

Shengnan Xu

List of Publications by Citations

Source: <https://exaly.com/author-pdf/8844516/shengnan-xu-publications-by-citations.pdf>

Version: 2024-04-25

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
21	Influence of pyrolysis temperature on production of digested sludge biochar and its application for ammonium removal from municipal wastewater. <i>Journal of Cleaner Production</i> , 2019 , 209, 927-936	10.3	117
20	Biochar-Facilitated Microbial Reduction of Hematite. <i>Environmental Science & Technology</i> , 2016 , 50, 2389-95	10.3	110
19	Impact of hydraulic retention time on organic and nutrient removal in a membrane coupled sequencing batch reactor. <i>Water Research</i> , 2014 , 55, 12-20	12.5	49
18	Fate and toxicity of melamine in activated sludge treatment systems after a long-term sludge adaptation. <i>Water Research</i> , 2013 , 47, 2307-14	12.5	29
17	Impact of zero valent iron on blackwater anaerobic digestion. <i>Bioresource Technology</i> , 2019 , 285, 121351-11	11.1	25
16	Enhancing blackwater methane production by enriching hydrogenotrophic methanogens through hydrogen supplementation. <i>Bioresource Technology</i> , 2019 , 278, 481-485	11	25
15	Improving the energy efficiency of a pilot-scale UASB-digester for low temperature domestic wastewater treatment. <i>Biochemical Engineering Journal</i> , 2018 , 135, 71-78	4.2	21
14	Promoting waste activated sludge reduction by linear alkylbenzene sulfonates: Surfactant dose control extracellular polymeric substances solubilization and microbial community succession. <i>Journal of Hazardous Materials</i> , 2019 , 374, 74-82	12.8	18
13	The role of magnetic MOFs nanoparticles in enhanced iron coagulation of aquatic dissolved organic matter. <i>Chemosphere</i> , 2020 , 247, 125921	8.4	17
12	Anammox reactor optimization for the treatment of ammonium rich digestate lagoon supernatant - Step feeding mitigates nitrite inhibition. <i>International Biodeterioration and Biodegradation</i> , 2019 , 143, 104733	4.8	10
11	The importance of integrated fixed film activated sludge reactor and intermittent aeration in nitrification-anammox systems: Understanding reactor optimization for lagoon supernatant treatment. <i>International Biodeterioration and Biodegradation</i> , 2020 , 149, 104938	4.8	7
10	Kinetics of Nutrient Removal by Nano Zero-Valent Iron under Different Biochemical Environments. <i>Water Environment Research</i> , 2015 , 87, 483-90	2.8	6
9	Importance of controlling phosphate concentration in nitrification-anammox reactor operation. <i>Environmental Science: Water Research and Technology</i> , 2019 , 5, 1234-1243	4.2	5
8	Effect of Flow Rate Increase on the Performance of a Pilot-Scale Biological Nutrient Removal Reactor. <i>Journal of Environmental Engineering, ASCE</i> , 2018 , 144, 04018022	2	5
7	Biodegradation and toxicity of melamine at high activated sludge concentrations in a membrane bioreactor. <i>Water Science and Technology</i> , 2018 , 77, 979-987	2.2	5
6	Evaluation of anaerobic/anoxic/oxic (A2/O) and reverse A2/O processes in biological nutrient removal. <i>Water Environment Research</i> , 2014 , 86, 2186-93	2.8	5
5	Emerging investigator series: dual role of organic matter in the anaerobic degradation of triclosan. <i>Environmental Sciences: Processes and Impacts</i> , 2017 , 19, 499-506	4.3	4

4	Improving nitrogen removal in an IFAS nitrification-anammox reactor treating lagoon supernatant by manipulating biocarrier filling ratio and hydraulic retention time. <i>Biochemical Engineering Journal</i> , 2019 , 152, 107365	4.2	4
3	Filamentous sludge bulking control by nano zero-valent iron in activated sludge treatment systems. <i>Environmental Sciences: Processes and Impacts</i> , 2014 , 16, 2721-8	4.3	4
2	Cocoamidopropyl Betaine Dosage Dependence of Short-Time Aerobic Digestion for Waste-Activated Sludge Reduction. <i>ACS Sustainable Chemistry and Engineering</i> , 2019 , 7, 877-884	8.3	4
1	Long-term continuous partial nitrification-anammox reactor aeration optimization at different nitrogen loading rates for the treatment of ammonium rich digestate lagoon supernatant. <i>Process Biochemistry</i> , 2020 , 99, 139-146	4.8	2
