#	ARTICLE	IF	CITATIONS
1	A New Role for the Human Placenta as a Hematopoietic Site Throughout Gestation. <i>Reproductive Sciences</i> , 2009, 16, 178-187.	2.5	61
2	Differential effects of interleukin-3, interleukin-7, interleukin 15, and granulocyte-macrophage colony-stimulating factor in the generation of natural killer and B cells from primitive human fetal liver progenitors. <i>Experimental Hematology</i> , 2000, 28, 961-973.	0.4	44
3	Fetal bone marrow as a source of stem cells for in utero or postnatal transplantation. <i>British Journal of Haematology</i> , 2000, 109, 173-181.	2.5	33
4	Human placenta and chorion: potential additional sources of hematopoietic stem cells for transplantation. <i>Transfusion</i> , 2011, 51, 94S-105S.	1.6	24
5	Detection of human hematopoietic stem cell engraftment in the livers of adult immunodeficient mice by an optimized flow cytometric method. <i>Stem Cell Studies</i> , 2011, 1, 1.	0.2	16
6	The human chorion contains definitive hematopoietic stem cells from the 15th week of gestation. <i>Development (Cambridge)</i> , 2017, 144, 1399-1411.	2.5	16
7	Detection of human hematopoietic stem cell engraftment in the livers of adult immunodeficient mice by an optimized flow cytometric method. <i>Stem Cell Studies</i> , 2010, 1, .	0.2	14
8	Broad Distribution of Colony-Forming Cells with Erythroid, Myeloid, Dendritic Cell, and NK Cell Potential Among CD34++ Fetal Liver Cells. <i>Journal of Immunology</i> , 2001, 167, 4902-4909.	0.8	13
9	The Adult Livers of Immunodeficient Mice Support Human Hematopoiesis: Evidence for a Hepatic Mast Cell Population that Develops Early in Human Ontogeny. <i>PLoS ONE</i> , 2014, 9, e97312.	2.5	13
10	Preeclampsia and Inflammatory Preterm Labor Alter the Human Placental Hematopoietic Niche. <i>Reproductive Sciences</i> , 2016, 23, 1179-1192.	2.5	10
11	Megakaryocyte Growth and Development Factor Is a Potent Growth Factor for Primitive Hematopoietic Progenitors in the Human Fetus. <i>Pediatric Research</i> , 2004, 55, 1050-1056.	2.3	8
12	The Human Term Placenta as a Source of Transplantable Hematopoietic Stem Cells. , 2014, , 171-181.		2
13	Potential of Membranes Surrounding the Fetus as Immunoprotective Cell-Carriers for Allogeneic Transplantations. <i>Transplantation Direct</i> , 2019, 5, e460.	1.6	2
