccessibility and source identification of heavy metals in agricultural soils contaminated by mining activities. <i>Environmental Earth Sciences</i> , 2018 , 77, 1	2.9	7
16	Physiological, anatomical, and transcriptional responses of mulberry (<i>Morus alba</i> L.) to Cd stress in contaminated soil. <i>Environmental Pollution</i> , 2021 , 284, 117387	9.3	7

15	A questionnaire based probabilistic risk assessment (PRA) of heavy metals in urban and suburban soils under different land uses and receptor populations. <i>Science of the Total Environment</i> , 2021 , 793, 148525	10.2	7
14	Co-application of indole-3-acetic acid/gibberellin and oxalic acid for phytoextraction of cadmium and lead with <i>Sedum alfredii</i> Hance from contaminated soil. <i>Chemosphere</i> , 2021 , 285, 131420	8.4	7
13	A dynamic model to evaluate the critical loads of heavy metals in agricultural soil. <i>Ecotoxicology and Environmental Safety</i> , 2020 , 197, 110607	7	6
12	Factors influencing the effectiveness of liming on cadmium reduction in rice: A meta-analysis and decision tree analysis. <i>Science of the Total Environment</i> , 2021 , 779, 146477	10.2	6
11	Characteristics and behaviour of vanadium(V) adsorption on goethite and birnessite. <i>Environmental Earth Sciences</i> , 2020 , 79, 1	2.9	5
10	A water balance approach to assess rainwater availability potential in urban areas: the case of Beijing, China. <i>Water Science and Technology: Water Supply</i> , 2015 , 15, 490-498	1.4	5
9	Extraction of Cd and Pb from contaminated-paddy soil with EDTA, DTPA, citric acid and FeCl ₃ and effects on soil fertility. <i>Journal of Central South University</i> , 2019 , 26, 2987-2997	2.1	5
8	Distribution Characteristics and Risk Assessment of Heavy Metals in Soil and Street Dust with Different Land Uses, a Case in Changsha, China. <i>International Journal of Environmental Research and Public Health</i> , 2021 , 18,	4.6	3
7	Estimation of the accumulation rates and health risks of heavy metals in residential soils of three metropolitan cities in China.. <i>Journal of Environmental Sciences</i> , 2022 , 115, 149-161	6.4	3
6	Optimizing pyrolysis temperature of contaminated rice straw biochar: Heavy metal(loid) deportment, properties evolution, and Pb adsorption/immobilization. <i>Journal of Saudi Chemical Society</i> , 2022 , 26, 101439	4.3	2
5	Effects of combined soil amendments on Cd accumulation, translocation and food safety in rice: a field study in southern China. <i>Environmental Geochemistry and Health</i> , 2021 , 1	4.7	1
4	Adsorption of Cd on Soils with Various Particle Sizes from an Abandoned Non-ferrous Smelting Site: Characteristics and Mechanism.. <i>Bulletin of Environmental Contamination and Toxicology</i> , 2022 , 1	2.7	1
3	Comparison of heavy metals in urban soil and dust in cities of China: characteristics and health risks. <i>International Journal of Environmental Science and Technology</i> , 1	3.3	1
2	Facilitation of <i>Morus alba</i> L. intercropped with <i>Sedum alfredii</i> H. and <i>Arundo donax</i> L. on soil contaminated with potentially toxic metals. <i>Chemosphere</i> , 2021 , 133107	8.4	0
1	Physiological responses, tolerance efficiency, and phytoextraction potential of (Boreau) H. Ohba under Cd stress in hydroponic condition. <i>International Journal of Phytoremediation</i> , 2021 , 23, 80-88	3.9	0
