

Laurens M Boucher

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/8855516/laurens-m-boucher-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
79	The Roles of Climate Risk Dynamics and Adaptation Limits in Adaptation Assessment. <i>Springer Climate</i> , 2022 , 209-216	0.3	
78	Data Analysis and Exploration with Computational Approaches. <i>SpringerBriefs in Earth System Sciences</i> , 2022 , 29-53	1	
77	Weather extremes over Europe under 1.5 and 2.0 °C global warming from HAPPI regional climate ensemble simulations. <i>Earth System Dynamics</i> , 2021 , 12, 457-468	4.8	3
76	The potential of nature-based flood defences to leverage public investment in coastal adaptation: Cases from the Netherlands, Indonesia and Georgia. <i>Ecological Economics</i> , 2021 , 179, 106828	5.6	2
75	Improved Transferability of Data-Driven Damage Models Through Sample Selection Bias Correction. <i>Risk Analysis</i> , 2021 , 41, 37-55	3.9	5
74	Future Changes in Wave Conditions at the German Baltic Sea Coast Based on a Hybrid Approach Using an Ensemble of Regional Climate Change Projections. <i>Water (Switzerland)</i> , 2021 , 13, 167	3	2
73	Loss and Damage and limits to adaptation: recent IPCC insights and implications for climate science and policy. <i>Sustainability Science</i> , 2020 , 15, 1245-1251	6.4	31
72	Approaches to analyse and model changes in impacts: reply to discussions of How to improve attribution of changes in drought and flood impacts. <i>Hydrological Sciences Journal</i> , 2020 , 65, 491-494	3.5	
71	Leveraging public adaptation finance through urban land reclamation: cases from Germany, the Netherlands and the Maldives. <i>Climatic Change</i> , 2020 , 160, 671-689	4.5	9
70	Investments under non-stationarity: economic evaluation of adaptation pathways. <i>Climatic Change</i> , 2020 , 161, 451-463	4.5	25
69	How to improve attribution of changes in drought and flood impacts. <i>Hydrological Sciences Journal</i> , 2019 , 64, 1-18	3.5	39
68	Evaluating adaptation measures for reducing flood risk: A case study in the city of Colombo, Sri Lanka. <i>International Journal of Disaster Risk Reduction</i> , 2019 , 37, 101162	4.5	18
67	A Temperature-Scaling Approach for Projecting Changes in Short Duration Rainfall Extremes from GCM Data. <i>Water (Switzerland)</i> , 2019 , 11, 313	3	10
66	Integrated Disaster Risk Management and Adaptation. <i>Climate Risk Management, Policy and Governance</i> , 2019 , 287-315	2.7	11
65	Observed and Projected Impacts from Extreme Weather Events: Implications for Loss and Damage. <i>Climate Risk Management, Policy and Governance</i> , 2019 , 63-82	2.7	30
64	Insurance as a Response to Loss and Damage?. <i>Climate Risk Management, Policy and Governance</i> , 2019 , 483-512	2.7	10
63	Validation of flood risk models: Current practice and possible improvements. <i>International Journal of Disaster Risk Reduction</i> , 2019 , 33, 441-448	4.5	36

62	Science for Loss and Damage. Findings and Propositions. <i>Climate Risk Management, Policy and Governance</i> , 2019 , 3-37	2.7	12
61	Global mortality from storm surges is decreasing. <i>Environmental Research Letters</i> , 2018 , 13, 014008	6.2	25
60	Development of damage functions for flood risk assessment in the city of Colombo (Sri Lanka). <i>Procedia Engineering</i> , 2018 , 212, 332-339		10
59	Regional and Temporal Transferability of Multivariable Flood Damage Models. <i>Water Resources Research</i> , 2018 , 54, 3688-3703	5.4	33
58	Upscaling the Impacts of Climate Change in Different Sectors and Adaptation Strategies 2018 , 173-243		1
57	Understanding epistemic uncertainty in large-scale coastal flood risk assessment for present and future climates. <i>Natural Hazards and Earth System Sciences</i> , 2018 , 18, 2127-2142	3.9	26
56	Multi-variable flood damage modelling with limited data using supervised learning approaches. <i>Natural Hazards and Earth System Sciences</i> , 2017 , 17, 1683-1696	3.9	40
55	Data-mining for multi-variable flood damage modelling with limited data 2017 ,		1
54	Adaptation to flood risk: Results of international paired flood event studies. <i>Earth's Future</i> , 2017 , 5, 953-965	9.5	111
53	Weather Indicators for Insured Hailstorm Damage to Motor Vehicles and Potential Climate Change Impacts. <i>Geneva Papers on Risk and Insurance: Issues and Practice</i> , 2016 , 41, 512-527	1.2	2
52	FLOPROS: an evolving global database of flood protection standards. <i>Natural Hazards and Earth System Sciences</i> , 2016 , 16, 1049-1061	3.9	125
51	Uncertainty in flood damage estimates and its potential effect on investment decisions. <i>Natural Hazards and Earth System Sciences</i> , 2016 , 16, 1-14	3.9	68
50	Improving predictions and management of hydrological extremes through climate services. <i>Climate Services</i> , 2016 , 1, 6-11	3.8	33
49	Understanding trends and projections of disaster losses and climate change: is vulnerability the missing link?. <i>Climatic Change</i> , 2015 , 133, 23-35	4.5	116
48	Mainstreaming climate change in regional development policy in Europe: five insights from the 2007-2013 programming period. <i>Regional Environmental Change</i> , 2015 , 15, 973-985	4.3	6
47	Preface: Current advances in analysis, modelling and mitigation of the costs of natural hazards. <i>Natural Hazards and Earth System Sciences</i> , 2015 , 15, 1157-1162	3.9	1
46	Understanding trends and projections of disaster losses and climate change: is vulnerability the missing link? 2015 , 133, 23		1
45	Reply to 'Statistics of flood risk'. <i>Nature Climate Change</i> , 2014 , 4, 844-845	21.4	2

44	Uncertainty and sensitivity of flood risk calculations for a dike ring in the south of the Netherlands. <i>Science of the Total Environment</i> , 2014 , 473-474, 224-34	10.2	30
43	Increasing stress on disaster-risk finance due to large floods. <i>Nature Climate Change</i> , 2014 , 4, 264-268	21.4	320
42	Assessing the Costs of Natural Hazards: State of the Art and the Way Forward 2014 , 253-290		1
41	Comment on Garg et al., . Up-scaling potential impacts on water flows from agricultural water interventions: opportunities and trade-offs in the Osman Sagar catchment, Musi sub-basin, India. <i>Hydrological Processes</i> 27: 3905-3921. <i>Hydrological Processes</i> , 2014 , 28, 3350-3351	3.3	
40	Floods and climate: emerging perspectives for flood risk assessment and management. <i>Natural Hazards and Earth System Sciences</i> , 2014 , 14, 1921-1942	3.9	184
39	The Costing of Measures for Natural Hazard Mitigation in Europe. <i>Natural Hazards Review</i> , 2014 , 15, 0401-0410	10.2	22
38	Flood risk and climate change: global and regional perspectives. <i>Hydrological Sciences Journal</i> , 2014 , 59, 1-28	3.5	698
37	Effect of spatial adaptation measures on flood risk: study of coastal floods in Belgium. <i>Regional Environmental Change</i> , 2014 , 14, 413-425	4.3	27
36	EURO-CORDEX: new high-resolution climate change projections for European impact research. <i>Regional Environmental Change</i> , 2014 , 14, 563-578	4.3	1286
35	Assessing the influence of climate model uncertainty on EU-wide climate change impact indicators. <i>Climatic Change</i> , 2013 , 120, 211-227	4.5	14
34	Projections of future extreme weather losses under changes in climate and exposure. <i>Risk Analysis</i> , 2013 , 33, 915-30	3.9	108
33	A multi-hazard regional level impact assessment for Europe combining indicators of climatic and non-climatic change. <i>Global Environmental Change</i> , 2013 , 23, 522-536	10.1	90
32	Review article: Assessing the costs of natural hazards: State of the art and knowledge gaps. <i>Natural Hazards and Earth System Sciences</i> , 2013 , 13, 1351-1373	3.9	285
31	The downstream externalities of harvesting rainwater in semi-arid watersheds: An Indian case study. <i>Agricultural Water Management</i> , 2011 , 98, 1162-1170	5.9	46
30	How reliable are projections of future flood damage?. <i>Natural Hazards and Earth System Sciences</i> , 2011 , 11, 3293-3306	3.9	65
29	Have Disaster Losses Increased Due to Anthropogenic Climate Change?. <i>Bulletin of the American Meteorological Society</i> , 2011 , 92, 39-46	6.1	339
28	HOW SENSITIVE ARE US HURRICANE DAMAGES TO CLIMATE? COMMENT ON A PAPER BY W. D. NORDHAUS. <i>Climate Change Economics</i> , 2011 , 02, 1-7	0.9	30
27	Sensitivity of river discharge to ENSO. <i>Geophysical Research Letters</i> , 2010 , 37, n/a-n/a	4.9	102

26	Changes in future flood risk due to climate and development in a Dutch polder area. <i>Global Environmental Change</i> , 2010 , 20, 463-471	10.1	138
25	Climate change and hailstorm damage: Empirical evidence and implications for agriculture and insurance. <i>Resources and Energy Economics</i> , 2010 , 32, 341-362	3.2	56
24	Climate change and increased risk for the insurance sector: a global perspective and an assessment for the Netherlands. <i>Natural Hazards</i> , 2010 , 52, 577-598	3	80
23	Imagining the unimaginable: synthesis of essays on abrupt and extreme climate change. <i>Current Opinion in Environmental Sustainability</i> , 2010 , 2, 347-355	7.2	3
22	Less ice on the Baltic reduces the extent of hypoxic bottom waters and sedimentary phosphorus release. <i>Estuarine, Coastal and Shelf Science</i> , 2009 , 82, 689-691	2.9	5
21	Future risk of flooding: an analysis of changes in potential loss of life in South Holland (The Netherlands). <i>Environmental Science and Policy</i> , 2009 , 12, 157-169	6.2	47
20	Inundation scenarios for flood damage evaluation in polder areas. <i>Natural Hazards and Earth System Sciences</i> , 2009 , 9, 1995-2007	3.9	38
19	Regional sensitivities of mean and peak river discharge to climate variability in Europe. <i>Journal of Geophysical Research</i> , 2008 , 113,		39
18	Neo-Atlantis: The Netherlands under a 5-m sea level rise. <i>Climatic Change</i> , 2008 , 91, 103-122	4.5	25
17	Estimates of spatial variation in evaporation using satellite-derived surface temperature and a water balance model. <i>Hydrological Processes</i> , 2008 , 22, 670-682	3.3	23
16	Financial services and disaster risk finance: Examples from the community level. <i>Environmental Hazards</i> , 2007 , 7, 32-39	4.2	10
15	Disaster management. Confronting disaster losses. <i>Science</i> , 2007 , 318, 753	33.3	117
14	On the Flood Risk in the Netherlands 2007 , 469-484		9
13	Sensitivity of global river discharges under Holocene and future climate conditions. <i>Geophysical Research Letters</i> , 2006 , 33,	4.9	54
12	Winter atmospheric circulation and river discharge in northwest Europe. <i>Geophysical Research Letters</i> , 2006 , 33,	4.9	31
11	Detecting the long-term impacts from climate variability and increasing water consumption on runoff in the Krishna river basin (India). <i>Hydrology and Earth System Sciences</i> , 2006 , 10, 703-713	5.5	32
10	Financing climate change adaptation. <i>Disasters</i> , 2006 , 30, 49-63	2.8	64
9	Experts address the question: How can we maximize the impact of adaptation measures to support sustainable development?. <i>Natural Resources Forum</i> , 2006 , 30, 328-330	2.2	3

8	Group report: Reflections on the application of integrated assessment 2005 , 379-387		
7	ELOISE research and the implementation of EU policy in the coastal zone 2005 , 1-19		
6	The Role of Financial Services in Climate Adaptation in Developing Countries. <i>Quarterly Journal of Economic Research</i> , 2005 , 74, 196-207	0.4	12
5	Ocean circulation and iceberg discharge in the glacial North Atlantic: Inferences from unmixing of sediment size distributions. <i>Geology</i> , 2002 , 30, 555	5	100
4	Late Quaternary activity of the Feldbiss Fault Zone, Roer Valley Rift System, the Netherlands, based on displaced fluvial terrace fragments. <i>Tectonophysics</i> , 2002 , 352, 295-315	3.1	36
3	Changing climate and increasing costs Implications for liability and insurance. <i>Advances in Global Change Research</i> , 2002 , 429-444	1.2	5
2	Changes in Impacts of Climate Extremes: Human Systems and Ecosystems 231-290		93
1	Review Article: Validation of flood risk models: current practice and innovations		5
