|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Survival of Patients with Metastatic Prostate Cancer After Disease Progression on an Androgen Receptor Axis-Targeted Therapy Given in the Metastatic Castration-Sensitive Versus Metastatic Castration-Resistant Prostate Cancer Setting. <i>European Urology Focus</i> , 2023, 9, 106-109.                 | 3.1 | 3         |
| 2  | Recent Advances in the Management of Metastatic Prostate Cancer. <i>JCO Oncology Practice</i> , 2022, 18, 45-55.                                                                                                                                                                                            | 2.9 | 75        |
| 3  | Multi-institutional Analysis of the Clinical and Genomic Characteristics of Black Patients with Metastatic Hormone-Sensitive Prostate Cancer. <i>Oncologist</i> , 2022, 27, 220-227.                                                                                                                        | 3.7 | 5         |
| 4  | Current and emerging role of sacituzumab govitecan in the management of urothelial carcinoma. <i>Expert Review of Anticancer Therapy</i> , 2022, 22, 335-341.                                                                                                                                               | 2.4 | 8         |
| 5  | Development of Novel Regimens Combining Immune Checkpoint Inhibitors and Radiation Therapy in Prostate Cancer. <i>European Urology</i> , 2022, 81, 263-265.                                                                                                                                                 | 1.9 | 0         |
| 6  | Real-world experience with elective discontinuation of PD-1 inhibitors at 1 year in patients with metastatic melanoma. <i>Journal of Clinical Oncology</i> , 2021, 9, e001781.                                                                                                                              |     | 15        |
| 7  | Utilization of systemic therapy for treatment of advanced urothelial carcinoma: Lessons from real world experience. <i>Cancer Treatment and Research Communications</i> , 2021, 27, 100325.                                                                                                                 | 1.7 | 24        |
| 8  | Current management of metastatic castration-sensitive prostate cancer. <i>Cancer Treatment and Research Communications</i> , 2021, 28, 100384.                                                                                                                                                              | 1.7 | 7         |
| 9  | Real-world prevalence of homologous recombination repair gene (BRCA1/2 and ATM) mutations (HRRm) in patients (pts) with advanced prostate cancer (aPC) as detected by comprehensive genomic profiling (CGP) of circulating cell-free DNA (cfDNA).. <i>Journal of Clinical Oncology</i> , 2021, 39, 256-256. | 1.6 | 0         |
| 10 | Differences in the genomic landscape of advanced prostate cancer (aPC) patients (pts) with BRCA1 versus BRCA2 mutations as detected by machine learning analysis of the comprehensive genomic profile (CGP) of cell-free DNA (cfDNA).. <i>Journal of Clinical Oncology</i> , 2021, 39, 162-162.             | 1.6 | 0         |
| 11 | Multi-institutional evaluation of the clinical outcomes and genomic correlates of African Americans with metastatic castration-sensitive prostate cancer (mCSPC).. <i>Journal of Clinical Oncology</i> , 2021, 39, 17-17.                                                                                   | 1.6 | 0         |
| 12 | Phase I with expansion clinical trial of seleno-L-methionine (SLM) in combination with axitinib in patients with relapsed clear cell renal cell carcinoma (ccRCC): Bench to bedside.. <i>Journal of Clinical Oncology</i> , 2021, 39, 322-322.                                                              | 1.6 | 1         |
| 13 | Landscape of circulating tumor DNA (ctDNA) abnormalities in advanced prostate cancer (aPCa): Distinctions in African American (AA) versus Caucasian (Ca) patients.. <i>Journal of Clinical Oncology</i> , 2021, 39, 156-156.                                                                                | 1.6 | 0         |
| 14 | Randomized phase II trial of radium-223 (RA) plus enzalutamide (EZ) versus EZ alone in metastatic castration-refractory prostate cancer (mCRPC): Final efficacy and safety results.. <i>Journal of Clinical Oncology</i> , 2021, 39, 135-135.                                                               | 1.6 | 1         |
| 15 | Association of circulating tumor cells (CTC) with survival outcomes in patients (pts) with metastatic castration-sensitive prostate cancer (mCSPC) in a real-world cohort.. <i>Journal of Clinical Oncology</i> , 2021, 39, 59-59.                                                                          | 1.6 | 0         |
| 16 | Comprehensive genomic profiling of matched primary prostate cancer tissue and cell-free DNA (cfDNA) to assess ontogeny of BRCA1/BRCA2 mutations.. <i>Journal of Clinical Oncology</i> , 2021, 39, 166-166.                                                                                                  | 1.6 | 0         |
| 17 | Combination therapy with avelumab (Ave) and cabozantinib (Cabo) in patients (pts) with newly diagnosed metastatic clear cell renal cell carcinoma (mccRCC).. <i>Journal of Clinical Oncology</i> , 2021, 39, 334-334.                                                                                       | 1.6 | 0         |
| 18 | Comparative Effectiveness of Immune Checkpoint Inhibitors in Patients with Platinum Refractory Advanced Urothelial Carcinoma. <i>Journal of Urology</i> , 2021, 205, 709-717.                                                                                                                               | 0.4 | 7         |

| #  | ARTICLE                                                                                                                                                                                                                                                                                                                                                                                                                   | IF  | CITATIONS |

| 19 | Reply to Salma Kaochar, Nicholas Mitsiades Letter to the Editor re: Umang Swami, Pedro Isaacsson Velho, Roberto Nussenzeig, et al. Association of SPOP Mutations with Outcomes in Men with De Novo Metastatic Castration-sensitive Prostate Cancer. Eur Urol 2020, 78:652-666. Can Mutant SPOP Become an Actionable Biomarker for Precision Oncology Management of Prostate Cancer?. European Urology, 2021, 79, e94-e95. | 1.9 | 0         |
| 20 | Melanoma Brain Metastases in the Era of Targeted Therapy and Checkpoint Inhibitor Therapy. Cancers, 2021, 13, 1489.                                                                                                                                                                                                                                                                                                       | 3.7 | 7         |
| 21 | Immunotherapy and fatigue: what we know and what we don't know. Oncotarget, 2021, 12, 719-720.                                                                                                                                                                                                                                                                                                                            | 1.8 | 3         |
| 22 | Real-world first-line (1L) treatment patterns in patients (pts) with metastatic castration-sensitive prostate cancer (mCSPC) in a U.S. health insurance database.. Journal of Clinical Oncology, 2021, 39, 5072-5072.                                                                                                                                                                                                     | 1.6 | 17        |
| 23 | Recent Advances in the Treatment of Metastatic Prostate Cancer. Advances in Oncology, 2021, 1, 263-272.                                                                                                                                                                                                                                                                                                                   | 0.2 | 1         |
| 24 | Correlation of baseline circulating tumor cells (CTC) and associated genomic profile with survival outcomes in patients (pts) with metastatic castration-sensitive prostate cancer (mCSPC) in a real-world cohort.. Journal of Clinical Oncology, 2021, 39, 5077-5077.                                                                                                                                                    | 1.6 | 0         |
| 25 | Immune Checkpoint Inhibitors in Prostate Cancer. Cancers, 2021, 13, 2187.                                                                                                                                                                                                                                                                                                                                                 | 3.7 | 48        |
| 26 | Differences in the tumor genomic landscape between African Americans (AA) and Caucasians (CA) advanced prostate cancer (aPC) patients (pts) by comprehensive genomic profiling (CGP) of cell-free DNA (cfDNA).. Journal of Clinical Oncology, 2021, 39, 5058-5058.                                                                                                                                                        | 1.6 | 1         |
| 27 | Real-world pan-cancer landscape of frameshift mutations (FSM) and their role in predicting responses to immune checkpoint inhibitors (ICI) in patients (pts) with tumors with low tumor mutational burden (TMB).. Journal of Clinical Oncology, 2021, 39, 2599-2599.                                                                                                                                                      | 1.6 | 0         |
| 28 | Genomic predictors of response to PD-1 axis inhibitors in metastatic urothelial cancer (mUC) patients using machine learning analysis of tissue comprehensive genomic profiling (CGP).. Journal of Clinical Oncology, 2021, 39, 4542-4542.                                                                                                                                                                                | 1.6 | 0         |
| 29 | Cancer immunotherapy: recent advances and challenges. Annals of Translational Medicine, 2021, 9, 1032-1032.                                                                                                                                                                                                                                                                                                               | 1.7 | 2         |
| 30 | Landmark Series on Disparities in Surgical Oncology: Melanoma. Annals of Surgical Oncology, 2021, 28, 6986-6993.                                                                                                                                                                                                                                                                                                          | 1.5 | 4         |
| 31 | The dark side of immunotherapy. Annals of Translational Medicine, 2021, 9, 1041-1041.                                                                                                                                                                                                                                                                                                                                     | 1.7 | 12        |
