#	ARTICLE	IF	CITATIONS
1	Allergen-specific T cells and clinical features of food allergy: Lessons from CoFAR immunotherapy cohorts. <i>Journal of Allergy and Clinical Immunology</i> , 2022, 149, 1373-1382.e12.	1.5	30
2	Efficacy and safety of oral immunotherapy in children aged 1–3 years with peanut allergy (the Immune Tj ETQq0 0 0 rgBT /Overlock 1 359-371).	6.3	139
3	Updating the CoFAR Grading Scale for Systemic Allergic Reactions in Food Allergy. <i>Journal of Allergy and Clinical Immunology</i> , 2022, 149, 2166-2170.e1.	1.5	30
4	Epicutaneous immunotherapy for treatment of peanut allergy: Follow-up from the Consortium for Food Allergy Research. <i>Journal of Allergy and Clinical Immunology</i> , 2021, 147, 992-1003.e5.	1.5	34
5	A 5-year summary of real-life dietary egg consumption after completion of a 4-year egg powder oral immunotherapy (eOIT) protocol. <i>Journal of Allergy and Clinical Immunology</i> , 2020, 145, 1292-1295.e1.	1.5	12
6	Induction of sustained unresponsiveness after egg oral immunotherapy compared to baked egg therapy in children with egg allergy. <i>Journal of Allergy and Clinical Immunology</i> , 2020, 146, 851-862.e10.	1.5	53
7	Long-term, open-label extension study of the efficacy and safety of epicutaneous immunotherapy for peanut allergy in children: PEOPLE 3-year results. <i>Journal of Allergy and Clinical Immunology</i> , 2020, 146, 863-874.	1.5	63
8	Impact of food allergy on food insecurity and health literacy in a tertiary care pediatric allergy population. <i>Pediatric Allergy and Immunology</i> , 2019, 30, 363-369.	1.1	26
9	Clinical factors associated with peanut allergy in a high-risk infant cohort. <i>Allergy: European Journal of Allergy and Clinical Immunology</i> , 2019, 74, 2199-2211.	2.7	18
10	Development and Application of a Functional Human Esophageal Mucosa Explant Platform to Eosinophilic Esophagitis. <i>Scientific Reports</i> , 2019, 9, 6206.	1.6	5
11	Effect of Epicutaneous Immunotherapy vs Placebo on Reaction to Peanut Protein Ingestion Among Children With Peanut Allergy. <i>JAMA - Journal of the American Medical Association</i> , 2019, 321, 946.	3.8	206
12	The Consortium for Food Allergy Research (CoFAR): The first generation. <i>Journal of Allergy and Clinical Immunology</i> , 2019, 143, 486-493.	1.5	18
13	Acetaminophen is both bronchodilatory and bronchoprotective in human precision cut lung slice airways. <i>Xenobiotica</i> , 2019, 49, 1106-1115.	0.5	3
14	Effects of rhinovirus 39 infection on airway hyperresponsiveness to carbachol in human airways precision cut lung slices. <i>Journal of Allergy and Clinical Immunology</i> , 2018, 141, 1887-1890.e1.	1.5	22
15	Single-cell profiling of peanut-responsive T cells in patients with peanut allergy reveals heterogeneous effector TH2 subsets. <i>Journal of Allergy and Clinical Immunology</i> , 2018, 141, 2107-2120.	1.5	88
16	Delivery of high-quality pediatric spirometry in rural communities: A novel use for telemedicine. <i>Journal of Allergy and Clinical Immunology: in Practice</i> , 2018, 6, 1042-1044.	2.0	12
17	Advances in the approach to the patient with food allergy. <i>Journal of Allergy and Clinical Immunology</i> , 2018, 141, 2002-2014.	1.5	13
18	Efficacy and Safety of AR101 in Oral Immunotherapy for Peanut Allergy: Results of ARCO01, a Randomized, Double-Blind, Placebo-Controlled Phase 2 Clinical Trial. <i>Journal of Allergy and Clinical Immunology: in Practice</i> , 2018, 6, 476-485.e3.	2.0	153

#	ARTICLE	IF	CITATIONS
19	AR101 Oral Immunotherapy for Peanut Allergy. <i>New England Journal of Medicine</i> , 2018, 379, 1991-2001.	13.9	518
20	Successful desensitization in a pediatric patient with acetazolamide allergy. <i>Annals of Allergy, Asthma and Immunology</i> , 2018, 121, 508-509.	0.5	1
21	Addendum guidelines for the prevention of peanut allergy in the United States: Report of the National Institute of Allergy and Infectious Diseases's sponsored expert panel. <i>Journal of Allergy and Clinical Immunology</i> , 2017, 139, 29-44.	1.5	374
22	Addendum Guidelines for the Prevention of Peanut Allergy in the United States: Report of the National Institute of Allergy and Infectious Diseases's Sponsored Expert Panel. <i>Journal of Pediatric Nursing</i> , 2017, 32, 91-98.	0.7	14
23	Addendum Guidelines for the Prevention of Peanut Allergy in the United States: Report of the National Institute of Allergy and Infectious Diseases's Sponsored Expert Panel. <i>Pediatric Dermatology</i> , 2017, 34, e1-e21.	0.5	20
24	Addendum guidelines for the prevention of peanut allergy in the United States. <i>Pediatric Dermatology</i> , 2017, 34, 5-12.	0.5	17
25	Impact of granulocyte contamination on PBMC integrity of shipped blood samples: Implications for multi-center studies monitoring regulatory T cells. <i>Journal of Immunological Methods</i> , 2017, 449, 23-27.	0.6	8
26	Addendum guidelines for the prevention of peanut allergy in the United States: Report of the National Institute of Allergy and Infectious Diseases's sponsored expert panel. <i>Annals of Allergy, Asthma and Immunology</i> , 2017, 118, 166-173.e7.	0.5	59
27	Food Allergy. <i>New England Journal of Medicine</i> , 2017, 377, 1168-1176.	13.9	69
28	Food Allergy. <i>New England Journal of Medicine</i> , 2017, 377, 2294-2295.	13.9	7
29	Epicutaneous immunotherapy for the treatment of peanut allergy in children and young adults. <i>Journal of Allergy and Clinical Immunology</i> , 2017, 139, 1242-1252.e9.	1.5	265
30	Novel baseline predictors of adverse events during oral immunotherapy in children with peanut allergy. <i>Journal of Allergy and Clinical Immunology</i> , 2017, 139, 882-888.e5.	1.5	100
31	Transcriptional Profiling of Egg Allergy and Relationship to Disease Phenotype. <i>PLoS ONE</i> , 2016, 11, e0163831.	1.1	30
32	Long-term treatment with egg oral immunotherapy enhances sustained unresponsiveness that persists after cessation of therapy. <i>Journal of Allergy and Clinical Immunology</i> , 2016, 137, 1117-1127.e10.	1.5	149
33	Early-life gut microbiome composition and milk allergy resolution. <i>Journal of Allergy and Clinical Immunology</i> , 2016, 138, 1122-1130.	1.5	307
34	Safety of epicutaneous immunotherapy for the treatment of peanut allergy: A phase 1 study using the Viaskin patch. <i>Journal of Allergy and Clinical Immunology</i> , 2016, 137, 1258-1261.e10.	1.5	91
35	Current and Emerging Therapies for IgE-Mediated Food Allergy. <i>Current Allergy and Asthma Reports</i> , 2016, 16, 28.	2.4	11
36	Impact of Allergic Reactions on Food-Specific IgE Concentrations and Skin Test Results. <i>Journal of Allergy and Clinical Immunology: in Practice</i> , 2016, 4, 239-245.e4.	2.0	20

#	ARTICLE	IF	CITATIONS
37	Egg-Specific IgA and IgA2 Are Associated with Sustained Unresponsiveness to Egg Following Oral Immunotherapy. <i>Journal of Allergy and Clinical Immunology</i> , 2015, 135, AB38.	1.5	1
38	Diagnosis, Management, and Investigational Therapies for Food Allergies. <i>Gastroenterology</i> , 2015, 148, 1132-1142.	0.6	31
39	Sublingual immunotherapy for peanut allergy: Long-term follow-up of a randomized multicenter trial. <i>Journal of Allergy and Clinical Immunology</i> , 2015, 135, 1240-1248.e3.	1.5	160
40	Correlations between basophil activation, allergen-specific IgE with outcome and severity of oral food challenges. <i>Annals of Allergy, Asthma and Immunology</i> , 2015, 114, 319-326.	0.5	74
41	State of the art on food allergen immunotherapy: Oral, sublingual, and epicutaneous. <i>Journal of Allergy and Clinical Immunology</i> , 2014, 133, 318-323.	1.5	172
42	Sustained unresponsiveness to peanut in subjects who have completed peanut oral immunotherapy. <i>Journal of Allergy and Clinical Immunology</i> , 2014, 133, 468-475.e6.	1.5	375
43	Immunomodulatory Effect of Active Treatment Options in Food Allergy. <i>Current Treatment Options in Allergy</i> , 2014, 1, 133-144.	0.9	1
44	The natural history of egg allergy in an observational cohort. <i>Journal of Allergy and Clinical Immunology</i> , 2014, 133, 492-499.e8.	1.5	229
45	Pneumococcal meningitis in a patient with IL-1 receptor-associated kinase-4 deficiency: A case of failed prophylaxis. <i>Journal of Allergy and Clinical Immunology: in Practice</i> , 2013, 1, 700-703.	2.0	1
46	Sublingual versus oral immunotherapy for peanut-allergic children: A retrospective comparison. <i>Journal of Allergy and Clinical Immunology</i> , 2013, 132, 476-478.e2.	1.5	86
47	Peanut oral immunotherapy modifies IgE and IgG4 responses to major peanut allergens. <i>Journal of Allergy and Clinical Immunology</i> , 2013, 131, 128-134.e3.	1.5	171
48	Sublingual immunotherapy for peanut allergy: A randomized, double-blind, placebo-controlled multicenter trial. <i>Journal of Allergy and Clinical Immunology</i> , 2013, 131, 119-127.e7.	1.5	268
49	Allergic Reactions to Foods in Preschool-Aged Children in a Prospective Observational Food Allergy Study. <i>Pediatrics</i> , 2012, 130, e25-e32.	1.0	223
50	Oral Immunotherapy for Treatment of Egg Allergy in Children. <i>New England Journal of Medicine</i> , 2012, 367, 233-243.	13.9	606
51	Effects of the β_2 -agonist, isoprenaline, on the down-regulation, functional responsiveness and trafficking of β_2 -adrenergic receptors with N-terminal polymorphisms. <i>Cell Biology International</i> , 2012, 36, 1171-1183.	1.4	9
52	A randomized controlled study of peanut oral immunotherapy: Clinical desensitization and modulation of the allergic response. <i>Journal of Allergy and Clinical Immunology</i> , 2011, 127, 654-660.	1.5	488
53	Mechanisms of immune tolerance relevant to food allergy. <i>Journal of Allergy and Clinical Immunology</i> , 2011, 127, 576-584.	1.5	151
54	A phase II, randomized, double-blind, parallel-group, placebo-controlled oral food challenge trial of Xolair (omalizumab) in peanut allergy. <i>Journal of Allergy and Clinical Immunology</i> , 2011, 127, 1309-1310.e1.	1.5	234

#	ARTICLE	IF	CITATIONS
55	Peanut oral immunotherapy is not ready for clinical use. <i>Journal of Allergy and Clinical Immunology</i> , 2010, 126, 31-32.	1.5	100
56	Guidelines for the Diagnosis and Management of Food Allergy in the United States: Report of the NIAID-Sponsored Expert Panel. <i>Journal of Allergy and Clinical Immunology</i> , 2010, 126, S1-S58.	1.5	1,149
57	Guidelines for the Diagnosis and Management of Food Allergy in the United States: Summary of the NIAID-Sponsored Expert Panel Report. <i>Journal of Allergy and Clinical Immunology</i> , 2010, 126, 1105-1118.	1.5	1,614
58	Individualized IgE-based dosing of egg oral immunotherapy and the development of tolerance. <i>Annals of Allergy, Asthma and Immunology</i> , 2010, 105, 444-450.	0.5	137
59	Oral immunotherapy for food allergy. <i>Current Allergy and Asthma Reports</i> , 2009, 9, 186-193.	2.4	44
60	Safety of a peanut oral immunotherapy protocol in children with peanut allergy. <i>Journal of Allergy and Clinical Immunology</i> , 2009, 124, 286-291.e6.	1.5	252
61	Clinical efficacy and immune regulation with peanut oral immunotherapy. <i>Journal of Allergy and Clinical Immunology</i> , 2009, 124, 292-300.e97.	1.5	610
62	Adverse reactions during peanut oral immunotherapy home dosing. <i>Journal of Allergy and Clinical Immunology</i> , 2009, 124, 1351-1352.	1.5	179
63	Characterization of a panel of six β_2 -adrenergic receptor antibodies by indirect immunofluorescence microscopy. <i>Respiratory Research</i> , 2008, 9, 32.	1.4	5
64	Egg oral immunotherapy in nonanaphylactic children with egg allergy. <i>Journal of Allergy and Clinical Immunology</i> , 2007, 119, 199-205.	1.5	357
65	The β_2 -agonist isoproterenol attenuates EGF-stimulated wound closure in human airway epithelial cells. <i>American Journal of Physiology - Lung Cellular and Molecular Physiology</i> , 2006, 290, L485-L491.	1.3	11
66	Occupational asthma symptoms and respiratory function among aerial pesticide applicators. <i>American Journal of Industrial Medicine</i> , 2003, 43, 407-417.	1.0	16
67	Enhanced beta2-adrenergic receptor (beta2AR) signaling by adeno-associated viral (AAV)-mediated gene transfer. <i>BMC Pharmacology</i> , 2003, 3, 15.	0.4	10
68	EGF receptor downregulation depends on a trafficking motif in the distal tyrosine kinase domain. <i>American Journal of Physiology - Cell Physiology</i> , 2002, 282, C420-C433.	2.1	32
69	Molecular Cloning and Functional Characterization of a Vasotocin Receptor Subtype That Is Expressed in the Shell Gland and Brain of the Domestic Chicken ¹ . <i>Biology of Reproduction</i> , 2000, 62, 8-15.	1.2	56
70	The role of food allergy and other allergic disease in atopic dermatitis. <i>Clinical Reviews in Allergy and Immunology</i> , 1999, 17, 293-321.	2.9	4
71	Diagnosis of post-bone marrow transplant pulmonary lymphoproliferative disorder by bronchoalveolar lavage. , 1998, 25, 67-70.		4
72	Clinical Manifestations of Food Allergic Disease. , 0, , 1-17.		3
