citing authors

#	ARTICLE	IF	CITATIONS
1	Conditional variable importance for random forests. BMC Bioinformatics, 2008, 9, 307.	1.2	2,129
2	On the behaviour of marginal and conditional AIC in linear mixed models. Biometrika, 2010, 97, 773-789.	1.3	187
3	<i>BayesX</i> : Analyzing Bayesian Structured Additive Regression Models. Journal of Statistical Software, 2005, 14, .	1.8	117
4	Identifying Risk Factors for Severe Childhood Malnutrition by Boosting Additive Quantile Regression. Journal of the American Statistical Association, 2011, 106, 494-510.	1.8	102
5	Generalized Additive Models for Location, Scale and Shape for High Dimensional Data – A Flexible Approach Based on Boosting. Journal of the Royal Statistical Society Series C: Applied Statistics, 2012, 61, 403-427.	0.5	101
6	Saproxylic beetle assemblages related to silvicultural management intensity and stand structures in a beech forest in Southern Germany. Journal of Insect Conservation, 2008, 12, 107-124.	0.8	98
7	Variable Selection and Model Choice in Geoadditive Regression Models. Biometrics, 2009, 65, 626-634.	0.8	98
8	Geoadditive expectile regression. Computational Statistics and Data Analysis, 2012, 56, 755-767.	0.7	96
9	Beyond mean regression. Statistical Modelling, 2013, 13, 275-303.	0.5	96
10	A Mixed Model Approach for Geoadditive Hazard Regression. Scandinavian Journal of Statistics, 2007, 34, 207-228.	0.9	94
11	Spike-and-Slab Priors for Function Selection in Structured Additive Regression Models. Journal of the American Statistical Association, 2012, 107, 1518-1532.	1.8	94
12	Bayesian structured additive distributional regression with an application to regional income inequality in Germany. Annals of Applied Statistics, 2015, 9, .	0.5	94
13	Influence of brain-derived neurotrophic-factor and apolipoprotein E genetic variants on hippocampal volume and memory performance in healthy young adults. Journal of Neural Transmission, 2011, 118, 249-257.	1.4	88
14	Analysis of the individual and aggregate genetic contributions of previously identified serine peptidase inhibitor Kazal type 5 (SPINK5), kallikrein-related peptidase 7 (KLK7), and filaggrin (FLG) polymorphisms to eczema risk. Journal of Allergy and Clinical Immunology, 2008, 122, 560-568.e4.	1.5	83
15	Expectile and quantile regression – “David and Goliath?”. Statistical Modelling, 2015, 15, 433-456.	0.5	80
16	Nosocomial Infection, Length of Stay, and Time-Dependent Bias. Infection Control and Hospital Epidemiology, 2009, 30, 273-276.	1.0	78
17	Simultaneous Confidence Bands for Penalized Spline Estimators. Journal of the American Statistical Association, 2010, 105, 852-863.	1.8	76
18	Structured Additive Regression for Categorical Space-Time Data: A Mixed Model Approach. Biometrics, 2006, 62, 109-118.	0.8	74

#	ARTICLE	IF	CITATIONS
19	A Framework for Unbiased Model Selection Based on Boosting. <i>Journal of Computational and Graphical Statistics</i> , 2011, 20, 956-971.	0.9	73
20	Structured Additive Regression Models: An $R$ Interface to <code>BayesX</code> . <i>Journal of Statistical Software</i> , 2015, 63, .	1.8	68
21	Decomposing environmental, spatial, and spatiotemporal components of species distributions. <i>Ecological Monographs</i> , 2011, 81, 329-347.	2.4	67
22	Bayesian regularisation in structured additive regression: a unifying perspective on shrinkage, smoothing and predictor selection. <i>Statistics and Computing</i> , 2010, 20, 203-219.	0.8	64
23	Estimation of the extinction risk for high-montane species as a consequence of global warming and assessment of their suitability as cross-taxon indicators. <i>Ecological Indicators</i> , 2010, 10, 341-352.	2.6	61
24	Bayesian semiparametric additive quantile regression. <i>Statistical Modelling</i> , 2013, 13, 223-252.	0.5	58
25	Conditional Transformation Models. <i>Journal of the Royal Statistical Society Series B: Statistical Methodology</i> , 2014, 76, 3-27.	1.1	57
26	Validation of the German Revised Addenbrooke's Cognitive Examination for Detecting Mild Cognitive Impairment, Mild Dementia in Alzheimer's Disease and Frontotemporal Lobar Degeneration. <i>Dementia and Geriatric Cognitive Disorders</i> , 2010, 29, 448-456.	0.7	53
27	Bayesian Structured Additive Distributional Regression for Multivariate Responses. <i>Journal of the Royal Statistical Society Series C: Applied Statistics</i> , 2015, 64, 569-591.	0.5	48
28	Simultaneous inference in structured additive conditional copula regression models: a unifying Bayesian approach. <i>Statistics and Computing</i> , 2016, 26, 841-860.	0.8	45
29	Use of Penalized Splines in Extended Cox-Type Additive Hazard Regression to Flexibly Estimate the Effect of Time-varying Serum Uric Acid on Risk of Cancer Incidence: A Prospective, Population-Based Study in 78,850 Men. <i>Annals of Epidemiology</i> , 2009, 19, 15-24.	0.9	44
30	Estimating habitat suitability and potential population size for brown bears in the Eastern Alps. <i>Biological Conservation</i> , 2011, 144, 1733-1741.	1.9	44
31	On confidence intervals for semiparametric expectile regression. <i>Statistics and Computing</i> , 2013, 23, 135-148.	0.8	43
32	Multilevel structured additive regression. <i>Statistics and Computing</i> , 2014, 24, 223-238.	0.8	41
33	Nonparametric Inference in Hidden Markov Models Using P-Splines. <i>Biometrics</i> , 2015, 71, 520-528.	0.8	41
34	Bayesian Generalized Additive Models for Location, Scale, and Shape for Zero-Inflated and Overdispersed Count Data. <i>Journal of the American Statistical Association</i> , 2015, 110, 405-419.	1.8	41
35	Nonlife ratemaking and risk management with Bayesian generalized additive models for location, scale, and shape. <i>Insurance: Mathematics and Economics</i> , 2014, 55, 225-249.	0.7	40
36	A unifying approach to the estimation of the conditional Akaike information in generalized linear mixed models. <i>Electronic Journal of Statistics</i> , 2014, 8, .	0.4	40

#	ARTICLE	IF	CITATIONS
37	Sentinel lymph node dissection in more than 1200 prostate cancer cases: Rate and prediction of lymph node involvement depending on preoperative tumor characteristics. <i>International Journal of Urology</i> , 2014, 21, 58-63.	0.5	39
38	Fast smoothing parameter separation in multidimensional generalized P-splines: the SAP algorithm. <i>Statistics and Computing</i> , 2015, 25, 941-957.	0.8	37
39	Predicting Tree Species From 3D Laser Scanning Point Clouds Using Deep Learning. <i>Frontiers in Plant Science</i> , 2021, 12, 635440.	1.7	36
40	Epidemiology of suicide in Spain, 1981â€“2008: A spatiotemporal analysis. <i>Public Health</i> , 2013, 127, 380-385.	1.4	35
41	Mixed model-based inference in geospatial hazard regression for interval-censored survival times. <i>Computational Statistics and Data Analysis</i> , 2006, 51, 777-792.	0.7	34
42	Bayesian semi parametric multi-state models. <i>Statistical Modelling</i> , 2008, 8, 169-198.	0.5	34
43	Scale-Dependent Priors for Variance Parameters in Structured Additive Distributional Regression. <i>Bayesian Analysis</i> , 2016, 11, .	1.6	34
44	A unified framework of constrained regression. <i>Statistics and Computing</i> , 2016, 26, 1-14.	0.8	33
45	Structural Equation Models for Dealing With Spatial Confounding. <i>American Statistician</i> , 2018, 72, 239-252.	0.9	33
46	Environmental heterogeneity predicts global species richness patterns better than area. <i>Global Ecology and Biogeography</i> , 2021, 30, 842-851.	2.7	32
47	Propriety of posteriors in structured additive regression models: Theory and empirical evidence. <i>Journal of Statistical Planning and Inference</i> , 2009, 139, 843-859.	0.4	29
48	Origin Detection During Food-borne Disease Outbreaks - A Case Study of the 2011 EHEC/HUS Outbreak in Germany. <i>PLOS Currents</i> , 2014, 6, .	1.4	29
49	Spatial smoothing techniques for the assessment of habitat suitability. <i>Environmental and Ecological Statistics</i> , 2008, 15, 343-364.	1.9	28
50	A primer on Bayesian distributional regression. <i>Statistical Modelling</i> , 2018, 18, 219-247.	0.5	26
51	Flexible hazard ratio curves for continuous predictors in multi-state models. <i>Statistical Modelling</i> , 2010, 10, 291-314.	0.5	25
52	A Network-Based Kernel Machine Test for the Identification of Risk Pathways in Genome-Wide Association Studies. <i>Human Heredity</i> , 2013, 76, 64-75.	0.4	25
53	Rage Against the Mean â€“ A Review of Distributional Regression Approaches. <i>Econometrics and Statistics</i> , 2023, 26, 99-123.	0.4	25
54	Understanding the economic determinants of the severity of operational losses: A regularized generalized Pareto regression approach. <i>Journal of Applied Econometrics</i> , 2018, 33, 898-935.	1.3	24

#	ARTICLE	IF	CITATIONS
55	High dimensional structured additive regression models: Bayesian regularization, smoothing and predictive performance. <i>Journal of the Royal Statistical Society Series C: Applied Statistics</i> , 2011, 60, 51-70.	0.5	22
56	The effect of bark beetle infestation and salvage logging on bat activity in a national park. <i>Biodiversity and Conservation</i> , 2012, 21, 2775-2786.	1.2	22
57	Markov-switching generalized additive models. <i>Statistics and Computing</i> , 2017, 27, 259-270.	0.8	22
58	Regression Models. , 2013, , 21-72.		21
59	Analysing farmland rental rates using Bayesian geoadditive quantile regression. <i>European Review of Agricultural Economics</i> , 2016, 43, 663-698.	1.5	21
60	Updated Nomogram Incorporating Percentage of Positive Cores to Predict Probability of Lymph Node Invasion in Prostate Cancer Patients Undergoing Sentinel Lymph Node Dissection. <i>Journal of Cancer</i> , 2017, 8, 2692-2698.	1.2	21
61	On the dependency of soccer scores – a sparse bivariate Poisson model for the UEFA European football championship 2016. <i>Journal of Quantitative Analysis in Sports</i> , 2018, 14, 65-79.	0.5	21
62	Mixed binary–continuous copula regression models with application to adverse birth outcomes. <i>Statistics in Medicine</i> , 2019, 38, 413-436.	0.8	21
63	Locally adaptive Bayesian P-splines with a Normal-Exponential-Gamma prior. <i>Computational Statistics and Data Analysis</i> , 2009, 53, 3533-3552.	0.7	20
64	A general approach to the analysis of habitat selection. <i>Environmental and Ecological Statistics</i> , 2011, 18, 1-25.	1.9	20
65	Differential decomposition of humic acids by marine and estuarine bacterial communities at varying salinities. <i>Biogeochemistry</i> , 2012, 111, 331-346.	1.7	20
66	Reconsidering the income–health relationship using distributional regression. <i>Health Economics (United Kingdom)</i> , 2018, 27, 1074-1088.	0.8	20
67	Semiparametric multinomial logit models for analysing consumer choice behaviour. <i>AStA Advances in Statistical Analysis</i> , 2007, 91, 225-244.	0.4	19
68	Bayesian bivariate quantile regression. <i>Statistical Modelling</i> , 2015, 15, 326-344.	0.5	19
69	LASSO-type penalization in the framework of generalized additive models for location, scale and shape. <i>Computational Statistics and Data Analysis</i> , 2019, 140, 59-73.	0.7	19
70	Bayesian geoadditive sample selection models. <i>Journal of the Royal Statistical Society Series C: Applied Statistics</i> , 2010, 59, 381-404.	0.5	18
71	Penalized likelihood and Bayesian function selection in regression models. <i>AStA Advances in Statistical Analysis</i> , 2013, 97, 349-385.	0.4	18
72	Estimating the Relationship Between Women's Education and Fertility in Botswana by Using an Instrumental Variable Approach to Semiparametric Expectile Regression. <i>Journal of the Royal Statistical Society Series C: Applied Statistics</i> , 2013, 62, 25-45.	0.5	18

#	ARTICLE	IF	CITATIONS
73	Discussion of "The Evolution of Boosting Algorithms" and "Extending Statistical Boosting". <i>Methods of Information in Medicine</i> , 2014, 53, 436-445.	0.7	18
74	Bayesian Nonparametric Instrumental Variables Regression Based on Penalized Splines and Dirichlet Process Mixtures. <i>Journal of Business and Economic Statistics</i> , 2014, 32, 468-482.	1.8	18
75	First Nomogram Predicting the Probability of Lymph Node Involvement in Prostate Cancer Patients Undergoing Radioisotope Guided Sentinel Lymph Node Dissection. <i>Urologia Internationalis</i> , 2015, 95, 422-428.	0.6	18
76	Bayesian regularisation in geospatial regression. <i>Statistics and Computing</i> , 2017, 27, 1539-1553.	0.8	18
77	Predicting the occurrence of wildfires with binary structured additive regression models. <i>Journal of Environmental Management</i> , 2017, 187, 154-165.	3.8	17
78	Building Cox-type structured hazard regression models with time-varying effects. <i>Statistical Modelling</i> , 2011, 11, 3-24.	0.5	15
79	Model selection in semiparametric geospatial regression. <i>Electronic Journal of Statistics</i> , 2017, 11, .	0.4	15
80	Boosting joint models for longitudinal and time-to-event data. <i>Biometrical Journal</i> , 2017, 59, 1104-1121.	0.6	14
81	Modelling regional patterns of inefficiency: A Bayesian approach to geospatial panel stochastic frontier analysis with an application to cereal production in England and Wales. <i>Journal of Econometrics</i> , 2020, 214, 513-539.	3.5	14
82	Additive mixed models with Dirichlet process mixture and P-spline priors. <i>ASTA Advances in Statistical Analysis</i> , 2012, 96, 47-68.	0.4	12
83	Variable selection and model choice in structured survival models. <i>Computational Statistics</i> , 2013, 28, 1079-1101.	0.8	12
84	Model building in nonproportional hazard regression. <i>Statistics in Medicine</i> , 2013, 32, 5301-5314.	0.8	12
85	Assessing opportunities for physical activity in the built environment of children: interrelation between kernel density and neighborhood scale. <i>International Journal of Health Geographics</i> , 2015, 14, 35.	1.2	12
86	Vulnerability to poverty revisited: Flexible modeling and better predictive performance. <i>Journal of Economic Inequality</i> , 2018, 16, 439-454.	2.0	12
87	Mitigating spatial confounding by explicitly correlating Gaussian random fields. <i>Environmetrics</i> , 2022, 33, .	0.6	12
88	ACTIVITY-GUIDED ANTITHROMBIN III THERAPY IN SEVERE SURGICAL SEPSIS. <i>Shock</i> , 2008, 30, 634-641.	1.0	10
89	Studying the occurrence and burnt area of wildfires using zero-one-inflated structured additive beta regression. <i>Environmental Modelling and Software</i> , 2018, 110, 107-118.	1.9	10
90	A Markov-switching generalized additive model for compound Poisson processes, with applications to operational loss models. <i>Quantitative Finance</i> , 2018, 18, 1679-1698.	0.9	10

#	ARTICLE	IF	CITATIONS
91	Estimating time-varying parameters in brand choice models: A semiparametric approach. <i>International Journal of Research in Marketing</i> , 2018, 35, 394-414.	2.4	10
92	A trivariate additive regression model with arbitrary link functions and varying correlation matrix. <i>Journal of Statistical Planning and Inference</i> , 2019, 199, 236-248.	0.4	10
93	Modular regression - a Lego system for building structured additive distributional regression models with tensor product interactions. <i>Test</i> , 2019, 28, 1-39.	0.7	10
94	Generalized additive models with flexible response functions. <i>Statistics and Computing</i> , 2019, 29, 123-138.	0.8	10
95	Structured additive regression modeling of age of menarche and menopause in a breast cancer screening program. <i>Biometrical Journal</i> , 2014, 56, 416-427.	0.6	9
96	Semiparametric stochastic volatility modelling using penalized splines. <i>Computational Statistics</i> , 2015, 30, 517-537.	0.8	9
97	Epidemiological and Ecological Characterization of the EHEC O104:H4 Outbreak in Hamburg, Germany, 2011. <i>PLoS ONE</i> , 2016, 11, e0164508.	1.1	9
98	Flexible Instrumental Variable Distributional Regression. <i>Journal of the Royal Statistical Society Series A: Statistics in Society</i> , 2020, 183, 1553-1574.	0.6	9
99	Structured fusion lasso penalized multi-state models. <i>Statistics in Medicine</i> , 2016, 35, 4637-4659.	0.8	8
100	Lost in Translation: On the Problem of Data Coding in Penalized Whole Genome Regression with Interactions. <i>G3: Genes, Genomes, Genetics</i> , 2019, 9, 1117-1129.	0.8	8
101	Multivariate conditional transformation models. <i>Scandinavian Journal of Statistics</i> , 2020, , .	0.9	8
102	Treatment effects beyond the mean using distributional regression: Methods and guidance. <i>PLoS ONE</i> , 2020, 15, e0226514.	1.1	8
103	PLASMA HOMOCYSTEINE AND CEREBROSPINAL FLUID NEURODEGENERATION BIOMARKERS IN MILD COGNITIVE IMPAIRMENT AND DEMENTIA. <i>Journal of the American Geriatrics Society</i> , 2009, 57, 737-739.	1.3	7
104	A Novel Kernel for Correcting Size Bias in the Logistic Kernel Machine Test with an Application to Rheumatoid Arthritis. <i>Human Heredity</i> , 2012, 74, 97-108.	0.4	7
105	Spline-based procedures for dose-finding studies with active control. <i>Statistics in Medicine</i> , 2015, 34, 232-248.	0.8	7
106	Source Estimation for Propagation Processes on Complex Networks With an Application to Delays in Public Transportation Systems. <i>Journal of the Royal Statistical Society Series C: Applied Statistics</i> , 2017, 66, 521-536.	0.5	7
107	Assessing the relationship between markers of glycemic control through flexible copula regression models. <i>Statistics in Medicine</i> , 2019, 38, 5161-5181.	0.8	7
108	Bayesian measurement error correction in structured additive distributional regression with an application to the analysis of sensor data on soil-plant variability. <i>Stochastic Environmental Research and Risk Assessment</i> , 2019, 33, 747-763.	1.9	7

#	ARTICLE	IF	CITATIONS
109	Noncrossing structured additive multiple-output Bayesian quantile regression models. <i>Statistics and Computing</i> , 2020, 30, 855-869.	0.8	7
110	Pseudo-document simulation for comparing LDA, GSDMM and GPM topic models on short and sparse text using Twitter data. <i>Computational Statistics</i> , 2023, 38, 647-674.	0.8	7
111	Boosting multi-state models. <i>Lifetime Data Analysis</i> , 2016, 22, 241-262.	0.4	6
112	Pathway-Based Kernel Boosting for the Analysis of Genome-Wide Association Studies. <i>Computational and Mathematical Methods in Medicine</i> , 2017, 2017, 1-17.	0.7	6
113	Bayesian Multivariate Distributional Regression With Skewed Responses and Skewed Random Effects. <i>Journal of Computational and Graphical Statistics</i> , 2018, 27, 602-611.	0.9	6
114	Modelling children's anthropometric status using Bayesian distributional regression merging socio-economic and remote sensed data from South Asia and sub-Saharan Africa. <i>Economics and Human Biology</i> , 2021, 40, 100950.	0.7	6
115	A new strategy to analyze possible association structures between dynamic nocturnal hormone activities and sleep alterations in humans. <i>American Journal of Physiology - Regulatory Integrative and Comparative Physiology</i> , 2009, 296, R1216-R1227.	0.9	5
116	Impact of chronic hepatitis C on mortality in cirrhotic patients admitted to intensive-care unit. <i>BMC Infectious Diseases</i> , 2016, 16, 122.	1.3	5
117	Spatio-temporal expectile regression models. <i>Statistical Modelling</i> , 2020, 20, 386-409.	0.5	5
118	Non-stationary spatial regression for modelling monthly precipitation in Germany. <i>Spatial Statistics</i> , 2020, 40, 100386.	0.9	5
119	Generalised joint regression for count data: a penalty extension for competitive settings. <i>Statistics and Computing</i> , 2020, 30, 1419-1432.	0.8	5
120	Introductory data science across disciplines, using Python, case studies, and industry consulting projects. <i>Teaching Statistics</i> , 2021, 43, S190.	0.6	5
121	Impact of comorbidities and surgery on health related transitions in pancreatic cancer admissions: A multi state model. <i>Cancer Epidemiology</i> , 2012, 36, e142-e146.	0.8	4
122	Variational approximations in geoadditive latent Gaussian regression: mean and quantile regression. <i>Statistics and Computing</i> , 2015, 25, 1247-1263.	0.8	4
123	Studying the relationship between a woman's reproductive lifespan and age at menarche using a Bayesian multivariate structured additive distributional regression model. <i>Biometrical Journal</i> , 2017, 59, 1232-1246.	0.6	4
124	Flexible estimation of time-varying effects for frequently purchased retail goods: a modeling approach based on household panel data. <i>OR Spectrum</i> , 2018, 40, 837-873.	2.1	4
125	Adaptive semiparametric M-quantile regression. <i>Econometrics and Statistics</i> , 2019, 11, 116-129.	0.4	4
126	Bayesian Gaussian distributional regression models for more efficient norm estimation. <i>British Journal of Mathematical and Statistical Psychology</i> , 2021, 74, 99-117.	1.0	4

#	ARTICLE	IF	CITATIONS
127	Interactively visualizing distributional regression models with <code>distreg.vis</code> . <i>Statistical Modelling</i> , 2022, 22, 527-545.	0.5	4
128	Rocks rock: the importance of rock formations as resting sites of the Eurasian lynx <i>Lynx lynx</i> . <i>Wildlife Biology</i> , 2019, 2019, .	0.6	4
129	A Semiparametric Analysis of Conditional Income Distributions. <i>Schmollers Jahrbuch</i> , 2015, 135, 13-22.	0.2	4
130	Generalised exponential-Gaussian distribution: a method for neural reaction time analysis. <i>Cognitive Neurodynamics</i> , 2023, 17, 221-237.	2.3	4
131	Bayesian accelerated failure time models based on penalized mixtures of Gaussians: regularization and variable selection. <i>AStA Advances in Statistical Analysis</i> , 2015, 99, 259-280.	0.4	3
132	Correction: Bayesian structured additive distributional regression with an application to regional income inequality in Germany. <i>Annals of Applied Statistics</i> , 2016, 10, .	0.5	3
133	Maximum penalized likelihood estimation in semiparametric mark-recapture-recovery models. <i>Biometrical Journal</i> , 2016, 58, 222-239.	0.6	3
134	Structured additive distributional regression for analysing landings per unit effort in fisheries research. <i>Mathematical Biosciences</i> , 2017, 283, 145-154.	0.9	3
135	Exploring risk factors in breast cancer screening program data using structured geospatial models with high order interaction. <i>Spatial Statistics</i> , 2017, 22, 403-418.	0.9	3
136	Editorial "Joint modeling of longitudinal and time-to-event data and beyond". <i>Biometrical Journal</i> , 2017, 59, 1101-1103.	0.6	3
137	A penalized spline estimator for fixed effects panel data models. <i>AStA Advances in Statistical Analysis</i> , 2018, 102, 145-166.	0.4	3
138	Generalized Semiparametric Regression with Covariates Measured with Error. , 2010, , 133-154.		3
139	Introduction to the Special Volume on "Ecology and Ecological Modelling in R". <i>Journal of Statistical Software</i> , 2007, 22, .	1.8	3
140	Categorical structured additive regression for assessing habitat suitability in the spatial distribution of mussel seed abundance. <i>Environmetrics</i> , 2012, 23, 75-84.	0.6	2
141	Bivariate cumulative probit model for the comparison of neuronal encoding hypotheses. <i>Biometrical Journal</i> , 2014, 56, 23-43.	0.6	2
142	Integrating multivariate conditionally autoregressive spatial priors into recursive bivariate models for analyzing environmental sensitivity of mussels. <i>Spatial Statistics</i> , 2017, 22, 419-433.	0.9	2
143	The effect of income on democracy revisited a flexible distributional approach. <i>Empirical Economics</i> , 2019, 56, 1207-1230.	1.5	2
144	Directional bivariate quantiles: a robust approach based on the cumulative distribution function. <i>AStA Advances in Statistical Analysis</i> , 2020, 104, 225-260.	0.4	2
