|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Multimodal Communication in a Noisy Environment: A Case Study of the Bornean Rock Frog <i>Staurois parvus</i> . PLoS ONE, 2012, 7, e37965.                                                                                                             | 2.5 | 99        |
| 2  | From uni- to multimodality: towards an integrative view on anuran communication. Journal of Comparative Physiology A: Neuroethology, Sensory, Neural, and Behavioral Physiology, 2014, 200, 777-787.                                                   | 1.6 | 85        |
| 3  | Multimodal signaling in the Small Torrent Frog ( <i>Micrixalus saxicola</i> ) in a complex acoustic environment. Behavioral Ecology and Sociobiology, 2013, 67, 1449-1456.                                                                             | 1.4 | 83        |
| 4  | The anuran vocal sac: a tool for multimodal signalling. Animal Behaviour, 2014, 97, 281-288.                                                                                                                                                           | 1.9 | 62        |
| 5  | Communication in Noisy Environments i: Acoustic Signals of <i>Staurois Latopalmatus</i> Boulenger 1887. Herpetologica, 2009, 65, 154-165.                                                                                                              | 0.4 | 47        |
| 6  | Don't get the blues: conspicuous nuptial colouration of male moor frogs ( <i>Rana arvalis</i> ) supports visual mate recognition during scramble competition in large breeding aggregations. Behavioral Ecology and Sociobiology, 2012, 66, 1587-1593. | 1.4 | 45        |
| 7  | Increased androgenic sensitivity in the hind limb muscular system marks the evolution of a derived gestural display. Proceedings of the National Academy of Sciences of the United States of America, 2016, 113, 5664-5669.                            | 7.1 | 45        |
| 8  | Communication in Noisy Environments li: Visual Signaling Behavior of Male Foot-flagging Frogs <i>staurois Latopalmatus</i> . Herpetologica, 2009, 65, 166-173.                                                                                         | 0.4 | 41        |
| 9  | Divergent Receiver Responses to Components of Multimodal Signals in Two Foot-Flagging Frog Species. PLoS ONE, 2013, 8, e55367.                                                                                                                         | 2.5 | 29        |
| 10 | A Common Endocrine Signature Marks the Convergent Evolution of an Elaborate Dance Display in Frogs. American Naturalist, 2021, 198, 522-539.                                                                                                           | 2.1 | 13        |
| 11 | Conservation breeding of the northern river terrapin ( <i>Pseudemys baska</i> ) at the Vienna Zoo, Austria, and in Bangladesh. International Zoo Yearbook, 2015, 49, 31-41.                                                                            | 0.9 | 10        |
| 12 | Androgen Receptor Modulates Multimodal Displays in the Bornean Rock Frog ( <i>Staurois</i> )                                                                                                                                                           | 2.0 | 10        |
| 13 | Ontogenetic Change of Signal Brightness in the Foot-Flagging Frog Species <i>Staurois parvus</i> and <i>Staurois guttatus</i> . Herpetologica, 2015, 71, 1-7.                                                                                          | 0.4 | 9         |
| 14 | Multimodal Signal Testing Reveals Gestural Tapping Behavior in Spotted Reed Frogs. Herpetologica, 2018, 74, 127.                                                                                                                                       | 0.4 | 8         |
| 15 | Giant panda twin rearing without assistance requires more interactions and less rest of the mother. A case study at Vienna Zoo. PLoS ONE, 2018, 13, e0207433.                                                                                          | 2.5 | 5         |
| 16 | Testosterone amplifies the negative valence of an agonistic gestural display by exploiting receiver perceptual bias. Proceedings of the Royal Society B: Biological Sciences, 2021, 288, 20211848.                                                     | 2.6 | 5         |
| 17 | Insight into the Evolution of Anuran Foot Flag Displays: A Comparative Study of Color and Kinematics. Ichthyology and Herpetology, 2021, 109, .                                                                                                        | 0.8 | 4         |
| 18 | Carotenoid intake during early life mediates ontogenetic colour shifts and dynamic colour change during adulthood. Animal Behaviour, 2022, 187, 121-135.                                                                                               | 1.9 | 4         |
