#	Article	IF	CITATIONS
1	A cross-linguistic study of early lexical development. Cognitive Development, 1995, 10, 159-199.	0.7	347
2	From communication to language in two modalities. Cognitive Development, 1994, 9, 23-43.	0.7	292
3	Gesturing in mother-child interactions. Cognitive Development, 1999, 14, 57-75.	0.7	265
4	A comparison of the transition from first words to grammar in English and Italian. Journal of Child Language, 1999, 26, 69-111.	0.8	208
5	The acquisition of Italian morphology: implications for models of language development. Journal of Child Language, 1992, 19, 491-557.	0.8	161
6	Gestures and Words in Early Development of Children With Down Syndrome. Journal of Speech, Language, and Hearing Research, 1998, 41, 1125-1135.	0.7	146
7	Asynchrony of lexical and morphosyntactic development in children with Down Syndrome. Neuropsychologia, 2000, 38, 634-644.	0.7	125
8	Clinical markers for specific language impairment in Italian: the contribution of clitics and nonâ€word repetition. International Journal of Language and Communication Disorders, 2006, 41, 695-712.	0.7	125
9	Relationship between gestures and words in children with Down's syndrome and typically developing children in the early stages of communicative development. International Journal of Language and Communication Disorders, 2003, 38, 179-197.	0.7	123
10	Spoken and gestural production in a naming task by young children with Down syndrome. Brain and Language, 2007, 101, 208-221.	0.8	117
11	From action to language through gesture: A longitudinal perspective. Gesture, 2005, 5, 155-177.	0.5	111
12	Language acquisition in special populations: a comparison between Down and Williams syndromes. Neuropsychologia, 2002, 40, 2461-2470.	0.7	110
13	A crosslinguistic study of the relationship between grammar and lexical development. Journal of Child Language, 2005, 32, 759-786.	0.8	99
14	Cochlear Implant in the Second Year of Life: Lexical and Grammatical Outcomes. Journal of Speech, Language, and Hearing Research, 2012, 55, 382-394.	0.7	97
15	Grammatical Deficits in Italian-Speaking Children With Specific Language Impairment. Journal of Speech, Language, and Hearing Research, 1997, 40, 809-820.	0.7	96
16	Neuropsychological profile of Italians with Williams syndrome: An example of a dissociation between language and cognition?. Journal of the International Neuropsychological Society, 2004, 10, 862-876.	1.2	94
17	Language in Italian children with Down syndrome and with specific language impairment Neuropsychology, 2008, 22, 27-35.	1.0	79
18	Preterm Birth: Neuropsychological Profiles and Atypical Developmental Pathways. Developmental Disabilities Research Reviews, 2011, 17, 102-113.	2.9	79

#	Article	IF	CITATIONS
19	Early Action and Gesture "Vocabulary―and Its Relation With Word Comprehension and Production. Child Development, 2012, 83, 526-542.	1.7	79
20	Specific language impairment in Italian: the first steps in the search for a clinical marker. International Journal of Language and Communication Disorders, 2002, 37, 77-93.	0.7	73
21	Sentence repetition as a measure of early grammatical development in Italian. International Journal of Language and Communication Disorders, 2007, 42, 187-208.	0.7	63
22	Do healthy preterm children need neuropsychological followâ€up? Preschool outcomes compared with term peers. Developmental Medicine and Child Neurology, 2010, 52, 955-961.	1.1	60
23	What atypical populations can reveal about language development: The contrast between deafness and Williams syndrome. Language and Cognitive Processes, 2001, 16, 219-239.	2.3	57
24	Co-speech gestures in a naming task: Developmental data. Language and Cognitive Processes, 2009, 24, 168-189.	2.3	56
25	Linguistic and pragmatic skills in toddlers with cochlear implant. International Journal of Language and Communication Disorders, 2013, 48, 715-725.	0.7	56
26	Developmental evaluation at age 4: Validity of an Italian parental questionnaire. Journal of Paediatrics and Child Health, 2010, 46, 419-426.	0.4	46
27	Communicative and linguistic development in preterm children: a longitudinal study from 12 to 24 months. International Journal of Language and Communication Disorders, 2010, 45, 162-173.	0.7	40
28	Toward mastery of Italian morphology: a cross-sectional study. Journal of Child Language, 1993, 20, 377-393.	0.8	38
29	From action to language through gesture. Gesture, 2005, 5, 155-177.	0.5	38
30	Early communicative behaviors and their relationship to motor skills in extremely preterm infants. Research in Developmental Disabilities, 2016, 48, 132-144.	1.2	35
31	Gesture and speech in maternal input to children with Down's syndrome. International Journal of Language and Communication Disorders, 2006, 41, 235-251.	0.7	33
32	Assessing lexicon: validation and developmental data of the Picture Naming Game (PiNG), a new picture naming task for toddlers. International Journal of Language and Communication Disorders, 2012, 47, 589-602.	0.7	33
33	Early development of gestures, object-related-actions, word comprehension and word production, and their relationships in Italian infants. Gesture, 2010, 10, 52-85.	0.5	32
34	Language development in a bimodal bilingual child with cochlear implant: A longitudinal study. Bilingualism, 2014, 17, 798-809.	1.0	31
35	Developmental evidence for continuity from action to gesture to sign/word. LIA Language, Interaction and Acquisition, 2017, 8, 13-41.	0.1	31
36	The use of articles by Italian-speaking children with specific language impairment. Clinical Linguistics and Phonetics, 1993, 7, 19-27.	0.5	29

MARIA CRISTINA CASELLI

#	Article	IF	CITATIONS
37	Lexical and Grammatical Abilities in Deaf Italian Preschoolers: The Role of Duration of Formal Language Experience. Journal of Deaf Studies and Deaf Education, 2009, 14, 63-75.	0.7	29
38	Sign Vocabulary in Deaf Toddlers Exposed to Sign Language Since Birth. Journal of Deaf Studies and Deaf Education, 2014, 19, 303-318.	0.7	26
39	The relationship between spontaneous gesture production and spoken lexical ability in children with Down syndrome in a naming task. Gesture, 2008, 8, 197-218.	0.5	25
40	Specific Language Impairment in Italian and English: Evaluating Alternative Accounts of Grammatical Deficits. Language and Cognitive Processes, 1998, 13, 1-20.	2.3	23
41	Nouns and predicates comprehension and production in children with Down syndrome. Research in Developmental Disabilities, 2014, 35, 761-775.	1.2	23
42	The Italian Words and Sentences MB-CDI: normative data and concordance between complete and short forms. Journal of Child Language, 2019, 46, 546-566.	0.8	20
43	Gender differences in early stages of language development. Some evidence and possible explanations. Journal of Neuroscience Research, 2023, 101, 643-653.	1.3	20
44	Finding the balance between capture and control: Oculomotor selection in early deaf adults. Brain and Cognition, 2015, 96, 12-27.	0.8	18
45	Sign Language Skills Assessed Through a Sentence Reproduction Task. Journal of Deaf Studies and Deaf Education, 2018, 23, 408-421.	0.7	13
46	Visual Word Recognition in Deaf Readers: Lexicality Is Modulated by Communication Mode. PLoS ONE, 2013, 8, e59080.	1.1	12
47	Attentional orienting to social and nonsocial cues in early deaf adults Journal of Experimental Psychology: Human Perception and Performance, 2015, 41, 1758-1771.	0.7	11
48	Maternal responses and development of communication skills in extremely preterm infants. First Language, 2018, 38, 175-197.	0.5	10
49	The acquisition of Italian morphology: a reply to Hyams. Journal of Child Language, 1993, 20, 707-712.	0.8	8
50	Language Profiles and Their Relation to Cognitive and Motor Skills at 30 Months of Age: An Online Investigation of Low-Risk Preterm and Full-Term Children. Journal of Speech, Language, and Hearing Research, 2021, 64, 2715-2733.	0.7	8
51	Does the native language influence lexical composition in very preterm children at the age of two years? A cross-linguistic comparison study of Italian and Finnish children. First Language, 2017, 37, 368-390.	0.5	7
52	Environmental Learning of Social Cues: Evidence From Enhanced Gaze Cueing in Deaf Children. Child Development, 2019, 90, 1525-1534.	1.7	6
53	Non-word repetition in bilingual children: the role of language exposure, vocabulary scores and environmental factors. Speech, Language and Hearing, 2022, 25, 283-298.	0.6	6
54	Do Spoken Vocabulary and Gestural Production Distinguish Children with Transient Language Delay from Children Who Will Show Developmental Language Disorder? A Pilot Study. International Journal of Environmental Research and Public Health, 2022, 19, 3822.	1.2	3
