#	ARTICLE	IF	CITATIONS
1	Detection of <i>Pintomyia fischeri</i> (Diptera: Psychodidae) With <i>Leishmania infantum</i> (Trypanosomatida: Trypanosomatidae) Promastigotes in a Focus of Visceral Leishmaniasis in Brazil. <i>Journal of Medical Entomology</i> , 2021, 58, 830-836.	1.8	15
2	First report of cutaneous mycetoma by <i>Paecilomyces variotii</i> and the successful treatment with combined itraconazole and terbinafine along with resection surgeries. <i>Australasian Journal of Dermatology</i> , 2021, 62, e397-e399.	0.7	3
3	Immunohistochemical and Molecular Diagnosis of Mucocutaneous and Mucosal Leishmaniasis. <i>International Journal of Surgical Pathology</i> , 2020, 28, 138-145.	0.8	7
4	Chromosomal segments may explain the antibody response cooperation for canine leishmaniasis pathogenesis. <i>Veterinary Parasitology</i> , 2020, 288, 109276.	1.8	7
5	Clinical and Immunological Features of Human <i>Leishmania (L.) infantum</i> -Infection, Novel Insights Honduras, Central America. <i>Pathogens</i> , 2020, 9, 554.	2.8	8
6	Reactivity of purified and axenic amastigotes as a source of antigens to be used in serodiagnosis of canine visceral leishmaniasis. <i>Parasitology International</i> , 2020, 79, 102177.	1.3	2
7	New record of preclinical diagnosis of American visceral leishmaniasis in Amazonian Brazil encourages optimizing disease control. <i>Parasite Epidemiology and Control</i> , 2020, 10, e00154.	1.8	4
8	Histopathological features of skin lesions in patients affected by non-ulcerated or atypical cutaneous leishmaniasis in Honduras, Central America. <i>International Journal of Experimental Pathology</i> , 2018, 99, 249-257.	1.3	16
9	Canine antibody response to <i>Lutzomyia longipalpis</i> saliva in endemic area of visceral leishmaniasis.. <i>Revista Da Sociedade Brasileira De Medicina Tropical</i> , 2016, 49, 361-364.	0.9	4
10	Differential Recruitment of Dendritic Cells Subsets to Lymph Nodes Correlates with a Protective or Permissive T-Cell Response during <i>Leishmania (Viannia) braziliensis</i> or <i>Leishmania (Leishmania) amazonensis</i> Infection. <i>Mediators of Inflammation</i> , 2016, 2016, 1-12.	3.0	17
11	Value of the oral swab for the molecular diagnosis of dogs in different stages of infection with <i>Leishmania infantum</i> . <i>Veterinary Parasitology</i> , 2016, 225, 108-113.	1.8	26
12	Genome-Wide Association Study of Cell-Mediated Response in Dogs Naturally Infected by <i>Leishmania infantum</i> . <i>Infection and Immunity</i> , 2016, 84, 3629-3637.	2.2	11
13	Serological and infection statuses of dogs from a visceral leishmaniasis-endemic area. <i>Revista De Saude Publica</i> , 2014, 48, 563-571.	1.7	18
14	Expression of inducible nitric oxide synthase in macrophages inversely correlates with parasitism of lymphoid tissues in dogs with visceral leishmaniasis. <i>Acta Veterinaria Scandinavica</i> , 2014, 56, 57.	1.6	12
15	Comparative evaluation of the DPP [®] CVL rapid test for canine serodiagnosis in area of visceral leishmaniasis. <i>Veterinary Parasitology</i> , 2014, 205, 444-450.	1.8	67
16	Asymptomatic dogs are highly competent to transmit <i>Leishmania (Leishmania) infantum</i> chagasi to the natural vector. <i>Veterinary Parasitology</i> , 2013, 196, 296-300.	1.8	128
17	Effects of Salivary Gland Homogenate from Wild-Caught and Laboratory-Reared <i>Lutzomyia longipalpis</i> on the Evolution and Immunomodulation of <i>Leishmania (Leishmania) amazonensis</i> Infection. <i>Scandinavian Journal of Immunology</i> , 2009, 70, 389-395.	2.7	22
18	Antifungal Drug Susceptibility Profile of <i>Pichia anomala</i> Isolates from Patients Presenting with Nosocomial Fungemia. <i>Antimicrobial Agents and Chemotherapy</i> , 2007, 51, 1573-1576.	3.2	31

#	ARTICLE	IF	CITATIONS
19	Molecular and Standard Approaches to the Diagnosis of Mycobacterial Granulomatous Lymphadenitis in Paraffin-Embedded Tissue. <i>Laboratory Investigation</i> , 2002, 82, 1095-1097.	3.7	2
20	Insulin-like Growth Factor (IGF)-I affects parasite growth and host cell migration in experimental cutaneous leishmaniasis. <i>International Journal of Experimental Pathology</i> , 2001, 81, 249-255.	1.3	21
21	Detection of specific antibody isotypes and subtypes before and after treatment of American visceral leishmaniasis. <i>Journal of Clinical Laboratory Analysis</i> , 2000, 14, 5-12.	2.1	34
22	An Evaluation of clinical, serologic, anatomopathologic and immunohistochemical findings for fifteen patients with mucosal leishmaniasis before and after treatment. <i>Revista Do Instituto De Medicina Tropical De Sao Paulo</i> , 1998, 40, 23-30.	1.1	21
23	Interstitial pneumonitis in human visceral leishmaniasis. <i>Transactions of the Royal Society of Tropical Medicine and Hygiene</i> , 1989, 83, 73-76.	1.8	48
24	Cutaneous leishmaniasis of the new world: Diagnostic immunopathology and antigen pathways in skin and mucosa. <i>Acta Tropica</i> , 1989, 46, 121-130.	2.0	37
