| #  | ARTICLE                                                                                                                                                                                                                        | IF   | CITATIONS |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-----------|
| 1  | The impact of frailty on ICU and 30-day mortality and the level of care in very elderly patients (≥80 years). <i>Intensive Care Medicine</i> , 2017, 43, 1820-1828.                                                            | 8.2  | 311       |
| 2  | Pantoprazole in Patients at Risk for Gastrointestinal Bleeding in the ICU. <i>New England Journal of Medicine</i> , 2018, 379, 2199-2208.                                                                                      | 27.0 | 232       |
| 3  | The contribution of frailty, cognition, activity of daily life and comorbidities on outcome in acutely admitted patients over 80 years in European ICUs: the VIP2 study. <i>Intensive Care Medicine</i> , 2020, 46, 57-69.     | 8.2  | 230       |
| 4  | The impact of frailty on survival in elderly intensive care patients with COVID-19: the COVIP study. <i>Critical Care</i> , 2021, 25, 149.                                                                                     | 5.8  | 107       |
| 5  | Withholding or withdrawing of life-sustaining therapy in older adults (≥80 years) admitted to the intensive care unit. <i>Intensive Care Medicine</i> , 2018, 44, 1027-1038.                                                   | 8.2  | 106       |
| 6  | Reliability of the Clinical Frailty Scale in very elderly ICU patients: a prospective European study. <i>Annals of Intensive Care</i> , 2021, 11, 22.                                                                          | 4.6  | 61        |
| 7  | Steroid use in elderly critically ill COVID-19 patients. <i>European Respiratory Journal</i> , 2021, 58, 2100979.                                                                                                              | 6.7  | 44        |
| 8  | Extracorporeal cardiopulmonary resuscitation after out-of-hospital cardiac arrest in a Danish health region. <i>Acta Anaesthesiologica Scandinavica</i> , 2017, 61, 176-185.                                                   | 1.6  | 36        |
| 9  | A comparison of very old patients admitted to intensive care unit after acute versus elective surgery or intervention. <i>Journal of Critical Care</i> , 2019, 52, 141-148.                                                    | 2.2  | 30        |
| 10 | Cumulative Prognostic Score Predicting Mortality in Patients Older Than 80 Years Admitted to the ICU. <i>Journal of the American Geriatrics Society</i> , 2019, 67, 1263-1267.                                                 | 2.6  | 28        |
| 11 | Attitudes of physicians towards the care of critically ill elderly patients – a European survey. <i>Acta Anaesthesiologica Scandinavica</i> , 2018, 62, 207-219.                                                               | 1.6  | 25        |
| 12 | Increased 30-day mortality in very old ICU patients with COVID-19 compared to patients with respiratory failure without COVID-19. <i>Intensive Care Medicine</i> , 2022, 48, 435-447.                                          | 8.2  | 23        |
| 13 | Frailty is associated with long-term outcome in patients with sepsis who are over 80 years old: results from an observational study in 241 European ICUs. <i>Age and Ageing</i> , 2021, 50, 1719-1727.                         | 1.6  | 20        |
| 14 | Inhibitors of the renin-angiotensin-aldosterone system and COVID-19 in critically ill elderly patients. <i>European Heart Journal - Cardiovascular Pharmacotherapy</i> , 2021, 7, 76-77.                                       | 3.0  | 19        |
| 15 | Relationship between the Clinical Frailty Scale and short-term mortality in patients ≥80 years old acutely admitted to the ICU: a prospective cohort study. <i>Critical Care</i> , 2021, 25, 231.                              | 5.8  | 19        |
| 16 | Sepsis at ICU admission does not decrease 30-day survival in very old patients: a post-hoc analysis of the VIP1 multinational cohort study. <i>Annals of Intensive Care</i> , 2020, 10, 56.                                    | 4.6  | 16        |
| 17 | Association between tracheostomy timing and outcomes for older critically ill COVID-19 patients: prospective observational study in European intensive care units. <i>British Journal of Anaesthesia</i> , 2022, 128, 482-490. | 3.4  | 16        |
| 18 | The importance of revealing data on limitation of life sustaining therapy in critical ill elderly Covid-19 patients. <i>Journal of Critical Care</i> , 2022, 67, 147-148.                                                      | 2.2  | 14        |

| #  | ARTICLE                                                                                                                                                                                                                  | IF  | CITATIONS |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Effect of the COVID-19 pandemic at a major Danish trauma center in 2020 compared with 2018-2019: A retrospective cohort study. <i>Acta Anaesthesiologica Scandinavica</i> , 2022, 66, 265-272.                           | 1.6 | 12        |
| 20 | Lactate is associated with mortality in very old intensive care patients suffering from COVID-19: results from an international observational study of 2860 patients. <i>Annals of Intensive Care</i> , 2021, 11, 128.   | 4.6 | 12        |
| 21 | Provision of critical care for the elderly in Europe: a retrospective comparison of national healthcare frameworks in intensive care units. <i>BMJ Open</i> , 2021, 11, e046909.                                         | 1.9 | 11        |
| 22 | The association of the Activities of Daily Living and the outcome of old intensive care patients suffering from COVID-19. <i>Annals of Intensive Care</i> , 2022, 12, 26.                                                | 4.6 | 10        |
| 23 | Sex-specific outcome disparities in very old patients admitted to intensive care medicine: a propensity matched analysis. <i>Scientific Reports</i> , 2020, 10, 18671.                                                   | 3.3 | 9         |
| 24 | The management of multi-morbidity in elderly patients: Ready yet for precision medicine in intensive care?. <i>Critical Care</i> , 2021, 25, 330.                                                                        | 5.8 | 9         |
| 25 | Variations in end-of-life care practices in older critically ill patients with COVID-19 in Europe. <i>Journal of Internal Medicine</i> , 2022, 292, 438-449.                                                             | 6.0 | 8         |
| 26 | Management and outcomes in critically ill nonagenarian versus octogenarian patients. <i>BMC Geriatrics</i> , 2021, 21, 576.                                                                                              | 2.7 | 7         |
| 27 | Differences in mortality in critically ill elderly patients during the second COVID-19 surge in Europe. <i>Critical Care</i> , 2021, 25, 344.                                                                            | 5.8 | 7         |
| 28 | ICU-Mortality in Old and Very Old Patients Suffering From Sepsis and Septic Shock. <i>Frontiers in Medicine</i> , 2021, 8, 697884.                                                                                       | 2.6 | 6         |
| 29 | A new multi-national network studying Very old Intensive care Patients (VIPs). <i>Anaesthesiology Intensive Therapy</i> , 2021, 53, 290-295.                                                                             | 1.0 | 6         |
| 30 | Health-related quality of life in older patients surviving ICU treatment for COVID-19: results from an international observational study of patients older than 70 years. <i>Age and Ageing</i> , 2022, 51, .            | 1.6 | 6         |
| 31 | Complete recovery after severe myxoedema coma complicated by status epilepticus. <i>BMJ Case Reports</i> , 2015, 2015, bcr2014209071-bcr2014209071.                                                                      | 0.5 | 5         |
| 32 | Early evaluation of organ failure using MELD-XI in critically ill elderly COVID-19 patients. <i>Clinical Hemorheology and Microcirculation</i> , 2021, 79, 109-120.                                                      | 1.7 | 5         |
| 33 | Disease-Course Adapting Machine Learning Prognostication Models in Elderly Patients Critically Ill With COVID-19: Multicenter Cohort Study With External Validation. <i>JMIR Medical Informatics</i> , 2022, 10, e32949. | 2.6 | 5         |
| 34 | Differences in Mortality in Critically Ill Elderly Patients During the Second COVID-19 Surge in Europe. <i>SSRN Electronic Journal</i> , 0, , .                                                                          | 0.4 | 3         |
| 35 | Short-term mortality of patients ≥80 years old admitted to European intensive care units: an international observational study. <i>British Journal of Anaesthesia</i> , 2022, 129, 58-66.                                | 3.4 | 3         |
| 36 | Optimizing hemodynamic function during cardiopulmonary resuscitation. <i>Current Opinion in Critical Care</i> , 2021, 27, 216-222.                                                                                       | 3.2 | 2         |

| #  | ARTICLE                                                                                                                                                                                       | IF  | CITATIONS |
|----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 37 | The clinical frailty scale “ does it predict outcome of the very-old in UK ICUs?. Journal of the Intensive Care Society, 0, , 175114372110507.                                                | 2.2 | 2         |
| 38 | Pre-charging the defibrillator before rhythm analysis reduces hands-off time in patients with out-of-hospital cardiac arrest with shockable rhythm. Resuscitation, 2021, 169, 23-30.          | 3.0 | 1         |
| 39 | The effects of preoperative point-of-care focused cardiac ultrasound in high-risk patients: study protocol for a prospective randomised controlled trial. Danish Medical Journal, 2020, 67, . | 0.5 | 1         |
| 40 | Association of chronic heart failure with mortality in old intensive care patients suffering from Covid-19. ESC Heart Failure, 2022, , .                                                      | 3.1 | 1         |
