| # | ARTICLE | IF | CITATIONS |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1 | Preliminary investigation of effects of copper on a terrestrial population of the antarctic rotifer <i>Philodina</i> sp.. <i>Chemosphere</i> , 2022, 300, 134413. | 4.2 | 4 |
| 2 | Assessing metal contaminants in Antarctic soils using diffusive gradients in thin-films. <i>Chemosphere</i> , 2021, 269, 128675. | 4.2 | 7 |
| 3 | Using an expert judgment response matrix to assess the risk of groundwater discharges from remediated fuel spill sites to the marine environment at subantarctic Macquarie Island, Australia. <i>Integrated Environmental Assessment and Management</i> , 2021, 17, 785-801. | 1.6 | 2 |
| 4 | Metal lability and environmental risk in anthropogenically disturbed Antarctic melt streams. <i>Environmental Pollution</i> , 2021, 287, 117627. | 3.7 | 3 |
| 5 | The microalga <i>Phaeocystis antarctica</i> is tolerant to salinity and metal mixture toxicity interactions. <i>Environmental Sciences: Processes and Impacts</i> , 2021, 23, 1362-1375. | 1.7 | 4 |
| 6 | Sensitivity to Copper and Development of Culturing and Toxicity Test Procedures for the Antarctic Terrestrial Nematode <i>Plectus murrayi</i> . <i>Environmental Toxicology and Chemistry</i> , 2020, 39, 482-491. | 2.2 | 8 |
| 7 | Assessing the Risk of Metals and Their Mixtures in the Antarctic Nearshore Marine Environment with Diffusive Gradients in Thin-Films. <i>Environmental Science & Technology</i> , 2020, 54, 306-315. | 4.6 | 14 |
| 8 | Applying microbial indicators of hydrocarbon toxicity to contaminated sites undergoing bioremediation on subantarctic Macquarie Island. <i>Environmental Pollution</i> , 2020, 259, 113780. | 3.7 | 9 |
| 9 | Basal tolerance but not plasticity gives invasive springtails the advantage in an assemblage setting. , 2020, 8, coaa049. | | 19 |
| 10 | Impacts of Petroleum Fuels on Fertilization and Development of the Antarctic Sea Urchin <i>Sterechinus neumayeri</i> . <i>Environmental Toxicology and Chemistry</i> , 2020, 39, 2527-2539. | 2.2 | 4 |
| 11 | Effects of ocean acidification on Antarctic marine organisms: A meta-analysis. <i>Ecology and Evolution</i> , 2020, 10, 4495-4514. | 0.8 | 39 |
| 12 | Preliminary study of cellular metal accumulation in two Antarctic marine microalgae – implications for mixture interactivity and dietary risk. <i>Environmental Pollution</i> , 2019, 252, 1582-1592. | 3.7 | 15 |
| 13 | Response of the Native Springtail <i>Parisotoma insularis</i> to Diesel Fuel-Contaminated Soils Under Field-Realistic Exposure Conditions at Subantarctic Macquarie Island. <i>Integrated Environmental Assessment and Management</i> , 2019, 15, 565-574. | 1.6 | 3 |
| 14 | Sensitivity of a Large and Representative Sample of Antarctic Marine Invertebrates to Metals. <i>Environmental Toxicology and Chemistry</i> , 2019, 38, 1560-1568. | 2.2 | 11 |
| 15 | Diffusive Gradients in Thin Films Can Predict the Toxicity of Metal Mixtures to Two Microalgae: Validation for Environmental Monitoring in Antarctic Marine Conditions. <i>Environmental Toxicology and Chemistry</i> , 2019, 38, 1323-1333. | 2.2 | 19 |
| 16 | Increased sensitivity of subantarctic marine invertebrates to copper under a changing climate - Effects of salinity and temperature. <i>Environmental Pollution</i> , 2019, 249, 54-62. | 3.7 | 17 |
| 17 | Uptake and Depuration Kinetics Influence Microplastic Bioaccumulation and Toxicity in Antarctic Krill (<i>Euphausia superba</i>). <i>Environmental Science & Technology</i> , 2018, 52, 3195-3201. | 4.6 | 129 |
| 18 | Comparative copper sensitivity between life stages of common subantarctic marine invertebrates. <i>Environmental Toxicology and Chemistry</i> , 2018, 37, 807-815. | 2.2 | 19 |

| # | ARTICLE | IF | CITATIONS |
|----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Turning microplastics into nanoplastics through digestive fragmentation by Antarctic krill. <i>Nature Communications</i> , 2018, 9, 1001. | 5.8 | 632 |
| 20 | The influence of vegetation and soil properties on springtail communities in a diesel-contaminated soil. <i>Science of the Total Environment</i> , 2018, 619-620, 1098-1104. | 3.9 | 22 |
| 21 | Microfluidic qPCR Enables High Throughput Quantification of Microbial Functional Genes but Requires Strict Curation of Primers. <i>Frontiers in Environmental Science</i> , 2018, 6, . | 1.5 | 31 |
| 22 | Chronic toxicity of an environmentally relevant and equitoxic ratio of five metals to two Antarctic marine microalgae shows complex mixture interactivity. <i>Environmental Pollution</i> , 2018, 242, 1319-1330. | 3.7 | 29 |
| 23 | Ecosystem effects and the management of petroleum-contaminated soils on subantarctic islands. <i>Chemosphere</i> , 2018, 194, 200-210. | 4.2 | 36 |
| 24 | Complex genetic structure revealed in the circum-Antarctic broadcast spawning sea urchin <i>Sterechinus neumayeri</i> . <i>Marine Ecology - Progress Series</i> , 2018, 601, 153-166. | 0.9 | 5 |
| 25 | Lethal and behavioral impacts of diesel and fuel oil on the Antarctic amphipod <i>Paramoera walkeri</i> . <i>Environmental Toxicology and Chemistry</i> , 2017, 36, 2444-2455. | 2.2 | 11 |
| 26 | Chronic toxicity of five metals to the polar marine microalga <i>Cryothecomonas armigera</i> – Application of a new bioassay. <i>Environmental Pollution</i> , 2017, 228, 211-221. | 3.7 | 34 |
| 27 | Integrated Modeling of Survival Data from Multiple Stressor Ecotoxicology Experiments. <i>Environmental Science & Technology</i> , 2017, 51, 7271-7277. | 4.6 | 4 |
| 28 | Oil Pollution in Antarctica. , 2017, , 759-803. | | 8 |
| 29 | Fuel oil and dispersant toxicity to the Antarctic sea urchin (<i>Sterechinus neumayeri</i>). <i>Environmental Toxicology and Chemistry</i> , 2017, 36, 1563-1571. | 2.2 | 23 |
| 30 | Toxicity of copper to three common subantarctic marine gastropods. <i>Ecotoxicology and Environmental Safety</i> , 2017, 136, 70-77. | 2.9 | 10 |
| 31 | Sensitivity of six subantarctic marine invertebrates to common metal contaminants. <i>Environmental Toxicology and Chemistry</i> , 2016, 35, 2245-2251. | 2.2 | 20 |
| 32 | Soil invertebrate community change over fuel-contaminated sites on a subantarctic island: An ecological field-based line of evidence for site risk assessment. <i>Integrated Environmental Assessment and Management</i> , 2016, 12, 306-314. | 1.6 | 12 |
| 33 | The environmental impact of sewage and wastewater outfalls in Antarctica: An example from Davis station, East Antarctica. <i>Water Research</i> , 2016, 105, 602-614. | 5.3 | 48 |
| 34 | Assessing fuel spill risks in polar waters: Temporal dynamics and behaviour of hydrocarbons from Antarctic diesel, marine gas oil and residual fuel oil. <i>Marine Pollution Bulletin</i> , 2016, 110, 343-353. | 2.3 | 26 |
| 35 | Seawater temperature effect on metal accumulation and toxicity in the subantarctic Macquarie Island isopod, <i>Exosphaeroma gigas</i> . <i>Aquatic Toxicology</i> , 2016, 177, 333-342. | 1.9 | 7 |
| 36 | Dispersal and dilution of wastewater from an ocean outfall at Davis Station, Antarctica, and resulting environmental contamination. <i>Chemosphere</i> , 2016, 152, 142-157. | 4.2 | 25 |

| # | ARTICLE | IF | CITATIONS |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 37 | Population structure and long-term decline in three species of heart urchins <i>Abatus</i> spp. near-shore in the Vestfold Hills region, East Antarctica. <i>Marine Ecology - Progress Series</i> , 2016, 545, 227-238. | 0.9 | 2 |
| 38 | A robust bioassay to assess the toxicity of metals to the Antarctic marine microalga <i>Phaeocystis antarctica</i> . <i>Environmental Toxicology and Chemistry</i> , 2015, 34, 1578-1587. | 2.2 | 25 |
| 39 | Toxicity of fuel-contaminated soil to Antarctic moss and terrestrial algae. <i>Environmental Toxicology and Chemistry</i> , 2015, 34, 2004-2012. | 2.2 | 18 |
| 40 | Application of a quantitative histological health index for Antarctic rock cod (<i>Trematomus</i>) Tj ETQq0 0 0 rgBT /Overlock 10 Tf 50 622 Td | 1.1 | 12 |
| 41 | Abundance and diversity of soil invertebrates in the Windmill Islands region, East Antarctica. <i>Polar Biology</i> , 2015, 38, 1391-1400. | 0.5 | 8 |
| 42 | Application of a Bayesian nonparametric model to derive toxicity estimates based on the response of Antarctic microbial communities to fuel-contaminated soil. <i>Ecology and Evolution</i> , 2015, 5, 2633-2645. | 0.8 | 9 |
| 43 | Modelling grouped survival times in toxicological studies using Generalized Additive Models. <i>Environmental and Ecological Statistics</i> , 2015, 22, 465-491. | 1.9 | 4 |
| 44 | Tracking spatial distribution of human-derived wastewater from Davis Station, East Antarctica, using $\delta^{15}\text{N}$ and $\delta^{13}\text{C}$ stable isotopes. <i>Marine Pollution Bulletin</i> , 2015, 90, 41-47. | 2.3 | 10 |
| 45 | An Antarctic Research Station as a Source of Brominated and Perfluorinated Persistent Organic Pollutants to the Local Environment. <i>Environmental Science & Technology</i> , 2015, 49, 103-112. | 4.6 | 93 |
| 46 | Determining the sensitivity of the Antarctic amphipod <i>Orchomenella pinguides</i> to metals using a joint model of survival response to exposure concentration and duration. <i>Ecotoxicology</i> , 2015, 24, 583-594. | 1.1 | 13 |
| 47 | Impact of hydrocarbons from a diesel fuel on the germination and early growth of subantarctic plants. <i>Environmental Sciences: Processes and Impacts</i> , 2015, 17, 1238-1248. | 1.7 | 19 |
| 48 | Physical, chemical, biological and ecotoxicological properties of wastewater discharged from Davis Station, Antarctica. <i>Cold Regions Science and Technology</i> , 2015, 113, 52-62. | 1.6 | 32 |
| 49 | Reproduction, growth and early life history of the Antarctic gammarid amphipod <i>Paramoera walkeri</i> . <i>Polar Biology</i> , 2015, 38, 1583-1596. | 0.5 | 6 |
| 50 | The use of microbial gene abundance in the development of fuel remediation guidelines in polar soils. <i>Integrated Environmental Assessment and Management</i> , 2015, 11, 235-241. | 1.6 | 12 |
| 51 | Sensitivity and response time of three common Antarctic marine copepods to metal exposure. <i>Chemosphere</i> , 2015, 120, 267-272. | 4.2 | 31 |
| 52 | Temporal changes in the sensitivity of coastal Antarctic zooplankton communities to diesel fuel: A comparison between single- and multi-species toxicity tests. <i>Environmental Toxicology and Chemistry</i> , 2014, 33, 882-890. | 2.2 | 27 |
| 53 | Direct evidence of histopathological impacts of wastewater discharge on resident Antarctic fish (<i>Tj ETQq1 1 0.784314 rgBT /Overlock</i> | 2.3 | 18 |
| 54 | Phytoremediation of hydrocarbon contaminants in subantarctic soils: An effective management option. <i>Journal of Environmental Management</i> , 2014, 142, 60-69. | 3.8 | 50 |

| # | ARTICLE | IF | CITATIONS |
|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 55 | Effects of ocean warming and acidification on fertilization in the Antarctic echinoid <i>Sterechinus neumayeri</i> across a range of sperm concentrations. <i>Marine Environmental Research</i> , 2013, 90, 136-141. | 1.1 | 25 |
| 56 | Toxicity of diesel contaminated soils to the subantarctic earthworm <i>Microscolex macquariensis</i> . <i>Environmental Toxicology and Chemistry</i> , 2013, 32, 370-377. | 2.2 | 21 |
| 57 | Vulnerability of the calcifying larval stage of the Antarctic sea urchin <i>Sterechinus neumayeri</i> to near-future ocean acidification and warming. <i>Global Change Biology</i> , 2013, 19, 2264-2275. | 4.2 | 77 |
| 58 | Behavioural sensitivity of a key Southern Ocean species (Antarctic krill, <i>Euphausia superba</i>) to p,p'-DDE exposure. <i>Ecotoxicology and Environmental Safety</i> , 2012, 75, 163-170. | 2.9 | 13 |
| 59 | Combined effects of two ocean change stressors, warming and acidification, on fertilization and early development of the Antarctic echinoid <i>Sterechinus neumayeri</i> . <i>Polar Biology</i> , 2012, 35, 1027-1034. | 0.5 | 71 |
| 60 | Response of stream invertebrate communities to vegetation damage from overgrazing by exotic rabbits on subantarctic Macquarie Island. <i>Marine and Freshwater Research</i> , 2011, 62, 404. | 0.7 | 6 |
| 61 | Physico-chemical changes in metal-spiked sediments deployed in the field: Implications for the interpretation of in situ studies. <i>Chemosphere</i> , 2011, 83, 400-408. | 4.2 | 11 |
| 62 | Toxicity of Metals to the Bivalve <i>Tellina deltoidalis</i> and Relationships Between Metal Bioaccumulation and Metal Partitioning Between Seawater and Marine Sediments. <i>Archives of Environmental Contamination and Toxicology</i> , 2010, 58, 657-665. | 2.1 | 23 |
| 63 | Contaminated suspended sediments toxic to an Antarctic filter feeder: Aqueous and particulate phase effects. <i>Environmental Toxicology and Chemistry</i> , 2009, 28, 409-417. | 2.2 | 33 |
| 64 | Reproductive potential of a marine ecosystem engineer at the edge of a newly expanded range. <i>Global Change Biology</i> , 2008, 14, 907-915. | 4.2 | 98 |
| 65 | Sensitivities of Australian and New Zealand amphipods to copper and zinc in waters and metal-spiked sediments. <i>Chemosphere</i> , 2006, 63, 1466-1476. | 4.2 | 79 |
| 66 | Acute toxicity and bioaccumulation of aqueous and sediment-bound metals in the estuarine amphipod <i>Melita plumulosa</i> . <i>Environmental Toxicology</i> , 2006, 21, 489-504. | 2.1 | 35 |
| 67 | CHRONIC SUBLETHAL SEDIMENT TOXICITY TESTING USING THE ESTUARINE AMPHIPOD, MELITA PLUMULOSA (ZEIDLER): EVALUATION USING METAL-SPIKED AND FIELD-CONTAMINATED SEDIMENTS. <i>Environmental Toxicology and Chemistry</i> , 2006, 25, 1887. | 2.2 | 37 |
| 68 | LABORATORY CULTURE AND LIFE-CYCLE EXPERIMENTS WITH THE BENTHIC AMPHIPOD MELITA PLUMULOSA (ZEIDLER). <i>Environmental Toxicology and Chemistry</i> , 2005, 24, 2065. | 2.2 | 47 |
| 69 | Larval development and metamorphosis of the Australian diadematid sea urchin <i>Centrostephanus rodgersii</i> . <i>Invertebrate Reproduction and Development</i> , 2005, 47, 197-204. | 0.3 | 32 |
| 70 | Exposure-Pathway Models Explain Causality in Whole-Sediment Toxicity Tests. <i>Environmental Science & Technology</i> , 2005, 39, 837-843. | 4.6 | 69 |
| 71 | Short-term accumulation of Cd and Cu from water, sediment and algae by the amphipod <i>Melita plumulosa</i> and the bivalve <i>Tellina deltoidalis</i> . <i>Marine Ecology - Progress Series</i> , 2005, 287, 177-188. | 0.9 | 59 |
| 72 | An Assessment of Five Australian Polychaetes and Bivalves for Use in Whole-Sediment Toxicity Tests: Toxicity and Accumulation of Copper and Zinc from Water and Sediment. <i>Archives of Environmental Contamination and Toxicology</i> , 2004, 47, 314-23. | 2.1 | 63 |

| # | ARTICLE | IF | CITATIONS |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 73 | Management and remediation of contaminated sites at Casey Station, Antarctica. Polar Record, 2001, 37, 199-214. | 0.4 | 160 |
| 74 | Effects of metal contaminants on the development of the common Antarctic sea urchin <i>Sterechinus neumayeri</i> and comparisons of sensitivity with tropical and temperate echinoids. Marine Ecology - Progress Series, 2001, 215, 143-154. | 0.9 | 102 |
